**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS**  
(Unaudited)

**1. Basis of Presentation**

The accompanying financial statements and notes thereto of Craft Brewers Alliance, Inc. (formerly Redhook Ale Brewery, Incorporated) (the Company) reflect the financial position of the Company as of June 30, 2008 and December 31, 2007, the results of operations for the three- and six-month periods ended June 30, 2008 and 2007, and its cash flows for the six-month periods ended June 30, 2008 and 2007. Accordingly, these financial statements do not reflect the effect that the July 1, 2008 merger of Widmer Brothers Brewing Company (Widmer) with and into the Company, as described in Note 8 below, had on the Company's financial statements. As well, these financial statements do not reflect the effect that the July 1, 2008 merger had on agreements between the Company and Craft Brands Alliance LLC (Craft Brands), including the merger of Craft Brands with and into the Company. See Note 4 for further discussion of Craft Brands.

The accompanying financial statements and related notes of the Company should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K, as amended, for the year ended December 31, 2007. These financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted pursuant to such rules and regulations. These financial statements are unaudited but, in the opinion of management, reflect all material adjustments necessary to present fairly the financial position, results of operations and cash flows of the Company for the periods presented. All such adjustments were of a normal, recurring nature. Certain reclassifications have been made to the prior year's financial statements to conform to the current year presentation. The results of operations for such interim periods are not necessarily indicative of the results of operations for the full year.

**2. Inventories**

Inventories consist of the following:

	<b>June 30, 2008</b>	<b>December 31, 2007</b>
Work in process	\$ 1,007,483	\$ 922,157
Raw materials	634,682	537,695
Finished goods, net	472,030	510,461
Packaging materials	469,334	487,210
Promotional merchandise, net	234,273	469,995
	<b>\$ 2,817,802</b>	<b>\$ 2,927,518</b>

Work in process is beer held in fermentation tanks prior to the filtration and packaging process. Promotional merchandise and finished goods are reduced by a \$104,000 and \$109,000 reserve for obsolescence as of June 30, 2008 and December 31, 2007, respectively.

**3. Other Current Assets**

Other current assets consist of the following:

	<b>June 30, 2008</b>	<b>December 31, 2007</b>
Deposits paid to keg lessor	\$ 818,010	\$ 655,800
Merger-related costs (see Note 8)	688,368	153,711
Prepaid insurance	50,294	201,175
Other	179,031	32,348
	<b>\$ 1,735,703</b>	<b>\$ 1,043,034</b>

**4. Craft Brands Alliance LLC**

On July 1, 2004, the Company entered into agreements with Widmer with respect to the operation of a joint venture sales and marketing entity, Craft Brands. Pursuant to these agreements, and through June 30, 2008, the Company manufactured and sold its product to Craft Brands at a price substantially below wholesale pricing levels; Craft Brands, in turn, advertised, marketed, sold and distributed the product to wholesale outlets in the western United States pursuant to a distribution agreement between Craft Brands and Anheuser-Busch, Incorporated ( A-B ).

In connection with the merger of Widmer with and into the Company, Craft Brands was also merged with and into the Company, effective July 1, 2008. All existing agreements between the Company and Craft Brands and between Craft Brands and Widmer terminated as a result of the merger of Craft Brands with and into the Company.

The restated operating agreement between the Company, Widmer and Craft Brands, as amended (the Operating Agreement ), governed the operations of Craft Brands and the obligations of its members, including capital contributions, loans and allocation of profits and losses:

The Operating Agreement required the Company to make certain capital contributions to support the operations of Craft Brands. Contemporaneous with the execution of the Operating Agreement, the Company made a 2004 sales and marketing capital contribution to Craft Brands in the amount of \$250,000. The agreement designated that this sales and marketing capital contribution be used by Craft Brands for expenses related to the marketing, advertising and promotion of the Company's products. Although the Company and Widmer amended the Operating Agreement in February 2007 and in February 2008 to require an additional sales and marketing contribution in 2009, the July 1, 2008 merger of Craft Brands into the Company eliminated any obligation by the Company or Widmer under these amendments.

The Operating Agreement obligated the Company and Widmer to make other additional capital contributions only upon the request and consent of the Craft Brands board of directors. No additional capital contributions were requested or made in connection with this obligation.

The Operating Agreement required the Company and Widmer to make loans to Craft Brands to assist Craft Brands in conducting its operations and meeting its obligations. To the extent that cash flow from operations and borrowings from financial institutions was not sufficient for Craft Brands to meet its obligations, the Company and Widmer were obligated to lend to Craft Brands the funds the president of Craft Brands deemed necessary to meet such obligations. As of June 30, 2008 and December 31, 2007, there were no loan obligations due to the Company.

The Operating Agreement addressed the allocation of profits and losses of Craft Brands. After giving effect to the allocation of the sales and marketing capital contribution, if any, and after giving effect to income attributable to the shipments of the Kona brand, which was shared differently between the Company and Widmer through 2006, the remaining profits and losses of Craft Brands were allocated between the Company and Widmer based on the cash flow percentages of 42% and 58%, respectively. Net cash flow, if any, was generally distributed monthly to the Company and Widmer based upon these cash flow percentages. No

**Table of Contents**

**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS** (continued)  
(Unaudited)

distribution was to be made to the Company or Widmer unless, after the distribution was made, the assets of Craft Brands were in excess of its liabilities, with the exception of liabilities to members, and Craft Brands was able to pay its debts as they became due in the ordinary course of business.

The Company has assessed its investment in Craft Brands pursuant to the provisions of Financial Accounting Standards Board ( FASB ) Interpretation No. 46 Revised, *Consolidation of Variable Interest Entities – an Interpretation of ARB No. 51* ( FIN 46R ). FIN 46R clarifies the application of consolidation accounting for certain entities that do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties or in which equity investors do not have the characteristics of a controlling financial interest; these entities are referred to as variable interest entities. Variable interest entities within the scope of FIN 46R are required to be consolidated by their primary beneficiary. The primary beneficiary of a variable interest entity is determined to be the party that absorbs a majority of the entity's expected losses, receives a majority of its expected returns, or both. FIN 46R also requires disclosure of significant variable interests in variable interest entities for which a company is not the primary beneficiary. The Company has concluded that its investment in Craft Brands meets the definition of a variable interest entity but that the Company was not the primary beneficiary. In accordance with FIN 46R, the Company has not consolidated the financial statements of Craft Brands with the financial statements of the Company, but instead accounted for its investment in Craft Brands under the equity method, as outlined by Accounting Principle Board Opinion ( APB ) No. 18, *The Equity Method of Accounting for Investments in Common Stock*. The equity method requires that the Company recognize its share of the net earnings of Craft Brands by increasing its investment in Craft Brands on the Company's balance sheet and recognizing income from equity investment in the Company's statement of operations. A cash distribution or the Company's share of a net loss reported by Craft Brands has been reflected as a decrease in investment in Craft Brands on the Company's balance sheet. The Company did not control the amount or timing of cash distributions by Craft Brands.

For the three months ended June 30, 2008 and 2007, the Company's share of Craft Brands' net income totaled \$637,000 and \$970,000, respectively. During the three months ended June 30, 2008 and 2007, the Company received cash distributions of \$947,000 and \$721,000, respectively, representing its share of the net cash flow of Craft Brands.

For the six months ended June 30, 2008 and 2007, the Company's share of Craft Brands' net income totaled \$1,390,000 and \$1,648,000, respectively. During the six months ended June 30, 2008 and 2007, the Company received cash distributions of \$1,467,000 and \$1,037,000, respectively, representing its share of the net cash flow of Craft Brands.

As of June 30, 2008 and December 31, 2007, the Company's investment in Craft Brands totaled \$339,000 and \$416,000, respectively.

