Earnings Release Q1 2011

October 1 to December 31, 2010

Munich, Germany, January 25, 2011

Fiscal Year Off To A Strong Start

Continued broad-based growth

Excellent bottom-line performance

Peter Löscher, President and Chief

Executive Officer of Siemens AG

Capital-efficient growth is our aspiration. We have lived up to it. Orders and revenue grew in all regions, particularly in emerging markets. That benefits us in Germany as well. We delivered excellent bottom-line performance and are fully on track to reach the targets we set for fiscal 2011.

Financial Highlights:

For the third straight quarter, all Sectors of Siemens delivered order and revenue growth compared to the prior-year period, including growth in all reporting regions and double-digit increases in emerging economies.

Revenue rose 12% and orders climbed 19%, benefiting from a currency tailwind. The book-to-bill ratio was 1.16 and the backlog for the Sectors increased to 92 billion.

Total Sectors profit rose to 2.229 billion, even after the allocation of 261 million related to previously announced special employee remuneration.

Siemens signed an option agreement for Atos Origin S.A. to acquire Siemens IT Solutions and Services, subject to necessary approvals. Pretax impacts on income in the first quarter include a goodwill impairment of 136 million and 75 million related to establishing the business as a separate legal entity.

Income from continuing operations climbed 17%, to 1.787 billion. Basic EPS was 2.00.

Free cash flow from continuing operations climbed to 908 million from 725 million in the first quarter a year earlier.

Table of Contents

Siemens 2

Orders and Revenue**Fiscal year begins with strong growth momentum**

Siemens delivered year-over-year growth in both orders and revenue for the third straight quarter. With all Sectors and all three of Siemens' reporting regions contributing increases, orders climbed 19% and revenue was up 12%. Both revenue and orders benefited clearly from positive currency translation effects. On an organic basis, excluding currency translation and portfolio effects, orders increased 13% and revenue rose 6%. The combined book-to-bill ratio for Siemens was 1.16, and the Sectors' combined order backlog increased to 92 billion, in part due to positive currency translation effects.

Emerging markets drive order growth

All Sectors reported double-digit order growth compared to the prior-year period, highlighted by a higher volume from large orders in Energy and Industry, particularly at Fossil Power Generation and Mobility. Order volumes also benefited from currency translation effects as noted above.

All regions delivered order growth in the first quarter, led by Asia, Australia and the Americas. India led growth within Asia, Australia, due in part to a large order in Energy. The Americas combined higher orders in the established U.S. market with fast growth in emerging markets. Emerging markets grew significantly faster than orders overall, at 31%, and accounted for 7.834 billion or 35% of total orders for the quarter.

Revenue rises in all Sectors and regions, with boost from currency

Revenue growth was well balanced in the first quarter, with double-digit increases in all Sectors. Strong conversion from the Sectors' respective order backlogs played a major role in broad-based revenue growth, as did a strong tailwind from currency translation effects as noted above.

Revenue rose in all three regions, led by the Americas and Asia, Australia. More modest growth in the region comprising Europe, the Commonwealth of Independent States, Africa and the Middle East (Europe/CAME) included a strong increase in Germany. Emerging markets on a global basis grew faster than revenue overall, at 16% year-over-year, and accounted for 5.748 billion or 29% of total revenue for the quarter.

Table of Contents

Siemens 3

Income and Profit**Industry and Energy take****Total Sectors profit higher**

Total Sectors profit for the first quarter rose 6% year-over-year, to 2.229 billion, burdened by 261 million related to previously announced special employee remuneration. This amount was accrued centrally in the fourth quarter of fiscal 2010 and allocated to the Sectors during the current quarter (see below). This impact cut 1.4 percentage points from Total Sectors profit as a percent of revenue, which was 12.0%. All Divisions in the Sectors took a charge for a portion of these costs based on their number of non-management employees. In contrast, positive currency effects benefited profit in all Sectors, particularly in Industry.

The Industry Sector drove the increase in Total Sectors profit for the quarter, with 22% profit growth compared to the prior-year period. Profit in Energy rose 7%, on particularly strong earnings conversion at Fossil Power Generation. Profit in the Healthcare Sector declined on lower profit at Diagnostics and 32 million in charges related to particle therapy contracts, among other factors.

