As previously announced in a news release issued by the Company on September 4, 2013, this presentation will be available via live webcast. A replay of the presentation will also be available at the Company's website, www.keyenergy.com, under Investor Relations. A copy of the slides to be used in connection with the presentation is attached as Exhibit 99.1, and is incorporated herein by reference.

In addition, the Company provides the following updates:

Pricing for US services generally stable compared to the second quarter of 2013;

US Segment third quarter 2013 revenues expected to be down 2% to 4% from the second quarter as equipment, primarily, vacuum trucks, coiled tubing units and frac stacks, are redeployed due to transitory changes in customers programs during the quarter;

US Segment operating income margins expected to be down 100 to 200 basis points from second quarter levels due to third quarter US Segment revenue decline;

The Company expects to average between 35 and 40 rigs working outside the US during the third quarter and 40 to 45 average rigs working during the fourth quarter as customer and logistical delays have impacted the commencement of projects. The Company anticipates to have redeployed 10 rigs out of the Northern Region of Mexico during the third quarter, which will bring the total number of rigs redeployed from the Northern Region to 15 from the end of the first quarter 2013; and

Based on 35 to 40 rigs average rigs working outside the US, International Segment operating income margins are anticipated to range from a loss of 5% to breakeven.