The Company recognized the following sales and shipments of the Company's products to Craft Brands during the periods indicated:

	<b>Three Months Ended June</b>		<b>Six Months Ended June 30,</b>	
	<b>2008</b>	<b>2007</b>	<b>2008</b>	<b>2007</b>
Sales to Craft Brands	\$ 3,517,672	\$ 3,704,055	\$ 6,913,596	\$ 6,968,573
Shipments to Craft Brands (in barrels)	29,700	32,600	58,200	61,300
As a percentage of total Company shipments	39%	34%	40%	38%

In conjunction with the sale of product to Craft Brands, the Company's balance sheets as of June 30, 2008 and December 31, 2007 reflect a trade receivable due from Craft Brands of approximately \$551,000 and \$670,000, respectively. In conjunction with the sale of products in Washington state, where state liquor regulations require that the Company sell its product directly to third-party beer distributors, the Company's balance sheets as of June 30, 2008

and December 31, 2007 reflect a trade payable to Craft Brands, based upon a contractually determined formula, of approximately \$530,000 and \$416,000, respectively.

**Table of Contents**

**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS (continued)**  
(Unaudited)

**5. Common Stockholders Equity**

***Issuance of Common Stock***

In conjunction with the exercise of stock options granted under the Company's stock option plans, the Company issued 72,250 shares of Common Stock and received proceeds on exercise totaling \$181,000 during the six months ended June 30, 2008. During the six months ended June 30, 2007, the Company issued 38,500 shares of Common Stock and received proceeds on exercise totaling \$113,000.

On June 24, 2008, the board of directors approved, under the 2007 Stock Incentive Plan (the 2007 Plan), a grant of 1,140 shares of fully-vested Common Stock to each independent, non-employee director. In conjunction with these stock grants, the Company issued 4,560 shares of Common Stock and recognized stock-based compensation expense of \$20,000 in the Company's statement of operations during the quarter ended June 30, 2008.

On May 22, 2007, the board of directors approved a grant of 2,300 shares of fully-vested Common Stock to each independent, non-employee director, 10,000 shares of fully-vested Common Stock to the Chief Executive Officer Paul Shipman, and 5,000 shares of fully-vested Common Stock to President David Mickelson under the 2007 Plan. In conjunction with these stock grants, the Company issued 24,200 shares of Common Stock and recognized stock-based compensation expense of \$169,000 in the Company's statement of operations for the quarter ended June 30, 2007.

***Stock Plans***

The Company maintains several stock incentive plans under which non-qualified stock options, incentive stock options and restricted stock are granted to employees and non-employee directors. The Company issues new shares of Common Stock upon exercise of stock options. Under the terms of the Company's incentive stock option plans, employees and directors may be granted options to purchase the Company's Common Stock at the market price on the date the option is granted. Under these stock option plans, stock options granted at less than the fair market value on the date of grant are deemed to be non-qualified stock options rather than incentive stock options.

The Company maintains the 1992 Stock Incentive Plan, as amended (the 1992 Plan) and the Amended and Restated Directors Stock Option Plan (the Directors Plan) under which non-qualified stock options and incentive stock options were granted to employees and non-employee directors through October 2002. Employee options were generally designated to vest over a five-year period while director options became exercisable six months after the grant date. Vested options are generally exercisable for ten years from the date of grant. Although the 1992 Plan and the Directors Plan both expired in October 2002, preventing further option grants, the provisions of these plans remain in effect until all options terminate or are exercised.

The Company's shareholders approved the 2002 Stock Option Plan (the 2002 Plan) in May 2002. The 2002 Plan provides for granting of non-qualified stock options and incentive stock options to employees, non-employee directors and independent consultants or advisors. The compensation committee of the board of directors administers the 2002 Plan, determining to whom options are to be granted, the number of shares of Common Stock for which the options are exercisable, the purchase prices of such shares, and all other terms and conditions. Options granted to employees of the Company in 2002 under the 2002 Plan were designated to vest over a five-year period, and options granted to the Company's directors in 2002, 2003, 2004 and 2005 under the 2002 Plan became exercisable six months after the grant date. Options were granted at an exercise price equal to fair market value of the underlying Common Stock on the grant date and terminate on the tenth anniversary of the grant date. Options granted in 2006 under the 2002 Plan were granted to the Company's directors (other than A-B designated directors) at an exercise price less than the fair market value of the underlying Common Stock on the grant date. These options were immediately exercisable and each grantee exercised his option to purchase this Common Stock on the same day as the grant. The maximum number of shares of Common Stock for which options may be granted during the term of the 2002 Plan is 346,000. As of June 30, 2008, 100,259 options were available for future grant under the 2002 Plan.

The 2007 Plan was adopted by the board of directors and approved by the shareholders in May 2007. The 2007 Plan provides for stock options, restricted stock, restricted stock units, performance awards and stock appreciation rights. While incentive stock options may only be granted to employees,

**Table of Contents**

**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS (continued)**  
(Unaudited)

awards other than incentive stock options may be granted to employees and directors. The 2007 Plan is administered by the compensation committee of the board of directors. A maximum of 100,000 shares of Common Stock are authorized for issuance under the 2007 Plan. As of June 30, 2008, 71,240 shares of Common Stock are available for future issuance under the 2007 Plan.

***Accounting for Stock-Based Compensation***

Prior to the January 1, 2006 adoption of Statement of Financial Accounting Standards ( SFAS ) No. 123R, *Share-Based Payment*, the Company accounted for its employee and director stock-based compensation plans using the intrinsic value method, as prescribed by APB No. 25, *Accounting for Stock Issued to Employees*. Under the intrinsic value method, no stock-based compensation expense was recognized in the Company's statement of operations because the exercise price of the Company's stock options granted to employees and directors equaled the fair market value of the underlying Common Stock on the date of grant. As permitted, for all periods prior to January 1, 2006, the Company elected to adopt the disclosure only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, as amended by SFAS No. 148.

On November 29, 2005, the board of directors of the Company approved an acceleration of vesting of all of the Company's unvested stock options (the Acceleration). The Acceleration was effective for stock options outstanding as of December 30, 2005. These options were granted under the 1992 Plan and 2002 Plan. As a result of the Acceleration, options to acquire approximately 136,000 shares of the Company's Common Stock, or 16% of total outstanding options, became exercisable on December 30, 2005. Of the approximately 136,000 shares subject to the Acceleration, options to acquire approximately 70,000 shares of the Company's Common Stock at an exercise price of \$1.865 would have otherwise fully vested in August 2006, and options to acquire approximately 66,000 shares of the Company's Common Stock at an exercise price of \$2.019 would have otherwise vested in August 2006 and August 2007. The Acceleration did not have a material impact on 2006 or 2007 results of operations.

On January 1, 2006, the Company adopted SFAS No. 123R, *Share-Based Payment*, which revises SFAS No. 123 and supersedes APB No. 25. SFAS No. 123R requires that all share-based payments to employees and directors be recognized as expense in the statement of operations based on their fair values and vesting periods. The Company is required to estimate the fair value of share-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods in the Company's statement of operations. The Company elected to follow the modified prospective transition method, one of two methods prescribed by the standard, for implementing SFAS No. 123R. Under the modified prospective method, compensation cost is recognized beginning with the effective date (i) based on the requirements of SFAS No. 123R for all share-based payments granted after the effective date and (ii) based on the requirements of SFAS No. 123 for all awards granted to employees prior to the effective date of SFAS No. 123R that remain unvested on the effective date. No compensation expense was recognized in 2008 or 2007 for stock options outstanding as of December 31, 2005 because these options were fully vested prior to the January 1, 2006 adoption of SFAS No. 123R.

***Stock-Based Compensation Expense***

On June 24, 2008, the board of directors approved, under the 2007 Stock Incentive Plan, a grant of 1,140 shares of fully-vested Common Stock to each independent, non-employee director. In conjunction with these stock grants, the Company issued 4,560 shares of Common Stock and recognized stock-based compensation expense of \$20,000 in the Company's statement of operations during the quarter ended June 30, 2008.