Income climbs on Sectors profit,**higher results below Total Sectors**

Income from continuing operations climbed 17% year-over-year, to 1.787 billion, and corresponding basic EPS rose to 2.00 up from 1.70 a year earlier. These increases were due to growth in Total Sectors profit and improved results below Total Sectors, including higher contributions from Siemens Real Estate, Equity Investments and Financial Services. Corporate items and pensions was a positive 231 million compared to a negative 142 million in the first quarter a year earlier. The current quarter benefited from allocation primarily to the Sectors of a substantial part of the 310 million in special employee remuneration that was accrued in the fourth quarter of fiscal 2010. Within this part is the 261 million that was debited to the Sectors as mentioned earlier. Siemens IT Solutions and Services posted a loss of 129 million due to a 136 million goodwill impairment in connection with the option agreement mentioned earlier. Net income increased 15% year-over-year to 1.753 billion. Basic EPS improved to 1.97 from 1.70 a year earlier. The primary driver of net income in both periods was continuing operations and the related factors discussed above.

Table of Contents

Siemens 4

Cash, Return on Capital Employed (ROCE), Pension Funded Status**Free cash flow rises****for Siemens and Sectors**

Free cash flow from continuing operations rose to 908 million from 725 million in the first quarter a year earlier, including higher Free cash flow at the Sector level. Other factors in the increase included higher cash inflows from Corporate Treasury activities and lower cash outflows related to staff reduction measures, partly offset by higher payments for income taxes. The cash conversion rate for the first quarter was 0.51, up from the prior-year period.

ROCE rises on higher income**from continuing operations**

On a continuing basis, ROCE (adjusted) increased to 23.0% from 19.2% in the first quarter a year earlier. The difference was due mainly to higher income from continuing operations. To a lesser extent, ROCE (adjusted) also benefited from lower average capital employed compared to the prior-year period.

Improvement in pension**plan underfunding**

Beginning with fiscal 2011 the figures presented below cover both principal and non-principal pension plans. The presentation of prior-year information has been adjusted to conform to the current-year presentation. The estimated underfunding of Siemens pension plans as of December 31, 2010 amounted to approximately 6.1 billion, compared to an underfunding of approximately 7.4 billion at the end of fiscal 2010. The improvement in funded status since September 30, 2010 is due mainly to a decrease in Siemens defined benefit obligation (DBO) resulting from an increase in the discount rate assumption as of December 31, 2010. This was partly offset by a negative actual return on plan assets.

Table of Contents

Sectors 5

Industry Sector**Broad-based growth,
strong profit performance**

Industry delivered higher profit, revenue and orders compared to the first quarter a year ago, on continued strong execution in an improved market environment. Profit climbed to 1.022 billion, even after 149 million of the special employee remuneration allocation mentioned earlier. For comparison, profit of 840 million in the prior-year period benefited from a 45 million gain on the sale of a business.

Industry's growth momentum was most evident in new orders. With increases at all Divisions and double-digit growth in all three reporting regions, new orders rose 22%, to 10.083 billion. Revenue rose 13%, to 9.114 billion, on increases in all three regions and at all Divisions except Industry Solutions. Within these increases, currency translation effects added 6 percentage points to revenue and 7 percentage points to orders. The Sector's book-to-bill ratio was 1.11 and its order backlog increased to 29 billion at the end of the quarter.

**Strong global growth
drives higher profit**

First-quarter profit at **Industry Automation** was 363 million, up 63% year-over-year. Revenue growth drove high capacity utilization and also included a more favorable business mix compared to the prior-year quarter. Revenue and orders climbed 29% and 32%, respectively, on increases in all business units and in all regions. Emerging markets grew even faster than revenue and orders overall. Purchase price allocation (PPA) effects related to the fiscal 2007 acquisition of UGS Corp. were 35 million in the current period compared to 32 million a year earlier.

**Large contract wins
drive order growth**

Drive Technologies posted a 21% increase in revenue in the first quarter. Higher capacity utilization took profit up sharply year-over-year, to 229 million. Improved market conditions in the current quarter were particularly evident in new orders, which climbed 56% due in part to higher volume from large orders.

Table of Contents

Sectors 6

Profitable growth in recovering markets

Profit at **Building Technologies** rose to 117 million on a 14% increase in revenue. Orders also rose 14% compared to the prior-year period. Revenue and orders came in higher in all business units and all three reporting regions, including continued improvement in the low-voltage business. Emerging markets grew faster than revenue and orders overall.

LEDs continue to drive growth

OSRAM kept profit near the high level of the prior-year period, at 141 million, while continuing to expand its production capacity and marketing and selling activities. First-quarter revenue rose 14% year-over-year on strong sales of LEDs and increases in all business units. Revenue climbed in all regions, led by Asia, Australia and emerging markets. The Division intends to continue investing in market expansion and production capacity in coming quarters.

Orders up at Industry Solutions

Profit and revenue at **Industry Solutions** came in lower in the first quarter compared to the prior-year period. The difference is due primarily to the Division's metals technologies business, which posted lower revenue and profit in the current period due to low order intake in prior periods. In the current period orders in the metals technology business helped lift orders for the Division overall.

