II. BUSINESS

1. Business Overview

A. Industry Characteristics

As of December 31, 2010, the number of domestic mobile phone subscribers reached 50.77 million and, with more than 100% penetration rate, the Korean mobile communication market can be considered to have reached its maturation stage. However, the penetration rate is expected to increase further due to increased use of mobile phones by corporate users resulting from the rapid growth of smart phone markets, as well as the increasing popularity of high-tech mobile devices based on wireless data services such as tablet PC.

The Korean mobile communications market continues to improve in the quality of services with the help of advances in network-related technology evidenced by the world's first commercialization of CDMA2000 1x, CDMA 1x EV-DO, and the development of highly advanced handsets, including various smart phones, that enable the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite Digital Multimedia Broadcasting (DMB), digital home services, connected workforce services and other related services. In addition, through HSPA+ network commercialized in October 2010 and the LTE network expected to be introduced from the next year, the industry productivity enhancement (IPE) business directly resulting in the enhancement of productivity, such as the corporate connected workforce business, is expected to grow rapidly.

C. Domestic and Overseas Market Conditions

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Although demand

has primarily been in the domestic market, as the business territory expands to overseas market, the size of overseas sales is expected to grow in the near future. In addition, sales revenue related to data services is expected to increase due to the increasing popularity of smart phones and wireless Internet. Business-to-business segment that creates added values by adding additional solutions and applications is also growing. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries.

D. Business Overview and Competitive Strengths

The Company's revenue in 2010 amounted to Won 12,460.0 billion, an increase of Won 359.0 billion compared to 2009. This increase in revenue was meaningful since it was achieved despite a number of negative factors, including the charging of voice calls on a per-second basis from March 2010, the reduction of sign-up fees by 28% from December 2009 and the expansion of various discount plans. Operating income for 2010 amounted to Won 2,035.0 billion, which was lower than 2009, due among others to the increase in marketing and depreciation expenses. In 2010, however, the Company achieved meaningful business performance such as securing 3.91 million smart phone subscribers as of December 31, 2010. Net income in 2010 amounted to Won 1,411.0 billion, which increased from 2009.

The Company will comply with the guideline set by the Korea Communications Commission that limits marketing expenses of mobile communication business operators to stabilize the competition in the mobile service markets, while maintaining its competitive advantage based on fundamental strengths deriving from handsets, price plans, networks and contents. In 2010, the Company consistently strived to facilitate wireless Internet communication and enhance customers' benefits through the expansion of smart phone offerings, provision of unlimited data service and introduction of data-only frequency assignment, one-

person multi-device price plans and T-Store, which is an open marketplace for mobile applications. The vitalization of the Company's T-Store, which has grown rapidly in the number of subscribers, contents and downloads, has enhanced the Company's competitiveness in the wireless data market.

As of December 31, 2010, the Company reached a subscriber number of approximately 25,710,000 and a 50.6% market share of the wireless market in Korea in terms of the number of subscribers. The Company plans to establish its leadership among users of smart phones by introducing various mobile platforms and streamlining the subscription process and pricing structures to enable subscribers to easily access their mobile content from multiple devices. The Company also plans to maintain its leadership in wireless Internet market by providing innovative user interface for content access and through investment in data networks, network sharing and support of the content production. In 2010, the Company established platforms for future growth in business-to-business markets, such as industry productivity enhancement (IPE) business, in domestic and foreign markets. The Company currently provides more than 600 Korean companies with mobile office services, while the Company has achieved tangible results in certain industries including education, finance and medical services where the Company has focused its efforts. In 2011 the Company aims to become a global business-to-business service provider by providing its services to new industries, such as security, construction, heavy industries, farming and fishing. The Company will also continue its efforts to become a global leader in information and communication technology. It plans to actively respond to secular changes such as the growing popularity of smart phones and wireless Internet, as well as gaining competitive strengths in the IPE business. In particular, the Company intends to pursue opportunities to grow the wireless broadband and IPE businesses in Korea and abroad.

5. Derivative Transactions

In order to hedge risks related to fluctuations in currency exchange rates and interest rates, the Company enters into currency swap contracts and interest rate swap contracts. The gain or loss generated from the derivatives contracts is recognized as the gains/losses for the current period or other comprehensive income/loss, in accordance with Korean GAAP. Fair value of the Company's derivatives is calculated using the Company's valuation models. In accordance with the derivatives contracts, the Company's estimated gain/loss on the date of expiration is zero.

