CONSOLIDATED WATER CO. LTD.

(Exact name of Registrant as specified in its charter)

CAYMAN ISLANDS

N/A

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

Regatta Office Park
Windward Three, 4th Floor, West Bay Road
P.O. Box 1114 GT
Grand Cayman, KY1-1102, Cayman Islands

N/A

(Address of principal executive offices)

(Zip Code)

Registrant's Telephone number, including area code: **(345) 945-4277**

Securities registered pursuant to Section 12(b) of the Act:

Title of each class:

Common Stock, \$.60 Par Value

Name of each exchange on which registered:

The NASDAQ Stock Market LLC (NASDAQ Global Select Market)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this 10-K or any amendments to this Form 10-K. [Not Applicable]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definition of "large accelerated filer", "accelerated filer" and "smaller reporting

company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of common stock held by non-affiliates of the registrant, based on the closing sales price for the registrant's ordinary shares, as reported on the NASDAQ Global Select Market on June 30, 2007, was \$424,461,382.

As of March 10, 2008, 14,507,866 shares of the registrant's ordinary shares were outstanding.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements, including but not limited to, statements regarding our future revenues, future plans, objectives, expectations and events, assumptions and estimates.

Forward-looking statements can be identified by use of the words or phrases will, will likely result, are expected to, will continue, estimate, project, potential, believe, plan, anticipate, expect, intend, or similar expressions or variations of such words. Statements that are not historical facts are based on our current expectations, beliefs, assumptions, estimates, forecasts and projections for our business and the industry and markets related to our business. The forward-looking statements contained in this report are not guarantees of future performance and involve certain risks, uncertainties and assumptions which are difficult to predict. Actual outcomes and results may differ materially from what is expressed in such forward-looking statements. Important factors which may affect these actual outcomes and results include, without limitation, tourism and weather conditions in the areas we service, scheduled new construction within our operating areas, the economies of the U.S. and the areas we service, regulatory matters, availability of capital to repay debt and for expansion of our operations, and other factors, including those set forth under Part I, Item 1A. Risk Factors in this Annual Report.

The forward-looking statements in this Annual Report speak as of its date. We expressly disclaim any obligation or undertaking to update or revise any forward-looking statement contained in this Annual Report to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any forward-looking statement is based, except as may be required by law.

Unless otherwise indicated, references to we, our, ours and us refer to Consolidated Water Co. Ltd. and its subsidiaries.

Note Regarding Currency and Exchange Rates.

Unless otherwise indicated, all references to \$ or US\$ are to United States dollars.

The exchange rate for conversion of Cayman Island dollars (CI\$) into US\$, as determined by the Cayman Islands Monetary Authority, has been fixed since April 1974 at US\$1.20 per CI\$1.00.

The exchange rate for conversion of Belize dollars (BZE\$) into US\$, as determined by the Central Bank of Belize, has been fixed since 1976 at US\$ 0.50 per BZE\$1.00.

The exchange rate for conversion of Bahamian dollars (BAH\$) into US\$, as determined by the Central Bank of The Bahamas, has been fixed since 1973 at US\$1.00 per BAH\$1.00.

The official currency of the British Virgin Islands is the United States dollar.

The exchange rate for conversion of Bermuda dollars (BMD\$) into US\$ as determined by the Bermuda Monetary Authority, has been fixed since 1970 at US\$1.00 per BMD\$1.00.

Table of Contents**PART I****ITEM 1. BUSINESS****Overview**

We develop and operate seawater desalination plants and water distribution systems in areas where naturally occurring supplies of potable water are scarce or nonexistent. Through our subsidiaries and affiliate, we operate 12 reverse osmosis desalination plants and provide the following services to our customers in the Cayman Islands, Belize, the British Virgin Islands and the Bahamas:

Retail Water Operations. We produce and supply water to end-users, including residential, commercial and government customers in the Cayman Islands and a resort in the Bahamas. In the Cayman Islands, we operate under an exclusive retail license issued by the government to provide water in two of the most populated and rapidly developing areas in the Cayman Islands. In 2007, our retail water operations generated approximately 40% of our consolidated revenues.

Bulk Water Operations. We produce and supply water to government-owned distributors in the Cayman Islands, Belize and the Bahamas. In 2007, our bulk water operations generated approximately 45% of our consolidated revenues.

Services Operations. We provide engineering and management services for desalination projects, including designing and constructing desalination plants and managing and operating desalination plants owned by other companies. In 2007, our services operations generated approximately 15% of our consolidated revenues.

Affiliate Operations. Our affiliate, Ocean Conversion (BVI) Ltd. (OC-BVI), produces and supplies bulk water to the British Virgin Islands Water and Sewerage Department. We account for our interests in OC-BVI using the equity method of accounting and do not consolidate OC-BVI's operating results in our financial statements. Our affiliate Consolidated Water (Bermuda) Limited is presently constructing a plant on behalf of the Bermuda government which we expect will be completed in 2008. We will manage this plant on behalf of the Bermuda government for a period of not less than 12 months after its construction is completed.

As of December 31, 2007, the number of plants we, or our affiliate, manage in each country and the production capacities of these plants are as follows:

	Location	Plants	Capacity(1)
Cayman Islands		6	7.6
Bahamas		3	10.0
Belize		1	0.5
British Virgin Islands		2	1.7 ⁽²⁾
Total		12	19.8

(1) In millions of U.S. gallons per day.

(2) Owned and operated by OC-BVI. Does

not include
OC-BVI s
recently
constructed Bar
Bay plant that is
currently not in
use.

Strategy

Our strategy is to provide water services in areas where the supply of potable water is scarce and we believe the production of potable water by reverse osmosis desalination is, or will be, profitable. We have focused on the Caribbean basin and adjacent areas as our principal market because they possess the following characteristics which make them attractive for our business.

little or no naturally occurring fresh water;

limited regulations and taxes allowing for higher returns;

a large proportion of tourist properties, which historically have generated higher volume sales than residential properties; and

growing populations and tourism levels.

Table of Contents

Although we are currently focused primarily on these areas, we believe that our potential market includes any location with a demand for, but a limited supply of, potable water. The desalination of seawater is the most widely used process for producing fresh water in areas with an insufficient natural supply. In addition, in many locations, desalination is the only commercially viable means to expand the existing water supply. We believe that our experience in the development and operation of reverse osmosis desalination plants provides us with a competitive advantage to successfully expand our operations.

Key elements of our strategy include:

Maximizing the benefits of our exclusive retail license on Grand Cayman. We plan to continue to increase operations within our exclusive retail license service area through organic growth and possible further investments, if opportunities become available.

Expanding our existing operations in the Cayman Islands, Belize and The Bahamas. We plan to continue to seek new water supply agreements and licenses and focus on renewing our existing service contracts with extended terms and greater production levels.

Penetrating new markets where there is demand for potable water and where we believe production would be profitable. We plan to continue to seek opportunities to expand our operations into new markets including, but not limited to, markets throughout the Caribbean basin, Central America and South America. We may pursue these opportunities either on our own or through joint ventures and strategic alliances.

Broadening our existing and future operations into complementary services. We continue to consider and pursue opportunities to leverage our water-related expertise to enter complementary service industries, such as wastewater management.

Our Company

We conduct our operations in the Cayman Islands, The Bahamas, the British Virgin Islands, Belize and the United States through the following principal operating subsidiaries and affiliate:

Consolidated Water (Belize) Limited (or CW-Belize). In 2000, we acquired CW-Belize, (formerly Belize Water Limited), which has an exclusive contract to provide bulk water to Belize Water Services Ltd., a water distributor that serves residential, commercial and tourist properties in Ambergris Caye, Belize.

Cayman Water Company Limited (or Cayman Water). In 1998, we established Cayman Water, which operates under an exclusive retail license granted by the Cayman Islands government to provide water to customers within a prescribed service area, on Grand Cayman that includes the Seven Mile Beach and West Bay areas, two of the three most populated areas in the Cayman Islands. The only non government owned public water utility on Grand Cayman, Cayman Water owns and operates three desalination plants on Grand Cayman.

Table of Contents

Ocean Conversion (Cayman) Limited (or OC-Cayman). We acquired OC-Cayman which provides bulk water under various licenses and agreements to the Water Authority-Cayman, a government-owned utility and regulatory agency, which distributes the water to properties located outside our exclusive retail license service area in Grand Cayman. OC-Cayman operates three desalination plants owned by Water Authority-Cayman.

Consolidated Water (Bahamas) Limited (or CW-Bahamas). We acquired a 90.9% equity interest in CW-Bahamas (formerly Waterfields Company Limited), which provides bulk water under a long-term contract to the Water and Sewerage Corporation of The Bahamas, a government agency. CW-Bahamas second desalination plant, our largest, was substantially completed in July 2006. CW-Bahamas pays fees to two of our other subsidiaries for certain administrative services.

Aquilex, Inc. In 2005, we established Aquilex, a United States company, which provides financial, engineering and supply chain management support services to our subsidiaries and affiliates.

Ocean Conversion (BVI) Ltd. (or OC-BVI). We own 50% of the voting stock of our affiliate, OC-BVI, a British Virgin Islands company, which sells bulk water on a month-to-month basis to the Government of The British Virgin Islands Water and Sewage Department. We own an overall 43.5% equity interest in OC-BVI's profits and certain profit sharing rights that raise our effective interest in OC-BVI's profits to approximately 45%. OC-BVI also pays us fees for providing certain engineering and administrative services.

DesalCo Limited (or DesalCo). We acquired DesalCo, a Cayman Islands company, which provides management, engineering and construction services for desalination projects and is the exclusive Caribbean distributor of the DWEER energy recovery system, an advanced technology used to recapture energy from the discharged brine that is a by-product of the reverse osmosis desalination process.

Consolidated Water (Bermuda) Limited (or CW-Bermuda). In January 2007, our affiliate, Consolidated Water (Bermuda) Limited (CW-Bermuda) entered into a design, build and operate agreement with the Government of Bermuda for a desalination plant located on Tynes Bay along the northern coast of Bermuda. Under the agreement, CW-Bermuda, will construct the plant and operate it for a minimum of 12 months after its commissioning. We are loaning CW-Bermuda the funds to construct the plant and we will manage the plant's operations. We expect construction of the Tynes Bay plant to be completed in June 2008. Although we own only 40% of the common shares of CW-Bermuda, we include its amounts in our consolidated financial statements as we are its primary financial beneficiary.

Our Operations

We have three principal business segments: retail water operations, bulk water operations and services operations. Our retail water operations supply water to end-users, including residential, commercial and government customers. Through our bulk water operations we supply water to distributors and commercial suppliers, including governments and wholesalers. Our retail and bulk operations serve customers in the Cayman Islands, Belize, the British Virgin Islands and The Bahamas. Our services operations provide engineering and management services, which include designing and constructing desalination plants, and managing and operating plants owned by other companies. For fiscal year 2007, our retail water, bulk water and service operations generated approximately 40%, 45% and 15%, respectively, of our consolidated revenues. For information about our business segments and geographical information about our operating revenues and long-lived assets, see Note 17 to our audited consolidated financial statements at Item 18 of this Annual Report.

Retail Water Operations

For fiscal years 2007, 2006 and 2005, our retail water operations accounted for approximately 40%, 47% and 51%, respectively, of our consolidated revenues. These operations are comprised of businesses in the Cayman Islands and The Bahamas that produce and supply water to end-users, including residential, commercial and government

customers.

Table of Contents

Retail Water Operations in the Cayman Islands

We sell water through our retail operations to a variety of residential and commercial customers through our wholly-owned subsidiary Cayman Water, which operates under an exclusive license issued to us by the Cayman Islands government under The Water Production and Supply Law of 1979. Pursuant to the license, we have the exclusive right to produce potable water and distribute it by pipeline to our licensed service area which includes the Seven Mile Beach and West Bay areas of Grand Cayman, two of the three most populated areas in the Cayman Islands.

Under our exclusive license, we pay a royalty to the government of 7.5% of our gross water sales revenues. The selling prices of water sold to our customers, except for the prices under our agreements with the Cayman Beach Suites Hotel, Britannia Golf Course and North Sound Golf Club, are set out under the license and vary depending upon the type and location of the customer and the monthly volume of water purchased. The license provides for an automatic adjustment for inflation or deflation on an annual basis, subject to temporary limited exceptions, and an automatic adjustment for the cost of electricity on a monthly basis. The Water Authority-Cayman, on behalf of the government, reviews and confirms the calculations of the price adjustments for inflation and electricity costs. If we want to adjust our prices for any reason other than inflation or electricity costs, we have to request prior approval of the Cabinet of the Cayman Islands government. Disputes regarding price adjustments are referred to arbitration. Our last price increase, requested in June 1985, was granted in full.

Under our exclusive license, we must provide any requested piped water service within our exclusive retail license service area that is commercially feasible, as determined by the Cabinet of the Cayman Islands government. Where service is not considered commercially feasible, we may require the potential customer to contribute toward the capital costs of pipe-laying. We then repay these contributions to the customer, without interest, by way of a 10% discount on future billings for water sales until this advance in aid of construction has been repaid.

Unless renewed, our exclusive license expires in July 2010. Two years prior to the expiration of the license, we have the right to negotiate with the government to extend the license for an additional term. Unless we are in default under the license, the government may not grant a license to any other party without first offering the license to us on terms that are no less favorable than those which the government offers to a third party.

Facilities

Our retail operations in the Cayman Islands currently produce potable water at three reverse osmosis seawater conversion plants in Grand Cayman: our Governor's Harbour, West Bay and Britannia plants. We own the land for our Governor's Harbour and West Bay plants and have entered into a lease for the land for our Britannia plant which has more than 19 years remaining. The current production capacity of our Governor's Harbour plant is 2.2 million U.S. gallons of water per day. This production capacity was expanded on a temporary basis during 2007 from the original capacity of 1.2 million U.S. gallons per day, and we anticipate completing a permanent expansion of the plant's capacity by March 2009. The production capacity of the Britannia plant is 715,000 U.S. gallons of water per day. The Britannia plant was destroyed by Hurricane Ivan in September 2004 but was rebuilt and placed back in operation in October 2005. The production capacity of the West Bay plant was 710,000 U.S. gallons of water per day during 2007 and we completed an expansion of the production capacity of this plant to 920,000 U.S. gallons of water per day in January 2008. Since the Governor's Harbour and West Bay plants began production of water, they have consistently been capable of operating at or near their rated capacity.

Electricity to our plants is supplied by Caribbean Utilities Co. Ltd. (CUC), a publicly traded utility company. At all three plant sites from which we supply water to our distribution pipeline we maintain diesel driven, standby generators with sufficient capacity to operate our distribution pumps and other essential equipment, but not our reverse osmosis desalination equipment, during any temporary interruptions in electricity supply. Feed water for the reverse osmosis units is drawn from deep wells with associated pumps on the properties. Reject water is discharged into brine wells on the properties at a deeper level than the feed water intakes.

In the event of an emergency, our distribution system is connected to the distribution system of Water Authority-Cayman. In prior years in order to efficiently maintain our equipment, we have purchased water from Water Authority-Cayman for brief periods of time. We have also sold potable water to Water Authority-Cayman.

Our pipeline system in the Cayman Islands covers the Seven Mile Beach and West Bay areas of Grand Cayman and consists of approximately 68 miles of PVC pipeline. We extend our distribution system periodically as property developments are completed. We have a main pipe loop covering a major part of the Seven Mile Beach area. We place extensions of smaller diameter pipe off our main pipe to service new developments in our service area. This system of building branches from the main pipe keeps construction costs low and allows us to provide service to new areas in a timely manner. During 2006 and 2007, we completed a number of small

Table of Contents

pipeline extensions into newly developed properties within our distribution system. Developers are responsible for laying the pipeline within their developments at their own cost, but in accordance with our specifications. When a development is completed, the developer then transfers operation and maintenance of the pipeline to us.

We have a comprehensive layout of our pipeline system, superimposed upon digital aerial photographs, which is maintained using a computer aided design system. This system is interconnected with a computer generated hydraulic model, which allows us to accurately locate pipes and equipment in need of repair and maintenance. It also helps us to plan extensions and upgrades.

Customers

We enter into standard contracts with hotels, condominiums and other properties located in our existing licensed area to provide potable water. In the Seven Mile Beach area, our primary customers are the hotels and condominium complexes that serve the tourist industry. In the West Bay area, our primary customers are residential homes. Although adversely impacted in 2004 and 2005 by Hurricane Ivan, which struck the island in September 2004, development continues to take place on Grand Cayman, and particularly in our licensed area, to accommodate both the growing local population and the tourism market. Because our license requires us to supply water to developments in our licensed area, the planning department of the Cayman Islands government routinely advises us of proposed developments. This advance notice allows us to manage our production capacity to meet anticipated demand. We believe that we have a sufficient supply of water to meet the foreseeable future demand.

We bill on a monthly basis based on metered consumption and bills are typically collected within 30 to 35 days after the billing date and receivables not collected within 45 days subject the customer to disconnection from water service. In 2007 and 2006, bad debts represented less than 1% of our total annual sales. Customers who have had their service disconnected must pay re-connection charges.

The following table sets forth our approximate total number of customer connections and the volume of water sold in the Cayman Islands as of, and for the indicated years ended December 31:

Cayman Islands Retail Water Customer Connections and Volume of Water Sold

	2007	2006	2005	2004	2003
Number of Customer Connections	4,600	4,300	3,800	3,600	3,300
Volume of Water Sold (U.S. Gallons, In Thousands):					
Commercial	554,087	562,702	427,439	451,609	429,013
Residential	202,988	173,665	157,924	122,699	107,528
Government	45,623	12,789	8,929	7,584	6,164
Total	802,698	749,156	594,292	581,892	542,705

The table above does not precisely represent our actual number of customers or facilities that we serve. For example, in hotels and condominiums, we may only have a single customer who is the operator of the hotel or the condominium while supplying water to all of the units within that hotel or condominium development. Of the customer connections indicated in the table above for 2007, 66% were residential, 33% were hotels, condominiums and other commercial customers and 1% were government facilities.

Historically, demand on our pipeline distribution has varied throughout the year. Demand depends upon the number of tourists visiting and the amount of rainfall during any particular time of the year. In general, the majority of tourists come from the United States during the winter months.

Table of Contents

Before 1991, any owner of property within our licensed area could install water-making equipment for its own use. Since 1991, that option is only available to private residences, although water plants in existence prior to 1991 can be maintained but not replaced or expanded. We know of only one plant that continues to operate under such exemption at a hotel within our license area and we believe that the amount of water produced by this plant is insignificant to our operations.

Retail Water Operations in The Bahamas

In The Bahamas, we sell retail water through our South Bimini operation.

Facilities

We own and operate a reverse osmosis seawater conversion plant on South Bimini Island, The Bahamas, capable of producing 115,000 U.S. gallons of water per day.