On May 22, 2007, the board of directors approved a grant of 2,300 shares of fully-vested Common Stock to each independent, non-employee director, 10,000 shares of fully-vested Common Stock to the Chief Executive Officer Paul Shipman, and 5,000 shares of fully-vested Common Stock to President David Mickelson under the 2007 Plan. In conjunction with these stock grants, the Company issued 24,200 shares of Common Stock and recognized stock-based compensation expense of \$169,000 in the Company's statement of operations for the quarter ended June 30, 2007.

**Table of Contents**

**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS** (continued)  
(Unaudited)

There was no unrecognized stock-based compensation expense related to unvested stock options during the three and six months ended June 30, 2008 and 2007.

**Stock Option Plan Activity**

Presented below is a summary of the Company's stock option plan activity for the six months ended June 30, 2008:

	Shares	Weighted Average Exercise	Weighted Average Remaining	Aggregate Intrinsic Value
	Subject to Options	Price per Share	Contractual Life (Yrs)	
Outstanding at January 1, 2008	689,140	\$2.57	3.33	\$ 2,809,485
Granted				
Exercised	(72,250)			
Canceled	(30,600)			
Outstanding at June 30, 2008	586,290	\$2.42	2.98	\$ 1,284,261
Exercisable at June 30, 2008	586,290	\$2.42	2.98	\$ 1,284,261

The aggregate intrinsic value of the outstanding stock options is calculated as the difference between the stock closing price as reported by Nasdaq on the last day of the period and the exercise price of the shares. The applicable stock closing prices as of June 30, 2008 and January 1, 2008 were \$4.61 and \$6.65, respectively. The total intrinsic value of stock options exercised during the six months ended June 30, 2008 and 2007 was approximately \$153,000 and \$140,000, respectively. No options vested during the six months ended June 30, 2008 and 2007.

The following table summarizes information for options currently outstanding and exercisable at June 30, 2008:

Range of Exercise Prices	Number Outstanding & Exercisable	Average Remaining Contractual Life (Yrs)	Weighted Average Exercise Price
\$1.485 to \$1.865	305,540	3.07	\$1.859
\$1.866 to \$2.019	106,634	4.16	\$2.019
\$2.020 to \$3.969	174,116	2.08	\$3.648
\$1.485 to \$3.969	586,290	2.98	\$2.420

**6. Earnings (Loss) per Share**

The Company follows SFAS No. 128, *Earnings per Share*. Basic earnings (loss) per share is calculated using the weighted average number of shares of Common Stock outstanding. The calculation of adjusted weighted average shares outstanding for purposes of computing diluted earnings (loss) per share includes the dilutive effect of all outstanding stock options for periods when the Company reports net income. The calculation uses the treasury stock method and the as if converted method in determining the resulting incremental average equivalent shares outstanding

as applicable.

**Table of Contents**

**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS** (continued)  
(Unaudited)

The following table sets forth the computation of basic and diluted earnings (loss) per common share:

	<b>Three Months Ended June</b>		<b>Six Months Ended June 30,</b>	
	<b>2008</b>	<b>2007</b>	<b>2008</b>	<b>2007</b>
Numerator for basic and diluted net income (loss) per share net income (loss)	\$ (1,383,812)	\$ 532,724	\$ (1,928,217)	\$ 208,524
Denominator for basic net income (loss) per share weighted average common shares outstanding	8,391,246	8,325,438	8,373,594	8,310,440
Dilutive effect of stock options on weighted average common shares		441,863		437,252
Denominator for diluted net income (loss) per share	8,391,246	8,767,301	8,373,594	8,747,692
Basic net income (loss) per share	\$ (0.16)	\$ 0.06	\$ (0.23)	\$ 0.03
Diluted net income (loss) per share	\$ (0.16)	\$ 0.06	\$ (0.23)	\$ 0.02

**7. Income Taxes**

The Company records federal and state income taxes in accordance with SFAS No. 109, *Accounting for Income Taxes*. Deferred income taxes or tax benefits reflect the tax effect of temporary differences between the amounts of assets and liabilities for financial reporting purposes and amounts as measured for tax purposes as well as for tax net operating loss and credit carryforwards.

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109*, ( FIN 48 ). FIN 48 clarifies the accounting and disclosure requirements for uncertainty in income taxes recognized in an entity's financial statements in accordance with SFAS No. 109. The interpretation prescribes the minimum recognition threshold and measurement attribute required to be met before a tax position that has been taken or is expected to be taken is recognized in the financial statements. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition, and clearly excludes uncertainty in income taxes from guidance prescribed by FASB No. 5, *Accounting for Contingencies*. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company adopted this interpretation on January 1, 2007. The adoption of FIN 48 did not have a material impact on the Company's balance sheet or statement of operations.

As of June 30, 2008 and December 31, 2007, the Company's deferred tax assets were primarily comprised of federal net operating loss carryforwards ( NOLs ), federal and state alternative minimum tax credit carryforwards, and state NOL carryforwards. In assessing the realizability of the deferred tax assets, the Company considered both positive and negative evidence when measuring the need for a valuation allowance. The ultimate realization of deferred tax assets is dependent upon the existence of, or generation of, taxable income during the periods in which those temporary differences become deductible. The Company considered the scheduled reversal of deferred tax liabilities, projected future taxable income and other factors in making this assessment. The Company's estimates of future taxable income take into consideration, among other items, estimates of future taxable income related to

depreciation. Based upon the available evidence, the Company does not believe that all of the deferred tax assets will be realized. Accordingly, the Company's balance sheet as of June 30, 2008 and December 31, 2007 includes a valuation allowance of \$1,059,000 to cover certain federal and state NOLs that may expire before the Company is able to utilize the tax benefit. To the extent that the Company continues to be unable to generate adequate taxable income in future periods, the Company will not be able to recognize additional tax benefits and may be required to record a greater valuation allowance covering potentially expiring NOLs.

**Table of Contents**

**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS (continued)**  
(Unaudited)

The Company anticipates that, in connection with the closing of the merger with Widmer, the valuation allowance will no longer be required as of July 1, 2008. In accordance with SFAS No. 109, *Accounting for Income Taxes*, the valuation allowance will be eliminated against goodwill. See Note 8.

There were no unrecognized tax benefits as of June 30, 2008 or December 31, 2007. The Company does not anticipate significant changes to its unrecognized tax benefits within the next twelve months.

**8. Subsequent Event Merger with Widmer Brothers Brewing Company**

On November 13, 2007, the Company entered into an Agreement and Plan of Merger, as amended by Amendment No. 1 dated April 30, 2008 (the Merger Agreement) with Widmer. The Merger Agreement provided, subject to customary conditions to closing, for a merger (the Merger) of Widmer with and into the Company. A copy of the Merger Agreement was included as an exhibit to the Company's current report on Form 8-K filed with the Securities and Exchange Commission (SEC) on November 13, 2007. A copy of Amendment No. 1 to the Merger Agreement was included as an exhibit to the Company's registration statement on Form S-4/A filed with the SEC on May 2, 2008.

On July 1, 2008, the Merger was completed. Pursuant to the Merger Agreement and by operation of law, upon the merger of Widmer with and into the Company, the Company acquired all of the assets, rights, privileges, properties, franchises, liabilities and obligations of Widmer. Each outstanding share of capital stock of Widmer was converted into the right to receive 2.1551 shares of Company Common Stock, or approximately 8,361,514 shares. The Merger resulted in Widmer shareholders and existing Company shareholders each holding approximately 50% of the outstanding shares of the Company. No Widmer shareholder exercised statutory appraisal rights in connection with the Merger.