A. Currency Swap

(1) Purpose of Contracts: Hedging of risks related to fluctuations in currency exchange rates and interest rates

(2) Contract Terms

- Currency swap contract applying cash flow risk hedge accounting

The Company has entered into a currency swap contract with three banks including Citibank in order to hedge the foreign currency risk of unguaranteed U.S. dollar denominated bonds (face amounts totaling US \$300,000,000) issued on April 1, 2004. As of December 31, 2010, the Company reached a subscriber number of approximately 25.7 million and the Company's revenue in 2010 amounted to Won 12.46 trillion, despite rapid changes in the management environment, including a merger of a competitor. The Company's marketing expenses in 2010 (calculated in accordance with the Korea Communications Commission's guideline) amounted to Won 2.97 trillion, or 24.2% of the Company's revenue, which decreased 0.5%p from 2009. Operating income for 2010 amounted to Won 2.04 trillion, which was lower than 2009, due among others to the increase in depreciation expenses and a one-time increase in commissions paid in connection with the change of purchasing entity of handset installment receivables. Net income in 2010 amounted to Won 1.41 trillion. The Company spent Won 1.85 trillion for capital expenditures in 2010, which were used to expand Wi-Fi facilities and expand and upgrade the Company's WCDMA network, among others.

As of December 31, 2010, the Company held a 50.6% market share of the wireless market in Korea in terms of the number of subscribers. The Company plans to establish its leadership among users of smart phones by introducing various mobile platforms and streamlining the subscription process and pricing structures to enable subscribers to easily access their mobile content from multiple devices. The Company also plans to maintain its leadership in wireless Internet market by providing innovative user interface for content access and through investment in data networks, network sharing and support of the content production.

In 2010, the Company established platforms for future growth in business-to-business markets, such as industry productivity enhancement (IPE) business, in domestic and foreign markets. The Company currently provides more than 600 Korean companies with mobile office services, while the Company has achieved tangible results in certain industries including education, finance and medical services where the Company has focused its efforts. Total operating expenses	10,425	9,922	5%	9,922	9,615	3%

Labor costs increased in 2010 from the previous year due among others to a one-off effect of changing the Company's accounting policy related to annual bonus payments. Labor costs increased in 2009 from the previous year due among others to a change of bonus payment dates. Marketing commissions increased each of 2010 and 2009 from the previous year due primarily to an increase in initial commissions as a result of competitive market conditions and an increase in new subscribers. Other commissions increased in

2010 from the previous year due among others to a one-time increase in commissions paid in connection with the change of purchasing entity of handset installment receivables, and decreased in 2009 from the previous year due among others to a decrease in expenses related to long-term accounts receivable for handsets sold on installment payment plans.

Advertising costs decreased in 2010 from the previous year due to the Company's efforts to reduce expenses and decreased in 2009 from the previous year due to the reduction of media advertisements. Depreciation expenses increased in each of 2010 and 2009 from the previous year due principally to the acquisition of SK Networks leased-line business in the fourth quarter of 2009. Interconnection expenses decreased in 2010 from the previous year due primarily to decreases in interconnection rates and increased in 2009 from the previous year due among others to an increase in mobile-to-mobile interconnection traffic volume. Other operating expenses increased in 2010 from the previous year due among others to an increase in repair expenses related to the acquisition of SK Networks leased-line business and an increase in frequency usage expenses resulting from the new assignment of WCDMA frequency in 2010.

5. ANALYSIS OF NON-OPERATING INCOME / EXPENSES

2. Contingent Liabilities

A. Material Legal Proceedings

(1) Claim for Copyright License Fees regarding Coloring Services

On May 7, 2010, Korea Music Copyright Association (KOMCA) filed a lawsuit with the court demanding that the Company pay KOMCA license fees for the Company s Coloring services. The court rendered a judgment on February 18, 2011 against the Company ordering the Company to pay Won 570 million to KOMCA. The Company appealed the judgment to the appellate court on February 28, 2011. The Company plans to vigorously defend itself in the appellate court by emphasizing the character of service fees for Coloring services and the abuse of copyright by monopolistic or oligopolistic businesses. While the Company does not expect immediate impact on its business and financial condition from the litigation because the judgment amount is Won 570 million and the final outcome of the litigation has not been decided, the Company may be required to pay on-going license fees in the future if it loses in the final judgment.

