1. Interim Report For The 109th Business Term From January 1,2009 to June 30,2009 Canon Inc.

To Our Shareholders

We are pleased to present our report for the summary of the first half of our 109th business term (from January 1, 2009 to June 30, 2009).

Reviewing conditions in both the Japanese and overseas economies during the first half of the current business term, the U.S. economy continued to be severe due to deeper recession from a year ago, such as worsening employment conditions, falling capital expenditures and declining personal consumption. The European economies, both the euro zone and the U.K., also declined with serious conditions continuing since last year. Meanwhile, in Asia, the Chinese economy began to make a recovery around May, and the economies of other countries and areas in the region continued to remain generally stringent. The Japanese economy, sharing the ongoing declines of most of the world's other economies, suffered drops in exports and production, and ongoing declines in personal consumption and capital expenditures. Some areas seemed to have hit bottom, but conditions in general remained difficult. In foreign exchange markets, compared with the first half of the previous business term, the yen marked significant gains against both the U.S. dollar and the euro.

As to the conditions of the markets in which the Canon Group operates, demand for digital cameras remained weak for both single lens reflex (SLR) and compact types, while demand for networked multifunctional devices, inkjet printers, laser beam printers and other business machines generally declined under worsening economic conditions making for difficult overall circumstances. Demand for mirror projection mask aligners for LCDs declined due to a rapid drop in LCD panel prices and demand for semiconductor production equipment also dropped significantly due to a weak semiconductor market.

Under these business conditions, the Canon Group, in the fourth year of Phase III (2006 to 2010) of our Excellent Global Corporation Plan, worked to improve management quality through timely new product releases to satisfy

customers, thorough supply chain management aimed at lowering costs and maintenance of appropriate inventory levels.

As to the earnings for the first half of the current business term, on a consolidated basis, we recorded net sales of 1,480.8 billion yen (down 29.9% from the first half of 2008), income before income taxes of 57.9 billion yen (down 82.9%), and net income attributable to Canon Inc. of 33.3 billion yen (down 84.5%). Also on a non-consolidated basis, we recorded net sales of 879.9 billion yen (down 36.9%), ordinary profit of 34.8 billion yen (down 86.4%), and net income of 21.1 billion yen (down 87.5%).

For the interim dividend, we have decided to pay 55.0 yen per share from August 28.

For the second half of the current business term, we expect that continued vigilance will be called for given global economic conditions that are likely to worsen as the financial crisis and declining real economic conditions feed on each other in a negative cycle. Business conditions for the Canon Group are expected to be more difficult, characterized by intensifying market competition as capital investments and prices decline. In the face of such challenging circumstances, the Canon Group is united in its commitment to achieving an upturn in results in the second half of the fiscal year.

We look forward to your continued support and encouragement in the future.
August 2009

Fujio Mitarai
Chairman & CEO

Tsuneji Uchida
President & COO

n Business Machines Operations

Office Imaging Products

Regarding the imageRUNNER series of office-use digital networked multifunctional devices, amid ongoing difficult market conditions, we focused on maintaining and expanding market share in each region by promoting sales of the top-line iR C5185 and affordable iR C3580F/C3080F among color machines. As for black-and-white machines, we launched the high-speed iR5050N multifunctional device with network printing capability in the U.S. and introduced the reasonable iR2320L/iR2318L which can handle A3 paper, and meet the wide variety of user needs in Europe, Asia and other regions. We also worked to promote our solutions business by proposing printing environments adjusted to customers' business formats and needs by using the Multifunctional Embedded Application Platform (MEAP) capable of expanding the range of functions installed on our imageRUNNER series.

Among our imagePRESS series printers for digital commercial printing, color machines such as the imagePRESS C7000VP and imagePRESS C1+ have enjoyed strong popularity. To develop new markets for this series, we launched three black-and-white machines using eB toner for approaching the beauty of true black, including the imagePRESS 1135 which is capable of printing 135 pages per minute, and made our entry into the high-speed black-and-white market.

In the multifunctional black-and-white machines for individuals and small-business owners, we launched five new products, including the Satera MF4380dn which combines four functions (copier, printer, color scanner and fax) and an automated double-sided printing function in a compact body while offering a printing speed of 22 pages per minute, and worked to expand sales of these products.

Sales for this segment fell by 30.9% on a consolidated basis in comparison to the first half of 2008.

Change in Sales [Consolidated]
100 MILLIONS OF YEN

Computer Peripherals

In the area of inkjet printers, we targeted both the home and office users in launching the PIXUS MX860 equipped with a broad range of functions useful for business, including a double-sided Auto Document Feeder and wireless LAN functionality. Furthermore, in developing our user base that is expected to need high printing volume, we introduced and focused sales efforts on the PIXUS Pro9500 Mark II which offers professionals and advanced amateurs high image quality and high antiweatherability based on ten colors of pigment ink, and the PIXUS Pro9000 Mark II which uses eight colors of dye ink to offer crisp and high gloss prints. As a result, despite the sluggish market, we succeeded in limiting inkjet printer unit sales to a minor decline.

Regarding laser beam printers, performance of OEM-brand products in general remained weak due to factors such as significant unit sales declines for both color and black-and-white products. For Canon-brand products, we launched five new color machines, including the Satera LBP9600C/9500C offering greater functionality while consuming less energy than previous models and printing 30 color pages per minute and up to A3 size, and the Satera LBP7200C capable of printing 20 color pages per minute and up to A4 size. Additionally, we worked to expand our solutions business utilizing the MEAP-Lite function expansion system.