Strong profit performance, high volume from large orders

Mobility delivered 116 million in profit in the first quarter. For comparison, profit in the prior-year period included a 45 million gain on the sale of the Division's airfield lighting business. Orders climbed 24%. A significantly higher volume from large orders in Europe/CAME included a major order for high-speed trains in the U.K.

Table of Contents

Sectors 7

Energy Sector**Strong profit performance,
robust order growth**

In strengthening global energy markets, the **Energy** Sector delivered double-digit increases in orders and revenue compared to the first quarter a year earlier, and profit rose 7%, to 826 million, driven by a strong earnings increase at Fossil Power Generation. Sector profit for the quarter includes higher expenses for R&D, marketing and selling associated with growth, particularly at Renewable Energy. Energy's portion of the special employee remuneration allocation mentioned earlier was 69 million.

Revenue rose 14% year-over-year, to 6.378 billion, on strong conversion of orders from the backlog. All Divisions contributed to the increase, and revenue also rose in all three regions. Orders for the quarter climbed 27%, to 8.759 billion, with the strongest growth coming from Fossil Power Generation and Oil & Gas. For comparison, the prior-year quarter included significantly lower volume from large orders. Orders grew in all three regions, particularly in emerging markets in Asia, Australia. Currency translation effects accounted for 6 percentage points of revenue growth and 7 percentage points of order growth. The book-to-bill ratio in the current period was 1.37, and the Sector's order backlog increased to 56 billion.

**Global order growth,
strong earnings conversion**

Fossil Power Generation reached a new high in profit, at 473 million. The Division continued its strong project execution, and the revenue mix included conversion of high-margin component orders from the Sector's backlog as well as positive effects related to project completions. Revenue rose 9% compared to the first quarter a year earlier, including strong growth in the Americas. The global market environment for fossil power generation showed continued signs of recovery. The Division recorded a higher volume from large orders compared to the prior-year period, all three regions reported strong growth, and orders more than doubled in emerging markets on a global basis. As a result, first-quarter orders for the Division came in at 3.916 billion, well above the prior-year level.

**Profit held back by
investments in growth**

Renewable Energy posted a strong rise in revenue, to 868 million, on conversion of large orders from prior periods. This helped lift first-quarter profit above the prior-year level despite significantly higher expenses for R&D, marketing and selling associated with expansion of its wind business and integration of its solar thermal business, which are expected to continue to hold back profitability in the coming quarter. Orders came in above revenue, but well below the prior-year quarter which included a higher volume from large orders. During the quarter, Renewable Energy closed the acquisition of a stake in A2SEA A/S, a supplier of offshore wind-farm installation services.

Table of Contents

Sectors 8

**Large contract wins
drive order growth**

Oil & Gas contributed 108 million to Sector profit in the first quarter. Orders climbed 35% compared to the first quarter a year earlier, due in part to higher volume from large orders, and revenue rose 7%. Both revenue and orders grew in all three regions.

**Focus on profit in
challenging markets**

Orders at **Power Transmission** rose 14% and revenue increased 8% compared to the first quarter a year ago, led by the transformers business. Profit of 134 million was held back by higher marketing and selling expenses associated with growth and by pricing pressure. The Division expects negative impacts on profit in coming quarters related to optimizing its global footprint.

**Distribution orders climb
as markets stabilize**

As its markets continued to stabilize, **Power Distribution** generated 10% order growth and 9% revenue growth compared to the first quarter a year earlier. All three regions contributed to the order increase, while revenue growth came from Europe/CAME and Asia, Australia. Profit of 76 million was also held back by higher expenses year-over-year for marketing, selling and expanding activities related to new technologies such as smart grids. These activities are expected to intensify in coming quarters.

Table of Contents

Sectors 9

Healthcare Sector**Solid organic revenue growth,
negative impacts on profit**

Effective with the first quarter of fiscal 2011, financial disclosure for the **Healthcare** Sector follows its new organizational structure. The new alignment achieves greater integration of the Sectors' businesses, and also unifies sales and service in one Sector-wide organization. The audiology business unit is now managed at the Sector level. First-quarter profit for Healthcare declined to \$381 million, due in part to higher functional costs compared to the prior-year period. The Sector's portion of the special employee remuneration allocation mentioned earlier was \$43 million. Imaging & Therapy Systems took \$32 million in charges stemming from increased cost estimates for completing particle therapy contracts, and the Sector built up a reserve of \$19 million related to a customer loan and receivables in the audiology business. In addition, profit at Diagnostics came in lower year-over-year, at \$78 million compared to \$115 million, due in part to a less favorable business mix. PPA effects related to past acquisitions at Diagnostics were \$44 million in the first quarter. A year earlier, Diagnostics recorded \$41 million in PPA effects.

