Press Release

Vale settles 2008 benchmark iron ore fines prices with ArcelorMittal

Rio de Janeiro, March 6, 2008 – Companhia Vale do Rio Doce (Vale), the world’s largest iron ore producer, concluded the iron ore price negotiations for 2008 with ArcelorMittal Sourcing S.A. (ArcelorMittal), the world’s largest steelmaker.

As an outcome of these negotiations, the iron ore prices for Southern System fines (SSF), FOB Tubarão, increased by 65% relatively to 2007. At the same time, due to its recognized superior quality, it was agreed that the price for Carajás iron ore fines (SFCJ) will have a premium of US\$ 0.0619 per dry metric ton Fe unit over the 2008 price for SSF.

Therefore, the new reference prices per dry metric ton Fe unit for 2008 are US\$ 1.3441 for SSF and US\$ 1.4060 for SFCJ.

The magnitude of the price increase for 2008 reflects the continuity of very tight conditions still prevailing in the global iron ore market.

The iron ore price settlement with large high-quality companies and traditional customers such as ArcelorMittal is an evidence of our commitment to the benchmark pricing system, respecting the weight of the long-term relationship and trust involved in these negotiations.

Vale reinforces its commitment with customers, investing a substantial amount of resources in increasing production capacity. Despite the sharp rise of investment and operational costs, the Company has managed to expand iron ore production at an average annual rate of 14.1%, between 2001 and 2007. Currently, we are developing projects to add new capacity of high quality iron ore to meet our client needs, aiming to reach a production capacity of 450 million metric tons per year by the end of 2012, which will require substantial investment in new mines and the enlargement of our railroad and port infrastructure.

This press release may contain statements that express management’s expectations about future events or results rather than historical facts. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected in forward-looking statements, and Vale cannot give assurance that such statements will prove correct. These risks and uncertainties include factors: relating to the Brazilian and Canadian economy and securities markets, which exhibit volatility and can be adversely affected by developments in other countries; relating to the iron ore and nickel business and its dependence on the global steel industry, which is cyclical in nature; and relating to the highly competitive industries in which Vale operates. For additional information on factors that could cause Vale’s actual results to differ from expectations reflected in forward-looking statements, please see Vale’s reports filed with the Brazilian Comissão de Valores Mobiliários and the U.S. Securities and Exchange Commission.