In connection with the Merger, the name of the Company was changed from Redhook Ale Brewery, Incorporated to Craft Brewers Alliance, Inc. The Common Stock of the Company continues to trade on the Nasdaq Stock Market under the trading symbol HOOK.

In 2007, the Company adopted a Company-wide severance plan that requires the payment of severance benefits to all full-time employees, other than executive officers, in the event that an employee's employment is terminated as a result of a merger or other business combination with Widmer. The Company is also party to employment arrangements with its executive officers which provide for severance payments to such officers upon termination of employment.

In connection with the Merger, including the preparation of the joint proxy/registration statement on Form S-4, the Company incurred legal, consulting, meeting and severance costs during the three and six months ended June 30, 2008 and 2007. Certain of the merger-related expenses have been reflected in the statement of operations as selling, general and administrative expenses and certain of the other merger-related costs have been capitalized as other current assets in the balance sheet in accordance with SFAS No. 141, *Business Combinations*. Presented below is a summary of the merger-related expenditures incurred during the periods indicated:

	Three Months Ended June		Six Months Ended June	
	2008	2007	2008	2007
Merger-related expenses reflected in statements of operations	\$ 1,090,805	\$ 110,041	\$ 1,168,655	\$ 169,931
Merger-related costs reflected in balance sheets	410,490		534,657	
Total legal, consulting, meeting and severance costs	\$ 1,501,295	\$ 110,041	\$ 1,703,312	\$ 169,931

**Table of Contents**

**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS (continued)**  
(Unaudited)

As of June 30, 2008 and December 31, 2007, other current assets on the Company's balance sheets include \$688,000 and \$154,000, respectively, in capitalized merger costs.

**Accounting for the Acquisition of Widmer**

The Company has estimated the aggregate purchase price of Widmer as follows:

Fair value of Common Stock issued	\$ 52,678,000
Interest-bearing debt assumed	30,082,000
Total purchase price	\$ 82,760,000

The fair value of the Common Stock issued was computed by multiplying the number of shares of Common Stock issued to Widmer security holders pursuant to the Merger times \$6.30, the average closing price of the Common Stock as reported by Nasdaq for the five trading days before and after November 13, 2007, the date of the Merger Agreement.

Under the purchase method of accounting, the purchase price will be allocated to the Company's estimate of the fair value of Widmer's tangible and intangible assets acquired and the liabilities assumed on July 1, 2008, the date of acquisition. Based upon a preliminary valuation of Widmer's tangible and intangible assets and liabilities, the Company estimates that the purchase price will be allocated as follows:

	<b>At July 1, 2008</b>
Current assets	\$ 21,841,000
Property, equipment and leasehold improvements	49,758,000
Equity investments	6,600,000
Trade name and trademarks	16,100,000
Intangible assets—recipes, distributor agreements, and non-compete agreements	2,000,000
Favorable contracts	3,470,000
Total assets acquired	99,769,000
Current liabilities	19,676,000
Deferred income tax liability, net and other noncurrent liabilities	12,374,000
Total liabilities assumed	32,050,000
Goodwill acquired (Total assets acquired less total liabilities assumed)	15,041,000
Elimination of valuation allowance for deferred tax assets	(1,059,000)
Incremental direct merger costs incurred by the Company	688,000
Total goodwill reported	\$ 14,670,000

The Company is in the process of obtaining third-party valuations of the property, equipment and leasehold improvements as well as of the intangible assets. Additionally, the Company has not yet finalized a fair value assessment of receivables, deferred taxes, inventories and other rights, privileges, assets and liabilities acquired. As the valuations and assessments are finalized, it is likely that the allocation of the purchase price will change.

Other than merger-related costs that were expensed and capitalized by the Company, the financial statements of the Company as of and for the three- and six-month periods ended June 30, 2008 do not reflect the effect that the Merger had on the Company's financial statements.

**Table of Contents**

**CRAFT BREWERS ALLIANCE, INC.**  
**NOTES TO FINANCIAL STATEMENTS** (continued)  
(Unaudited)

Acquired intangibles and their estimated remaining useful lives include:

Trade name and trademarks	Indefinite
Recipes	Indefinite
Distributor agreements	15 years
Non-compete agreements	3 years

In accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, the Company will not amortize goodwill but instead will perform an annual impairment test. If the carrying amount of goodwill exceeds its implied fair value, an impairment loss will be recognized. The Company will also evaluate potential impairment of long-lived assets in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. SFAS No. 144 establishes procedures for review of recoverability and measurement of impairment, if necessary, of long-lived assets and certain identifiable intangibles.

**Table of Contents****ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*This quarterly report on Form 10-Q includes forward-looking statements. Generally, the words believe, expect, intend, estimate, anticipate, project, will and similar expressions or their negatives identify forward-looking statements, which generally are not historical in nature. These statements are based upon assumptions and projections that Craft Brewers Alliance, Inc. (formerly Redhook Ale Brewery, Incorporated) (the Company) believes are reasonable, but are by their nature inherently uncertain. Many possible events or factors could affect the Company's future financial results and performance, and could cause actual results or performance to differ materially from those expressed, including those risks and uncertainties described in Part I, Item 1A. Risk Factors in the Company's Annual Report on Form 10-K, as amended, for the year ended December 31, 2007, and those described from time to time in the Company's future reports filed with the Securities and Exchange Commission. Caution should be taken not to place undue reliance on these forward-looking statements, which speak only as of the date of this quarterly report.*

*The following discussion and analysis should be read in conjunction with the Financial Statements and Notes thereto of the Company included herein, as well as the audited Financial Statements and Notes and Management's Discussion and Analysis of Financial Condition and Results of Operations contained in the Company's Annual Report on Form 10-K, as amended, for the fiscal year ended December 31, 2007. The discussion and analysis includes period-to-period comparisons of the Company's financial results. Although period-to-period comparisons may be helpful in understanding the Company's financial results, the Company believes that they should not be relied upon as an accurate indicator of future performance.*

**Merger with Widmer Brothers Brewing Company**

On November 13, 2007, the Company entered into an Agreement and Plan of Merger, as amended, with Widmer Brothers Brewing Company, an Oregon corporation (Widmer). On July 1, 2008, the merger of Widmer with and into the Company was completed (the Merger). In connection with the Merger, the name of the Company was changed from Redhook Ale Brewery, Incorporated to Craft Brewers Alliance, Inc. The Common Stock of the Company continues to trade on the Nasdaq Stock Market under the trading symbol HOOK.

Except where specifically indicated, this quarterly report on Form 10-Q does not address the effects of the Merger on the Company, its financial position or results of operations, its customers, suppliers, or employees, Craft Brands Alliance, or any of the Company's other material contractual arrangements.

**Overview**

Since its formation, the Company has focused its business activities on the brewing, marketing and selling of craft beers in the United States. The Company produces its specialty bottled and draft Redhook branded products in two Company-owned breweries, one in the Seattle suburb of Woodinville, Washington (the Washington Brewery) and the other in Portsmouth, New Hampshire (the New Hampshire Brewery).

Prior to July 1, 2004, the Company's sales consisted predominantly of sales of beer to third-party distributors and Anheuser-Busch, Incorporated (A-B) through the Company's Distribution Alliance with A-B. From July 1, 2004 through June 30, 2008, the Company's sales consisted of sales of product in the midwest and eastern U.S. to A-B pursuant to the July 1, 2004 A-B Distribution Agreement (the A-B Distribution Agreement), and sales to Craft Brands Alliance LLC (Craft Brands) in the western U.S.