Revenue and orders for Healthcare rose 11% and 10%, respectively, compared to the first quarter a year earlier, led by double-digit growth in Asia, Australia and the Americas. In addition to organic growth, volume for Healthcare overall benefited from currency translation effects amounting to 8% percentage points for revenue and 8% percentage points for orders. The Healthcare Sector's book-to-bill ratio was slightly above 1 for the quarter, and its order backlog was \$7 billion. Diagnostics posted revenue of \$916 million and orders of \$926 million, compared to \$830 million and \$832 million in the prior-year quarter, respectively, and showed nearly the same development as the Sector with regard to regional growth and currency translation effects.

Table of Contents

Equity Investments and Cross-Sector Businesses 10

Equity Investments and Cross-Sector Businesses**NSN contributes to profit****from Equity Investments**

Equity Investments recorded a profit of 85 million, compared to 76 million in the prior-year period. The result related to Siemens' share in Nokia Siemens Networks B.V. (NSN) was equity income of 18 million, compared to a loss of 42 million in the first quarter a year earlier. NSN reported to Siemens that it took restructuring charges and integration costs totaling 29 million, compared to 90 million in the prior-year period. Profit from Equity Investments is expected to be volatile in coming quarters.

Loss on goodwill impairment**at Siemens IT Solutions & Services**

Siemens IT Solutions and Services posted a loss of 129 million in the first quarter, due to a goodwill impairment of 136 million taken in connection with the above-mentioned

option agreement for Atos Origin to acquire the business. More information on this transaction is provided

below. Both revenue and orders declined year-over-year in highly competitive markets.

Another strong quarter for**Financial Services**

Financial Services (SFS) delivered 102 million in profit (defined as income before income taxes), up from 99 million a year earlier.

The commercial finance business recorded higher interest results, and benefited from a decline in defaults compared to the prior-year quarter. The equity business also made a

significant earnings contribution, even though its results came in below the high level recorded a year earlier. Total assets increased slightly, to 12.597 billion.

Table of Contents

Centrally Managed Portfolio Activities, Corporate Activities and Eliminations 11

Centrally Managed Portfolio Activities, Corporate Activities and Eliminations**Positive result for electronics assembly systems**

Centrally managed portfolio activities posted a loss of 2 million in the first quarter compared to a loss of 15 million in the prior-year period. The difference is due mainly to electronics assembly systems, which contributed a net positive result of 6 million. The remaining difference is due to net expenses related to divested businesses in both periods. Effective with the beginning of fiscal 2011, software development solutions for the telecommunication industry were transferred from Siemens IT Solutions and Services to Centrally managed portfolio activities.

Higher gains on disposals of real estate

Income before income taxes at **Siemens Real Estate (SRE)** was 97 million in the first quarter, compared to 60 million in the same period a year earlier. The change includes significantly higher net gains related to sales of real estate. During the current quarter, assets with a book value of 350 million were transferred to SRE as part of Siemens program to bundle its real estate assets into SRE and to implement further measures to increase the efficiency of these assets. SRE expects to incur costs associated with the program in coming quarters, and to continue with real estate disposals depending on market conditions.

Positive contribution from Corporate items and pensions

Corporate items and pensions totaled a positive 231 million in the first quarter compared to a negative 142 million in the same period a year earlier. The difference was due primarily to Corporate items, which were a positive 202 million compared to a negative 82 million in the first quarter of fiscal 2010. The current quarter benefited from management's allocation of a substantial part of personnel-related costs which were accrued in the fourth quarter of fiscal 2010, including the 310 million in special employee remuneration discussed earlier. Within this part is the 261 million that was allocated to the Sectors as mentioned earlier.

The current period includes costs of 75 million related to establishing Siemens IT Solutions and Services as a separate legal entity, including for carve-out activities, and a net charge related to legal and regulatory matters. The prior-year period included expenses associated with streamlining IT costs for Siemens as a whole. Centrally carried pension expenses totaled a positive 29 million in the first quarter, compared to a negative 60 million in the prior-year period. The change is due primarily to a positive effect resulting from lower interest costs and a higher expected return on plan assets.

Beginning with fiscal 2011, central infrastructure costs which were formerly reported in Corporate items are allocated primarily to the Sectors. The total amount to be allocated is determined at the beginning of the fiscal year and is charged in set portions in all four quarters. Presentation of prior-year information has been adjusted to conform to the current-year presentation. Central infrastructure costs allocated for the complete fiscal year 2010 amounted to 585 million. Costs to be allocated for the complete fiscal year 2011 amount to 531 million.