Customers

We provide retail water to South Bimini International Ltd (SBI), a Bahamian company, pursuant to a water supply agreement entered into with SBI in 2000. Under our agreement, we provide potable water to Bimini Sands Resort, a marina and condominium development. Under our agreement, SBI is committed to pay for a minimum of 3,000 U.S. gallons of water per customer per month (36,000 U.S. gallons per customer per year) on a take or pay basis for the Bimini Sands Resort. The price of water supplied is adjusted for inflation annually based on Bahamian and U.S. government indices, and adjusted monthly for changes in the cost of electricity. We have also sold water intermittently to the Water and Sewerage Corporation of the Bahamas (WSC) when their regular supply was unavailable. During 2007, we supplied SBI with 4.4 million U.S. gallons of water and the WSC with 3.9 million U.S. Gallons of water. We believe that water sales in Bimini will continue to be cyclical. We expect that our sales will be higher during the summer months when tourists and fishermen arrive from the United States by boat, and when several large angling tournaments are traditionally held in Bimini. We expect that sales will be lower during winter months when the weather is not conducive to pleasure boat travel from the United States.

Retail Water Demand and Average Sales Prices

The table below sets forth the total volume of water we supplied to our retail water customers on a quarterly basis for the indicated years ended December 31:

Retail Water Total Volume by Quarter
(U.S. Gallons, In Thousands)

	2007	2006	2005	2004	2003
First Quarter	217,263	209,334	146,461	176,346	141,575
Second Quarter	221,453	213,570	159,745	175,813	144,134
Third Quarter	189,734	175,971	137,881	123,512	125,510
Fourth Quarter	182,531	156,640	154,972	110,754	134,957
Total	810,981	755,515	599,059	586,425	546,176

Our average sales prices of potable water sold to our retail water customers for the indicated years ended December 31 were:

Retail Water Average Sales Prices

	2007	2006	2005
Average Sales Price Per 1,000 U.S. Gallons	\$23.66	\$23.82	\$22.32

Bulk Water Operations

For fiscal years 2007, 2006 and 2005, our bulk water operations accounted for approximately 45%, 48% and 45%, respectively, of our consolidated revenues and are comprised of businesses in the Cayman Islands, Belize, and The Bahamas. These businesses produce potable water from seawater and sell this water to governments and private customers.

Table of Contents

Bulk Water Operations in the Cayman Islands

We sell bulk water in the Cayman Islands through our wholly-owned subsidiary OC-Cayman.

Facilities

We operate three reverse osmosis seawater conversion plants in Grand Cayman that are owned by Water Authority-Cayman: the Red Gate Road, Lower Valley and North Sound plants, which have production capacities of approximately 1.3 million, 1.1 million and 1.6 million U.S. gallons of water per day, respectively. The North Sound plant operating capacity was expanded from approximately 0.8 million U.S. gallons to 1.6 million U.S. gallons of water per day during 2007. Each of these plants was damaged to varying degrees from Hurricane Ivan in September 2004 and was restored to fully operational status and production capacity in the fourth quarter of 2004. The plants that we operate for Water Authority-Cayman are located on land owned by the Cayman Islands government.

Customers

We provide bulk water on a take-or-pay basis to the Water Authority-Cayman, a government owned utility and regulatory agency, under various licenses and agreements. The Water Authority-Cayman in turn distributes that water to properties in the parts of Grand Cayman that are outside of our retail licensed area. During 2007, we supplied the Water Authority-Cayman with 993 million U.S. gallons of water.

In January 2001, we were granted a seven-year extension, effective December 2001, to the water supply license by the Cayman Islands government to supply desalinated water from the Red Gate Road plant through November 2008.

Under the terms of this license, OC-Cayman is obligated to deliver to the Water Authority-Cayman the amount of water it demands or 1.2 million U.S. gallons of water per day on average each month, whichever is less.

In December 2001, we were granted a seven-year water supply license, effective November 2002, by the Cayman Islands government to supply desalinated water from the North Sound plant through November 2009. Under the terms of this license OC-Cayman is obligated to deliver to the Water Authority-Cayman the amount of water it demands or 713,000 U.S. gallons of water per day on average each month, whichever is less. In January 2007, we were granted an extension to this water supply license for a period of seven years by the Cayman Island government, effective on 1 April 2007. Under the terms of this extension, we are obligated to deliver to the Water Authority-Cayman the amount of water it demands from the North Sound Plant or 1.43 million U.S. gallons per day, whichever is less.

In August 2005, we were granted a seven-year extension to the water supply license, with effect from January 2006, by the Cayman Islands government to supply desalinated water from the Lower Valley plant through January 2013.

Under the terms of this license, we increased the capacity of the Lower Valley plant to 1.1 million U.S. gallons of water per day in exchange for adjusting the capital element of the total price. .

Bulk Water Operations in Belize

In Belize, we sell bulk water through our wholly-owned subsidiary CW-Belize.

Facilities

We own the reverse osmosis seawater conversion plant in Belize and lease the land on which our plant is located from the Belize government at an annual rent of BZE\$1.00. The lease, which was entered into in April 1993 and extended in January 2004, expires in January 2037. We recently expanded the production capacity of the plant to 470,000 U.S. gallons of water per day and expect further expansions to keep pace with an increasing demand for water by our customer.

Electricity to our plant is supplied by Belize Electricity Limited. At the plant site, we maintain a diesel driven, standby generator with sufficient capacity to operate our water production equipment during any temporary interruption in the electricity supply. Feed water for the reverse osmosis units is drawn from deep wells with associated pumps on the property. Reject water is discharged into brine wells on the property at a level below that of the feed water intakes.

Table of Contents

Customers

We are the exclusive provider of water to Belize Water Services Ltd. (BWSL), which distributes the water through its own pipe line system to residential, commercial and tourist properties in Ambergris Caye, Belize. BWSL distributes our water primarily to residential properties, small hotels, and businesses that serve the tourist market. The base price of water supplied, and adjustments thereto, are determined by the terms of the contract, which provides for annual adjustments based upon the movement in the government price indices specified in the contract, as well as monthly adjustments for changes in the cost of diesel fuel and electricity. Demand is less cyclical than in our other locations due to a higher proportion of residential to tourist demand. During 2007, we supplied BWSL with 148.9 million U.S. gallons of water.

On September 17, 2003, we entered into an exclusive 23-year contract with BWSL to supply a minimum of 1.75 million U.S. gallons of water per week, or upon demand up to 2.1 million U.S. gallons per week, on a take or pay basis. This contract terminates on March 23, 2026. BWSL has the option to advise us no later than six months before the termination date that it wishes to renew the contract for a further 25-year period on the same terms and conditions. On October 3, 2005, a controlling interest in BWSL was sold back to the Belize Government. This transaction effectively reversed the 2001 privatization of BWSL. We do not anticipate that this change in control of our customer will affect our contractual arrangement with BWSL.

Bulk Water Operations in The Bahamas

In The Bahamas, we sell bulk water through our majority-owned subsidiary, CW-Bahamas.

Facilities

We currently supply bulk water in The Bahamas from our Windsor and Blue Hills plants. We supply water from our Windsor plant under the terms of a 15-year water supply agreement dated May 7, 1996 effective March 1998. In October 2005, we temporarily expanded this plant's capacity from 2.6 to 4.1 million U.S. gallons per day. During August 2006 we relocated some of the portable reverse osmosis units used to expand our Windsor plant to our retail water operations in the Cayman Islands, reducing our Windsor plant production capacity to 3.1 million U.S. gallons per day. We supply water from our Blue Hills plant under the terms of a twenty-year water supply agreement dated May 20, 2005 effective July 2006. The Blue Hills plant is capable of producing 7.2 million U.S. gallons of potable water per day, and is our largest seawater conversion facility to date.

Electricity to our plants is supplied by Bahamas Electricity Corporation. We maintain a standby generator with sufficient capacity to operate essential equipment at our Windsor and Blue Hills plants and are able to produce water with these plants during any temporary interruptions in the electricity supply.

Feed water for the reverse osmosis unit is drawn from deep wells with associated pumps on the property. Reject water is discharged into brine wells on the property at a deeper level than the feed water intakes.

Customers

We provide bulk water to the Water and Sewerage Corporation of The Bahamas (WSC), which distributes the water through its own pipeline system to residential, commercial and tourist properties on the Island of New Providence. During 2007, CW-Bahamas supplied WSC with approximately 3.4 billion U.S. gallons of water.

We are required to provide the WSC with at least 16.8 million U.S. gallons per week of potable water from our Windsor plant, and the WSC has contracted to purchase at least that amount from us on a take-or-pay basis. This water supply agreement expires on the later of March 1, 2013 or after the plant has produced approximately 13.1 billion U.S. gallons of water. At the conclusion of the initial term, the WSC has the option to:

extend the term for an additional five years at a reduced rate specified in the agreement;

exercise a right of first refusal to purchase any materials, equipment and facilities that CW-Bahamas intends to remove from the site, and negotiate a purchase price with CW-Bahamas; or

require CW-Bahamas to remove all materials, equipment and facilities from the site.

Within the past three years, we have experienced various equipment failures and operational problems which caused us to incur penalties for not supplying minimum water volumes to the WSC. We also incurred penalties for not meeting diesel fuel and electricity efficiencies specified in our water sale agreement with the WSC. These penalties

totaled \$452,184, \$367,257, and \$571,349 in 2007,

Table of Contents

2006, and 2005, respectively. We have undertaken a program to replace certain equipment prone to repetitive failure and to reduce the fouling tendency of the feed water to the plant.

We are required to provide the WSC with at least 33.6 million U.S. gallons per week of potable water from the Blue Hills plant, and the WSC has contracted to purchase at least that amount from us on a take-or-pay basis. This water supply agreement expires on the later of July 26, 2026 or after the plant has produced 35.0 billion U.S. gallons of water. At the conclusion of the initial term, the WSC has the option to:

extend the term for an additional five years at a reduced rate specified in the agreement;

exercise a right of first refusal to purchase any materials, equipment and facilities that CW-Bahamas intends to remove from the site, and negotiate a purchase price with CW-Bahamas; or

require CW-Bahamas to remove all materials, equipment and facilities from the site.

Our agreement with the WSC for the Blue Hills plant contains a non-revenue water (NRW) component that requires us to reduce the amount of water lost by the public water distribution system on New Providence Island over a one year period by 438 million U.S. gallons. Until such time as we could demonstrate to the WSC that we have achieved this reduction, we were required to provide 1.2 million U.S. gallons of water per day to the WSC from the Blue Hills plant at no cost to the WSC. We are solely responsible for the engineering, labor and materials costs incurred to effect the lost water reduction.

We have diligently pursued completion of the NRW project in order to reduce operating costs and improve the profitability of the Blue Hills operation. In September 2007, using standards promulgated by the International Water Association, we completed an internal assessment of our progress in achieving the water savings required under the Blue Hills agreement and submitted our assessment to the WSC. Based upon this assessment, the standards for which require us to validate the results for a period of time prior to September 2007, we believe we met the NRW requirement effective March 1, 2007. Consequently, we have invoiced the WSC (but did not previously recognize as revenue) approximately \$618,000 for the non-revenue water provided from March 1, 2007, through September 30, 2007. The WSC has confirmed by letter dated January 11, 2008 that the NRW project was completed on July 1, 2007, but has not provided any technical support for this later completion date. We have disputed the July 1, 2007 completion date and have asked WSC for technical information in support of this decision. We have subsequently closed out the NRW project and discharged all remaining NRW obligations to WSC. While we believe we have met the NRW requirement as of March 1, 2007, and are therefore contractually entitled to receive payment for all of these NRW invoices, because of the uncertainty associated with the WSC review and approval of our assessment, we have reserved for the NRW amounts invoiced for the period March 1, 2007 through June 30, 2007 of approximately \$332,000 in our results of operations for 2007. We can offer no assurances as to whether or not the remaining NRW invoices will ultimately be collected and recognized as revenues.

Bulk Water Demand and Average Sales Prices

The table below sets forth the total volume of water we supplied to our bulk water customers on a quarterly basis for the indicated years ended December 31:

Bulk Water Total Volume By Quarter

(U.S. Gallons, In Thousands)

	2007	2006	2005	2004	2003
First Quarter	1,101,720	585,297	441,498	438,851	133,682
Second Quarter	1,079,858	684,452	456,625	458,455	208,107
Third Quarter	1,070,677	1,040,096	442,404	424,665	345,307
Fourth Quarter	1,112,370	1,044,701	506,892	424,434	414,404
Total	4,364,625	3,354,546	1,847,419	1,746,405	1,101,500

Our average sales prices of potable water sold to our bulk water customers for the indicated years ended December 31 were as follows:

Bulk Water Average Sales Prices

	2007	2006	2005
Average Sales Price Per 1,000 U.S. Gallons	\$5.06	\$5.46	\$6.35

Table of Contents

Services Operations

For fiscal years 2007, 2006 and 2005, our services operations accounted for approximately 15%, 5%, and, 4%, respectively, of our consolidated revenues and are comprised of businesses in the Cayman Islands, Bermuda and Barbados. These businesses provide engineering and management services, including designing and constructing desalination plants, and managing and operating plants owned by other companies. Our service contract in Barbados terminated in June 2007. Revenues recorded from this contract amounted to approximately \$237,800, \$430,300 and \$410,700 for 2007, 2006 and 2005, respectively.

Engineering and Management Services Operations

We provide management, engineering and construction services for desalination projects and are the exclusive agents for sales of DWEER energy recovery systems for desalination plants in the Caribbean basin until October 2009. DesalCo, which is recognized by suppliers as an original equipment manufacturer of reverse osmosis seawater desalination plants, also functions as the primary purchasing agent for our Company.

In 2003, DWEER Technology Ltd. (DWEER Tech), the owner of the DWEER technology, licensed the worldwide rights to the DWEER technology to Calder AG, a Swiss company. On February 26, 2004, we entered into a new exclusive Caribbean distributorship agreement with Calder AG for the DWEER technology, and amended the terms of our distributorship agreement with DWEER Tech. Our agreements with Calder AG and DWEER Tech were amended in 2005 to allow DesalCo to manufacture components for legacy DWEER systems that currently operate in the majority of our desalination facilities. In August 2007, we entered into an agreement with Calder AG to assist them with new product testing, which when made effective, will provide a 5 year extension of our exclusive Calder products distributorship in our primary market area.

In late 2005, we established a wholly-owned U.S. subsidiary, Aquilex, Inc., to provide financial, engineering and supply chain support services to certain of our operating segments.

Affiliate Operations

Our affiliate, OC-BVI, sells water to one bulk customer in the British Virgin Islands. We own 50% of the voting shares of OC-BVI and have an overall 43.5% equity interest in the profits of OC-BVI. We also own separate profit sharing rights in OC-BVI that raise our effective interest in OC-BVI's profits from 43.5% to 45.1%. Sage Water Holdings (BVI) Limited (Sage) owns the remaining 50% of the voting shares of OC-BVI and the remaining 54.9% interest in its profits. Under the Articles of Association of OC-BVI, we have the right to appoint three of the six directors of OC-BVI. Sage is entitled to appoint the remaining three directors. In the event of a tied vote of the Board, the President of the Caribbean Water and Wastewater Association, a regional trade association comprised primarily of government representatives, is entitled to appoint a junior director to cast a deciding vote.

We provide certain engineering and administrative services to OC-BVI for a monthly fee and a bonus arrangement which provides for payment of 4.0% of the net operating income of OC-BVI.

We account for our interests in OC-BVI using the equity method of accounting.

Customer

OC-BVI sells bulk water to the Government of The British Virgin Islands Water and Sewerage Department (BVIW&S), which distributes the water through its own pipeline system to residential, commercial and tourist properties on the islands of Tortola and Jost Van Dyke in the British Virgin Islands. During 2007, OC-BVI supplied BVIW&S with 536 million U.S. gallons of water from its desalination plants located at Baughers Bay, Tortola, and Jost Van Dyke in the British Virgin Islands.

Table of Contents

Facilities

OC-BVI operates a seawater reverse osmosis plant at Baughers Bay, Tortola, in the British Virgin Islands, which has a production capacity of 1.7 million U.S. gallons per day. The plant has an advanced energy recovery system, generates its own electrical power on site using two large Caterpillar diesel driven generator units and also purchases electricity from the BVI Electric Co. to power ancillary equipment and provide building lighting. In 2007 OC-BVI completed the construction of a 700,000 U.S. gallons per day plant at Bar Bay, Tortola in the British Virgin Islands. This plant, while operational, is idle pending negotiation of an agreement for the plant with the BVI government.

In October 2006, we were notified by OC-BVI that the Ministry of Communications and Works of the Government of the British Virgin Islands (the Ministry) had asserted a purported right of ownership of OC-BVI's Baughers Bay desalination plant pursuant to the terms of a Water Supply Agreement dated May 1990 (the 1990 Agreement) and had invited OC-BVI to submit a proposal for its continued involvement in the production of water at the Baughers Bay plant in light of the Ministry's planned assumption of ownership. This matter remains in dispute and in November 2007 the Ministry commenced litigation against OC-BVI seeking ownership of the Baughers Bay plant. See further discussion at Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Material Commitments, Expenditures and Contingencies.

Reverse Osmosis Technology

The conversion of saltwater to potable water is called desalination. The two primary forms of desalination are distillation and reverse osmosis. Both methods are used throughout the world and technologies are improving to lower the costs of production. Reverse osmosis is a separation process in which the water from a pressurized saline solution is separated from the dissolved material by passing it over a semi-permeable membrane. The saline (or feed) water is first passed through a pretreatment system, which generally consists of fine filtration and the addition of precipitation inhibitors. Pre-treatment removes suspended solids, prevents salt precipitation and keeps the membranes free of microorganisms. Next, a high-pressure pump enables the water to actually pass through the membrane, while dissolved salts are rejected. The feed water is pumped into a vessel where it is pressurized against the membrane. As a portion of the feed water passes through the membrane leaving more than 98% of its dissolved solids behind, the remaining feed water increases in salt content. This remaining feed water is discharged without passing through the membrane. The energy created by this concentrated feed water or brine as it leaves the pressure vessel is used by an energy recovery device to assist in pressurizing new feed water subsequently introduced into the pressure vessel. The final step is post-treatment, which consists of stabilizing the water, removing undesirable dissolved gases and adjusting the pH and chlorination to prepare it for distribution.

We use reverse osmosis technology to convert seawater to potable water. We believe that this technology is the most effective and efficient conversion process for our market. However, we are always seeking ways to maximize efficiencies in our current processes and investigating new, more efficient processes to convert seawater to potable water. The equipment at our plants is among the most energy efficient available and we monitor and maintain our equipment in an efficient manner. As a result of our years of experience in seawater desalination, we believe that we have an expertise in the development and operation of desalination plants which is easily transferable to locations outside of our current operating areas.

Raw Materials and Sources of Supply

All materials, parts and supplies essential to our business operations can normally be obtained from multiple sources, except for the DWEER energy recovery devices which are exclusively manufactured by Calder AG, a Swiss company, and which we use at the majority of plants. We do not manufacture any parts or components for equipment essential to our business. Our access to seawater for processing into potable water is granted through our licenses and contracts with governments of the various jurisdictions in which we have our operations.

Seasonal Variations in Our Business

Our operations are affected by the levels of tourism and are subject to seasonal variations in our service areas. Demand for our water in the Cayman Islands, Belize and Bimini, The Bahamas is affected by variations in the level of tourism and local weather, primarily rainfall. Tourism in our service areas is affected by the economies of the tourists' home countries, primarily the United States and Europe, terrorist activity and perceived threats thereof, and increased costs of fuel and airfares. We normally sell slightly more water during the first and second quarters, when the number

of tourists is greater and local rainfall is less, than in the third and fourth quarters. We do not believe that our operations in Nassau and Tortola will be subject to significant seasonal variations in demand.