* Actual impact on the Company s business and financial condition from the litigation may be different from the Company s expectation stated above.

B. Other Matters

The Company has no other blank bills, mortgage bills, assumption of debt agreement or other contingent liabilities.

3. Status of sanctions, etc.

A. Status of sanctions

The Company was sanctioned with a fine of Won 50 million on December 30, 2008 for a violation of Telecommunications Law involving its mismanagement of privacy policy. The Company continues to improve related system security and is implementing system enhancements, such as introduction of scanning devices, to avoid unnecessary keeping of applications at the distributor level.

Due to the Company s ineffective measures taken with respect to phone numbers that are used for sending illegal unsolicited bulk messages, the Korea Communications Commission, on April 23, 2009, ordered the Company to improve its work procedures. The Company completed the upgrade of the related computer system to prevent illegal messages on October 10, 2009.

On September 2, 2009, the Korea Communications Commission ordered the Company to improve its work procedures in a case relating to the obstruction of subscribers' utilization of wireless internet services. The Company completed the improvement of the procedures in consultation with the Korea Communications Commission by December 8, 2009.

On October 13, 2009, the Korea Communications Commission imposed on the Company a fine of Won 140 million and a newspaper notice order in a case relating to the subscription for mobile telephone services using national identification numbers of the deceased and the Company's failure to verify the required documents. The Company implemented the improved work procedures to strengthen identification process at the time of subscription for mobile telephone services in January 2010.

On December 2, 2010, the Korea Communications Commission imposed on the Company a fine of Won 6.2 billion and issued a correction order in a case relating to the obstruction of subscribers' utilization of wireless internet services. The Company paid the fine and completed the improvement of the procedures in consultation with the Korea Communications Commission by March 9, 2011.

In addition, on January 21, 2009, the Company was sanctioned for unfair business practices with a fine of Won 1,268 million by the Fair Trade Commission of Korea along with a correctional order of its policy of restricting certain rate plan subscribers from using third party portal contents. The Company has paid the fine and has taken efforts to educate applicable divisions of the issue and to improve the level of the voluntary compliance program to comply with fair trade laws to prevent a repeat of the same violation.

Also on February 3, 2009, the Company received a correctional order and a fine of Won 500 million from the Fair Trade Commission of Korea involving an unfair trade interference practice including refusal of applications for subscription for certain PDA phones distributed by third party manufacturers. The Company filed a suit at the Seoul High Court, which found in favor of the Company and cancelled the Fair Trade Commission's correctional order and fine. On August 19, 2010, the Supreme Court of Korea rejected the appeal by the Fair Trade Commission of Korea and finally confirmed the Seoul High Court's decision. Accordingly, the Fair Trade Commission's correctional order was cancelled and the Company was refunded the fine and interest in the amount of Won 538 million.

On April 8, 2010, the Company received a correctional order from the Fair Trade Commission of Korea for a violation of the Act on Fair Labeling and Advertising relating to 11th Street (the Company's online shopping mall). In response thereto, the Company has been taking efforts to prevent a repetitive violation including thorough pre-review of the advertisement and marketing activities of 11th Street and appropriate education for relevant employees.

B. Other important matters that occurred after December 31, 2010

(1) Additional sale of SK C&C stock

On February 11, 2011, the Company sold entire 2,050,000 shares (ownership interest 4.1%) of SK C&C Co., Ltd. (SK C&C) held by the Company, at a price of Won 97,900 per share (total sales price of Won 200,695 million).

Independent Auditors Report

English Translation of a Report Originally Issued in Korean
To the Stockholders and Board of Directors of
SK Telecom Co., Ltd.

We have audited the accompanying non-consolidated statements of financial position of SK Telecom Co., Ltd. (the Company) as of December 31, 2010 and 2009, and the related non-consolidated statements of income, appropriations of retained earnings, changes in stockholders' equity and cash flows for the years then ended, all expressed in Korean won. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above presents fairly, in all material respects, the financial position of the Company as of December 31, 2010 and 2009, and the results of its operations, changes in its retained earnings and its stockholders' equity, and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the Republic of Korea.