Reduced income from Corporate Treasury activities

Income before income taxes from **Eliminations, Corporate Treasury and other reconciling items** was a negative 32 million in the first quarter compared to a negative 11 million in the same period a year earlier. The primary factor in the change was Corporate Treasury activities. Due mainly to an increase in interest rates during the first quarter, income at Corporate Treasury declined on changes in fair market value of interest rate derivatives used for interest rate management. This was partly offset by higher interest income relating to an increase in total liquidity compared to the prior-year period.

Table of Contents

Divestment of Siemens IT Solutions and Services Outlook 12

Divestment of Siemens IT Solutions and Services

During the first quarter, Siemens signed an option agreement to transfer Siemens IT Solutions and Services to Atos Origin in exchange for cash and securities, including 12.5 million of shares in Atos Origin with a total value of 850 million at the time of announcement. Final consideration depends on the price of Atos Origin shares at closing. Related to the agreement is a seven-year outsourcing contract worth around 5.5 billion, under which Atos Origin would provide managed services and systems integration to Siemens. Signing is expected in the second quarter. Pending necessary approvals by regulatory authorities and governing bodies of Atos Origin, closing of the transaction is expected in the fourth quarter of fiscal 2011.

Siemens expects the transaction and related activities to result in substantial negative earnings impacts in the first half of fiscal 2011, within a mid- to high-triple-digit million euro range. These impacts particularly include the above-mentioned goodwill impairment of 136 million booked in the current quarter, and up to 250 million that Siemens agreed to contribute for integration and training activities after the transfer of Siemens IT Solutions and Services to Atos Origin. In addition, and as previously disclosed, Siemens expects further substantial charges in fiscal 2011 related to establishing Siemens IT Solutions and Services as a separate legal entity, including for carve-out activities. The portion of these charges taken in the current quarter amounted to 75 million, reported within Corporate Items.

Following signing, Siemens will again assess whether to present Siemens IT Solutions and Services as an asset held for disposal and as discontinued operations.

Outlook for fiscal 2011

With continuing improvement in Siemens markets, we expect organic order intake to show a clear increase compared to fiscal 2010. Supported also by our already strong order backlog, we expect revenue to return to moderate organic growth. We further anticipate income from continuing operations to exceed reported fiscal 2010 results by at least 25% to 35%. This outlook excludes effects that may arise from legal and regulatory matters.

Beginning today at 07:45 a.m. CET, the press conference at which CEO Peter Löscher and CFO Joe Kaeser discuss the quarterly figures will be broadcast live at www.siemens.com/pressconference.

Starting at 08:45 CET, Peter Löscher and Joe Kaeser will hold a telephone conference in English for analysts and investors, which can be followed live at www.siemens.com/analystcall.

Recordings of the press conference and the analysts and investors conference will subsequently be made available as well.

Starting today at 10 a.m. CET, we will also provide a live video webcast of Chairman of the Supervisory Board Dr. Gerhard Crommes and CEO Peter Löscher's speeches to the Annual Shareholders' Meeting at the Olympic Hall in Munich, Germany. You can access the webcast at www.siemens.com/press/agm.

A video of the speeches will be available after the live webcast.

This document contains forward-looking statements and information that is, statements related to future, not past, events. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. Such statements are based on the current expectations and certain assumptions of Siemens' management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens' control, affect Siemens' operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. In particular, Siemens is strongly affected by changes in general economic and business conditions as these directly impact its processes, customers and suppliers. This may negatively impact our revenue development and the realization of greater capacity utilization as a result of growth. Yet due to their diversity, not all of Siemens' businesses are equally affected by changes in economic conditions; considerable differences exist in the timing and magnitude of the effects of such changes. This effect is amplified by the fact that, as a global company, Siemens is active in countries with economies that vary widely in terms of growth rate.

Uncertainties arise from, among other things, the risk of customers delaying the conversion of recognized orders into revenue or cancelling recognized orders, of prices declining as a result of continued adverse market conditions by