Government Regulations, Custom Duties and Taxes

Our operations and activities are subject to the governmental regulations and taxes of the countries in which we operate. The following summary of regulatory developments and legislation does not purport to describe all present and proposed regulation and legislation that may affect our businesses. Legislative or regulatory requirements currently applicable to our businesses may change in the future. Any such changes could impose new obligations on us that may adversely affect our businesses and operating results.

The Cayman Islands

The Cayman Islands are a British Overseas Territory and have had a stable political climate since 1670, when the Treaty of Madrid ceded the Cayman Islands to England. The Queen of England appoints the Governor of the Cayman Islands to make laws with the advice and consent of the legislative assembly. There are 15 elected members of the legislative assembly and three members appointed by the Governor from the Civil Service. The Cabinet is responsible for day-to-day government operations. The Cabinet consists of five ministers who are chosen by the legislative assembly from its 15 popularly elected members, and the three Civil Service members. The Governor has reserved powers and the United Kingdom retains full control over foreign affairs and defense. The Cayman Islands are a common law jurisdiction and have adopted a legal system similar to that of the United Kingdom.

Table of Contents

The Cayman Islands have no taxes on profits, income, distributions, capital gains or appreciation. We have exemptions from, or receive concessionaire rates of customs duties on capital expenditures for plant and major consumable spare parts and supplies imported into the Cayman Islands as follows:

We do not pay import duty or taxes on reverse osmosis membranes, electric pumps and motors and chemicals, but we do pay duty at the rate of 10% of the cost, including insurance and transportation to the Cayman Islands, of other plant and associated materials and equipment to manufacture or supply water in the Seven Mile Beach or West Bay areas; and

OC-Cayman pays all customs duties up to 10% with respect to materials and supplies imported for the Red Gate plant and is reimbursed amounts in excess of this percentage by the Water Authority-Cayman. OC-Cayman pays full customs duties in respect of all other plants that it operates for Water Authority-Cayman.

The stamp tax (7.5% to 9% depending on location) on the transfer of ownership of land in the Cayman Islands is a major source of revenue to the Cayman Islands government. To prevent stamp tax avoidance by transfer of ownership of the shares of a company which owns land in the Cayman Islands (as opposed to transfer of the land itself), The Land Holding Companies (Share Transfer Tax) Law was passed in 1976. The effect of this law is to charge a company, which owns land or an interest in land in the Cayman Islands, a tax based on the value of its land or interest in land attributable to each share transferred. The stamp tax calculation does not take into account the proportion which the value of a company's Cayman land or interest in land bears to its total assets and whether the intention of the transfer is to transfer ownership of part of a company's entire business or a part of its Cayman land or interest in land. Prior to our common shares becoming publicly traded in the United States, we paid this tax on private share transfers. We have never paid the tax on transfers of our publicly traded shares and requested an exemption in 1994. On April 10, 2003, we received notice that the Cayman Islands government had granted an exemption from taxation for all transfers of our shares. We believe it is unlikely that government will seek to collect this tax on transfers of our publicly traded shares during 1994 through April 10, 2003.

The Bahamas

The Commonwealth of the Bahamas is an independent nation and a constitutional parliamentary democracy with the Queen of England as the constitutional head of state. The basis of Bahamian law and legal system is the English common law tradition with a Supreme Court, Court of Appeals, and a Magistrates court.

We have not been granted any tax exemptions for our Bahamian operations. Bahamian companies are subject to an annual business license fee ranging from 1% to 2% of their gross revenues. We did not pay any business license fees to the Bahamian government in respect of our Bimini retail water operations since commencement of operations on July 11, 2001, other than contributions to the National Insurance Board Social Security Fund on behalf of our employees. On January 1, 2006 we transferred our Bimini assets to CW-Bahamas and expect to pay all applicable business license fees in connection with the Bimini operations for 2006 and in the future.

Belize

Belize (formerly British Honduras) achieved full independence from the United Kingdom in 1981. Today, Belize is a constitutional monarchy with the adoption of a constitution in 1991. Based on the British model with three independent branches, the Queen of England is the constitutional head of state, represented by a Governor General in the government. A Prime Minister and cabinet make up the executive branch, while a 29 member elected House of Representatives and a nine member appointed Senate form a bicameral legislature. The cabinet consists of a prime minister, other ministers and ministers of state who are appointed by the Governor-General on the advice of the Prime Minister, who has the support of the majority party in the House of Representatives. Belize is an English common law jurisdiction with a Supreme Court, Court of Appeals and local Magistrate Courts.

The Government of Belize has exempted CW-Belize from certain customs duties and all revenue replacement duties until April 18, 2026, and had exempted CW-Belize from company taxes until January 28, 2006. Belize levies a gross receipts tax on corporations at a rate varying between 0.75% and 25%, depending on the type of business, and a corporate income tax at a rate of 25% of chargeable income. Gross receipts tax payable amounts are credited towards corporate income tax. The Government of Belize recently implemented certain environmental taxes and a general sales tax effective July 1, 2006 and increased certain business and personal taxes and created new taxes effective March 1, 2005. Under the old tax structure without our exemption, we believe our business would be subject to a

1.25% gross receipts tax and income tax. Belize levies import duty on most imported items at rates varying

Table of Contents

between 0% and 45%, with most items attracting a rate of 20%. Under the terms of our water supply agreement with BWSL we are reimbursed by BWSL for all taxes and customs duties that we are required to pay.

The British Virgin Islands

The British Virgin Islands is a British Overseas Territory that was first settled by the Dutch in 1648 and annexed by the British in 1672. It adopted a new constitution in 2007 and is a constitutional democracy with three branches of government: the Executive Council, the Judiciary and the Legislative Council. Executive authority is vested in the Queen of England, exercised through her representative, the Governor. The Governor has responsibility for the courts, public service, police, and foreign affairs, defense and full policy-making authority. The Governor is not a member of the Executive Council but receives assistance with the day-to-day operations of the government. The Executive Council, comprised of various members of the legislature, is nominated by the Premier and appointed by the Governor. The Parliament or Legislative Council is made up of thirteen (13) seats with members elected by popular vote, serving up to but no more than four-year terms. The British Virgin Islands are an English common law jurisdiction with a Supreme Court, Court of Appeals and Magistrates Court.

The British Virgin Islands imposes a corporate income tax at a rate of 15% of net income. However, OC-BVI, received an exemption, under the water supply agreement with The British Virgin Islands government, from all taxes, duties, levies and impositions on items, which it imports for the Baughers Bay plant.

Market and Service Area

Although we currently operate in the Cayman Islands, Belize, The British Virgin Islands and The Bahamas, we believe that our potential market consists of any location where there is a need for potable water. The desalination of seawater, either through distillation or reverse osmosis, is the most widely used process for producing fresh water in areas with an insufficient natural supply. We believe our experience in the development and operation of distillation and reverse osmosis desalination plants as well as our exclusive rights in the Caribbean to the DWEER energy recovery system provides us with a significant opportunity to successfully expand our operations beyond the markets in which we currently operate.

Prior to our acquisition of OC-Cayman in February 2003, the market that we serviced under our exclusive license in the Cayman Islands consisted of Seven Mile Beach and West Bay, Grand Cayman, two of the three most populated areas in the Cayman Islands. The Cayman Islands Government, through Water Authority-Cayman, supplies water to parts of Grand Cayman, which are not within our licensed area, as well as to Little Cayman and Cayman Brac. We operate all the reverse osmosis desalination plants owned by Water Authority-Cayman on Grand Cayman and supply water under licenses and supply agreements held by OC-Cayman with Water Authority-Cayman.

According to the most recent information published by the Economics and Statistics Office of the Cayman Islands Government, the population of the Cayman Islands was estimated in December 2005 to be approximately 52,000. According to the figures published by the Department of Tourism Statistics Information Center, during the year ended December 31, 2007 tourist air arrivals increased by 46.5% and tourist cruise ship arrivals decreased 6.8% over the same period in 2006.

Total visitors for the year decreased from 2.2 million in 2006 to 2.0 million in 2007. We believe that our water sales in the Cayman Islands are more positively impacted by tourists that arrive by air than by those arriving by cruise ship, since cruise ship tourists generally only remain on island for one day or less as they do not remain on island overnight. Tourist air arrivals increased 8.9% and cruise ship arrivals decreased 13.2% in January 2008 compared to the same period in 2007. At this time we are not able to determine whether these trends will continue through 2008.

In December 2005, the Ritz-Carlton Hotel, condominiums and golf course development began operations. This development is required to purchase potable water from us for the hotel and condominiums under the terms of our exclusive license agreement, but not for its golf course.

During 2002, the government of the Cayman Islands amended the Development and Planning Law to permit construction of buildings up to seven stories in certain zones within our license area, including commercial and hotel zones. Previously, buildings in these zones were only permitted to be built to three stories. We believe that this change in the law has and will continue to facilitate the development of certain properties within our license area that may have otherwise not developed under the old height restriction, and

Table of Contents

it has already facilitated the re-development of a number of existing properties, which have been demolished and are being re-built under the terms of the new height restrictions.

Our current operations in Belize are located on Ambergris Caye, which consists of residential, commercial and tourist properties in the town of San Pedro. This town is located on the southern end of Ambergris Caye. Ambergris Caye is one of many islands located east of the Belize mainland and off the southeastern tip of the Yucatan Peninsula.

Ambergris Caye is approximately 25 miles long and, according to the Belize National Population Census 2000, has a population of about 4,500 residents, which has increased approximately 144% over the previous ten years. We provide bulk potable water to BWSL, which distributes this water to this market. BWSL currently has no other source of potable water on Ambergris Caye. Our contract with BWSL makes us their exclusive producer of desalinated water on Ambergris Caye through 2026.

A 185 mile long barrier reef, which is the largest barrier reef in the Western Hemisphere, is situated just offshore of Ambergris Caye. This natural attraction is becoming a choice destination for scuba divers and tourists. According to information published by the Belize Trade and Investment Development Service, tourism is Belize's second largest source of foreign income, next to agriculture.

Our current operations in The Bahamas are located on South Bimini Island and in Nassau on New Providence. The Bimini Islands consist of North Bimini and South Bimini, and are two of 700 islands which comprise The Bahamas. The Bimini Islands are located approximately 50 miles east of Ft. Lauderdale, Florida and are a premier destination for sport fishing enthusiasts. The population of the Bimini Islands is approximately 1,600 persons and the islands have about 200 hotel and guest rooms available for tourists. The total land area of the Bimini Islands is approximately 9 square miles.

New Providence, Lyford Caye and Paradise Island, connected by several bridges, are located approximately 150 miles east southeast of the Bimini Islands. With an area of 151 square miles and a population of approximately 211,000, Nassau is the political capital and the commercial hub of The Bahamas. As the largest city with its famed Cable Beach, it accounts for more than two-thirds of the 4.0 million tourists who visit The Bahamas annually.

The British Virgin Islands are a British Overseas Territory and are situated east of Puerto Rico. They consist of 16 inhabited and more than 20 uninhabited islands, of which Tortola is the largest and most populated island. The islands are the center for many large yacht-chartering businesses.

Competition

Cayman Islands. Pursuant to our license granted by the Cayman Islands government, we have the exclusive right to provide retail water within our licensed service area on Grand Cayman. At the present time, we are the only non government-owned public water utility on Grand Cayman. The Cayman Islands government, through Water Authority-Cayman, supplies water to parts of Grand Cayman located outside of our licensed service area. Although we have no competition within our exclusive retail license service area, our ability to expand our service area is at the discretion of the Cayman Island government. Prior to 1991, any owner of property within our exclusive retail license service area could install water-making equipment for its own use. Since 1991, that option is only available to private residences, although water plants in existence prior to 1991 can be maintained but not replaced or expanded. The Cayman Islands government, through Water Authority-Cayman, supplies water to parts of Grand Cayman outside of our licensed service area. We compete with such companies as GE Water, Veolia, and IDE for bulk water supply contracts with the Water Authority-Cayman.

Belize. On Ambergris Caye in Belize, our water supply contract with Belize Water Services Limited is exclusive, and Belize Water Services Limited can no longer seek contracts with other water suppliers, or produce water themselves, to meet their future needs in San Pedro, Ambergris Caye, Belize.

The Bahamas. On South Bimini Island in The Bahamas, we supply water to a private developer and do not have competitors. GE Water operates a seawater desalination plant on North Bimini Island. We competed with companies such as GE Water, Veolia, IDE, Pridesa, Inima and Biwater for the new contract with the Bahamian government to build and operate a seawater desalination plant at Blue Hills, New Providence, Bahamas. We expect to compete with these companies and others for future water supply contracts in The Bahamas.

British Virgin Islands. In the British Virgin Islands, GE Water operates seawater desalination plants in West End and Sea Cows Bay, Tortola, and on Virgin Gorda and generally bids against OC-BVI for projects.

Table of Contents

To implement our growth strategy outside our existing operating areas, we will have to compete with the same companies we competed with for the Blue Hills project in Nassau, Bahamas such as GE Water, Veolia, IDE, Pridesa, Inima and Biwater. These companies currently operate in areas in which we would like to expand our operations. These companies already maintain worldwide operations and have greater financial, managerial and other resources than our company. We believe that our low overhead costs, knowledge of local markets and conditions and our efficient manner of operating desalinated water production and distribution equipment will provide us competitive advantage on projects in the Caribbean basin and surrounding areas.

Environmental Matters

Cayman Islands. With respect to our Cayman Islands operations, although not required by local government regulations, we operate our water plants in accordance with guidelines of the Cayman Islands Department of Environment. We are licensed by the government to discharge concentrated seawater, which is a byproduct of our desalination process, into deep disposal wells.

Our Cayman Islands license requires that our potable water quality meet the World Health Organization's Guidelines for Drinking Water Quality and contain less than 200 mg/l of total dissolved solids. We completed upgrades to our Governor's Harbour, West Bay and Britannia plants before October 1, 2003, and we meet all of the water quality requirements in our Cayman license. In addition, noise levels at our plants cannot exceed the standards established by the U.S. Occupational Safety and Health Act.

Belize, The Bahamas, British Virgin Islands. With respect to our Belize and Bahamas operations and OC-BVI's British Virgin Islands operations, we and OC-BVI are required by our water supply contracts to take all reasonable measures to prevent pollution of the environment. We are licensed by the Belize and Bahamian governments to discharge concentrated seawater, which is a byproduct of our desalination process, into deep disposal wells. OC-BVI is licensed by the British Virgin Islands government to discharge concentrated seawater into the sea. We operate our plants in a manner so as to minimize the emission of hydrogen sulfide gas into the environment.

We are not aware of any existing or pending environmental legislation, which may affect our operations. To date we have not received any complaints from any regulatory authorities regarding hydrogen sulfide gas emission, nor any other matter relating to operations.

Employees

As of February 28, 2008, we employed a total of 96 persons, 51 in the Cayman Islands, 24 in The Bahamas, 15 in the United States and six in Belize. We also managed the eight employees of OC-BVI in the British Virgin Islands. We have eight executive management personnel and 24 administrative and clerical employees. The remaining employees are engaged in engineering, purchasing, plant maintenance and operations, pipe laying and repair, leak detection, new customer connections, meter reading and laboratory analysis of water quality. None of our employees is a party to a collective bargaining agreement. We consider our relationships with our employees to be good.

Available Information

Our website address is www.cwco.com. Information contained on our website is not incorporated by reference into this annual report, and you should not consider information contained on our website as part of this Annual Report. We have adopted a written code of conduct and ethics that applies to all of our employees and directors, including, but not limited to, our principal executive officer, principal financial officer, and principal accounting officer or controller, or persons performing similar functions. The code of conduct and ethics, the charters of the audit, compensation, and nomination committees of our Board of Directors, are available at the Investors portion of our website.

You may access, free of charge, our annual reports on Form 10-K, quarterly reports on Form 10-Q, and current reports on Form 8-K, plus amendments to such reports as filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, on the website of the Securities and Exchange Commission (the "SEC") as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. In addition, paper copies of these documents may be obtained free of charge by writing us at the following address: Consolidated Water Co. Ltd., P.O. Box 1114 GT, Regatta Business Park, Windward 3, 4th Floor, Grand Cayman, KY1-1102, Cayman Islands, Attention: Investor Relations; or by calling us at (345) 945-4277.

Table of Contents**ITEM 1A. RISK FACTORS**

Investing in our ordinary shares involves risks. Prior to making a decision about investing in our ordinary shares, you should consider carefully the factors discussed below and the information contained in this Annual Report. Each of these risks, as well as other risks and uncertainties not presently known to us or that we currently deem immaterial, could adversely affect our business, operating results, cash flows and financial condition, and cause the value of our ordinary shares to decline, which may result in the loss of all or part of your investment.

Our exclusive license to provide water to retail customers in the Cayman Islands may not be renewed in the future.

In the Cayman Islands, we provide water to retail customers under a license originally issued to us in December 1979 by the Cayman Islands government that grants us the exclusive right to provide water to retail customers within our licensed service area. Our service area is comprised of an area on Grand Cayman that includes the Seven Mile Beach and West Bay areas, two of the three most populated areas in the Cayman Islands. For the year ended December 31, 2007, we generated approximately 40% of our consolidated revenue from our retail water operations conducted pursuant to our exclusive license. Our license expires in July 2010. If we are not in default of any terms of the license, we have a right of first refusal to renew the license on terms that are no less favorable than those that the government offers to any third party. If we are unable to renew our license or negotiate a new license on satisfactory terms, we could lose a significant portion of our current revenues and our results of operations, cash flows and financial condition could be adversely affected.

We rely on fixed-term water supply and/or service agreements with our bulk customers in the Cayman Islands, Belize and The Bahamas, which may not be renewed or may be renewed on terms less favorable to us.

All of our bulk water supply agreements are for fixed terms ranging originally from seven to 23 years and with a range of approximately one to 19 years remaining. Upon expiration, these agreements may not be renewed or may be renewed on less favorable terms. In addition, certain of these agreements for plants not owned by us provide for our customers to take over the operations of the plant upon expiration of the contract term. If this occurs, we may no longer generate income from such plant. In instances where we own the plant that produces the water under an agreement that is not renewed or renewed with lower production quantities, we may not be able to find a new customer for the plant's excess production capacity. If our fixed-term agreements are not renewed or are renewed on less favorable terms, our results of operations, cash flows and financial condition could be adversely affected.

The water supply agreement between the British Virgin Islands Water and Sewerage Department and our affiliate, OC-BVI, is on a month-to-month basis and could be cancelled or renegotiated on less favorable terms.

