EBITDA is defined as net income before interest, income taxes, depreciation and amortization. EBITDA was presented because it is a required component of financial ratios reported by the Company to the Company's banks, and is also frequently used by securities analysts, investors and other interested parties, in addition to and not in lieu of Generally Accepted Accounting Principles (GAAP) results to compare to the performance of other companies who also publicize this information. Financial analysts frequently ask for EBITDA when it has not been presented. EBITDA is not a measurement of financial performance under GAAP and should not be considered an alternative to net income as indicator of the Company's operating performance or any other measure of performance derived in accordance with GAAP.

Limitation on Incorporation by Reference:

The information in this report, including exhibits, shall not be deemed filed for the purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that section.