In image scanners, we launched the thin and compact CanoScan LiDE 700F employing CIS (Contact Image Sensor) technology and maintained our high market share as the overall market contracted.

Sales for this segment fell by 34.6% on a consolidated basis in comparison to the first half of 2008.

7

Change in Sales [Consolidated]
100 MILLIONS OF YEN

Business Information Products

In the area of office-use document scanners, for the imageFORMULA series handled by Canon Electronics Inc., we released and focused on promoting new products such as the high-speed and high durability DR-9050C which can read 90 color pages per minute, and the compact and lightweight DR-6010C which can read 60 color pages per minute. Sales for this line of products, however, fell as companies' motivation for capital investments declined.

Regarding calculators handled by Canon Electronic Business Machines (H.K.) Co., Ltd., we launched the F-502G which is manufactured using recycled material and offers 140 scientific and statistical functions. Meanwhile, in electronic dictionaries, we introduced the top-line wordtank V923 offering a rich array of content for learners of Chinese, and the wordtank V320 for students, and worked to expand sales. However, all of these products met with declining market demand and saw lower sales.

Sales of servers and personal computers handled by Canon Marketing Japan Inc. declined due to the effects of companies reining in capital investments and Canon Marketing Japan's focus on shifting from single product sales to the solutions business.

Sales for this segment fell by 20.1% on a consolidated basis in comparison to the first half of 2008.

Change in Sales [Consolidated]
100 MILLIONS OF YEN

n Camera Operations

In this year which marks the 50th anniversary of the introduction of Canon's first SLR, in our EOS Kiss DIGITAL series of digital SLRs, we launched EOS Kiss X3 equipped with a 15.1 megapixel CMOS sensor, the newly designed DIGIC 4 high performance image processor and full HD video functionality, and worked to expand sales. Meanwhile, our EOS 5D Mark II offering advanced amateurs a 21.1 megapixel 35mm full-frame CMOS sensor has been awarded Camera of the Year in the Camera Grand Prix 2009 and attained high appraisal in the market.

In the area of compact digital cameras, we introduced four new models in our stylishly designed IXY DIGITAL series such as the IXY DIGITAL 510 IS equipped with DIGIC 4, a wide-angle 28mm 4x zoom, 12.1 megapixel CCD sensor and a 2.8-inch Clear Live LCD II monitor. Additionally, in our PowerShot series with its ample product range for a variety of photographic styles, we introduced and focused on selling four new products including the PowerShot SX200 IS with optical image stabilizer, a wide-angle 28mm 12x zoom, 12.1 megapixel CCD sensor and large 3.0-inch LCD monitor.

In digital video cameras, we released three new products offering a double memory capacity comprised of internal flash memory and SD/SDHC card for long recording times such as the iVIX HF S10 equipped with the newly developed DIGIC DV III image processor, 8.59 megapixel CMOS sensor and 10x optical zoom HD lens for even greater speed and image quality.

Sales for this segment fell by 22.3% on a consolidated basis in comparison to the first half of 2008.

Change in Sales [Consolidated]
100 MILLIONS OF YEN

n Optical and Other Products Operations

Regarding mirror projection mask aligners for LCDs, panel manufacturers made large capital investments after securing strong results in the first half of the previous term. Thanks to related product orders whose delivery dates fell in this first half, our first half sales maintained at around the same level as the same period of the previous term.

In semiconductor production equipment, we experienced lower sales amid sustained severe market conditions due to capital investment reductions by most semiconductor manufacturers in reaction to slumping semiconductor market.

In our imagePROGRAF series of large-format inkjet printers, we launched four new products aimed at solidifying our position in the large-size printer market and expanded our market share. Two of these products are the imagePROGRAF iPF755 capable of printing A0-plus paper and the imagePROGRAF iPF655 capable of printing A1-plus paper for CAD drawings, posters, signboards and a wide variety of other applications. We also introduced the PosterArtist 2009, a software application enabling easy and quick creation of professional-quality posters, and took other steps to develop our solutions business.

Regarding broadcast-use television lenses, we enhanced our product line by introducing two new products including the HJ14e×4.3B 14x super-wide-angle zoom lens and the compact and lightweight KJ17e×7.7B 17x portable zoom lens, both of which are HDTV compatible.

In medical equipment, we launched and focused on promoting the CR-1 Mark II, a new non-mydratic digital retinal camera, not requiring mydratic agent and capable of producing high-quality images of the back of the eye using only about one-fourth of the flash intensity than previous models.

As semiconductor manufacturers continue to keep a tight rein on capital investments in the face of their difficult market conditions, sales of magnetic head film deposition equipment handled by Canon ANELVA Corporation came in at the same level reported for the first half of the previous term, but sales of die bonders handled by Canon Machinery Inc. were weak throughout the first half.

Sales for this segment fell by 32.5% on a consolidated basis in comparison to the first half of 2008.

New Accounting Standard

Canon adopted SFAS No.160 Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No.51 in the fiscal year beginning January 1, 2009. Upon the adoption of SFAS 160, noncontrolling interests, which were previously referred to as minority interests and classified between total liabilities and stockholders' equity on the consolidated balance sheets, are now included as a separate component of total equity. In addition, consolidated net income on the consolidated statements of income now includes the net income (loss) attributable to noncontrolling

interests.