more than is currently anticipated by Siemens management or of functional costs increasing in anticipation of growth that is not realized as expected. Other factors that may cause Siemens results to deviate from expectations include developments in the financial markets, including fluctuations in interest and exchange rates (in particular in relation to the U.S. dollar), in commodity and equity prices, in debt prices (credit spreads) and in the value of financial assets generally. Any changes in interest rates or other assumptions used in calculating obligations for pension plans and similar commitments may impact Siemens defined benefit obligations and the anticipated performance of pension plan assets resulting in unexpected changes in the funded status of Siemens pension and other post-employment benefit plans. Any increase in market volatility, further deterioration in the capital markets, decline in the conditions for the credit business, continued uncertainty related to the subprime, financial market and liquidity crises, or fluctuations in the future financial performance of the major industries served by Siemens may have unexpected effects on Siemens results. Furthermore, Siemens faces risks and uncertainties in connection with: disposing of business activities, certain strategic reorientation measures; the performance of its equity interests and strategic alliances; the challenge of integrating major acquisitions, implementing joint ventures and other significant portfolio measures; the introduction of competing products or technologies by other companies or market entries by new competitors; changing competitive dynamics (particularly in developing markets); the risk that new products or services will not be accepted by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations, legal proceedings and actions resulting from the findings of, or related to the subject matter of, such investigations; the potential impact of such investigations and proceedings on Siemens business, including its relationships with governments and other customers; the potential impact of such matters on Siemens financial statements, and various other factors. More detailed information about certain of the risk factors affecting Siemens is contained throughout this report and in Siemens other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens neither intends to, nor assumes any obligation to, update or revise these forward-looking statements in light of developments which differ from those anticipated.

- (1) This supplementary information on *New orders* is provided on a voluntary basis. It is not part of the Interim Consolidated Financial Statements subject to the review opinion.
- (2) *Profit* of the **Sectors** as well as of **Equity Investments, Siemens IT Solutions and Services** and **Centrally managed portfolio activities** is earnings before financing interest, certain pension costs and income taxes. Certain other items not considered performance indicative by Management may be excluded. *Profit* of **SFS** and **SRE** is Income before income taxes.
- (3) *Assets* of the **Sectors** as well as of **Equity Investments, Siemens IT Solutions and Services** and **Centrally managed portfolio activities** is defined as Total assets less income tax assets, less non-interest bearing liabilities/provisions other than tax liabilities. *Assets* of **SFS** and **SRE** is Total assets; since fiscal 2011, Total assets of SRE nets certain intercompany finance receivables with certain intercompany finance liabilities.
- (4) *Free cash flow* represents net cash provided by (used in) operating activities less additions to intangible assets and property, plant and equipment. *Free cash flow* of the **Sectors, Equity Investments, Siemens IT Solutions and Services** and **Centrally managed portfolio activities** primarily exclude income tax, financing interest and certain pension related payments and proceeds. *Free cash flow* of **SFS**, a financial services business, and of **SRE** includes related financing interest payments and proceeds; income tax payments and proceeds of **SFS** and **SRE** are excluded.
- (5) *Amortization, depreciation and impairments* contains amortization and impairments, net of reversals of impairments, of intangible assets other than goodwill as well as depreciation and impairments of property, plant and equipment, net of reversals of impairments.
- (6) In December 2010, Siemens announced the proposed sale of Siemens IT Solutions and Services to Atos Origin.
- (7) As of September 30, 2010, Total assets of SRE amounts to 4,554 after netting of certain intercompany finance receivables with certain intercompany finance liabilities.

Due to rounding, numbers presented may not add up precisely to totals provided.

- (1) Profit of the Sectors and Divisions as well as of Equity Investments, Siemens IT Solutions and Services and Centrally managed portfolio activities is earnings before financing interest, certain pension costs and income taxes. Certain other items not considered performance indicative by Management may be excluded. Profit of SFS and SRE is Income before income taxes. Profit of Siemens is Income from continuing operations before income taxes. For a reconciliation of Income from continuing operations before income taxes to Net income see Consolidated Statements of Income.
- (2) Beginning with fiscal 2011, central infrastructure costs which were formerly reported in Corporate items will be allocated primarily to the Sectors. The total amount to be allocated is determined at the beginning of the fiscal year and is charged in set portions in all four quarters. Presentation of prior-year information has been adjusted to conform to the current-year presentation.
- (3) Includes impairments and reversals of impairments of investments accounted for using the equity method.
- (4)

Includes impairment of non-current available-for-sale financial assets. For Siemens, Financial income (expense), net comprises Interest income, Interest expense and Other financial income (expense), net as reported in the Consolidated Statements of Income.

- (5) Adjusted EBIT is Income from continuing operations before income taxes less Financial income (expense), net and Income (loss) from investments accounted for using the equity method, net.
 - (6) Amortization and impairments, net of reversals, of intangible assets other than goodwill.
 - (7) Depreciation and impairments of property, plant and equipment, net of reversals. Includes impairments of goodwill of 136 in the current period and in the prior-year period, respectively.
- Due to rounding, numbers presented may not add up precisely to totals provided.