Craft Brands was a joint venture sales and marketing entity formed by the Company and Widmer. The Company and Widmer manufactured and sold their product to Craft Brands at a price substantially below wholesale pricing levels; Craft Brands, in turn, advertised, marketed, sold and distributed the product to wholesale outlets in the western United States through a distribution agreement between Craft Brands and A-B. (Due to state liquor regulations, the Company sold its product in Washington state directly to third-party beer distributors and returned a portion of the revenue to Craft Brands based upon a contractually determined formula.) Profits and losses of Craft Brands were generally shared between the Company and Widmer based on the cash flow percentages of 42% and 58%, respectively. In connection with the Merger, Craft Brands was merged with and into the Company, effective July 1, 2008. All existing agreements between the Company and Craft Brands and between Craft Brands and Widmer terminated as a result of the merger of Craft Brands with and into the Company.

**Table of Contents**

For additional information regarding Craft Brands and the A-B Distribution Agreement, see Part 1, Item 1, Business Product Distribution Relationship with Anheuser-Busch, Incorporated and Relationship with Craft Brands Alliance LLC of the Company's Annual Report on Form 10-K, as amended, for the fiscal year ended December 31, 2007 and Craft Brands Alliance LLC below.

In addition to sales of beer, the Company derives other revenues from sources including the sale of retail beer, food, apparel and other retail items in its two brewery pubs.

For the six months ended June 30, 2008, the Company had gross sales and a net loss of \$22,439,000 and \$1,928,000, respectively, compared to gross sales and net income of \$23,027,000 and \$209,000, respectively, for the six months ended June 30, 2007.

As discussed in greater detail in Results of Operations, the Company's sales volume (shipments) decreased 10.2% to 144,600 barrels in the first six months of 2008 as compared to 161,100 barrels in the first six months of 2007. Sales in the craft beer industry generally reflect a degree of seasonality, with the first and fourth quarters historically being the slowest and the rest of the year typically demonstrating stronger sales. The Company has historically operated with little or no backlog, and its ability to predict sales for future periods is limited.

The Company's sales are affected by several factors, including consumer demand, price discounting and competitive considerations. The Company competes in the highly competitive craft brewing market as well as in the much larger specialty beer market, which encompasses producers of import beers, major national brewers that produce fuller-flavored products, and large spirit companies and national brewers that produce flavored alcohol beverages. Beyond the beer and flavored alcohol markets, craft brewers also face competition from producers of wines and spirits. The craft beer segment is highly competitive due to the proliferation of small craft brewers, including contract brewers, and the large number of products offered by such brewers. Imported products from foreign brewers have enjoyed resurgence in demand since the mid-1990s. Certain national domestic brewers have also sought to appeal to this growing demand for craft beers by producing their own fuller-flavored products. In recent years, the specialty segment has seen the introduction of flavored alcohol beverages, the consumers of which, industry sources generally believe, correlate closely with the consumers of the import and craft beer products. Sales of these flavored alcohol beverages were initially very strong, but growth rates have slowed in subsequent years. While there appear to be fewer participants in this category than at its peak, there is still significant volume associated with these beverages. The wine and spirits market has also experienced a surge in the past several years, attributable to competitive pricing, increased merchandising, and increased consumer interest in wine and spirits. Because the number of participants and number of different products offered in this segment have increased significantly in the past ten years, the competition for bottled product placements and especially for draft beer placements has intensified.

The Company is required to pay federal excise taxes on the sale of its beer. The excise tax burden on beer sales increases from \$7 to \$18 per barrel on annual sales over 60,000 barrels and thus, if sales volume increases, federal excise taxes would increase as a percentage of sales.

Management monitors the working capacity and maximum designed capacity of each brewery in connection with production and resource planning. Because an industry standard for defining brewery capacity does not exist, there are numerous variables that can be considered in arriving at an estimate of working capacity and maximum designed capacity. Following the Merger, management reviewed each facility, scrutinized the factors important to the Company in arriving at a practical definition of capacity, and recomputed the working capacity and maximum designed capacity of each brewery. Among the factors that management considered in estimating working capacity and maximum designed capacity are:

Brewhouse capacity, fermentation capacity, and packaging capacity;

A normal production year;

The product mix and product cycle times; and

Brewing losses and packaging losses.

Because the conditions under which each brewery operates (such as age of equipment, local environment, product mix) are slightly different, the impact that these factors have on the estimate of capacity also vary by brewery. For example, while the New Hampshire Brewery and the Portland, Oregon brewery (former Widmer brewery) (the Oregon Brewery ) are constrained by the volume of beer that each can ferment (each brewery can brew more beer than it can ferment), the Washington Brewery is constrained by the size of its brewhouse (the brewery has adequate capacity to ferment all product that is brewed).

**Table of Contents**

Management did not consider the impact that seasonality clearly has on the capacity calculation. Rather, management assumed that each brewery produces beer at 100% of working capacity throughout a 50 week year. But because seasonality is a notable factor affecting the Company's sales, the Company expects that the breweries' capacity will be more efficiently utilized during periods where the Company's sales are strongest and there likely will be periods where the breweries' capacity utilization will be lower.

Management estimates that the working capacity and maximum designed capacity (after all expansions and equipment upgrades have been completed) are:

	<b>As of July 1, 2008</b>	
	<b>Annual Working Capacity</b>	<b>Annual Maximum Designed Capacity</b>
	<i>(in barrels)</i>	
Washington Brewery	230,000	230,000
New Hampshire Brewery	146,700	231,000
Oregon Brewery (former Widmer brewery)	377,000	491,000
	<b>753,700</b>	<b>952,000</b>

In order to accommodate volume growth in the markets served by the New Hampshire Brewery, the Company has expanded fermentation capacity several times during the last several years. In May 2007, the Company completed process control automation upgrades to the brewery and added one 70,000 pound grain silo. In June 2007, the Company completed the installation of four additional 400-barrel fermenters. Installation cost for this expansion totaled \$1.3 million and added approximately 21,700 barrels of capacity to the New Hampshire Brewery, bringing the brewery's annual working capacity to approximately 146,700 barrels. The Company's 2008 capital projects include another expansion of brewing and fermentation capacity at the New Hampshire Brewery. The project includes a \$3.3 million addition of eight 400-barrel fermenters, four bright tanks, and improvements to the refrigeration, and a \$1.8 million upgrade to the water treatment system. The expansion is expected to increase working capacity by 43,300 barrels. The Company estimates that the expansion will be completed during the third quarter of 2008. Further expansion of fermentation capacity at the New Hampshire Brewery, which was originally slated for 2008, has been delayed until 2009 or later. Following the 2008 expansion, management estimates that the working capacity and maximum designed capacity will be:

	<b>As of September 1, 2008</b>	
	<b>Annual Working Capacity</b>	<b>Annual Maximum Designed Capacity</b>
	<i>(in barrels)</i>	
Washington Brewery	230,000	230,000
New Hampshire Brewery	190,000	231,000
Oregon Brewery (former Widmer brewery)	377,000	491,000
	<b>797,000</b>	<b>952,000</b>

The Company's capacity utilization has a significant impact on gross profit. Generally, when facilities are operating at their working capacities, profitability is favorably affected because fixed and semi-variable operating costs, such as depreciation and production salaries, are spread over a larger sales base. Because current period production levels have been below the Company's working capacity, gross margins have been negatively impacted. If the Company is unable to achieve significant sales growth, the resulting excess capacity and unabsorbed overhead of the Company will have an adverse effect on the Company's gross margins, operating cash flows and overall financial performance.

In addition to capacity utilization, other factors that could affect cost of sales and gross margin include sales to Craft Brands at a price substantially below wholesale pricing levels, sales of contract beer at a pre-determined

**Table of Contents**

contract price, changes in freight charges, the availability and prices of raw materials and packaging materials, the mix between draft and bottled product sales, the sales mix of various bottled product packages, and fees related to the A-B Distribution Agreement.

See Item 1A, Risk Factors below, and Part I, Item 1A. Risk Factors in the Company's Annual Report on Form 10-K, as amended, for the year ended December 31, 2007 for additional matters which could materially affect the Company's business, financial condition or future results.