Our audits also comprehended the translation of the Korean won amounts into U.S. dollar amounts and, in our opinion, such translation has been made in conformity with the basis stated in Note 2(a). Such U.S. dollar amounts are presented solely for the convenience of readers of the financial statements.

SK TELECOM CO., LTD.
NOTES TO NON-CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2010 AND 2009

1. GENERAL

SK Telecom Co., Ltd. (the Company) was incorporated in March 1984 under the laws of Korea to engage in providing nationwide cellular telephone communication services in the Republic of Korea. The Company mainly provides wireless telecommunications in the Republic of Korea. The Company's common shares and depositary receipts (DRs) are listed on the Stock Market of Korea Exchange and the New York and London Stock Exchanges, respectively. As of December 31, 2010, the Company's total issued shares are held by the following:

	Number of shares	Percentage of total shares issued (%)
SK Group	18,748,452	23.22
POSCO Corp.	2,341,569	2.90
Institutional investors and other minority shareholders	50,004,978	61.93
Treasury stock	9,650,712	11.95
	80,745,711	100.00

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying non-consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the Republic of Korea. The accompanying financial statements were approved by the Company's board of directors on January 20, 2011. Significant accounting policies followed in preparing the accompanying financial statements are summarized as follows:

a. Basis of Presentation

The Company maintains its official accounting records in Korean won and prepares statutory non-consolidated financial statements in Korean language (Hangul) in conformity with the accounting principles generally accepted in the Republic of Korea (Korean GAAP). Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with accounting principles generally accepted in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying financial statements have been condensed, restructured and translated into English with certain expanded descriptions from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations, changes in stockholders' equity or cash flows, is not presented in the accompanying financial statements.

The accompanying financial statements are stated in Korean won, the currency of the country in which the Company is incorporated and operates. The translation of Korean won amounts into U.S. dollar amounts is included solely for the convenience of readers of financial statements and has been made at the rate of ₩1,130.60 to US\$1.00, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York on the last business day of the period ended December 31, 2010. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at that or any other rate.

b. Cash Equivalents

Cash equivalents are highly liquid investments and short term financial instruments, which are readily convertible to cash without significant transaction cost, do not have significant risk of changes in interest rates, and with original maturities of three months or less.

c. Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided based on the estimated collectibility of individual accounts and historical bad debt experience.

d. Inventories

Inventories, which consist mainly of replacement units for wireless telecommunication facilities, supplies for sales promotion and merchandise for e-commerce business, are stated at the lower of cost or market value, with cost determined using the moving average method. The Company maintains a perpetual inventory system, which is adjusted to physical inventory counts performed at year end. When the market value of inventories is less than the acquisition cost, the carrying amount is reduced to the market value and any difference is charged to current operations as operating expenses. There are no such losses recognized for the years ended December 31, 2010 and 2009.

e. Securities (Excluding Equity Securities Accounted for Using the Equity Method)

Debt and equity securities are initially recorded at their acquisition costs (fair value of consideration paid) including incidental cost incurred in connection with acquisition of the related securities and classified into trading and available-for-sale and in the case of debt securities into held-to-maturity securities as well depending on the acquisition purpose and nature.

Trading securities are stated at fair value with gains or losses on valuation reflected in current operations.

Securities classified as available-for-sale are reported at fair value. Unrealized gains or losses on valuation of available-for-sale securities are included in accumulated other comprehensive income (loss) and the unrealized gains or losses are reflected in net income when the securities are sold or if there is an objective evidence of impairment such as bankruptcy of investees. Equity securities are stated at acquisition cost if fair value cannot be reliably measured.

Held-to-maturity securities are presented at acquisition cost after premiums or discounts are amortized or accreted, respectively. The Company recognizes write-downs resulting from declines in the fair value below its book value on the balance sheet date if there is objective evidence of impairment. The related write-downs are recorded in current operations as a loss on impairment of investment securities.