Since the expiration of the initial term of their bulk water supply agreement in May 1999, OC-BVI has supplied water to the British Virgin Islands Water and Sewerage Department under what it considers to be a month-to-month supply arrangement. Under this arrangement, the British Virgin Islands government could cease purchasing water from OC-BVI at any time. OC-BVI has continued to make attempts to negotiate a new water supply agreement. However, this agreement may not be renewed and a new agreement may not be reached. If a new agreement is obtained, it may be on terms less favorable to OC-BVI than the current arrangement. For the years ended December 31, 2007, 2006 and 2005 we recognized approximately \$1.6 million, \$1.4 million and \$1.4 million, respectively, in income from our equity investment in the earnings of OC-BVI. For these same years, we recognized approximately \$669,000, \$1,500,000 and \$680,000, respectively, in revenues from our agreement to provide management services to OC-BVI. We also recognized approximately \$445,000, \$508,000, and \$485,000 in other income for the years ended December 31, 2007, 2006 and 2005, respectively, from a profit-sharing agreement we have with OC-BVI. As of December 31, 2007, our loans to, and equity investment in, OC-BVI equaled approximately \$17.5 million and the recorded value of our management services agreement, which is reflected on our balance sheet as an intangible asset, was approximately \$856,000. In the event that the British Virgin Islands government ceased purchasing water from OC-BVI, or entered into a new contract with OC-BVI on less favorable terms than the existing supply arrangement, the values of our investment in OC-BVI, loan to OC-BVI and OC-BVI intangible asset would decline, and we could be required to record impairment charges to reduce the carrying values of these assets. Such impairment charges could reduce our earnings and could have a significant adverse impact on our results of operations and financial condition.

Table of Contents**The British Virgin Islands government has asserted a purported right of ownership of OC-BVI's Baughers Bay plant. If this right is found to be enforceable and is exercised by the government, OC-BVI will lose ownership of the Baughers Bay plant.**

In October 2006, the British Virgin Islands government notified OC-BVI that it was asserting a purported right of ownership of OC-BVI's desalination plant in Baughers Bay, Tortola pursuant to the terms of a water supply agreement dated May 1990 (or the 1990 Agreement) and invited OC-BVI to submit a proposal for its continued involvement in the production of water at the Baughers Bay plant. While OC-BVI believes that the government's claim can be resolved to the satisfaction of both parties through the negotiation of a new agreement, we cannot assure you that the government shares this belief or that such a result will occur. On November 15, 2007, OC-BVI issued a demand letter to the BVI Government for approximately \$6.2 million representing amounts that OC-BVI claimed were due by the BVI Government for water sold and delivered plus interest and legal fees. In response to OC-BVI's demand for payment, the BVI Government issued a letter dated November 19, 2007 that reasserted its claim that ownership of the Baughers Bay plant has passed to the BVI Government and rejected OC-BVI's claim for payment. OC-BVI advised the BVI Government in correspondence dated November 21, 2007 that it was demanding that the dispute between OC-BVI and the BVI Government be submitted to arbitration pursuant to the terms of the 1990 Agreement. On the following day, OC-BVI's management was informed that the BVI Government had filed a lawsuit with the Eastern Caribbean Supreme Court seeking ownership of the Baughers Bay plant. For the years ended December 31, 2007 and 2006 we recognized approximately \$1.6 million and \$1.4 million, respectively in income from our equity investment in the earnings of OC-BVI and approximately \$669,000 and \$1.5 million in revenue, respectively, from our agreement to provide management services to OC-BVI. We also recognized approximately \$445,000 and \$508,000 in other income for the years ended December 31, 2007 and 2006, respectively, from a profit-sharing agreement we have with OC-BVI. As of December 31, 2007, our loans to, and equity investment in, OC-BVI totaled approximately \$17.5 million and the recorded value of our management services agreement, which is reflected on our balance sheet as an intangible asset, was approximately \$856,000. If the government's right of ownership under the 1990 Agreement is found to be enforceable, OC-BVI may be forced to accept a water supply arrangement with the government on less favorable terms, and if the government exercises its purported right, OC-BVI could lose ownership of the Baughers Bay plant. In either case, the value of our OC-BVI-related assets would decline, and we could be required to record impairment charges to reduce the carrying values of these assets. Such impairment charges would reduce our earnings and could have a significant adverse impact on our results of operations and financial condition.

Our income from OC-BVI may be reduced if OC-BVI continues to experience difficulty in collecting the amounts it invoices to the BVI government.

Early in 2007, the British Virgin Islands Government unilaterally took the position that until such time as a new agreement is reached on the ownership of the Baughers Bay plant and the price for the water produced by the plant, the BVI Government would only pay that amount of OC-BVI's invoices that the Ministry purports constitutes OC-BVI's costs of producing the water. At its proposed interim price, the Ministry would pay only approximately 30% of the amounts billed by OC-BVI pending a new agreement. OC-BVI responded to the Ministry that the amount the Ministry proposed to pay was significantly less than OC-BVI's production costs. Payments made by the Ministry to OC-BVI since the Ministry's assumption of this reduced price have been sporadic and as of December 31, 2007 OC-BVI had received payment for less than 22% of the amounts it billed the Ministry for the year then ended. As of December 31, 2007 OC-BVI had \$8.2 million in gross accounts receivable balances due from the BVI Government. In January 2008 the BVI Government remitted a partial payment on these receivables to OC-BVI of \$3.5 million. If OC-BVI continues to experience difficulty in collecting the amounts it invoices to the BVI Government, it may be required to defer, or reserve for, all or a portion of the revenues it invoices but has not yet collected from the BVI Government. Should this occur, the income amounts we record from our various OC-BVI related assets would decline, and our results of operations could be adversely affected.

We do not have sole control over our affiliate, OC-BVI. A divergence of our interests and the interests of OC-BVI's other voting shareholder may adversely affect the operations of OC-BVI and in turn decrease the value of our investment in OC-BVI.

We own 43.5% of the equity and 50% of the voting shares of OC-BVI. We and Sage, which owns the remaining 50% of the voting shares, are each entitled to appoint three of the six directors of OC-BVI. If there is a vote of the directors on any matter, the president of the Caribbean Water and Wastewater Association, a regional trade association comprised primarily of government representatives, is entitled to appoint a temporary director to cast the deciding vote. As a result, although we provide operating management and engineering services to OC-BVI, we share the overall management of OC-BVI with Sage and do not fully control its operations. A divergence of our interests and the interests of Sage could adversely affect the operations of OC-BVI and in turn decrease the value of our investment in OC-BVI, in which case we could be required to record an impairment charge to reduce the carrying value of our investment in OC-BVI. Such an impairment charge would reduce our earnings and have a significant adverse impact on our result of operations and financial condition.

Table of Contents

The profitability of our plants is dependent upon our ability to accurately estimate the costs of their construction and operation.

The cost estimates prepared in connection with the construction and operation of our plants are subject to inherent uncertainties. Additionally, the terms of our supply contracts may require us to guarantee the price of desalinated water on a per unit basis, subject to certain annual inflation and monthly fuel cost adjustments, and to assume the risk that the costs associated with producing this water may be greater than anticipated. Because we base our contracted price of water in part on our estimation of future construction and operating costs, the profitability of our plants is dependent on our ability to estimate these costs accurately. The cost of materials and services and the cost of the delivery of such services may increase significantly after we submit our bid for a plant, which could cause the gross margin and net return on investment for a plant to be less than we anticipated when the bid was made. The profit margins we initially expect to generate from a plant could be further reduced if future operating costs for that plant exceed our estimates of such costs. These future operating costs could be affected by a variety of factors, including lower than anticipated production efficiencies and hydrological conditions at the plant site that differ materially from those that existed at the time we submitted our bid. Any construction and operating costs for our plants that significantly exceed our initial estimates could adversely affect our results of operations and financial condition.

A significant portion of our consolidated revenues are derived from two customers. A loss of, or a less favorable relationship with either of these customers would adversely affect our results of operations.

Our top two bulk water customers accounted for approximately 27% and 15% of our consolidated revenues for the year ended December 31, 2007. If either of these customers terminate or decide not to renew their contracts with us, or renew such contracts on terms that are less favorable to us, our results of operations and financial condition would be adversely affected.

If OC-BVI does not obtain a contract with the BVI Government to sell water to be produced at its Bar Bay plant, it may not be able to recover the cost of its investment in the plant, which could adversely affect its operations and in turn decrease the value of our investment in OC-BVI.

OC-BVI has constructed a new desalination plant located on Bar Bay, Tortola, in the British Virgin Islands. The total cost for this plant is approximately \$8.0 million. We have a loan receivable outstanding from OC-BVI of \$2,875,000 for the construction of this plant as of December 31, 2007. OC-BVI has constructed this plant in response to what it believes is an extreme shortage of, and a pressing demand for, potable water on the eastern end of Tortola and anticipates entering into a bulk water supply agreement with the British Virgin Islands government. However, OC-BVI does not presently have any type of agreement or understanding with the British Virgin Islands government, for the purchase of the water to be produced by its Bar Bay plant. If such an agreement is not obtained, or is not obtained on sufficiently favorable terms, OC-BVI may not be able to recover the cost of its investment in this plant, in which case we may be required to record an impairment charge to reduce the carrying value of our loan to OC-BVI and our investment in OC-BVI. Such an impairment charge would reduce our earnings and could have a significant adverse impact on our results of operations and financial condition.

Our operations are affected by tourism and are subject to seasonal fluctuations which could affect demand for our water and impact our revenues and results of operations.

Our operations are affected by the levels of tourism and are subject to seasonal variations in our service areas. Demand for our water in the Cayman Islands, Belize and Bimini, The Bahamas is affected by variations in the level of tourism and local weather, primarily rainfall. Tourism in our service areas is affected by the economies of the tourists home countries, primarily the United States and Europe, terrorist activity and perceived threats thereof, and increased costs of fuel and airfares. We normally sell slightly more water during the first and second quarters, when the number of tourists is greater and local rainfall is less, than in the third and fourth quarters. A downturn in tourism or greater than expected rainfall in the locations we serve could adversely affect our revenues and results of operations.

We may have difficulty accomplishing our growth strategy within and outside of our current operating areas.

Our expansion both within our current operating areas and into new areas involves significant risks, including, but not limited to, the following:

regulatory risks, including government relations difficulties, local regulations and currency controls;

Table of Contents

receiving and maintaining necessary permits, licenses and approvals;

risks related to operating in foreign countries, including political instability, reliance on local economies, environmental problems, shortages of materials, immigration restrictions and limited skilled labor;

risks related to development of new operations, including inaccurate assessment of the demand for water, engineering difficulties and inability to begin operations as scheduled; and

risks relating to greater competition in these new territories, including the ability of our competitors to gain or retain market share by reducing prices.

Even if we successfully expand our operations, we may have difficulty managing our growth. We cannot assure you that any new operations within or outside of our current operating areas will attain or maintain profitability or that the results from these new operations will not negatively affect our overall profitability.

Continued production shortfalls under our Windsor supply contract could result in further rate decreases or cancellation of the contract.

Our supply contract, through our subsidiary, CW-Bahamas, with the Water and Sewerage Corporation of The Bahamas (WSC) to supply water from our Windsor plant located on the island of New Providence in The Bahamas expires upon the earlier of either (i) March 2013 or (ii) CW-Bahamas supply of 13.1 billion gallons of water to the WSC. Since the plant was commissioned in 1996, fouling of its reverse osmosis membrane elements has occurred several times. From time to time since October 2004, we have been unable to deliver the minimum water volumes required under the contract because of mechanical equipment problems and membrane fouling. As a result, we have been subject to water rate decreases that decreased revenue by approximately \$436,000, \$400,000 and \$600,000 in 2007, 2006 and 2005, respectively. We have implemented an extensive program to test and understand the cause of the membrane fouling and have expanded the production capacity of the Windsor plant in order to replace the production capacity that was lost because of membrane fouling. At present, we believe we have resolved the membrane fouling problem at the Windsor plant. However, membrane fouling may reoccur at the Windsor plant, and if we are unable to meet the production minimums due to this or other operating issues, we could be in technical default of the Windsor supply contract and subject to various adverse consequences, including further water rate decreases or cancellation of the contract by the WSC.

Our operations could be harmed by hurricanes or tropical storms.

A hurricane or tropical storm could cause major damage to our equipment and properties and the properties of our customers, including the large tourist properties in our areas of operation. For example, in September 2004 Hurricane Ivan caused significant damage to our plants and our customers properties, which adversely affected our revenues. Any future damage could cause us to lose use of our equipment and properties and incur additional repair costs. Damage to our customers properties and the adverse impact on tourism could result in a decrease in water demand. A hurricane or tropical storm could also disrupt the delivery of equipment and supplies, including electricity, necessary to our operations. These and other possible effects of hurricanes or tropical storms could have an adverse impact on our results of operations and financial condition.

Contamination of our processed water may cause disruption in our services and adversely affect our revenues.

Our processed water may become contaminated by natural occurrences and by inadvertent or intentional human interference, including acts of terrorism. In the event that a portion of our processed water is contaminated, we may have to interrupt the supply of water until we are able to install treatment equipment or substitute the flow of water from an uncontaminated water production source. In addition, we may incur significant costs in order to treat a contaminated source of plant feed water through expansion of our current treatment facilities, or development of new treatment methods. An inability by us to substitute processed water from an uncontaminated water source or to adequately treat the contaminated plant feed water in a cost-effective manner may have an adverse effect on our revenues and our results of operations.

Potential government decisions, actions and regulations could negatively affect our operations.

Table of Contents

We are subject to the local regulations of the Cayman Islands, Belize, the British Virgin Islands and The Bahamas, all of which are subject to change. Any government that regulates our operations may issue legislation or adopt new regulations, including but not limited to:

restricting foreign ownership of us;

providing for the expropriation of our assets by the government;

providing for nationalization of public utilities by the government;

providing for different water quality standards;

unilaterally changing or renegotiating our licenses and agreements;

restricting the transfer of U.S. currency; or

causing currency exchange fluctuations/devaluations or making changes in tax laws.

As new laws and regulations are issued, we may be required to modify our operations and business strategy, which we may be unable to do in a cost-effective manner. Failure by us to comply with applicable regulations could result in the loss of our licenses or authorizations to operate, the assessment of penalties or fines, or otherwise may have a material adverse effect on our results of operations.

The rates we charge our retail customers in the Cayman Islands are subject to regulation. If we are unable to obtain government approval of our requests for rate increases, or if approved rate increases are untimely or inadequate to cover our projected expenses, our results of operations may be adversely affected.

Under our exclusive retail license in the Cayman Islands, we must obtain prior approval from the Cayman Islands government to increase our water supply rates, except for inflation-related adjustments. However, the expenses we incur in supplying water under this license may increase due to circumstances that were unforeseen at the time we entered into the license. We may incur additional costs in attempting to obtain government approval of any rate increase, which may be granted on a delayed basis, if at all. Failure to obtain timely and adequate rate increases could have an adverse effect on our results of operations.

We rely on the efforts of key employees. Our failure to retain these employees could adversely affect our results of operations.

Our success depends upon the abilities of our executive officers. In particular, the loss of the services of Fredrick W. McTaggart, our President and Chief Executive Officer, could be detrimental to our operations and our continued success. Mr. McTaggart has an employment agreement expiring on December 31, 2009. Each year, the term of this agreement may be extended for an additional year. However, we cannot guarantee that Mr. McTaggart will continue to work for us during the term of his agreement or will enter into any extensions thereof.

We are exposed to credit risk through our relationships with several customers and our affiliate.

We are subject to credit risk posed by possible defaults in payment by our bulk water customers in the Cayman Islands, Belize, the British Virgin Islands and The Bahamas and by possible defaults in payment of loan receivables by OC-BVI and Water Authority-Cayman. Adverse economic conditions affecting, or financial difficulties of, those parties could impair their ability to pay us or cause them to delay payment. We depend on these parties to pay us on a timely basis. Our outstanding accounts receivable are not covered by collateral or credit insurance. Any delay or default in payment could adversely affect our cash flows, financial condition and results of operations.

We are exposed to the risk of variations in currency exchange rates.

Although we report our results in United States dollars, the majority of our revenue is earned in other currencies. All of the currencies in our operating areas have been fixed to the United States dollar for over 20 years and we do not employ a hedging strategy against exchange rate risk associated with our reporting in United States dollars. If any of these fixed exchange rates becomes a floating exchange rate our results of operations and financial condition could be adversely affected.

Table of Contents

We may enter new markets in the future in which we do not have a contractual commitment for our products or existing customers.

Our strategy contemplates potential entry into new markets where we believe a demand for potable water exists beyond the current supply of potable water in those markets. We may decide to enter such markets by building new reverse osmosis desalination plants before we have obtained a contract for the sale of water produced by the new plant or before we have established a customer base for the water produced by the new plant. If after completing such plant we are unable to obtain a contract or sufficient number of customers for the plant, we may be unable to recover the cost of our investment in the plant, which could have a material adverse effect on our financial condition, results of operations and cash flows.

Future sales of our ordinary shares may depress the market price of our ordinary shares.

If we or our existing shareholders sell substantial amounts of ordinary shares or if it is perceived that such sales could occur, the market price of our ordinary shares could decline. In addition, if these sales were to occur, we may find it difficult to sell equity or equity-related securities in the future at a time and price that we deem desirable.

We may not pay dividends in the future. If dividends are paid, they may be in lesser amounts than past dividends.

Our shareholders may receive dividends out of legally available funds if, and when, they are declared by our Board of Directors. We have paid dividends in the past, but may cease to do so at any time. Under the agreements governing certain of our outstanding debt obligations, we may only pay dividends from cash flows, defined under the applicable agreement as consolidated net income plus non-cash charges less capital expenditures and scheduled debt repayment, calculated annually on a fiscal year basis. We may incur increased capital requirements or additional indebtedness in the future that may restrict our ability to declare and pay dividends. We may also be restricted from paying dividends in the future due to restrictions imposed by applicable corporate laws, our financial condition and results of operations, covenants contained in our financing agreements, management's assessment of future capital needs and other factors considered by our Board of Directors. There can be no assurance that we will continue to pay dividends in the future or, if dividends are paid, that they will be in amounts similar to past dividends.

Service of process and enforcement of legal proceedings commenced against us in the United States may be difficult to obtain.

We are incorporated under the laws of the Cayman Islands and a substantial portion of our assets are located outside of the United States. In addition, 12 out of 16 of our directors and officers reside outside the United States. As a result, it may be difficult for investors to effect service of process within the United States upon us and such other persons, or to enforce judgments obtained against such persons in United States courts, and bring any action, including actions predicated upon the civil liability provisions of the United States securities laws. In addition, it may be difficult for investors to enforce, in original actions brought in courts or jurisdictions located outside of the United States, rights predicated upon the United States securities laws.

Based on the advice of our Cayman Islands legal counsel, Myers and Alberg, we believe there is no reciprocal statutory enforcement of foreign judgments between the United States and the Cayman Islands, and that foreign judgments originating from the United States are not directly enforceable in the Cayman Islands. A prevailing party in a United States proceeding against us or our officers or directors would have to initiate a new proceeding in the Cayman Islands using the United States judgment as evidence of the party's claim. A prevailing party could rely on the summary judgment procedures available in the Cayman Islands, subject to available defenses in the Cayman Islands courts, including, but not limited to, the lack of competent jurisdiction in the United States courts, lack of due service of process in the United States proceeding and the possibility that enforcement or recognition of the United States judgment would be contrary to the public policy of the Cayman Islands.

Depending on the nature of damages awarded, civil liabilities under the Securities Act of 1933, as amended (or the Securities Act), or the Securities Exchange Act of 1934, as amended (or the Exchange Act), for original actions instituted outside the Cayman Islands may or may not be enforceable. For example, a United States judgment awarding remedies unobtainable in any legal action in the courts of the Cayman Islands, such as treble damages, would likely not be enforceable under any circumstances.