**Results of Operations**

The following table sets forth, for the periods indicated, certain items from the Company's Statements of Operations expressed as a percentage of net sales:

	<b>Three Months Ended</b>		<b>Six Months Ended</b>	
	<b>June 30,</b>		<b>June 30,</b>	
	<b>2008</b>	<b>2007</b>	<b>2008</b>	<b>2007</b>
Sales	111.3%	113.2%	111.4%	112.6%
Less excise taxes	11.3	13.2	11.4	12.6
Net sales	100.0	100.0	100.0	100.0
Cost of sales	93.0	82.7	94.4	86.3
Gross profit	7.0	17.3	5.6	13.7
Selling, general and administrative expenses	22.7	17.1	21.6	19.6
Merger-related expenses	10.1	0.9	5.8	0.8
Income from equity investment in Craft Brands	5.9	8.1	6.9	8.0
Operating income (loss)	(19.9)	7.4	(14.9)	1.3

***Sales.*** Total sales decreased \$1,477,000 in the second quarter of 2008 compared to the second quarter of 2007, primarily impacted by the following factors:

A decrease in shipments in the midwest and eastern U.S., partially offset by an increase in pricing, resulted in a \$394,000 decrease in second quarter 2008 sales;

A decrease in shipments in the western U.S. (not including beer brewed on a contract basis), partially offset by an increase in pricing, resulted in a \$186,000 decrease in sales in the second quarter of 2008;

A decrease in shipments of beer brewed on a contract basis, slightly offset by an increase in pricing of these shipments, contributed to a \$960,000 decrease in sales in the second quarter of 2008; and

An increase of \$64,000 in pub and other sales in the second quarter of 2008 modestly offset the total sales decrease.

(1) International,  
non-wholesalers,  
pubs and other

Total Company shipments decreased 20.5% to 76,200 barrels in the second quarter of 2008 as compared to 95,800 barrels in the same quarter of 2007, primarily driven by a decrease in shipments of beer brewed on a contract basis. Shipments to wholesalers, both through A-B in the midwest and eastern U.S. and through Craft Brands in the west, also declined in nearly all markets as a result of multiple factors, including: an increase in national competition, particularly in the Hefeweizen category; a softening of the U.S. economy; price increases made in response to an increase in the cost of commodities; and transition issues surrounding the Merger. Driven by a shift in the timing of promotions and the timing of the fourth of July holiday, a decline in shipments to chain stores in the western U.S. contributed to an 11.0% decrease in shipments of the Company's packaged products, while a 11,200 barrel decrease in shipments of draft beer brewed on a contract basis was the primary factor in the 32.0% decrease in shipments of the Company's draft products. Excluding the impact of shipments of beer brewed on a contract basis, the Company's shipments of bottled beer have steadily increased as a percentage of total beer shipments since the mid-1990's. During the three months ended June 30, 2008, 63.4% of total shipments, excluding beer brewed under a contract brewing arrangement, were shipments of bottled beer versus 62.9% in the three months ended June 30, 2007.

In connection with the second quarter 2008 expansion of Widmer's Portland, Oregon brewery, Widmer requested that the Company brew significantly less beer under its contract brewing arrangements with the Company. As a result, beer brewed and shipped under contract brewing arrangements with Widmer decreased by 13,300 barrels during the second quarter of 2008. In connection with the Supply, Distribution and Licensing Agreement with Craft Brands, if shipments of the Company's products in the Craft Brands territory decreased as compared to the previous year's shipments, the Company had the right to brew Widmer products in an amount equal to the lower of (i) the Company's product shipment decrease or (ii) the Widmer product shipment increase (the Contractual Obligation). In addition, pursuant to a Manufacturing and Licensing Agreement with Widmer, the Company could, at Widmer's request, brew more beer for Widmer than the Contractual Obligation. Under these contract brewing arrangements, the Company brewed and shipped 18,000 barrels and 31,300 barrels of Widmer beer in the second quarter of 2008 and 2007, respectively. All of these shipments were in excess of the Contractual Obligation. Through 2006, these contract brewing arrangements were limited to brewing draft beer at the Washington Brewery. However, the Company began brewing and shipping bottled beer from the Washington Brewery during the second quarter of 2007 and the New Hampshire Brewery brewed and shipped draft beer during the second quarter of 2007. During the second quarter of 2008, approximately 56% of the 18,000 barrels shipped was packaged product and all of the barrels were brewed and shipped by the Washington Brewery. During the second quarter of 2007, approximately 39% of the 31,300 barrels shipped was packaged product and 3,700 barrels were brewed and shipped by the Washington Brewery. Excluding shipments under these contract brewing arrangements, 2008 second quarter shipments of the Company's draft and

bottled products decreased 9.7% as compared to the 2007 second quarter.

Included in the Company's total shipments (as shipments to A-B) are shipments of *Widmer Hefeweizen*, a golden unfiltered wheat beer that is one of the leading American style Hefeweizens sold in the U.S. The Company brewed *Widmer Hefeweizen* at the New Hampshire Brewery and distributed the beer through A-B in the midwest and eastern U.S. under license from Widmer. In 2003, the Company entered into a licensing agreement with Widmer to produce and sell the *Widmer Hefeweizen* brand in states east of the Mississippi River. In March 2005, the *Widmer Hefeweizen* distribution territory was expanded to include all of the Company's midwest and eastern markets. In the fourth quarter of 2006, the *Widmer Hefeweizen* distribution territory was again modified when Widmer exercised its contractual

**Table of Contents**

right to eliminate Texas from the Company's *Widmer Hefeweizen* distribution territory. During the term of this licensing agreement, the Company agreed that it would not brew, advertise, market, or distribute any product that is labeled or advertised as a Hefeweizen or any similar product in the agreed upon midwest and eastern territory. Brewing and selling of *Redhook Hefe-weizen* was discontinued in conjunction with this agreement. The Company shipped 6,800 barrels and 9,000 barrels of *Widmer Hefeweizen* in the second quarter of 2008 and 2007, respectively. The Company believes that this agreement increased capacity utilization and strengthened the Company's product portfolio.

Excluding shipments of beer brewed under the contract brewing arrangement with Widmer and under the *Widmer Hefeweizen* licensing agreement, total Company shipments in the U.S. decreased nearly 4,100 barrels, or 7.3% in the 2008 second quarter as compared to the 2007 second quarter. The Company is evaluating alternatives to maximize the utilization of the capacity of the Company in future periods. If the Company is unable to achieve significant growth through its own products, the Company may have significant unabsorbed overhead that would generate unfavorable financial results.

During the second quarter of 2008 and 2007, the Company's products were distributed in 48 states. Second quarter 2008 shipments in the midwest and eastern United States decreased by 11.5% and shipments in the western United States served by Craft Brands decreased 8.9% compared to the 2007 second quarter.

Sales in the midwest and eastern United States in the quarter ended June 30, 2008 represented approximately 35% of total shipments, or 26,900 barrels, compared to 32%, or 30,400 barrels in the quarter ended June 30, 2007. While most states in the midwest and eastern U.S. experienced a decline in shipments, contributing most significantly to the sales decline in the 2008 quarter were declines in Pennsylvania, New Jersey, Delaware, Virginia, West Virginia, Tennessee, Kentucky, Texas and Arkansas.

Sales to Craft Brands in the three months ended June 30, 2008 represented approximately 39% of total shipments, or 29,700 barrels, compared to 34%, or 32,600 barrels, in the three months ended June 30, 2007. Contributing to the decline in shipments in the western U.S. were a 10% decline in shipments in Washington and a 17% decline in shipments to California. Improvements were made in Oregon, where shipments were up nearly 7%, in Idaho, where shipments were up 41%, and in Arizona, where shipments were up 11%.