Legal Proceedings

For information regarding investigations and other legal proceedings in which Siemens is involved, as well as the potential risks associated with such proceedings and their potential financial impact on the Company, please refer to Siemens' Annual Report for the fiscal year ended September 30, 2010 (Annual Report) and its annual report on Form 20-F for the fiscal year ended September 30, 2010 (Form 20-F), and, in particular, to the information contained in Item 3: Key Information Risk factors and Item 4: Information on the Company Legal proceedings.

Significant developments regarding investigations and other legal proceedings that have occurred since the publication of Siemens' Annual Report and Form 20-F are described below.

Public corruption proceedings

Governmental and related proceedings

On March 9, 2009, Siemens AG received a decision by the Vendor Review Committee of the United Nations Secretariat Procurement Division (UNPD) suspending Siemens AG from the UNPD vendor database for a minimum period of six months. The suspension applied to contracts with the UN Secretariat and stemmed from Siemens AG's guilty plea in December 2008 to violations of the U.S. Foreign Corrupt Practices Act. On December 22, 2009, Siemens AG filed a request to lift the existing suspension. On January 14, 2011, Siemens was informed that the Vendor Review Committee of the UNPD had recommended that the existing suspension be lifted and that Siemens AG be invited to re-register with the UNPD.

As previously reported, in February 2010 a Greek Parliamentary Investigation Committee (GPIC) was established to investigate whether any politicians or other state officials in Greece were involved in alleged wrong-doing of Siemens in Greece. GPIC's investigation is focused on possible criminal liability of politicians and other state officials. Greek public prosecutors are separately investigating certain fraud and bribery allegations involving among others former board members and former executives of Siemens A.E. Greece (Siemens A.E.) and Siemens AG. Both investigations may have a negative impact on civil proceedings currently pending against Siemens AG and Siemens A.E. and may affect the future business activities of Siemens in Greece. In January 2011, the GPIC stated in a letter to Siemens that the alleged damages suffered by the Greek state amount to at least 2 billion. Siemens rejected these allegations.

Table of Contents

As previously reported, the Nigerian Economic and Financial Crimes Commission (EFCC) was conducting an investigation into alleged illegal payments by Siemens to Nigerian public officials between 2002 and 2005. In October 2010, the EFCC filed charges with the Federal High Court in Abuja and the High Court of the Federal Capital Territory against among others Siemens Ltd. Nigeria (Siemens Nigeria), Siemens AG and former board members of Siemens Nigeria. On November 22, 2010, the Nigerian Government and Siemens Nigeria entered into an out of court settlement, obligating Siemens Nigeria to make a payment in the mid double-digit Euro million range to Nigeria in exchange for the Nigerian Government withdrawing these criminal charges and refraining from the initiation of any criminal, civil or other actions such as a debarment against Siemens Nigeria, Siemens AG, and Siemens employees. The Company remains subject to corruption-related investigations in several jurisdictions around the world. As a result, additional criminal or civil sanctions could be brought against the Company itself or against certain of its employees in connection with possible violations of law. In addition, the scope of pending investigations may be expanded and new investigations commenced in connection with allegations of bribery and other illegal acts. The Company's operating activities, financial results and reputation may also be negatively affected, particularly as a result of penalties, fines, disgorgements, compensatory damages, third-party litigation, including with competitors, the formal or informal exclusion from public invitations to tender, or the loss of business licenses or permits. Additional expenses and provisions, which could be material, may need to be recorded in the future for penalties, fines, damages or other charges in connection with the investigations.

Civil litigation

As previously reported, Siemens has been approached by a competitor to discuss claims it believes it has against the Company. The alleged claims relate to allegedly improper payments by the Company in connection with the procurement of public and private contracts. Siemens and the competitor continue to be engaged in discussions; the outcome of these discussions is open.

Antitrust proceedings

As previously reported, in April 2007, Siemens AG and VA Tech filed actions before the European Court of First Instance in Luxemburg against the decisions of the European Commission dated January 24, 2007, to fine Siemens and VA Tech for alleged antitrust violations in the European Market of high-voltage gas-insulated switchgear between 1988 and 2004. Gas-insulated switchgear is electrical equipment used as a major component for turnkey power substations. The fine imposed on Siemens amounted to 396.6 million and was paid by the Company in 2007. The

Table of Contents

fine imposed on VA Tech, which Siemens AG acquired in July 2005, amounted to 22.1 million. VA Tech was declared jointly liable with Schneider Electric for a separate fine of 4.5 million. The European Court of First Instance has not yet issued a decision. In addition to the proceedings mentioned in this document, authorities in Brazil, the Czech Republic and Slovakia are conducting investigations into comparable possible antitrust violations. In October 2010, the High Court of New Zealand dismissed corresponding charges against Siemens. The decision is still appealable by the New Zealand authorities.