Low trading volume of our stock may limit your ability to sell your shares at or above the price you pay for them.

During the year ended December 31, 2007, the average daily trading volume of our ordinary shares was approximately 79,000 shares, a much lower trading volume than the stock of many other companies listed on the NASDAQ Global Select Market. A public trading

Table of Contents

market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the market of willing buyers and sellers of our ordinary shares at any given time. This presence in turn depends on the individual decisions of investors and general economic and market conditions over which we have no control. As a consequence of the limited volume of trading in our ordinary shares, an investor in our stock may have difficulty selling a large number of our ordinary shares in the manner or at the price that might be attainable if our ordinary shares were more actively traded. In addition, as a result of our low trading volume, the market price of our ordinary shares may not accurately reflect their value.

Competition may threaten the sustainability and growth of our current operations and impede the expansion of our operations into new areas.

We face competition in our areas of operation in renewing our present supply contracts and in our efforts to expand our current operations within those areas. We also face competition in attempting to expand our operations to new areas. We often compete with larger companies, including units of General Electric Company and Veolia Environment. Some of our current and potential competitors have technical and financial resources and marketing and service organizations that are significantly greater than ours. Moreover, our competitors may forecast the course of market developments more accurately and could in the future develop new technologies that compete with our services. Additional competitors with significant market presence and financial resources may enter those markets, thereby further intensifying competition. These competitors may be able to reduce our market share by adopting more aggressive pricing policies than we can adopt or by developing technology and services that gain wider market acceptance than our technology and/or services. If we do not compete successfully, we may be unable to maintain or increase our operations and our results of operations and financial condition could be adversely affected.

We are subject to anti-takeover measures that may discourage, delay or prevent changes of control of Consolidated Water Co. Ltd.

Classified Board of Directors. We have a classified Board that consists of three groups of directors. Only one group of directors is elected each year. Our classified Board may increase the length of time necessary for an acquirer to change the composition of a majority of directors in order to gain control of our Board.

Option Deed. Our Board of Directors has adopted an Option Deed that is intended to improve the bargaining position of our Board of Directors in the event of an unsolicited offer to acquire our outstanding stock. Under the terms of the Option Deed, a stock purchase right is attached to each of our current or future outstanding ordinary shares issued prior to the time the purchase rights become exercisable, are redeemed or expire. The purchase rights will become exercisable only if an individual or group has acquired, or obtained the right to acquire, or announced a tender or exchange offer that if consummated would result in such individual or group acquiring beneficial ownership of 20% or more of our outstanding ordinary shares. Upon the occurrence of a triggering event, the rights will entitle every holder of our ordinary shares, other than the acquirer, to purchase our shares or shares of our successor on terms that would likely be economically dilutive to the acquirer. Under certain circumstances, instead of ordinary shares, our Board of Directors may issue cash or debt securities. Our Board of Directors, however, has the power to amend the Option Deed so that it does not apply to a particular acquisition proposal or to redeem the rights for a nominal value before they become exercisable. These features will likely encourage an acquirer to negotiate with our Board of Directors before commencing a tender offer or to condition a tender offer on our Board of Directors taking action to prevent the purchase rights from becoming exercisable. In March 2007, our Board extended the expiration date of the Option Deed through July 2017.

As a result of these anti-takeover measures, we could deter efforts to make changes to, or exercise control over, current management. In addition, our shareholders may not have an opportunity to sell their ordinary shares to a potential acquirer at the acquirer's offering price, which is typically at a premium to market price.

Restrictive covenants in our credit facilities and trust deeds could adversely affect our business by limiting our flexibility; our failure to comply with these covenants could cause foreclosure on our assets.

Our credit facilities and the trust deeds governing the terms of our debt securities contain restrictive covenants. These covenants and requirements limit our ability, without approval of the lender or trustee, to take various actions, including incurring additional debt, making capital expenditures, guaranteeing indebtedness, engaging in various types of transactions, including mergers and sales of assets, and paying dividends and making distributions or other

restricted payments. These covenants could place us at a disadvantage compared to some of our competitors which may not be required to operate under these or similar restrictions. Further, these covenants could have an adverse effect on our business by limiting our ability to take advantage of financing, acquisition or investment opportunities. A material breach of any of these covenants would constitute a default under our credit facilities or trust deeds. In the event of default, the lender or trustee may accelerate repayment of our outstanding indebtedness. If we are unable to repay the amounts accelerated, the lender or trustee has the right to foreclose on substantially all of our assets, which we have pledged to secure that indebtedness. Foreclosure upon our assets would have a significant adverse affect on our results of operations, financial condition and our ability to continue operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

Table of Contents

ITEM 2. PROPERTIES

Cayman Island Properties

Governor s Harbour Plant

We own our Governor s Harbour plant and the 8,745 square feet of buildings, which contain the water treatment facility, and operate and maintain the plant through our wholly-owned subsidiary Cayman Water. The plant is located on 3.2 acres, including 485 feet of waterfront. The current water production capacity of our Governor s Harbour plant is 2.2 million U.S. gallons per day. On this site we also have three 1.0 million U.S. gallon potable water storage tanks.

West Bay Plant

We own, operate and maintain our West Bay plant in Grand Cayman, which is located on 6.1 acres in West Bay. The plant began operating on June 1, 1995 and was expanded in February 1998, in February 2000 and again in January 2008. On this site, we have a 2,600 square foot building which houses our water production facilities, a 2,400 square foot building which houses the potable water distribution pumps, a water quality testing laboratory, office space and water storage capacity consisting of three 1.0 million U.S. gallon potable water tanks. The capacity of our West Bay plant was extended to 920,000 U.S. gallons per day in January 2008.

Britannia Plant

On February 1, 2002, we purchased the Britannia seawater desalination plant in Grand Cayman, which consists of a seawater reverse osmosis production plant with a capacity of 710,000 U.S. gallons of water per day, an 840,000 U.S. gallon bolted steel water tank, potable water high service pumps, and various ancillary equipment to support the operation. We have entered into a lease of the 0.73 acre site and steel frame building, which houses the plant, from Cayman Hotel and Golf Inc., for a term of 25 years at an annual rent of \$1.00.

Distribution System

We own our Seven Mile Beach and West Bay potable water distribution systems in Grand Cayman. The combined systems consist of polyvinyl chloride and polyethylene water pipes, valves, curb stops, meter boxes, and water meters installed in accordance to accepted engineering standards in the United States of America.

Leased Properties

In addition to the properties where our water plants are located, we lease approximately 5,451 square feet of office space at the Regatta Business Park, West Bay Road, Grand Cayman, Cayman Islands. The original term of the lease was three years from April 1, 2005. The Company exercised an option to extend the lease for a further three year period in October 2007, effective May 1, 2008.

OC-Cayman Properties

Following completion of our acquisition of all of the outstanding stock of each of DesalCo and OC-Cayman, we assumed operational control over four water production plants in the Cayman Islands, one of which we already owned, but had contracted with OC-Cayman to operate until December 2004.

Red Gate Road Plant

Under the terms of the water production and supply license between OC-Cayman and the government of the Cayman Islands, OC-Cayman is allowed to use the property on which the plant is located to produce approximately 1.3 million U.S. gallons of desalinated water per day for sale to the Water Authority-Cayman. OC-Cayman owns all of the buildings, equipment, feed water wells and brine disposal wells with the exception of the piping from the wells to the plant (including feed water and brine disposal) and the main electrical service disconnect, both of which are owned by Water Authority-Cayman. The property on which the plant is located is also owned by Water Authority-Cayman. The plant was originally powered only by electricity, but was upgraded in 1994 to include diesel driven high-pressure pumps. Upon expiration of the water production and supply license on November 30, 2008, Water Authority-Cayman will take possession of the plant for no consideration. This license was extended in November 2001 for a period of seven years and no further extension options are included in the present license.

Table of Contents

Lower Valley Plant

OC-Cayman provided the plant and equipment to Water Authority-Cayman under a vendor-financed sale and operating agreement which has been extended on two occasions. OC-Cayman operates the electrically-powered 1,100,000 U.S. gallons per day rated plant and supplies approximately 916,000 U.S. gallons of desalinated water per day to Water Authority-Cayman.

In 2005 Water Authority-Cayman accepted our proposal to increase the capacity of the Lower Valley plant to 1.1 million U.S. gallons per day in exchange for a seven-year extension of the license.

OC-Cayman leases the property on which the plant is located from Water Authority-Cayman for a minimal annual rent for the duration of the operating agreement, which originally was set to expire on March 9, 2006, but was extended effective January 2006 with the seven-year extension of the license. Responsibility for operation of the plant passes to Water Authority-Cayman upon expiration of the lease-purchase and operating agreement.

North Sound Plant

Construction of this plant was completed in November 2002. OC-Cayman provided the plant and equipment to Water Authority-Cayman under a seven-year vendor-financed sale and operating agreement. OC-Cayman operates the electrically powered plant and supplies approximately 1.43 million U.S. gallons of desalinated water per day to Water Authority-Cayman. OC-Cayman leases the property on which the plant is located from Water Authority-Cayman for a minimal annual rent, for the duration of the sale and operating agreement. The sale and operating agreement and property lease were recently extended and are expected to expire in the first quarter of 2014. Responsibility for operation of the plant passes to Water Authority-Cayman upon expiration of the sale and operating agreement.

Belize Properties

We own our San Pedro water production facility in Ambergris Caye, Belize. The plant consists of a one story concrete block building, which contains a seawater RO water production plant with a production capacity of 465,000 U.S. gallons per day. We lease from the Government of Belize at an annual rent of BZ\$1.00, land on which our plant is located. The lease commenced on April 27, 1993 and expires in 2026.

Bahamas Properties

We own the water production facility in South Bimini. The facility consists of a 250,000 U.S. gallon bolted steel potable water tank and two 40 foot long standard shipping containers which contain a seawater reverse osmosis production plant with a rated capacity of 115,000 U.S. gallons per day, a high service pump skid and an office. The facility is located on a parcel of land owned by South Bimini International Ltd., and we are allowed, under the terms of our agreement, to utilize the land for the term of the agreement without charge.

We own a water production facility, the Windsor plant, located in Nassau, New Providence, with a production capacity of 2.6 million U.S. gallons per day. The plant is powered by a combination of diesel engine-driven high-pressure pumps, and electrical power purchased from the Bahamas Electricity Corporation to power all other loads in the plant. The plant is contained within a 13,000 sq. ft. concrete and steel building that also contains a warehouse, workshop and offices. It is located on land owned by the Water and Sewerage Corporation of The Bahamas and our 15 year water sales agreement gives us a license to use the land throughout the term of that agreement.

In July 2006, we substantially completed construction of a second water production facility in Nassau, New Providence: the Blue Hills plant. With a production capacity of 7.2 million U.S. gallons per day this plant is the largest desalination plant we have built or operated to date. The plant is powered by a combination of diesel engine-driven high-pressure pumps, and electrical power purchased from the Bahamas Electricity Corporation to power all other loads in the plant. The plant is contained within a 16,000 sq. ft. concrete and steel building that also contains a warehouse, workshop and offices. It is located on land owned by the Water and Sewerage Corporation of The Bahamas and our 20 year water sales agreement gives us a license to use the land throughout the term of that agreement.

Table of Contents

U.S. Property

In July 2005, we guaranteed the financial obligations of a five year lease in Deerfield Beach, Florida for approximately 7,200 square feet of office and warehouse space for Aquilex, Inc., our wholly-owned subsidiary that was incorporated in the United States for the purpose of providing financial, engineering and supply chain management support services to our operating segments.

ITEM 3. LEGAL PROCEEDINGS

On November 17, 2006, Gruppozecca Bahamas Limited (GBL) filed a Statement of Claim in the Supreme Court of the Commonwealth of the Bahamas against CW-Bahamas, seeking damages in excess of \$950,000 for CW-Bahamas alleged breach of its obligations under an agreement between GBL and CW-Bahamas relating to the construction of our Blue Hills desalination plant in the Commonwealth of the Bahamas. We believe that the claims made by GBL against CW-Bahamas are without merit, and intend to vigorously defend against such claims.

From time to time the Company is involved in legal proceedings or claims arising in the normal course of business. As of December 31, 2007, other than already disclosed, the Company was not aware of any legal proceedings or claims, either threatened or pending, that management believes would result in a material adverse effect on the financial position or results of operations.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matter was submitted during the fourth quarter of the fiscal year covered by this Annual Report to a vote of security holders, through the solicitation of proxies or otherwise.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

Our Class A common stock is listed on the NASDAQ Global Select Market and trades under the symbol **CWCO** . Listed below, for each quarter of the last two fiscal years, are the high and low sales prices for the common stock on the NASDAQ Global Select Market.

	High	Low
First Quarter 2007	\$27.75	\$23.71
Second Quarter 2007	30.03	23.61
Third Quarter 2007	36.10	27.70
Fourth Quarter 2007	34.38	24.60
First Quarter 2006	\$28.40	\$19.85
Second Quarter 2006	31.32	23.40
Third Quarter 2006	28.09	21.13
Fourth Quarter 2006	28.62	23.51

No trading market exists for our redeemable preferred shares, which are only issued to, or purchased by, long-term employees of our company and must be held by these employees for a period of four years before they vest.

On October 18, 2006, we issued 5,907 shares of common stock to our directors under the Non-Executive Directors Share Plan. On October 18, 2007, we issued 5,252 shares of common stock to our directors under the Non-Executive Directors Share Plan

On September 27, 2005, the Company entered into a Second Deed of Amendment (the **Amendment**) to its Option Deed dated as of August 6, 1997 and as amended on August 8, 2005 between the Company and American Stock Transfer & Trust Company (the **Option Deed**). In March 2007, our Board extended the expiration date of the Option Deed through July 2017.

The Option Deed grants to each holder of a common and preferred share an option to purchase one one-hundredth of a class B common share at an exercise price of \$100.00, subject to adjustment. If an attempt to take over control of the Company occurs, each shareholder of the Company would be able to exercise the option and receive common shares with a value equal to twice the exercise price of the option. Under circumstances described in the Option Deed, as amended, instead of receiving common shares, the Company may issue to each shareholder (i) cash; (ii) other equity or debt securities of the Company; or (iii) the equity securities of the acquiring company, as the case may be, with a value equal to twice the exercise price of the option.

Pursuant to the Amendment to the Option Deed, each holder of a common and redeemable preferred share has the option to purchase one one-hundredth of a class B common share at an exercise price of \$50.00, subject to adjustment. The Amendment does not modify the Option Deed in any other material respect.

The options are attached to each common share and redeemable preferred share, and presently have no monetary value. The options will not trade separately from the Company's shares unless and until they become exercisable. The options, which expire on July 31, 2017, may be redeemed, at the option of the Company's Board of Directors, at a price of C\$.01 per option at any time until ten business days following the date that a group or person acquires ownership of 20% or more of the Company's outstanding common shares.

Our 2,023,850 Bahamian Depository Receipts (**BDRs**) are listed and traded only on the Bahamian International Stock Exchange (**BISX**). Currently 404,770 shares of our common stock underlie the BDRs and are held in a custodial account in The Bahamas. The BDRs are subject to dividend payments in proportion to their relative value to our common shares when and if declared.

 Holders

On March 10, 2008, we had 869 holders of record of our common stock.

Table of Contents**Dividends**

We have paid dividends to owners of our ordinary shares and redeemable preference shares since we began declaring dividends in 1985 and these dividends have increased consistently since 1985. However, the payment of any future cash dividends will depend upon our earnings, financial condition, cash flows, capital requirements and other factors our Board deems relevant in determining the amount and timing of such dividends.

The Board of Directors declares and approves all interim dividends. It is a requirement of our Articles of Association for the Board of Directors to seek shareholder approval of the final dividend, if any, at the annual meeting of our shareholders.

Listed below, for each quarter of the last two fiscal years, is the amount of interim dividends declared on our issued and outstanding shares of common stock and redeemable preferred shares. No final dividend was declared during the last two fiscal years.

First Quarter 2007	\$0.0650	Per Share
Second Quarter 2007	0.0650	Per Share
Third Quarter 2007	0.0650	Per Share
Fourth Quarter 2007		Per Share
First Quarter 2006	\$0.0600	Per Share
Second Quarter 2006	0.0600	Per Share
Third Quarter 2006	0.0600	Per Share
Fourth Quarter 2006	0.0600	Per Share

Exchange Controls and Other Limitations Affecting Security Holders

Our Company is not subject to any governmental laws, decrees or regulations in the Cayman Islands which restrict the export or import of capital, or that affect the remittance of dividends, interest or other payments to non-resident holders of our securities. The Cayman Islands does not impose any limitations on the right of non-resident owners to hold or vote our common stock other than stated below. There are no exchange control restrictions in the Cayman Islands.

Taxation

The Cayman Islands presently impose no taxes on profit, income, distribution, capital gains, or appreciations of our Company and no taxes are currently imposed in the Cayman Islands on profit, income, capital gains, or appreciations of the holders of our securities or in the nature of estate duty, inheritance, or capital transfer tax. There is no income tax treaty between the United States and the Cayman Islands.

As discussed in Part I, Item 1, we were subject in the Cayman Islands to a stamp tax when our shares are transferred. Prior to our common shares becoming quoted in the United States, we paid this tax on private share transfers. We have never paid the tax on transfers of our publicly traded shares. Since 1994, we requested that the Cayman Islands government exempt us from the share transfer tax. On April 10, 2003, we received notice that the Cayman Islands government had granted an exemption from taxation for all transfers of our shares. The government has not, and we believe it is unlikely that government will, seek to collect this tax on transfers of our publicly traded shares during the period 1994 through April 10, 2003.

The information required by Item 201(d) of Regulation S-K is provided under Item 12 of this Annual Report.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The table below contains selected financial data, expressed in U.S. dollars, derived from our audited consolidated financial statements for each of the years in the five-year period ended December 31, 2007. Our consolidated financial statements are prepared in accordance with the accounting principles generally accepted in the United States (US-GAAP). As a result, all financial information presented herein has been prepared in accordance with US-GAAP. This selected financial data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and with our consolidated financial statements and related notes thereto contained elsewhere in this Annual Report. Year-to-year comparisons of this selected financial data are significantly affected by our acquisitions. We acquired OC-Cayman, DesalCo and our interest in OC-BVI in February 2003. The operating results of CW-Bahamas have been included in our financial statements since August 2003. The financial data for the year ended December 31, 2004 includes other income of approximately \$591,000 related to insurance proceeds received in connection with Hurricane Ivan. Historical per share information set forth below has been retroactively adjusted to reflect our 2-for-1 stock split on August 25, 2005.

	Year Ended December 31,				
	2007	2006	2005	2004	2003
Statement of Income Data:					
Revenue	\$ 49,149,847	\$ 38,229,208	\$26,187,205	\$23,281,413	\$19,054,205

	14,495,364	12,737,486	12,161,407	11,759,010	10,075,060

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Overview**

Our objective is to provide water services in areas where the supply of potable water is scarce and where the use of reverse osmosis (RO) technology to produce potable water is economically feasible.

We intend to increase revenues by developing new business opportunities both within our current service areas and in new areas. We expect to maintain operating efficiencies by continuing to focus on our successful business model and by properly executing our equipment maintenance and water loss mitigation programs. We believe that many Caribbean basin and adjacent countries, being water scarce, present opportunities for operation of our plants in favorable regulatory environments.

