*February 2002*

**Portfolio Review**

Taiwan GDP fell by 1.9% during the fourth quarter of 2001, as compared to 4.2% during the third quarter of 2001. This led to a decline in GDP of 1.9% for the year as a whole, which is lower than the original forecast for a decline of 2.7%. On an adjusted quarter to quarter basis, GDP rose by 1.7%. The better-than-expected fourth quarter of 2001, GDP report bodes well for the outlook for growth this year.,

In February, the Taiwan stock market entered into the consolidation stage with a range between 5,500 to 6,000 for the TAIEX. Average total daily turnover, an indication of investor sentiment, dwindled to two-thirds of the level of volume traded in January. Capital flow continues its rotation among sectors. Pulp and paper was the best performing sector, up 4.8% for the month. The technology sector moved in line with the index, down 3.08%.

The Fund's investment strategy continues to focus on cyclical and outsourcing plays. The most encouraging guidance came from UMC this month. The company guided a 20% sequential quarter to quarter growth, indicating a broad-based recovery. Given prospects of an improving business environment, we have increased UMC weighting in the Fund's active portfolio. For outsourcing plays, Accton (networking), Realtek (IC design), Quanta (notebook), Austek (motherboard) and Beng (communication) remains our top holdings.

Taiwan Fund (Since Launch 1986/12/31): 634.72%

**Performance Chart**

**Taiwan's Macro Economics Review**

Liquidity conditions remain ample with M1B continuing an upward trend since April 2001 as a result of the aggressive easing of monetary policy. Industrial production and export orders have bottomed out during the fourth quarter of 2001, with the electronic sector leading the way.