Since 2003, shipments of Redhook branded products in the Craft Brands territory have declined 15.8% and shipments in Washington state, the Company's largest and oldest market, have declined 16.3%. In addition, consumer and retailer demand for Redhook branded products has lagged behind the demand for Widmer and Kona products in the Craft Brands territory in recent years. Beginning in 2004, Craft Brands initiated a five-year plan to strengthen the Redhook brand by improving the volume trend through targeted distribution growth, systematic pricing increases to enhance perceived value and bolster brand profitability, and focused marketing programs to attract and retain Redhook consumers. Since these efforts were initiated, the Redhook brand sales trends in the Craft Brands territory have shown a slowing in the rate of decline and some modest growth during some periods. In 2004, the brand experienced a 9% decline over 2003 shipments in the Craft Brands territory. In 2005, 2006 and 2007, the year over year losses in the Craft Brands territory were 4%, 3% and 1%, respectively. The trend reversed itself somewhat in 2008 with an 8.9% decline in shipments during the first six months of 2008 when compared to the same period in 2007. The general trend towards improvement in shipments in the Craft Brands territory has been driven by a reversal of the negative trend in Washington state. Shipments of the Redhook brand declined 12% in 2004 in Washington when compared to 2003, 2% in 2005 when compared to 2004, and 5% in 2006 when compared to 2005. In 2007, however, shipments in Washington increased 2% over 2006. In Washington state, the Redhook brand has been a market leader for many years and has in-market pricing that is consistent with other top selling craft brands. Consequently, management believes that the trend reversal is more likely a result of additional focus in the form of selling efforts and brand awareness programs and less likely a result of pricing.

In select western U.S. markets, the Company had historically elected to price its products below the market leaders. Over the past four years, Craft Brands has systematically raised Redhook's in-market pricing to levels comparable to the market leaders. This strategy is intended to strengthen the perceived value of the Redhook brand over the long term. However, in the short term, it is expected that the Redhook brand may continue to experience volume declines in certain markets.

In addition to strengthening the perceived value of the Redhook brand, Craft Brands management has focused on enhancing value through re-branding efforts and these efforts are showing some positive results. Craft Brands initiative to re-brand *Redhook IPA* into *Long Hammer IPA* has resulted in positive momentum for the Company's fastest growing national brand. Management recognizes the benefits of these efforts and is reviewing packaging and

**Table of Contents**

marketing campaign changes that are expected to be introduced in 2008 and 2009 to build on the *Long Hammer IPA* success.

Different products within brand families go through different life cycles at different times. Although *Redhook ESB* has historically been a larger percentage of product volume, the Company has experienced a decline in shipments of this product over the last five years as this product has matured. *Long Hammer IPA* has now become the Company's primary growth product and its growth has substantially offset the loss of *Redhook ESB* volume in the last two years. During the same five-year period that shipments of Redhook branded product declined in the Craft Brands territory, sales of Kona and Widmer products have increased. Kona is a relatively new product, recently introduced into many of the states served by Craft Brands. Although this product has experienced the rapid growth of a new brand that benefits from growing distribution and new trial from consumers, it is somewhat smaller in volume than the Redhook or Widmer brands. The growth experienced by the Widmer brand during this five-year period has been led by the popular consumer response to the Hefeweizen category within the craft beer segment and the role that *Widmer Hefeweizen* has enjoyed in being a leader in this category. This category continues to experience very positive trends nationally, but in recent years has seen a significant increase in competitive products from other craft brewers as well as offerings from large domestic brewers attempting to participate in the same category. In the first half of 2008, the growth of *Widmer Hefeweizen* slowed to the point that 2008 shipments are unchanged from 2007 shipments. In the eastern half of the U.S. serviced by the Company's sales force, the Redhook brand growth has been fueled by increased distribution led by the growth of *Long Hammer IPA*. Recent data reporting sales in the grocery channel report that *Long Hammer IPA* is leading IPA in the craft beer market. The craft beer market in the east has not been as developed as in the west until recently and the Company has benefited from increased interest in the category, the re-branding efforts described above and its strong distribution network.

*Pricing and Fees.* During the three months ended June 30, 2008, the Company sold its product at wholesale pricing levels in the midwest and eastern U.S., at lower than wholesale pricing levels to Craft Brands in the western U.S., and at agreed-upon pricing levels for beer brewed on a contract basis.

The Company sold its product at wholesale pricing levels in the midwest and eastern U.S. through sales to A-B. Average wholesale revenue per barrel for draft products, net of discounts, improved more than 2% in the second quarter of 2008 compared to the same quarter of 2007. This increase in pricing accounted for an increase of approximately \$42,000 in total sales. Average wholesale revenue per barrel for bottle products, net of discounts, increased more than 5% in the second quarter of 2008 compared to the same quarter of 2007. This increase in pricing accounted for an increase of approximately \$195,000 in total sales. Management believes that most, if not all, craft brewers are reviewing their pricing strategies in response to recent increases in the costs of raw materials and the weak dollar. Seldom, if ever, have pricing changes in recent years been driven by an inflationary period. Instead, pricing changes implemented by the Company have generally followed pricing changes initiated by large domestic or import brewing companies. While the Company has implemented modest price increases during the past few years, some of the benefit has been offset by competitive promotions and discounting. The Company may experience a decline in sales in certain regions following a price increase.

The Company sold its product to Craft Brands at a price substantially below wholesale pricing levels pursuant to the Supply, Distribution and Licensing Agreement with Craft Brands; Craft Brands, in turn, advertised, marketed, sold and distributed the product to wholesale outlets in the western U.S. through a distribution agreement between Craft Brands and A-B. The prices that the Company charged for draft product and for bottled product were determined by contractually defined formulas and were based on twelve month average pricing ending September of the previous year for all Redhook and Widmer draft and bottled product sold by Craft Brands. The prices were adjusted on January 1st of each year. Average revenue per barrel for draft products sold to Craft Brands increased approximately 5% in the second quarter of 2008 compared to the same quarter of 2007. This increase in pricing accounted for an increase of approximately \$45,000 in total sales. Average revenue per barrel for bottle products sold to Craft Brands increased more than 3% in the second quarter of 2008 compared to the same quarter of 2007 resulting in an increase of \$103,000 in total sales.

Average revenue per barrel on beer brewed on a contract basis for Widmer pursuant to the Supply, Distribution and Licensing Agreement with Craft Brands was generally at a price substantially lower than wholesale pricing levels.

After the Contractual Obligation had been fulfilled pursuant to the Supply, Distribution and Licensing Agreement with Craft Brands, the price charged Widmer for any additional barrels brewed declined pursuant to the Manufacturing and Licensing Agreement with Widmer, as amended. Average revenue per barrel for draft beer brewed on a contract basis increased more than 7% in the second quarter of 2008 compared to the second quarter of 2007 resulting in an increase of \$102,000 in total sales. Average revenue per barrel for bottled beer brewed on a

**Table of Contents**

contract basis increased more than 2% in the second quarter of 2008 compared to the second quarter of 2007 resulting in an increase of \$34,000 in total sales.

In connection with all sales through the July 1, 2004 A-B Distribution Agreement, the Company pays a Margin fee to A-B. The Margin does not apply to sales from the Company's retail operations or to dock sales. The Margin also did not apply to the Company's sales to Craft Brands because Craft Brands paid a comparable fee to A-B on its resale of the product. The A-B Distribution Agreement also provides that the Company shall pay the Additional Margin on shipments that exceed shipments in the same territory during the same periods in fiscal 2003. During the quarter ended June 30, 2008, the Margin was paid to A-B on shipments totaling 26,900 barrels to 483 distribution points. During the quarter ended June 30, 2007, the Margin was paid to A-B on shipments totaling 30,400 barrels to 532 distribution points. Because 2008 and 2007 second quarter shipments in the midwest and eastern U.S. each exceeded 2003 second quarter shipments in the same territory, the Company paid A-B the Additional Margin on 1,500 and 5,100 barrels, respectively. For the quarters ended June 30, 2008 and 2007, the Company paid a total of \$218,000 and \$263,000, respectively, related to the Margin and Additional Margin. The Margin and Additional Margin are reflected as a reduction of sales in the Company's statements of operations.