Our operations and activities are now conducted at twelve plants in three countries: the Cayman Islands, Belize, and The Bahamas and in two business segments: retail and bulk. Our former Barbados operations ceased to operate in June 2007 when our customer exercised its option to terminate its contract with us. Our affiliate, OC-BVI, sells bulk water to a customer in the British Virgin Islands. The following table sets forth the comparative combined production capacity of our retail, bulk and affiliate operations as of December 31 of each year.

Location	Comparative Operations					
	2007	Plants	Capacity ⁽¹⁾	2006	Plants	Capacity ⁽¹⁾
Cayman Islands		6	7.6	Cayman Islands	6	5.9
Bahamas		3	10.0	Bahamas	3	10.0
Belize		1	0.5	Belize	1	0.5
Barbados				Barbados	1	1.3
British Virgin Islands		2	1.7 ⁽²⁾	British Virgin Islands	2	1.7 ⁽²⁾
Total		12	19.8	Total	13	19.4

(1) In millions of U.S. gallons per day.

(2) Owned and operated by our affiliate OC-BVI. Does not include OC-BVI's recently constructed 700,000 U.S. gallon per day plant at Bar Bay, Tortola that is currently not in use.

Cayman Islands

We have been operating our business on Grand Cayman Island since 1973 and have been using RO technology to convert seawater to potable water since 1989. There is a limited natural supply of fresh water on the Cayman Islands. We currently have an exclusive license from the Cayman Islands government to process potable water from seawater and then sell and distribute that water by pipeline to Seven Mile Beach and West Bay, Grand Cayman. Our operations consist of six reverse osmosis seawater conversion plants which provide water to approximately 4,600 retail residential and commercial customers within a government licensed area and bulk water sales to the Water Authority-Cayman. Our pipeline system in the Cayman Islands covers the Seven Mile Beach and West Bay areas of Grand Cayman and consists of approximately 68 miles of polyvinyl chloride pipe. During 2007, we supplied approximately 803 million U.S. gallons (2006: 749 million U.S. gallons) of water to our retail water customers and 993 million U.S. gallons (2006: 951 million U.S. gallons) to our bulk customers in Grand Cayman.

Belize

Our Belize operation, which was acquired on July 21, 2000, consists of one reverse osmosis seawater conversion plant on Ambergris Caye, Belize, Central America capable of producing 465,000 U.S. gallons per day. We sell water to one customer, Belize Water Services Limited, which then distributes the water through its own distribution system to residential, commercial and tourist properties on Ambergris Caye. During 2007, we supplied approximately 149 million U.S. gallons (2006: 131 million U.S. gallons) of water to our Bulk water customer in Belize.

Table of Contents**Bahamas**

Our Bimini plant is capable of producing 115,000 U.S. gallons per day and provides potable water to Bimini Sands Resort and to the Bimini Beach Hotel. During 2007, we supplied approximately 4 million U.S. gallons (2006: 6 million U.S. gallons) of water to these customers. We have also sold water intermittently to the Water and Sewerage Corporation of the Bahamas (WSC) when their regular supply was unavailable. During 2007, we supplied the WSC with 3.9 million U.S. Gallons of water.

As a result of our acquisition of CW-Bahamas in August 2003, we acquired an additional reverse osmosis seawater conversion plant in The Bahamas. CW-Bahamas produces potable water from two reverse osmosis seawater conversion plants, the Windsor plant and the Blue Hills plant, in New Providence and has a total installed capacity of 9.8 million U.S. gallons per day. CW-Bahamas supplies water on a take or pay basis to the Water and Sewerage Corporation of The Bahamas under long-term build, own and operate supply agreements. During 2007, we supplied approximately 3.2 billion U.S. gallons (2006: 2.3 billion U.S. gallons) of water to the Water and Sewerage Corporation.

British Virgin Islands

We are in the market in the British Virgin Islands with an equity position in, and shared management of, OC-BVI. This affiliate produces potable water from one reverse osmosis seawater conversion plants in Tortola. This plant has a total installed capacity of 1.7 million U.S. gallons per day and provides water to the Department of Water and Sewerage of the Ministry of Communications and Works of the Government of the British Virgin Islands. During 2007, OC-BVI supplied approximately 536 million U.S. gallons (2006: 470 million U.S. gallons) of water to its bulk water customer.

Critical Accounting Policies

We have identified the accounting policies below as those policies critical to our business operations and the understanding of results of operations.

Use of estimates: The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant items subject to estimates and assumptions include the carrying value of property, plant and equipment, intangible assets, goodwill, allowances for receivables and inventory, and the fair value of our investment in affiliate. Actual results could differ significantly from those estimates.

Basis of consolidation: For consolidation purposes, we evaluate our investments in subsidiaries and affiliates in accordance with the guidance set forth in Accounting Research Bulletin No. 51 Consolidated Financial Statements and related pronouncements, including Financial Accounting Standards Board Interpretation No. 46(R) Consolidation of Variable Interest Entities (FIN 46(R)). This interpretation addresses the consolidation by business enterprises of variable interest entities, which have one or more of the characteristics defined in the interpretation. We consolidate the results of those affiliates that possess the characteristics of a variable interest entity and for which the Company is the primary financial beneficiary. The consolidated financial statements include the accounts of our wholly-owned subsidiaries Cayman Water Company Limited, Consolidated Water (Belize) Limited, Ocean Conversion (Cayman) Limited, DesalCo Limited, DesalCo (Barbados) Ltd, Aquilex, Inc. and our majority owned subsidiary Consolidated Water (Bahamas) Limited. In accordance with FIN 46 (R) the consolidated financial statements also include the accounts of our 40% owned affiliate Consolidated Water (Bermuda) Limited. All inter-company balances and transactions have been eliminated.

Goodwill and other intangible assets: Goodwill represents the excess costs over fair value of the assets of an acquired business. Goodwill and intangible assets acquired in a business combination accounted for as a purchase and determined to have an indefinite useful life are not amortized, but are tested for impairment at least annually in accordance with the provisions of SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 142 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets. We periodically evaluate the possible impairment of goodwill.

Management identifies its reporting units and determines the carrying value of each reporting unit by assigning the assets and liabilities, including the existing goodwill and intangible assets, to those reporting units. We determine the fair value of each

Table of Contents

reporting unit and compare it to the carrying amount of the reporting unit. To the extent the carrying amount of the reporting unit exceeds the fair value of the reporting unit, we are required to perform the second step of the impairment test, as this is an indication that the reporting unit goodwill may be impaired. In this step, we compare the implied fair value of the reporting unit goodwill with the carrying amount of the reporting unit goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit to all the assets (recognized and unrecognized) and liabilities of the reporting unit in a manner similar to a purchase price allocation, in accordance with SFAS No. 141, *Business Combinations*. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. If the implied fair value is less than its carrying amount, the impairment loss is recorded. Our annual tests have resulted in no goodwill impairment.

Plant construction revenue and cost of plant construction revenue: We recognize revenue and related costs as work progresses on fixed price contracts for the construction of desalination plants to be sold to third parties using the percentage-of-completion method, which relies on contract revenue and estimates of total expected costs. We follow this method since we can make reasonably dependable estimates of the revenue and costs applicable to various stages of a contract. Under the percentage-of-completion method, we record revenue and recognize profit or loss as work on the contract progresses. Our engineering personnel estimate total project costs and profit to be earned on each long term, fixed price contract prior to commencement of work on the contract and updates these estimates as work on the contract progresses. The cumulative amount of revenue recorded on a contract at a specified point in time is that percentage of total estimated revenue that incurred costs to date comprises of estimated total contract costs. If, as work progresses, the actual contract costs exceed estimates, the profit recognized on revenue from that contract decreases. We recognize the full amount of any estimated loss on a contract at the time the estimates indicate such a loss. Any costs and estimated earnings in excess of billings are classified as current assets. Accounts receivable, net, at December 31, 2007 includes approximately \$988,000 in estimated earnings in excess of billings related to the construction of the Tynes Bay plant in Bermuda. Billings in excess of costs and estimated earnings on uncompleted contracts are classified as current liabilities.

Property, plant and equipment: Property, plant and equipment is stated at cost less accumulated depreciation. Depreciation commences in the month the asset is placed in service and is calculated using a straight-line method with an allowance for estimated residual value. Rates are determined based on the estimated useful lives of the assets as follows:

Buildings	5 to 40 years
Plant and equipment	4 to 40 years
Distribution system	3 to 40 years
Office furniture, fixtures and equipment	3 to 10 years
Vehicles	3 to 10 years
Leasehold improvements	lesser of 5 years or operating lease term
Lab equipment	5 to 10 years

Additions to property, plant and equipment are comprised of the cost of the contracted services, direct labor and materials. Assets under construction are recorded as additions to property, plant and equipment upon completion of a project. Improvements that significantly increase the value of property, plant and equipment are capitalized.

Maintenance, repairs and minor improvements are charged to expense as incurred.

Construction in progress: The cost of borrowed funds directly attributable to the acquisition and construction of qualifying assets, which are assets that necessarily take a substantial period of time to be ready for their intended use, are added to the cost of those assets until such time as the assets are substantially ready for use or sale.

Trade accounts receivable: We maintain an allowance for doubtful accounts for estimated losses resulting from the inability of our customers to make payments. Management continuously evaluates the collectibility of accounts receivable and records allowances based on estimates of the level of actual write-offs that might be experienced. These estimates are based on, among other things, comparisons of the relative age of accounts and consideration of actual write-off history.

Table of Contents**Quarterly Results of Operations**

The following table presents unaudited quarterly results of operations for the eight quarters ended December 31, 2007. We believe that all necessary adjustments, consisting only of normal recurring adjustments, have been included in the amounts stated below to present fairly such quarterly information.

	For the year ended December 31, 2007			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Total revenue	\$ 12,734,610	\$ 11,964,380	\$ 11,919,463	\$ 12,531,394
Gross profit	5,303,355	4,484,296	4,320,275	4,576,300
Net income	3,587,478	2,621,537	2,509,164	2,669,472
Diluted earnings per share	0.25	0.18	0.17	0.18

	For the year ended December 31, 2006			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Total revenue	\$9,243,564	\$9,626,979	\$10,010,365	\$9,348,300
Gross profit	4,773,348	4,409,485	3,808,822	2,622,151
Net income	3,078,011	2,522,029	1,247,040	674,046
Diluted earnings per share	0.24	0.20	0.10	0.05

Table of Contents**Results of Operations**

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our audited consolidated financial statements and accompanying notes included under Part II, Item 8 of this Annual Report.

Year Ended December 31, 2007 Compared to Year Ended December 31, 2006**Consolidated Results**

Net income for the year ended December 31, 2007 was \$11,387,651 (\$0.79 per share on a fully-diluted basis) as compared to \$7,521,126 (\$0.59 per share on a fully-diluted basis) for the year ended December 31, 2006.

Total revenues for the year ended December 31, 2007 increased to \$49,149,847 from \$38,229,208 for the year ended December 31, 2006 primarily due to an increase in bulk water revenues and revenues from plant construction contracts. Gross profit for the year ended December 31, 2007 was \$18,684,226, or 38% of total revenues, as compared to \$15,613,806, or 41%, for the previous year. For further discussion of revenues and gross profit for the year ended December 31, 2007, see the Results by Segment analysis that follows.

General and administrative (G&A) expenses were \$9,478,308 and \$8,432,073 on a consolidated basis for 2007 and 2006, respectively. Compensation expenses for 2007 exceeded those for 2006 by approximately \$637,000 due to incremental hires for our Aquilex office and an increase in accrued management bonuses. Directors fees and expenses for 2007 exceeded those for 2006 by approximately \$271,000. During 2008, we changed the bonus arrangements for our executive management and reduced the size of some of our Board committees with the intention of reducing the aggregate amount paid for directors fees and expenses in 2008 from that paid in 2007.

Interest income for 2007 was \$1,911,303, up \$1.6 million from 2006. This increase reflects the investment of available cash balances (the majority of which arose from the stock offering we completed in December 2006) during the year in interest bearing, cash equivalent deposits. Interest expense for 2007 of \$1,856,277 was consistent with that incurred for 2006 of \$1,886,518.

Results by Segment***Retail Segment:***

Revenues generated by our retail water operations were \$19,522,504 and \$18,003,456 for 2007 and 2006, respectively. By volume of gallons sold, our retail revenues increased by approximately 6.25% in 2007 when compared to 2006.

As a result of the added revenues the retail segment generated gross profit of \$12,294,829 (63% of revenues) in 2007 as compared to \$11,367,577 (63% of revenues) in 2006.

Consistent with prior periods, we record all non-direct G&A expenses in our retail business segment and do not allocate any of these non-direct costs to our other two business segments. Retail G&A expenses for 2007 were \$7,822,592, up \$736,081 from 2006. The increase in G&A expenses for 2007 is attributable to a rise in compensation expense of approximately \$603,000 resulting from incremental hires for our Aquilex office and an increase in accrued management bonuses as well as incremental directors fees and expenses of approximately \$217,000. During 2008, we changed the bonus arrangements for our executive management and we reduced the size of some of our Board committees with the intention of reducing the aggregate amount paid for directors fees and expenses in 2008 from that paid in 2007.

Bulk Segment:

Bulk segment revenues were \$22,096,635 and \$18,303,479 for 2007 and 2006, respectively. Revenues from the bulk segment grew from 2006 to 2007 primarily due to our operations in the Bahamas, as our Blue Hills plant did not begin operations until July 2006.

Gross profit dollars for our bulk segment were \$4,241,634 and \$3,424,748 for 2007 and 2006, respectively. Gross profit as a percentage of bulk revenues was 19% for both 2007 and 2006.

During 2006, the gross profit for our Bahamas operations benefited from the Windsor Plant Expansion project, whereby we expanded the capacity of our Windsor plant and increased its revenues through the use of six containerized production units. These units were operated with existing staff and minimal additional other costs. As a result, the revenues generated from the production of these units during 2006 were at significantly higher gross profits as a percentage of revenues than the revenues for 2007. Four of these containerized production units were transferred

from the Bahamas to our Grand Cayman retail operations in the third quarter of 2006.

Table of Contents

The 2007 bulk segment gross profit was adversely affected by the non-revenue water (NRW) component of our agreement with the WSC for the Blue Hills plant. This element of the agreement required us to reduce the amount of water lost by the public water distribution system on New Providence Island over a one year period by 438 million U.S. gallons. Until such time as we demonstrated to the WSC that we have achieved this reduction, we were required to provide 1.2 million U.S. gallons of water per day to the WSC from the Blue Hills plant at no cost to the WSC. The variable costs associated with providing this free water to WSC were significant to overall plant operating costs and impacted the overall gross profit on water revenues from the Blue Hills plant during 2007.

We have diligently pursued completion of the NRW project in order to reduce operating costs and improve the profitability of the Blue Hills operation. In September 2007, using standards promulgated by the International Water Association, we completed an internal assessment of our progress in achieving the water savings required under the Blue Hills agreement and submitted our assessment to the WSC. Based upon this assessment, the standards for which require us to validate the results for a period of time prior to September 2007, we believe we met the NRW requirement effective March 1, 2007. Consequently, we invoiced the WSC (but did not previously recognize as revenue) approximately \$618,000 for the non-revenue water provided for the period from March 1, 2007 through September 30, 2007. The WSC has confirmed by letter dated January 11, 2008 that the NRW project was completed on July 1, 2007 but has not provided any technical support for this later completion date. We have disputed the July 1, 2007 completion date and have asked the WSC for technical information in support of its decision. We have subsequently closed out the NRW project and discharged all remaining NRW obligations to the WSC. Based upon the January 11, 2007 correspondence from the WSC we recognized \$286,000 in revenue during the fourth quarter of 2007 relating to the period July 1, 2007 to September 30, 2007 and recognized revenues for all water delivered to the WSC during the fourth quarter of 2007. While we believe we have met the NRW requirement as of March 1, 2007 and are therefore contractually entitled to receive payment for all of these NRW invoices, because of the uncertainty associated with the WSC review and approval of our assessment we have reserved for the NRW amounts invoiced for the period March 1, 2007 through June 30, 2007 of approximately \$332,000 in our results of operations for 2007. We can offer no assurances as to how much, if any, of these remaining NRW invoices we will ultimately be able to collect and recognize as revenues.

Bulk segment G&A expenses for, 2007 and 2006 were \$1,437,896 and \$1,232,435 respectively. The growth in G&A expenses from 2006 to 2007 primarily reflects additional consulting fees in 2007.

Services Segment:

Revenues from services provided in 2007 were \$7,530,708 as compared to \$1,922,273 in 2006. Services revenues increased from 2006 to 2007 due to approximately \$5.6 million in revenues recognized for the construction of the Tynes Bay plant in Bermuda and the expansion of the North Sound plant on behalf of the Water Authority-Cayman. The increase in gross profit of the services segment to \$2,147,763 for 2007 from the gross profit reported for this segment for 2006 of \$821,481 results from the gross profit recognized on the Tynes Bay and North Sound projects. G&A expenses for the services segment were \$217,820 and \$113,127 for 2007 and 2006, respectively. The increase in G&A expenses primarily represents incremental expenses incurred by our Bermuda operations.

Year Ended December 31, 2006 Compared to Year Ended December 31, 2005**Consolidated Results**

Net income for the year ended December 31, 2006 was \$7,521,126 (\$0.59 per share on a fully-diluted basis), up 36% from the \$5,514,258 (\$0.45 per share) reported for the year ended December 31, 2005.

The earnings improvement for 2006 reflects a substantial increase in consolidated gross profit attributable to revenue growth. Consolidated revenues for 2006 amounted to \$38,229,208 as compared to \$26,187,205 for 2005. Additional revenues were earned by all three business segments as retail sales, bulk sales and services revenues for 2006 exceeded those for 2005. Consistent with the growth in revenues, consolidated gross profit increased from \$10,354,397 in 2005 to \$15,613,806 in 2006. Please refer to Results by Segment below for a more detailed discussion of our revenues and gross profit for the year ended December 31, 2006.

General and administrative (G&A) expenses were \$8,421,815 and \$6,115,297 on a consolidated basis for 2006 and 2005, respectively. The majority of the increase in G&A expenses for 2006 is attributable to personnel costs, which exceeded those for the

Table of Contents

prior year by approximately \$1.5 million. The personnel costs for our accounting, engineering and supply chain support office/subsidiary in Deerfield Beach, Florida that opened in November 2005 grew by approximately \$713,000 from 2005 to 2006 and our Cayman subsidiaries incurred approximately \$722,000 more in personnel costs in 2006 as a result of incremental hires, pay raises and bonus accruals. The overall growth in 2006 G&A expense also reflects increases in depreciation expense, insurance expense and directors' expenses of approximately \$177,000, \$169,000 and \$107,000, respectively and the other various G&A costs for our Deerfield Beach office, which exceeded those for 2005 by approximately \$388,000.

Interest expense for 2006 was \$1,886,518, as compared to \$885,628 for 2005. The greater interest expense for 2006 reflects the increase in average outstanding borrowings in 2006 (which were incurred to complete construction of our Blue Hills plant in The Bahamas) and the cessation of the capitalization of interest costs for our Blue Hills plant upon the commissioning of that plant in July 2006.