Trading securities are presented in the current asset section of the financial position, and available-for-sale and held-to-maturity securities are presented in the current asset section of the statements of financial position if their maturities are within one year; otherwise, such securities are recorded in the non-current section of the statements of financial position.

f. Equity Securities Accounted for Using the Equity Method

Investment securities of affiliated companies, in which the Company has the ability to exercise significant influence, are carried using the equity method of accounting, whereby the Company's initial investment is recorded at cost and the carrying value is subsequently increased or decreased to reflect the Company's portion of stockholders' equity of the investee. Differences between the purchase cost and net asset fair value of the investee are amortized over 5 to 20 years using the straight-line method. When applying the equity method of accounting, unrealized inter-company gains and losses are eliminated (See Note 4). In addition, the Company provides for additional losses for those investments accounted for using the equity method that are reduced to zero to the extent that the Company has other investment assets related to the equity method investees.

When the Company's share of equity interest in the equity method investees increases as a result of capital transactions of the investees with (or without) consideration, the increase in the Company's proportionate shares in the investees are treated as goodwill or negative goodwill and when the Company's share of equity interest in the equity method investees decreases as a result of capital transactions of the investees with (or without) consideration, the decrease in the Company's proportionate shares in the investees are accounted for as gain or loss on disposal. However, if equity method investees are subsidiaries, such differences in the Company's proportionate shares in the investees are accounted for as increase (decrease) in capital surplus (or capital adjustments).

In translating the foreign currency statements of the Company's foreign-based investees, the Company applies (a) the current rate of exchange at the end of the reporting period to the items in investee's statements of financial position (except historical rates applied for stockholders' equity), and (b) the average rate for the current period for items in the statements of income. After translating the items in the statements of financial position and income as noted above, the Company's portion of the amount after deducting the translated total liabilities from translated total assets and equity is recorded as accumulated other comprehensive income (loss) in the Company's stockholders' equity.

g. Valuation of Long-term Accounts Receivable - Other

Long-term accounts receivable are stated at the present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts which are deducted directly from the related nominal receivable balances. Such imputed interest is included in operations using the effective interest rate method over the collection period.

h. Property and Equipment

Property and equipment are stated at cost less accumulated depreciation. Major renewals and betterments, which prolong the useful life or enhance the value of assets, are capitalized. Expenditures for maintenance and repairs are charged to expense as incurred.

Depreciation is computed using the declining balance method (except for buildings and structures acquired on or after January 1, 1995 which are depreciated using the straight-line method) over the estimated useful lives (4 to 30 years) of the related assets.

Interest expense and other financing charges for borrowings related to the manufacture or construction of property and equipment are charged to current operations as incurred.

i. Intangible Assets

Intangible assets are recorded at cost, less amortization computed using the straight-line method over 5 to 20 years. The amortization for the years ended December 31, 2010 and 2009 are ₩532,857 million and ₩482,813 million, respectively.

j. Impairment Losses

When the recoverable amount of assets (that are not recorded at fair value) including investment assets (except for trading and available for sale investments in listed companies), property and equipment, and intangible assets is significantly less than the carrying value due to obsolescence, physical damage, decline in market value or other causes, the carrying value is reduced to the recoverable amount and any difference is charged to current operation as an impairment loss. The Company recorded such impairment loss of ₩ 9,352 million and nil for the years ended December 31, 2010 and 2009, respectively.

k. Convertible Bonds

The proceeds from issuance of convertible bonds are allocated between the conversion rights and the debt issued; and the portion allocable to the conversion rights is accounted for as capital surplus with a corresponding conversion right adjustment deducted from the related bonds. Such conversion right adjustment is amortized to interest expense using the effective interest rate method over the redemption period of the convertible bonds. The portion allocable to the conversion rights is measured by deducting the present value of the debt at the time of issuance from the gross proceeds from issuance of convertible bonds, with the present value of the debt being computed by discounting the expected future cash flows (including call premium, if any) using the effective interest rate applied to ordinary or straight debt of the Company at the issue date.

l. Discounts on Bonds

Discounts on bonds are amortized to interest expense using the effective interest rate method over the redemption period of the bonds.

m. Valuation of Long-term Payables

Long-term payables resulting from long-term installment transactions are stated at the present value of the expected future cash flows. Imputed interest amounts are recorded in present value discount accounts which are deducted directly from the related nominal payable balances. Such imputed interest is included in operations using the effective interest rate method over the redemption period.

n. Provisions, Contingent Liabilities and Contingent Assets

The Company recognizes a provision when i) it has a present obligation as a result of a past event, ii) it is probable that a disbursement of economic resources will be required to settle the obligation, and iii) a reliable estimate can be made of the amount of the obligation (See Note 22). When a possible range of loss in connection with a probable loss contingency as of the balance sheet date is estimable with reasonable certainty, and some amount within that range appears at the time to be a better estimate than any other amount within the range, the Company accrues such amount. When no amount within the

range appears to be a better estimate than any other amount, the minimum in that range is recorded.