As of June 30, 2008, the net amount due to A-B under all Company agreements with A-B totaled \$113,000.

*Retail Operations and Other Sales.* Sales through the Company's retail operations and other sales increased \$64,000 to \$1,726,000 in the 2008 second quarter from \$1,662,000 in the 2007 second quarter, primarily as the result of an increase in beer and food sales.

*Excise Taxes.* Excise taxes decreased \$352,000 to \$1,215,000 for the three months ended June 30, 2008 compared to \$1,567,000 for the three months ended June 30, 2007, primarily as a result of the overall decrease in shipments. The Company continues to be responsible for federal and state excise taxes for all shipments, including those to Craft Brands and brewed under contract. The comparability of excise taxes as a percentage of net sales is impacted by: average revenue per barrel; the mix of sales in the midwest and eastern United States, sales to Craft Brands, sales of beer brewed on contract basis, and pub sales; and the estimated annual average federal and state excise tax rates.

*Cost of Sales.* Cost of sales is comprised of direct and overhead costs incurred to produce the Company's package and draft products, as well as expenses associated with the Company's pub operations. Comparing the second quarter of 2008 to the second quarter of 2007, cost of sales increased by \$174,000, increased as a percentage of net sales and increased on a per barrel basis. Cost of sales and gross margin were negatively impacted by an increase in the cost of some raw materials and packaging materials, a higher proportion of packaged product and an increase in production losses.

In the second quarter of 2008, the Company experienced a 9% increase, or approximately \$6.10 per barrel, in the cost of packaging as compared to the second quarter of 2007. This increase, assuming no change in the mix of package versus draft sales, resulted in an increase in cost of sales of approximately \$288,000. This per barrel cost increase was compounded by an increase in 2008 second quarter shipments of packaged product relative to total shipments. Shipments of packaged product, excluding shipments of beer brewed on a contract basis, increased to 63.4% of total shipments in the 2008 second quarter from 62.9% in the 2007 second quarter.

According to industry and media sources, the cost of barley, wheat and hops, all primary ingredients in the Company's products, has increased significantly in recent months. Media sources estimate that the cost of barley increased 48% from August 2006 through June 2007, largely driven by a lower supply of barley as farmers shift their focus to growing corn, a key component of biofuels. The beer industry appears to also be experiencing a decline in the supply of hops, driven by a number of factors: excess supply in the 1990s led some growers to switch to more lucrative crops, resulting in an estimated 40% decrease in worldwide hop-growing acreage; poor weather in eastern Europe and Germany caused substantial hops crop losses in 2007; hops crop production in England has declined approximately 85% since the mid-1970s; and 2007 U.S., New Zealand, and Australia hops crop yields were only average. Wheat exports have increased by 30% because of the weak U.S. dollar and poor worldwide harvests, leading to U.S. supplies of wheat that are at the lowest levels in 60 years.

While the Company has experienced an increase in the cost of barley over the past year, the Company's fixed price contracts had limited that increase through August 2007 to less than 10%. The Company's existing barley purchase contracts expired during the third quarter of 2007, and the Company's new barley supply contracts reflect pricing that

is significantly higher than the pricing in the expired contracts. These new barley supply contracts provide a substantial portion of the Company's malted barley requirements for 2008. In 2007 and early 2008, the Company entered into fixed price purchase contracts for its specialty hops, both to assure that the Company will have the

**Table of Contents**

necessary supply for current and future production needs, but also to obtain favorable pricing. The Company believes that these contracts will provide a significant portion of its requirements for these hops for the next five years. While the cost of these hops is higher in some cases than the Company's cost in prior years, management believes that securing an adequate supply is crucial in the current environment.

On average, the Company experienced cost increases of approximately 27%, 9% and 1% for second quarter 2008 purchases of malted barley, wheat and hops, respectively. These cost increases resulted in an increase in second quarter 2008 cost of sales of approximately \$3.70 per barrel. At 2007 production levels, these raw materials cost increases resulted in an increase in cost of sales of approximately \$286,000. The Company will continue to seek opportunities to secure favorable pricing for its key materials. If the Company experiences difficulty in securing its key raw materials or continues to experience increases in the cost of these materials, it will have a material negative impact on the Company's gross margins and results of operations.

The Company's cost of sales includes a licensing fee of \$90,000 and \$125,000 for the 2008 and 2007 second quarters, respectively, in connection with the Company's shipment of 6,800 barrels and 9,000 barrels of *Widmer Hefeweizen* in the midwest and eastern United States pursuant to a licensing agreement with Widmer.

Based upon the Washington and New Hampshire Breweries' combined working capacity of 94,000 barrels and 89,000 barrels for the second quarter of 2008 and 2007, respectively, the utilization rate was 81% and 86%, respectively. Capacity utilization rates are calculated by dividing the Company's total shipments by the working capacity.

**Gross profit.** In the second quarter of 2008, the gross margin on wholesale shipments of bottled and draft product in the midwest and eastern U.S. averaged 24%. Although wholesale prices charged for bottled product are generally 40% to 50% higher than wholesale prices charged for draft product, the gross profit earned by the Company on bottled product and draft product does not follow this spread. In the second quarter of 2008, the gross profit per barrel for bottled product was approximately 6% higher than the gross profit per barrel for draft product. By comparison, in the second quarter of 2007, the gross profit per barrel for bottled product was approximately 1% lower than the gross profit per barrel for draft product. Because wholesale sales price increases have not increased at the same rate as packaging costs have increased in recent years, 2008 and 2007 gross profit per barrel for bottled product has been negatively impacted. If wholesale pricing does not increase at the rate of raw material and packaging cost increases, the Company's gross profit and results of operations will continue to be negatively impacted.

From July 2004 through June 30, 2008, the Company sold its draft and bottled product to Craft Brands in the western U.S. at prices determined by a contractually defined formula and based on twelve month average pricing ending September of the previous year for all product sold by Craft Brands. These prices, which were adjusted on January 1st of each year, were substantially below wholesale pricing levels. Although Craft Brands raised average wholesale prices along with most craft and domestic brewers in response to the cost pressure attributable to increases in cost of commodities, the Company's gross margin on package and draft product in the western U.S. does not reflect this pricing improvement because of the contractually determined pricing. However, not reflected in the Company's gross profit is the Company's 42% share of the profits of Craft Brands, where this benefit of the higher wholesale pricing was reflected. To the extent that Craft Brands benefited from higher average pricing, the Company generally also benefited by recognizing additional income from its investment in Craft Brands.

Because product brewed under contract brewing arrangements with Widmer was sold to Widmer at agreed-upon prices that were generally substantially below wholesale pricing levels, the Company's gross margin on package and draft product was also significantly less than the gross margin on wholesale shipments in the midwest and east. While these arrangements did not generally contribute to gross profit, the Company believes that these arrangements increased capacity utilization, helped the Company cover fixed and semi-variable operating costs after covering associated variable costs and contributed positively to the return received from Craft Brands.

**Merger-related expenses.** In connection with the Merger with Widmer and the preparation of a joint proxy/registration statement on Form S-4, the Company incurred approximately \$1,501,000 in legal, consulting, meeting, printing and severance costs during the quarter ended June 30, 2008.

Under the Company's 2007 severance plan, the Company is required to make severance payments to all full-time employees, other than executive officers, in the event that an employee's employment is terminated as a result of the

Merger with Widmer. The Company is also party to employment arrangements with current and former executive officers which provide for severance payments to such officers upon termination of employment. The Company estimates that severance benefits totaling approximately \$1.73 million will be paid to all affected Redhook employees, including executive officers, in connection with the Merger. Of the total severance, \$1.04 million was recognized as a