Results by Segment***Retail Segment:***

Revenues generated by our retail water operations were \$18,003,456 and \$13,372,103 for 2006 and 2005, respectively. The 35% increase in revenues from 2005 to 2006 resulted from increased demand in Grand Cayman, particularly in our Seven Mile Beach service area. By volume of gallons sold, our retail sales increased 26% in 2006 when compared to 2005. During 2005 our retail sales were adversely affected by the continuing impact of Hurricane Ivan, which damaged a number of hotel and tourist properties in September 2004, thereby reducing the level of tourism and the demand for water for most of 2005. Many of the damaged properties have reopened, new properties have been constructed, and consequently 2006 water demand in our Seven Mile Beach service area exceeded that for 2005.

In 2006 the retail segment generated \$11,367,577 in gross profit (63% of sales), as compared to \$8,002,553 (60% of sales) in 2005. Total 2006 gross profit for retail sales increased as compared to 2005 because of the increased retail water sales. Retail segment gross profit as a percentage of sales improved from 2005 to 2006 as output and revenues for the retail plants grew at a rate faster than overall plant operating costs, as a significant portion of these costs are relatively fixed.

Consistent with prior periods we record all non-direct G&A expenses in our retail business segment and do not allocate any of these non-direct costs to our other two business segments. Retail G&A expenses for 2006 were \$7,086,511, up 33% from the \$5,320,301 in retail G&A for 2005. The 2006 personnel costs of our accounting, engineering and supply chain support subsidiary in Deerfield Beach, Florida exceeded those for 2005 by approximately \$713,000, and the other 2006 G&A expenses for this subsidiary exceeded 2005's by approximately \$465,000, as this subsidiary commenced its activities in the fourth quarter of 2005. The remainder of the 2006 growth in G&A expenses for the retail segment consists primarily of personnel costs for the other retail segment subsidiaries arising from incremental hires, pay raises and bonuses.

Bulk Segment:

Bulk water sales for 2006 and 2005 were \$18,303,479 and \$11,724,438, respectively. The growth in bulk sales from 2005 to 2006 of \$6,579,041, or 56%, reflects added production capacity and reduced production penalties at the Windsor plant (which was temporarily expanded from October 2005 to August 2006) which increased 2006 sales for that plant by \$610,119 from 2005. In addition, we recognized incremental sales of \$4,707,399 for 2006 attributable to the opening our Blue Hills plant in July 2006 and increased sales of \$1,068,656 to our customer, Water Authority-Cayman, in the Cayman Islands. The Bulk water sales includes revenues to the Water and Sewerage Corporation of The Bahamas (WSC) and the Water Authority-Cayman totaling \$9,912,088 (2005: \$4,594,570) and \$7,088,782 (2005: \$6,020,125), respectively, which represented 26% (2005: 18%) and 19% (2005: 23%) of total revenues, respectively.

The gross profit on our bulk water sales declined from 23% of sales for the nine months ended September 30, 2006 to 19% of sales for the year ended December 31, 2006. This decline in overall gross profit from the end of the third quarter to year end represents the impact of approximately \$1.7 million in sales from our Blue Hills plant during the three months ended December 31, 2006 made at essentially a break even gross margin. Our agreement with the WSC for the Blue Hills plant contains a non-revenue water (NRW) component that requires us to reduce the amount of

water lost by the public water distribution system on New Providence Island over a one year period by 438 million U.S. gallons. Until such time as we can demonstrate to the WSC that we have achieved this reduction, we are required to provide 1.2 million U.S. gallons of water per day to the WSC from the Blue Hills plant at no cost to the

Table of Contents

WSC. The costs associated with providing this free water to WSC are significant to overall plant operating costs and greatly reduced the overall gross margin on total water sales from the Blue Hills plant during the fourth quarter of 2006. The lack of gross margin on these sales made by the Blue Hills facility is attributable to higher operational costs related to plant start-up and our current obligations with respect to the NRW reduction component of the Blue Hills contract.

Bulk segment gross profit for 2006 was \$3,424,748, or 19% of sales, as compared to \$1,892,329, or 16% of sales, for 2005. In 2006 total bulk segment gross profit dollars increased as compared to the prior year because of the increased bulk water sales. Gross profit for bulk water sales improved as a percentage of sales from 2005 to 2006 primarily due to operational efficiencies associated with the use of containerized units in the temporary expansion of the Windsor plant and to a lesser extent of the Lower Valley plant.

Bulk segment G&A expenses for 2006 and 2005 were \$1,222,177 and \$744,275 respectively. The overall increase in bulk G&A reflects increases in a variety of expense categories including personnel costs, insurance, and professional fees.

Services Segment:

Our 2006 revenues from services provided were \$1,922,273 as compared to \$1,090,664 for 2005. Service revenues rose from 2005 to 2006 as a result of increased engineering and design fees received from OC-BVI in connection with the construction of the Bar Bay plant.

The gross profit of \$821,481 for 2006 exceeded the gross profit reported for this segment for 2005 by \$361,966 as a result of increased design fees while maintaining relatively fixed operating costs.

G&A expenses for the services segment from 2006 to 2005 remained relatively unchanged at \$113,127 and \$50,721, respectively.

LIQUIDITY AND CAPITAL RESOURCES

Overview

Our sources of cash are operations, borrowings under our term loans and credit facilities and sales of our debt and equity securities.

Our cash flows from operations are derived from distributions from, and the management fees paid to us by, our operating subsidiaries. Cash flows from our subsidiaries' operations are dependent upon the revenue amounts generated which are affected primarily by tourism, weather conditions, changes in our customer base, the timing and level of rate increases, overall economic conditions and other factors and the timing of the collection of these revenues from our customers. Distributions from CW-Bahamas to us are subject to certain restrictions under the terms of its credit facility. See *Borrowings Outstanding - CW-Bahamas Credit Facility Refinancing*.

Our ability to access the debt and equity capital markets is impacted by our current and anticipated financial results, financial condition; existing level of borrowings; the terms of our debt agreements (including our compliance therewith), and the conditions in the debt and equity markets affecting our offerings.

Our primary uses of cash are construction costs and capital expenditures, including plant expansion and new plant construction. Other significant uses include payment of dividends, repayment of debt and pursuit of new business opportunities.

Cash Flows for the Year Ended December 31, 2007

Our cash and cash equivalents increased from \$37,310,699 at December 31, 2006 to \$38,529,383 at December 31, 2007.

Cash Flows from Operating Activities

Operating activities provided net cash for the year ended December 31, 2007 of \$9,212,610. This cash provided reflects net income generated for the year of \$11,387,651 as adjusted for (i) various items included in the determination of net income that do not affect cash flows during the year and (ii) changes in the other components of working capital. The more significant of such items and their

Table of Contents

approximate amounts for 2007 included depreciation and amortization (\$5.9 million), undistributed income from OC-BVI (\$2.3 million) and a net increase in accounts receivable during the year (\$3.7 million).

Cash Flows Used in Investing Activities

Our investing activities used \$6,514,895 in net cash during the year ended December 31, 2007. Approximately \$1.9 million was used to fund expansion of our desalination plant at Governor's Harbour, \$1.6 million was spent to acquire a parcel of land adjacent to our Governor Harbor's plant, \$1 million was spent to complete construction of a water tower in the Bahamas, and we had miscellaneous other property additions of approximately \$3.2 million. We collected \$1,019,163 on our loans receivable.

Cash Flows from Financing Activities

We obtained \$1,479,031 in net cash from our financing activities during 2007. The exercise of stock options by some of our employees provided approximately \$3.5 million. During the year we made \$1,302,099 in scheduled payments on our debt and paid dividends of \$3,721,538.

Financial Position

Our total assets increased from approximately \$139.0 million at December 31, 2006 to approximately \$149.3 million at December 31, 2007.

Accounts receivable as of December 31, 2007 were approximately \$9.9 million, up almost \$3.7 million from December 31, 2006. This increase in accounts receivable reflects incremental receivables of approximately \$3.5 million for CW-Bahamas resulting from the added revenues generated by our Blue Hills plant.

Our inventory growth from approximately \$2.8 million at December 31, 2006 to approximately \$3.6 million at December 31, 2007 represents purchases for our Blue Hills plant and to support our overall increase in revenues.

Borrowings Outstanding

As of December 31, 2007, we had borrowings outstanding aggregating \$23,500,593 that consisted of bonds payable. *5.95% Secured Bonds*

In August 2006, we issued \$15,771,997 principal amount secured fixed rate bonds in a private offering and received net proceeds (excluding issuance costs and after the offering discount) of \$14,445,720. These bonds bear interest at a rate of 5.95%, are repayable in quarterly principal and interest installments of \$526,010 and mature in 2016. We have the right to redeem the bonds in full at any time after August 4, 2009 at a premium of 1.5% of the outstanding principal and accrued interest on the bonds on the date of redemption. As of December 31, 2007, \$14,270,994 in principal amount was outstanding on these secured bonds. Our obligations under the bonds are secured by fixed and floating charges (i) on all of our assets, including an equitable charge of all of the shares of Cayman Water, and (ii) on all of Cayman Water's assets including its real estate. Cayman Water has also guaranteed our payment obligations under the bonds.

Table of Contents

The trust deed for these bonds restricts our ability to enter into new borrowing agreements or any new guarantees without prior approval of the trustee and limits our capital expenditures, with the exception of capital expenditures to be incurred on certain defined projects, to \$2,000,000 annually without prior approval by the trustee. The trust deed also contains financial covenants that require us to maintain a debt service coverage ratio of not less than 1.25 to 1, a ratio of long term debt to EBITDA (i.e. earnings before interest, taxes, depreciation and amortization for the 12 months preceding the ratio calculation date) not greater than 2.5 to 1 and a ratio of long term debt to equity equal to or less than 1.5 to 1. As of December 31, 2007, we were in compliance with the covenants under the trust

CW-Bahamas Series A Bonds

In July 2005, CW-Bahamas sold \$10,000,000 Series A bonds to Bahamian citizens and permanent resident investors in The Bahamas to finance a portion of the construction cost of its Blue Hills plant. These bonds mature on June 30, 2015 and accrue interest at the annual fixed rate of 7.5%. Interest is payable quarterly. CW-Bahamas has the option to redeem the bonds in whole or in part without penalty commencing after June 30, 2008. We have guaranteed CW-Bahamas repayment obligations upon an event of default as defined in the guarantee agreement. If we pay any amounts pursuant to the guarantee, we will be subrogated to all rights of the bondholders in respect of any such payments. The guarantee is a general unsecured obligation junior to our other secured obligations. As of December 31, 2007, \$10,000,000 of the Series A bonds was outstanding.

CW-Bahamas Credit Facility

CW-Bahamas has a credit facility with Royal Bank of Canada that consists of a BAH\$500,000 revolving working capital loan. The obligations under the credit facility are secured by the assets CW-Bahamas. Borrowings under the working capital loan accrue interest at the Nassau Prime rate plus 1.50% per annum. No amounts were outstanding under this facility at December 31, 2007.

The credit facility contains certain covenants applicable to CW-Bahamas, including restrictions on additional debt, guarantees and sale of assets. The credit facility limits the payment of dividends by CW-Bahamas to available cash flow (as defined in the governing loan agreement). The credit facility also contains a financial covenant requiring CW-Bahamas to maintain a ratio of total liabilities to tangible net worth (each as defined in the loan agreement) of not greater than 2 to 1.

All obligations under the credit facility are repayable on demand. CW-Bahamas was not in compliance with the financial covenant of this facility as of December 31, 2007.

Material Commitments, Expenditures and Contingencies*OC-BVI Contract Dispute*

In October 2006, our affiliate OC-BVI notified us that the Ministry of Communications and Works of the Government of the British Virgin Islands (the Ministry) had asserted a purported right of ownership of the Baughers Bay plant pursuant to the terms of the Water Supply Agreement between the parties dated May 1990 (the 1990 Agreement) and had invited OC-BVI to submit a proposal for its continued involvement in the production of water at the Baughers Bay plant in light of the Ministry's planned assumption of ownership.

Under the terms of the 1990 Agreement, upon the expiration of the initial seven year term in May 1999, the agreement would automatically be extended for another seven year term unless the Ministry provided notice, at least eight months prior to such expiration, of its decision to purchase the plant from OC-BVI for approximately \$1.42 million.

In correspondence between the parties from late 1998 through early 2000, the Ministry indicated that the BVI Government was prepared to exercise the option to purchase the plant but would be amenable to negotiating a new water supply agreement, and that it considered the 1990 Agreement to be in force on a monthly basis until negotiations between the BVI Government and OC-BVI were concluded. Occasional discussions were held between the parties since 2000 without resolution of the matter. OC-BVI has continued to supply water to the Ministry and has expended approximately \$4.7 million to significantly expand the production capacity of the plant beyond that contemplated in the 1990 Agreement.

The Ministry is OC-BVI's sole customer and substantially all of its revenues are generated from the Baughers Bay plant. For the years ended December 31, 2007, 2006, and 2005, we recognized approximately \$1.6 million, \$1.4 million and \$1.4 million, respectively, in income from our equity investment in the earnings of OC-BVI. For those same years, we recognized approximately \$669,000, \$1,500,000 and \$680,000, respectively, in revenues from

its management services agreement with OC-BVI. We also

38

Table of Contents

recognized approximately \$445,000, \$508,000 and \$485,000 in other income for the years ended December 31, 2007, 2006 and 2005, respectively, from our profit-sharing agreement with OC-BVI. In addition to our loan to, and equity investment in, OC-BVI of approximately \$17.5 million, the recorded value of the management services agreement with OC-BVI, which is reflected as an intangible asset on our consolidated balance sheet, was approximately \$856,000 as of December 31, 2007. OC-BVI owed us approximately \$660,000 for unpaid management fees and operating advances as of December 31, 2007, which is included in accounts receivable in our consolidated balance sheet and was subsequently collected in 2008.

OC-BVI submitted a proposal to the Ministry in late 2006 to continue to supply water from the Baughers Bay plant. The Ministry held discussions with OC-BVI regarding a new contract but did not formally respond to OC-BVI's proposal. Early in 2007 the Ministry unilaterally took the position that until such time as a new agreement is reached on the ownership of the plant and the price for the water produced by the plant, the Ministry would only pay that amount of OC-BVI's billings that the Ministry purports constitutes OC-BVI's costs of producing the water. At its proposed interim price, the Ministry would pay only approximately 30% of the amounts billed by OC-BVI pending a new agreement. OC-BVI responded to the Ministry that the amount the Ministry proposed to pay was significantly less than OC-BVI's production costs. Payments made by the Ministry to OC-BVI since the Ministry's assumption of this reduced price have been sporadic and as of December 31, 2007 OC-BVI had received payment for less than 22% of the amounts it billed the Ministry for the year then ended. On November 15, 2007, OC-BVI issued a demand letter to the BVI Government for approximately \$6.2 million representing amounts that OC-BVI claimed were due by the BVI Government for water sold and delivered plus interest and legal fees. In response to OC-BVI's demand for payment, the BVI Government issued a letter dated November 19, 2007 that reasserted its claim that ownership of the Baughers Bay plant has passed to the BVI Government and rejected OC-BVI's claim for payment. OC-BVI advised the BVI Government in correspondence dated November 21, 2007 that it was demanding that the dispute between OC-BVI and the BVI Government be submitted to arbitration pursuant to the terms of the 1990 Agreement. On the following day, OC-BVI's management was informed that the BVI Government had filed a lawsuit with the Eastern Caribbean Supreme Court seeking ownership of the Baughers Bay plant. OC-BVI has informed the Company that it intends to vigorously pursue its rights to full payment for water sold and delivered to the BVI Government and to defend against any action that the BVI Government owns any interest in the Baughers Bay plant and that it believes this dispute will be resolved to its satisfaction.

As of December 31, 2007 OC-BVI had \$8.2 million in gross accounts receivable balances due from the BVI Government. In January 2008 the BVI Government remitted a partial payment on these receivables to OC-BVI of \$3.5 million. If OC-BVI continues to experience difficulty in collecting the amounts it invoices to the BVI Government, it may be required to defer or reserve for all or a portion of the revenues it invoices but has not yet collected from the BVI Government. Should this occur, the income amounts we record from our various OC-BVI related assets would decline, and our results of operations could be adversely affected.

During 2007 OC-BVI completed, for a total cost of approximately \$8 million, the construction of a 700,000 U.S. gallons per day desalination plant located at Bar Bay, Tortola (the Bar Bay plant). We provided OC-BVI with a \$3 million loan to fund part of this plant's construction costs, of which \$2,875,000 remained outstanding as of December 31, 2007. Principal on this loan is payable in quarterly installments of \$125,000 with a final balloon payment of \$2 million due on August 31, 2009 and interest on the loan is due quarterly at the rate of LIBOR plus 3.5%. As of December 31, 2007, OC-BVI had failed to make the November 2007 scheduled principal payment on the loan but had brought the loan current with respect to all scheduled principal payments as of March 2008. OC-BVI constructed this plant in response to what it believes is an extreme shortage of, and a pressing demand for, potable water on the eastern end of Tortola and anticipated entering into a bulk water supply agreement with the Ministry. However, due to the Baughers Bay dispute OC-BVI had not reached an agreement with the Ministry and the Bar Bay plant had not commenced operations as of March 2008.

OC-BVI has informed us that it met with members of the Ministry and others in the BVI Government in March 2008 and that during this meeting the BVI Government expressed its preference to resolve the Baughers Bay ownership issue without litigation and to enter into negotiations for new water supply agreements with OC-BVI on mutually acceptable terms for both the Baughers Bay and Bar Bay plants. OC-BVI has also informed us that it believes based

upon this meeting that further payments against its outstanding accounts receivables from the BVI Government as of December 31, 2007 may be forthcoming in the near future.

We account for our investment in OC-BVI in accordance with Accounting Principles Board Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock. This accounting pronouncement requires recognition of a loss on an equity investment that is other than temporary, and indicates that a current fair value of an equity investment that is less than its carrying amount may indicate a loss in the value of the investment. To test for possible impairment of our investment in OC-BVI, we estimated its fair value as of December 31, 2007. In making this estimate, we calculated the expected cash flows from our investment in OC-BVI using the guidance set forth under the FASB Statement of Financial Accounting Concepts No. 7, Using Cash Flow Information and Present Value in Accounting Measurements. In accordance with this FASB statement we (i) identified various

Table of Contents

possible outcomes of the Baughers Bay dispute and negotiations for a contract on the new Bar Bay plant; (ii) estimated the cash flows associated with each possible outcome, and (iii) assigned a probability to each outcome based upon discussions held to date by OC-BVI's management with the BVI Government and OC-BVI's legal counsel. The resulting probability-weighted sum represents the expected cash flows, and our best estimate of future cash flows, to be derived from our investment in OC-BVI. We determined that the fair value of our investment in OC-BVI, as based upon these expected cash flows, exceeded our carrying value for its investment in OC-BVI as of December 31, 2007 and therefore no loss should be recognized on this investment.