The Company does not recognize the following contingent obligations as liabilities:

Possible obligations related to past events, for which the existence of a liability can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

Present obligations arising out of past events or transactions, for which i) a disbursement of economic resources to fulfill such obligations is not probable or ii) a disbursement of economic resources is probable, but the related amount cannot be reasonably estimated.

In addition, the Company does not recognize potential assets related to past events or transactions, for which the existence of an asset or future benefit can only be confirmed upon occurrence of uncertain future event or events outside the control of the Company.

o. Accrued Severance Indemnities

In accordance with the Company's policy, all employees with more than one year of service are entitled to receive severance indemnities upon termination of their employment based on length of service and rate of pay. Accruals for severance indemnities are recorded to approximate the amount required to be paid if all employees were to terminate at the end of the reporting period.

The Company has deposits with insurance companies to fund the portion of the employees' severance indemnities which is in excess of the tax deductible amount allowed under the Corporate Income Tax Law, in order to take advantage of the additional tax deductibility for such funding. Such deposits with outside insurance companies, where the beneficiaries are the Company's employees, totaling ~~₩84,668 million and ₩66,476 million~~ as of December 31, 2010 and 2009, respectively, are deducted from accrued severance indemnities.

Actual payment of severance indemnities amounted to ~~₩17,867 million and ₩26,122 million~~ for the years ended December 31, 2010 and 2009, respectively.

p. Research and Development Costs

The Company charges substantially all research and development costs to expense as incurred. The Company incurred internal research and development costs of ~~₩264,417 million and ₩233,469 million~~ for the years ended December 31, 2010 and 2009, respectively. In addition, external research and development costs were ~~₩80,474 million and ₩55,528 million~~ for the years ended December 31, 2010 and 2009, respectively.

q. Accounting for Foreign Currency Transactions and Translation

Transactions denominated in foreign currencies are recorded in Korean won based on the prevailing rate of exchange at the dates of transactions. Monetary assets and liabilities denominated in foreign currency are translated into Korean won at the Base Rates announced by Seoul Money Brokerage Services, Ltd. at the end of the reporting period, which are ~~₩1,138.90 and ₩1,167.60~~ to US\$1.00 at December 31, 2010 and 2009, respectively. The resulting gains or losses arising from the translation or settlement of such assets and liabilities are included in current operations.

r. Derivative Instruments

The Company records rights and obligations arising from derivative instruments as assets and liabilities, which are stated at fair value. The gains and losses that result from the change in the fair value of derivative instruments are reported in current earnings. However, for derivative instruments designated as hedging the exposure of variable cash flows, the effective portions of the gains or losses on the hedging instruments are recorded as accumulated other comprehensive income (loss) and credited/charged to operations at the time the hedged transactions affect earnings, and the ineffective portions of the gains or losses are credited/charged immediately to operations.

s. Revenue Recognition

The Company recognizes revenue when they are realized or realizable and earned. Revenues are realized or realizable and earned when the Company has persuasive evidence of an arrangement, the goods have been delivered or the services have been rendered to the customer, sales price is fixed or determinable and collectability is reasonably assured.

The Company's revenue is principally derived from telecommunication service including data services and wireless device sales. Telecommunication service consists of fixed monthly charges, usage-related charges and non-refundable activation fees. Fixed monthly charges are recognized in the period earned. Usage-related charges are recognized at the time services are rendered. Non-refundable activation fees are recognized when the activation service was performed.