In January 2010, the European Commission launched an investigation related to previously reported investigations into potential antitrust violations involving producers of flexible current transmission systems in New Zealand and the USA including, among others, Siemens AG. In April 2010, authorities in Korea and Mexico informed the Company that similar proceedings had been initiated. Siemens AG is cooperating with the authorities. On June 1, 2010, the New Zealand Commerce Commission notified Siemens AG that their investigation had been closed. On September 13, 2010, the European Commission notified Siemens AG that their investigation had been closed. On November 17, 2010, the Korean antitrust authority notified Siemens AG that their investigation had been closed.

On November 16, 2010, the Greek Competition Authority searched the premises of Siemens S.A. in Athens, in response to allegations of anti-competitive practices in the field of telecommunication and security. Siemens is cooperating with the authority.

On December 15, 2010, the Turkish Antitrust Authority searched the premises of several diagnostic companies including, among others, Siemens Healthcare Diagnostik Ticaret Limited Sirketi in Istanbul, in response to allegations of anti-competitive agreements. Siemens is cooperating with the authority.

Other proceedings

In December 2008, the Polish Agency of Internal Security (AWB) remanded into custody an employee of Siemens Healthcare Poland, in connection with an investigation regarding a public tender issued by the hospital of Wroclaw in 2008. According to the AWB, the Siemens employee and the deputy hospital director were accused of having manipulated the tender procedure. In October 2010, the investigation was closed.

This document contains forward-looking statements and information that is, statements related to future, not past, events. These statements may be identified by words such as expects, looks forward to, anticipates, intends, plans, believes, seeks, estimates, will, project or words of similar meaning. Such statements are based on the

Table of Contents

current expectations and certain assumptions of Siemens management, and are, therefore, subject to certain risks and uncertainties. A variety of factors, many of which are beyond Siemens control, affect Siemens operations, performance, business strategy and results and could cause the actual results, performance or achievements of Siemens to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements. In particular, Siemens is strongly affected by changes in general economic and business conditions as these directly impact its processes, customers and suppliers. This may negatively impact our revenue development and the realization of greater capacity utilization as a result of growth. Yet due to their diversity, not all of Siemens businesses are equally affected by changes in economic conditions; considerable differences exist in the timing and magnitude of the effects of such changes. This effect is amplified by the fact that, as a global company, Siemens is active in countries with economies that vary widely in terms of growth rate. Uncertainties arise from, among other things, the risk of customers delaying the conversion of recognized orders into revenue or cancelling recognized orders, of prices declining as a result of continued adverse market conditions by more than is currently anticipated by Siemens management or of functional costs increasing in anticipation of growth that is not realized as expected. Other factors that may cause Siemens results to deviate from expectations include developments in the financial markets, including fluctuations in interest and exchange rates (in particular in relation to the U.S. dollar), in commodity and equity prices, in debt prices (credit spreads) and in the value of financial assets generally. Any changes in interest rates or other assumptions used in calculating obligations for pension plans and similar commitments may impact Siemens defined benefit obligations and the anticipated performance of pension plan assets resulting in unexpected changes in the funded status of Siemens pension and other post-employment benefit plans. Any increase in market volatility, further deterioration in the capital markets, decline in the conditions for the credit business, continued uncertainty related to the subprime, financial market and liquidity crises, or fluctuations in the future financial performance of the major industries served by Siemens may have unexpected effects on Siemens results. Furthermore, Siemens faces risks and uncertainties in connection with: disposing of business activities, certain strategic reorientation measures; the performance of its equity interests and strategic alliances; the challenge of integrating major acquisitions, implementing joint ventures and other significant portfolio measures; the introduction of competing products or technologies by other companies or market entries by new competitors; changing competitive dynamics (particularly in developing markets); the risk that new products or services will not be accepted by customers targeted by Siemens; changes in business strategy; the outcome of pending investigations, legal proceedings and actions resulting from the findings of, or related to the subject matter of, such investigations; the potential impact of such investigations and proceedings on Siemens business, including its relationships with governments and other customers; the potential impact of such matters on Siemens financial statements, and various other factors. More detailed information about certain of the risk factors affecting Siemens is contained throughout this report and in Siemens other filings with the SEC, which are available on the Siemens website, www.siemens.com, and on the SEC's website, www.sec.gov. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the relevant forward-looking statement as expected, anticipated, intended, planned, believed, sought, estimated or projected. Siemens neither intends to, nor assumes any obligation to, update or revise these forward-looking statements in light of developments which differ from those anticipated.