Meanwhile, the Company recognizes sales revenues on a gross basis when the Company is the primary obligator in the transactions with customers and if the Company merely acts an agent for the buyer or seller from whom it earns a commission, then sales revenues are recognized on a net basis.

t. Income Tax

Income tax expense is determined by adding or deducting the total income tax and surtaxes to be paid for the current period and the changes in deferred income tax assets and liabilities. Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences with some exceptions and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which the deductible temporary differences can be utilized. The carrying amount of deferred tax assets is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the assets to be recovered. Deferred income tax assets and liabilities are classified into current and non-current based on the classification of related assets or liabilities for financial reporting purposes (See Note 15).

u. Handset Subsidies

Effective April 1, 2008, the Telecommunication Business Act was revised to allow wireless carriers to provide handset subsidies to customers without any restrictions. As a result, the Company provides lump-sum handset subsidies to customers who agree to use the Company's service for the predetermined service period and the subsidies are charged to commission paid as the related payments are made. In case where the customers agree to use the Company's service for the predetermined service period and purchase handsets on installment basis, the subsidies are paid every month over the installment period and the Company provides provision for handset subsidies estimated to be paid based on the historical experience (See Note 22).

v. Use of Estimates

The Company's management makes reasonable estimates and assumptions in preparing the financial statements in conformity with accounting principles generally accepted in the Republic of Korea. These estimates and assumptions can change according to additional experiences, changes in circumstances, new information and other and could differ from actual results.

w. Reclassification in the prior year's financial statements

For the purpose of improving the quality of reporting, certain reclassifications have been made in the prior year's financial statements to conform to the classifications used in the current year. The reclassification of prior year's financial statements has no impact on equity or net income.

WiBro license	25,450	WiBro Service	(Note c)
DMB license	3,903	DMB Service	5 years and 6 months

(Note a) With its application for a license to provide IMT 2000 service, the Company has a commitment to pay ₩1,300,000 million to the Korea Communications Commission (KCC former Ministry of Information Communication). Of which, ₩650,000 million was paid in March 2001 by SK IMT Co., Ltd. (a former subsidiary of the Company), which was merged into the Company on May 1, 2003, and the remainder is required to be paid over 10 years with an annual interest rate equal to the 3-year-maturity government bond rate minus 0.75% (3.37% as of December 31, 2010). The future payment obligations is ₩170,000 million in 2011. On December 4, 2001, SK IMT Co., Ltd. received the IMT 2000 license from KCC, and recorded the total license cost (measured at present value) as an intangible asset. As a result of the merger with SK IMT Co., Ltd., the Company acquired such IMT license of ₩1,259,253 million and assumed the related long-term payable with principal amount of ₩650,000 million on May 1, 2003 (the date of merger). Amortization of the IMT license commenced when the Company started its commercial IMT 2000 service in December 2003, using the straight-line method over the estimated useful life of the IMT license which expires in December 2016. As of December 31, 2010, the present value discount related to the current portion of payments to be made to KCC totaled ₩1,052 million.

(Note b) On May 2010, the Company acquired additional W-CDMA license from KCC and recorded the total license cost (measured at present value) as an intangible asset. Amortization of the W-CDMA license commenced when the Company started to use the additional W-CDMA frequency in October 7, 2010, on a straight-line method basis over the estimated useful life of the W-CDMA license which expires in December 2016. In addition, the Company has a commitment to pay ₩53,100 million to the KCC with an annual interest rate equal to the government's previous year public funds financing account rate minus 1% (3.58% as of December 31, 2010). The future payment obligations are ₩17,700 million annually from 2012 to 2014. As of December 31, 2010, the present value discount related to the long-term portion of payments to be made to KCC total ₩2,457million.

(Note c) The Company purchased the WiBro license from KCC on March 30, 2005. The license period is seven years from the purchase date. Amortization of the WiBro license commenced when the Company started its commercial WiBro services on June 30, 2006 using the straight line basis over the remaining useful life.

(Note c) The 3-months LIBOR rate as of December 31, 2010 is 0.30%.

All of the above bonds will be paid in full at maturity.

On April 7, 2009, the Company issued convertible bonds with a maturity of five years in the principal amount of US\$332,528,000 for US\$326,397,463 with an initial conversion price of ₩230,010 per share of the Company's common stock, which was greater than market value at the date of issuance. The Company may redeem the principal amount after 3 years from the issuance date if the market price exceeds 130% of the conversion price during a predetermined period. On the other hand, the bond holders may redeem their notes at 100% of the principal amount on April 7, 2012 (3 years from the issuance date). The conversion right may be exercised during the period from May 18, 2009 to March 24, 2014 and the number of common shares to be converted As of December 31, 2010 is 2,090,996 shares.

Conversion of notes to common shares may be prohibited under the Telecommunications Law or other legal restrictions which restrains foreign governments, individuals and entities from owning more than 49% of the Company's voting stock, if this 49% ownership limitation is violated due to the exercise of conversion rights. In this case, the Company will pay a bond holder as cash settlement determined at the average price of one day after a holder exercises its conversion right or the weighted average price for the following five or twenty business days. The Company intends to sell treasury shares held in trust by the Company that corresponds to the number of shares of common stock that would have been delivered in the absence of the 49% foreign shareholding restrictions. Unless either previously redeemed or converted, the notes are redeemable at 100% of the principal amount at maturity. Conversion price has changed from ₩230,010 to ₩220,000 and the number of common shares that can be converted has changed from 1,999,997 shares to 2,090,996 shares due to the payment of periodic dividends in accordance with a resolution of Board of Directors at January 27, 2010 and payment of interim dividends in accordance with a resolution of the Board of Directors at July 22, 2010. During the year ended December 31, 2010, no conversion has been made.

Independent Accountant's Review Report on Internal Accounting Control System (IACS)

English Translation of a Report Originally Issued in Korean

To the Representative Director of

SK Telecom Co., Ltd.

We have reviewed the accompanying Report on the Management's Assessment of IACS (the Management's Report) of SK Telecom Co., Ltd. (the Company) As of December 31, 2010. The Management's Report, and the design and operation of IACS are the responsibility of the Company's management. Our responsibility is to review the Management's Report and issue a review report based on our procedures. The Company's management stated in the accompanying Management's Report that based on the assessment of the IACS As of December 31, 2010, the Company's IACS has been appropriately designed and is operating effectively As of December 31, 2010, in all material respects, in accordance with the IACS Framework established by the Korea Listed Companies Association. We conducted our review in accordance with the IACS Review Standards established by the Korean Institute of Certified Public Accountants. Those standards require that we plan and perform a review, objective of which is to obtain a lower level of assurance than an audit, of the Management's Report in all material respects. A review includes obtaining an understanding of a company's IACS and making inquiries regarding the Management's Report and, when deemed necessary, performing a limited inspection of underlying documents and other limited procedures.

The Company's IACS represents internal accounting policies and a system to manage and operate such policies to provide reasonable assurance regarding the reliability of financial statements prepared, in accordance with accounting principles generally accepted in the Republic of Korea, for the purpose of preparing and disclosing reliable accounting information. Because of its inherent limitations, IACS may not prevent or detect a material misstatement of the financial statements. Also, projections of any evaluation of effectiveness of IACS to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on our review, nothing has come to our attention that causes us to believe that the Management's Report referred to above is not fairly stated, in all material respects, in accordance with the IACS Framework established by the Korea Listed Companies Association.

Our review is based on the Company's IACS As of December 31, 2010, and we did not review its IACS subsequent to December 31, 2010. This report has been prepared pursuant to the Acts on External Audit for Stock Companies in the Republic of Korea and may not be appropriate for other purposes or for other users.

Report on the Assessment of Internal Accounting Control System (IACS)

To the Board of Directors and Audit Committee of
SK Telecom Co., Ltd.

I, as the Internal Accounting Control Officer (IACO) of SK Telecom Co., Ltd. (the Company), assessed the status of the design and operation of the Company s IACS for the year ended December 31, 2010.

The Company s management including IACO is responsible for designing and operating IACS. I, as the IACO, assessed whether the IACS has been appropriately designed and is effectively operating to prevent and detect any error or fraud which may cause any misstatement of the financial statements, for the purpose of preparing and disclosing reliable financial statements reporting. I, as the IACO, applied the IACS Framework established by the Korea Listed Companies Association for the assessment of design and operation of the IACS.

Based on the assessment of the IACS, the Company s IACS has been appropriately designed and is operating effectively as of December 31, 2010, in all material respects, in accordance with the IACS Framework.