The identification of the possible outcomes for the Baughers Bay dispute and Bar Bay negotiations, the projections of cash flows for each outcome, and the assignment of relative probabilities to each outcome all represent significant estimates made by us. The ultimate resolution of the Baughers Bay and Bar Bay issues may differ significantly from our estimates and may result in actual cash flows from OC-BVI that vary materially from the expected cash flows we used in determining OC-BVI's fair value at December 31, 2007. If OC-BVI and the BVI Government are unable to agree on a new contract for Baughers Bay and this matter proceeds to resolution through the Courts, the Ministry's right of ownership under the 1990 Agreement could be found to be enforceable, in which case OC-BVI could lose its water supply arrangement with the Ministry or may be forced to accept a water supply arrangement with the Ministry on less favorable terms, and if the BVI Government exercises its purported right, OC-BVI could lose ownership of the Baughers Bay plant. Even if OC-BVI is able to refute the Ministry's purported right of ownership, OC-BVI may elect to accept a new contract on less favorable terms. OC-BVI may be unsuccessful in negotiating a contract for the Bar Bay plant on terms it finds acceptable. Any of these or other possible outcomes could result in actual cash flows from our investment in OC-BVI that are significantly lower than our estimate. In such case, we could be required to record an impairment charge to reduce the carrying value of our investment in OC-BVI. Such impairment charge would reduce our earnings and could have a material adverse impact on our results of operations and financial condition.

Material Expenditures and Commitments

The following table summarizes our contractual obligations as of December 31, 2007:

	Total	2008	2009 - 2011	2012 - 2014	2015 and Thereafter
Secured 5.95% bonds ⁽¹⁾⁽²⁾	\$ 18,410,350	\$ 2,104,040	\$ 6,312,120	\$ 6,312,120	\$ 3,682,070
Series A bonds ⁽¹⁾	15,625,000	750,000	2,250,000	2,250,000	10,375,000
Employment agreements	1,989,349	961,500	1,027,849	0	0
Operating leases	1,027,830	302,167	725,663	0	0
Other	352,660	242,660	0	60,000	50,000

(1) Includes interest costs to be incurred.

(2) Secured 5.95% bonds are shown gross of discount.

In addition to the commitments in the table above, we estimate the costs as of December 31, 2007 to complete the expansion of the Governor's Harbour and West Bay plants on Grand Cayman to be approximately \$3.8 million. We further estimate the costs as of December 31, 2007 to complete the construction of the Frank Sound plant in Grand Cayman and the Tynes Bay plant in Bermuda to be \$13.3 million. We project these costs will all be incurred in 2008.

Table of Contents*CW-Bahamas Performance Bonds*

We have two contracts, one for our Windsor plant and one for our Blue Hills plant, to supply water to the Water and Sewer Corporation of the Government of The Bahamas (WSC). Each contract requires us to guarantee delivery of a minimum quantity of water per week. If we do not meet this minimum, we are required to pay to the WSC for the difference between the minimum and actual gallons delivered at a per gallon rate equal to the price per gallon that WSC is currently paying us under the contract. The Windsor and Blue Hills contracts expire in 2013 and 2026, respectively and require us to deliver 14.0 million imperial gallons and 28.0 million imperial gallons, respectively, of water each week. We are required to provide the WSC with performance and operating guarantees, in the form of bank-issued performance bonds, to secure any payments we may be required to make under the minimum delivery requirements of these contracts. As of December 31, 2007, performance bonds of \$1.90 million and \$3.0 million were outstanding for the Windsor and Blue Hills plant respectively.

CW-Bermuda Financing

In January 2007, our recently formed affiliate, CW-Bermuda, signed a contract with the Government of Bermuda to design, build and operate a desalination plant at Tynes Bay on the northern coast of Bermuda. The project includes the desalination plant which will have a production capacity of 600,000 U.S. gallons per day, a standby electrical power plant and 1.27 miles of main water delivery pipelines. The plant design provides for a future increase in production capacity to 1.2 million U.S. gallons per day. CW-Bermuda is constructing the plant and will operate it. Under the terms of the contract, CW-Bermuda is required to complete construction and commission the plant and pipeline by the end of June 2008 and will operate the plant for at least 12 months after commissioning. We have agreed to loan CW-Bermuda up to \$7.5 million to complete construction of the project and have entered into a management agreement with CW-Bermuda to oversee construction of the plant and to operate the plant once it is completed. The total revenues to be received under this contract for the desalination plant and management agreement are estimated to be approximately \$10.8 million. As of December 31, 2007, \$955,000 was receivable from our Bermuda affiliate and our remaining loan commitment under this facility was \$3.1 million.

Frank Sound Contract

In July 2007, the Cayman Islands Government awarded Ocean Conversion (Cayman) Limited, a ten-year Design-Build-Sell-Operate contract for a seawater desalination plant on Frank Sound on Grand Cayman Island. The design capacity of the new plant will be 2.38 million U.S. gallons per day with a contract guarantee for the delivery of 2.14 million U.S. gallons per day to the customer, the Water Authority-Cayman. It is anticipated that this project will be completed in late 2008.

Dividends

On January 31, 2007, we paid a dividend of \$0.06 to shareholders of record on December 31, 2006, and on April 30, 2007, we paid a dividend of \$0.065 to shareholders of record on March 31, 2007.

On July 31, 2007, we paid a dividend of \$0.065 to shareholders of record on June 30, 2007, and on October 31, 2007 we paid a dividend of \$0.065 to shareholders of record on September 30, 2007.

On January 31, 2008, we paid a dividend \$0.065 to shareholders of record on January 15, 2008.

On February 20, 2008 our Board declared a dividend of \$0.065 payable on April 30, 2008 to shareholders of record on March 31, 2008.

We have paid dividends to owners of our ordinary shares and redeemable preference shares since we began declaring dividends in 1985 and these dividends have consistently increased since 1985. Our payment of any future cash dividends will depend upon our earnings, financial condition, cash flows, capital requirements and other factors our Board deems relevant in determining the amount and timing of such dividends.

Dividend Reinvestment and Common Stock Purchase Plan.

This program is available to our shareholders, who may reinvest all or a portion of their common cash dividends into shares of common stock at prevailing market prices. It also accepts optional cash payments to purchase additional shares at prevailing market prices.

Impact of Inflation

Under the terms of our Cayman Islands license and our water sales agreements in Belize, Bahamas and the British Virgin Islands, our water rates are automatically adjusted for inflation on an annual basis, subject to temporary

exceptions. We, therefore, believe that the impact of inflation on our net income, measured in consistent dollars, will not be material.

Table of Contents

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Credit Risk

We are not exposed to significant credit risk on retail customer accounts in the Cayman Islands, Bimini and the Bahamas, as our policy is to cease supply of water to customers whose accounts are more than 45 days overdue. Our primary exposure to credit risk is from accounts receivable arising from bulk water sales to the governments of Belize, The Bahamas, The British Virgin Islands, and the Cayman Islands. As of December 31, 2007 we had approximately \$2.3 million in loans receivable due from the Water Authority-Cayman and \$2,875,000 in a loan receivable due from our affiliate OC-BVI.

Interest Rate Risk

We are not exposed to significant interest rate risk as the annual interest rates on our Series A bonds and 5.95% bonds are fixed at 7.5% and 5.95%, respectively. As of December 31, 2007, we are subject to interest rate risk related to our \$2,875,000 loan to OC-BVI that bears interest at the three month LIBOR plus 3.5% per annum.

Foreign Exchange Risk

All of our foreign currencies have fixed exchanged rates to the U.S. dollar. If any of these fixed exchange rates become a floating exchange rate, however, our results of operation could be adversely affected.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

Consolidated Water Co. Ltd.

We have audited the accompanying consolidated balance sheets of Consolidated Water Co. Ltd. as of December 31, 2007 and 2006, and the related consolidated statements of income, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2007. We also have audited Consolidated Water Co. Ltd.'s internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Consolidated Water Co. Ltd.'s management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Consolidated Water Co. Ltd. as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, Consolidated Water Co. Ltd. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Table of Contents

CONSOLIDATED WATER CO. LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Principal activity

Consolidated Water Co. Ltd., and its subsidiaries (collectively, the Company) use reverse osmosis technology to produce fresh water from seawater. The Company processes and supplies water to its customers in the Cayman Islands, Belize and the Bahamas. The Company sells water to a variety of customers, including public utilities, commercial and tourist properties, residential properties and government facilities. The base price of water supplied by the Company, and adjustments thereto, are generally determined by the terms of the license and contracts, which provide for adjustments based upon the movement in the government price indices specified in the license and contracts, as well as monthly adjustments for changes in the cost of energy. The Company also provides engineering and design services and manages and operates plants owned by others.

2. Accounting policies

Basis of preparation: The consolidated financial statements presented are prepared in accordance with accounting principles generally accepted in the United States of America.

Use of estimates: The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant items subject to estimates and assumptions include the carrying value of property, plant and equipment, intangible assets, goodwill, allowances for receivables and inventory, and the fair value of the Company's investment in and loan to affiliate. Actual results could differ significantly from those estimates.

Basis of consolidation: For consolidation purposes, the Company evaluates its investments in subsidiaries and affiliates in accordance with the guidance set forth in Accounting Research Bulletin No. 51 Consolidated Financial Statements and related pronouncements, including Financial Accounting Standards Board Interpretation No. 46(R)

Consolidation of Variable Interest Entities (FIN 46R). FIN 46R addresses the consolidation by business enterprises of variable interest entities, which have one or more of the characteristics defined in the interpretation. The Company consolidates the results of those affiliates that possess the characteristics of a variable interest entity and for which the Company is the primary financial beneficiary. The consolidated financial statements include the accounts of the Company's wholly-owned subsidiaries Cayman Water Company Limited, Consolidated Water (Belize) Limited, Ocean Conversion (Cayman) Limited, DesalCo Limited, DesalCo (Barbados) Ltd., Aquilex, Inc. and its majority owned subsidiary Consolidated Water (Bahamas) Limited. In accordance with FIN 46R the consolidated financial statements also include the accounts of the Company's 40% owned affiliate Consolidated Water (Bermuda) Limited. All significant inter-company balances and transactions have been eliminated.

Foreign currency: The Company's reporting currency is the United States dollar. The functional currency of the Company and its foreign subsidiaries is the currency for each respective country. The exchange rates between the Cayman Islands dollar, the Belize dollar, the Bahamian dollar, the Bermuda dollar, and the Barbados dollar have been fixed to the United States dollar during all periods presented.

Monetary assets and liabilities denominated in foreign currencies are translated at the rates of exchange ruling at the balance sheet date. Foreign currency transactions are translated at the rate ruling on the date of the transaction. Net exchange gains and losses are included in other income in the consolidated statements of income.

Cash and cash equivalents: Cash and cash equivalents consist of cash at banks on call and highly liquid deposits with an original maturity of three months or less.

Trade accounts receivable and allowance for doubtful accounts: Trade accounts receivable are recorded at invoiced amounts based on meter readings or minimum take-or-pay amounts per contractual agreements. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable balance. The Company determines the allowance for doubtful accounts based on historical write-off experience and monthly review of delinquent accounts. Past due balances are reviewed individually for collectability and disconnection. Account balances are charged off against the allowance for doubtful accounts after all means of collection have been exhausted and the potential for recovery is considered by

management to be remote.

Inventory: Inventory primarily includes replacement spares and parts that are valued at the lower of cost and net realizable value on a first-in, first-out basis. Inventory also includes potable water held in the Company's reservoirs. The carrying amount of the water inventory is the lower of the average cost of producing or purchasing water during the year or its net realizable value.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents**CONSOLIDATED WATER CO. LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Loans receivable: Loans receivable relate to amounts advanced to customers to facilitate the construction of water desalination plants. The allowance for loan losses, if any, is the Company's best estimate of the amount of probable credit losses in the Company's existing loans and is determined on an individual loan basis.

Property, plant and equipment: Property, plant and equipment is stated at cost less accumulated depreciation. Depreciation is calculated using a straight line method with an allowance for estimated residual values. Rates are determined based on the estimated useful lives of the assets as follows:

Buildings	5 to 40 years
Plant and equipment	4 to 40 years
Distribution system	3 to 40 years
Office furniture, fixtures and equipment	3 to 10 years
Vehicles	3 to 10 years
Leasehold improvements	Shorter of 5 years or operating lease term outstanding
Lab equipment	5 to 10 years

Additions to property, plant and equipment are comprised of the cost of the contracted services, direct labor and materials. Assets under construction are recorded as additions to property, plant and equipment upon completion of the projects. Depreciation commences in the month the asset is placed in service.

Construction in progress: Interest costs directly attributable to the acquisition and construction of qualifying assets, which are assets that necessarily take a substantial period of time to be ready for their intended use, are added to the cost of those assets until such time as the assets are substantially ready for use or sale.

Goodwill and intangible assets: Goodwill represents the excess costs over fair value of the assets of an acquired business. Goodwill and intangible assets acquired in a business combination accounted for as a purchase and determined to have an indefinite useful life are not amortized, but are tested for impairment at least annually in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets . SFAS No. 142 also requires that intangible assets with estimatable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment in accordance with SFAS No. 144, Accounting for Impairment or Disposal of Long-Lived Assets . The Company periodically evaluates the possible impairment of goodwill. Management identifies its reporting units and determines the carrying value of each reporting unit by assigning the assets and liabilities, including the existing goodwill and intangible assets, to those reporting units. The Company determines the fair value of each reporting unit and compares it to the carrying amount of the reporting unit. To the extent the carrying amount of the reporting unit exceeds the fair value of the reporting unit, the Company is required to perform the second step of the impairment test, as this is an indication that the reporting unit goodwill may be impaired. In this step, the Company compares the implied fair value of the reporting unit goodwill with the carrying amount of the reporting unit goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit to all the assets (recognized and unrecognized) and liabilities of the reporting unit in a manner similar to a purchase price allocation, in accordance with SFAS No. 141,

Business Combinations . The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. If the implied fair value is less than its carrying amount, the impairment loss is recorded. The Company has concluded based upon its annual impairment valuation during 2007 that its goodwill was not impaired

Investments: Investments where the Company does not exercise significant influence over the operating and financial policies of the investee and holds less than 20% of the voting stock are recorded at cost. Investments where the Company has significant influence over the operating and financial policies of the investee and holds 20% to 50% of the voting stock are recorded using the equity method of accounting for investments in common stock. The Company recognizes an impairment loss on declines in value that are other than temporary.

Other assets: Under the terms of the contract with the Water and Sewerage Corporation of The Bahamas for the purchase of water from the Company's Blue Hills desalination plant, the Company was required to reduce the amount

of water lost by the public water distribution system on New Providence Island, The Bahamas, over a one year period by 438 million U.S. gallons, a requirement the Company met during 2007. The Company was solely responsible for the engineering, labor and materials costs incurred to effect the reduction in lost water, which were capitalized and are being amortized on a straight-line basis over the remaining life of the Blue Hills contract. Such costs and related amortization are included in other assets and aggregated \$3,431,535 and \$156,679, respectively, at December 31, 2007 and \$2,333,993 and \$49,759, respectively, at December 31, 2006.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents**CONSOLIDATED WATER CO. LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Other liabilities: Other liabilities consist of security deposits and advances in aid of construction. Security deposits are received from large customers as security for trade receivables. Advances in aid of construction are recognized as a liability when advances are received from condominium developers in the licensed area to help defray the capital expenditure costs of the Company. These advances do not represent loans to the Company and are interest free. However, the Company allows a discount of ten percent on future supplies of water to these developments until the aggregate discounts allowed are equivalent to advances received. Discounts are charged against advances received.

Income taxes: The Company opened Aquilex, Inc. its United States subsidiary in 2005. The Company accounts for the income taxes arising from this subsidiary's operations in accordance with the provisions of SFAS No. 109,

Accounting for Income Taxes. Prior to 2005, the Company was located only in jurisdictions where its operations were exempt from income taxes. Pursuant to SFAS No. 109, income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities, if any, are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is provided to the extent any deferred tax asset may not be realized.

Shares repurchased: Under Cayman Islands law, shares repurchased out of capital by the Company are treated as cancelled upon redemption, and the Company's issued share capital is reduced by the par value of those shares, with the difference being adjusted to additional paid up capital.

Stock and stock option incentive plans: The Company issues stock under incentive plans that form part of employees' and non-executive directors' remuneration. The Company also grants options to purchase ordinary shares as part of remuneration for certain long-serving employees and certain management employees.

Prior to January 1, 2006, the Company accounted for its stock-based compensation under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees and related interpretations (APB 25). Under APB No. 25, stock-based compensation cost was reflected in net income for grants of stock by the Company prior to fiscal year 2006 when the exercise prices for stock options granted by the Company were less than the market values of the underlying ordinary shares on the dates of the grants.

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 123(R),

Share-Based Payment, which requires the measurement and recognition of compensation cost at fair value for all share-based payments, including stock options. The Company is using the modified prospective application method in which compensation cost is recognized for new share-based awards and for share-based awards granted prior to, but not yet vested, as of January 1, 2006. The adoption of SFAS No. 123(R) for 2006 and thereafter did not have a material impact on the Company's financial position or results of operations.

The following table illustrates the effect on net income if the fair-value-based method had been applied to all outstanding and unvested awards for the year ended December 31, 2005:

Net income, as reported	\$5,514,258
Add stock-based employee compensation expense included in reporting net income	256,032
Deduct total stock-based employee compensation expense determined under fair-value-based method for all awards	(330,308)
 Pro forma net income	 \$5,439,982

Earnings per share:

Basic as reported	\$	0.47
Basic pro forma	\$	0.46
Diluted as reported	\$	0.45
Diluted pro forma	\$	0.45

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents**CONSOLIDATED WATER CO. LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Upon exercise of options, proceeds up to the par value of the stock issued are credited to ordinary share capital; any proceeds in excess of the par value of the stock issued are credited to additional paid in capital in the period in which the options are exercised.

Plant construction revenue and cost of plant construction revenue: The Company recognizes revenue and related costs as work progresses on fixed price contracts for the construction of desalination plants to be sold to third parties using the percentage-of-completion method, which relies on contract revenue and estimates of total expected costs. The Company follows this method since it can make reasonably dependable estimates of the revenue and costs applicable to various stages of a contract. Under the percentage-of-completion method, the Company records revenue and recognizes profit or loss as work on the contract progresses. The Company estimates total project costs and profit to be earned on each long term, fixed price contract prior to commencement of work on the contract and updates these estimates as work on the contract progresses. The cumulative amount of revenue recorded on a contract at a specified point in time is that percentage of total estimated revenue that incurred costs to date comprises of estimated total contract costs. If, as work progresses, the actual contract costs exceed estimates, the profit recognized on revenue from that contract decreases. The Company recognizes the full amount of any estimated loss on a contract at the time the estimates indicate such a loss. Any costs and estimated earnings in excess of billings are classified as current assets. Accounts receivable, net, at December 31, 2007 includes approximately \$988,000 in estimated earnings in excess of billings related to the construction of the Tynes Bay plant in Bermuda. Billings in excess of costs and estimated earnings on uncompleted contracts, if any, are classified as current liabilities

Revenue and cost of sales: Customers are billed monthly based on meter readings performed at or near each month end and in accordance with contractual agreements which stipulate minimum monthly charges for water service. An estimate, where necessary, is made for water delivered but unbilled at year end when readings are not performed at the year end date.

Consulting revenue is recognized on the accrual basis based upon time spent at agreed upon rates and is included under services revenue.

Interest income is recognized by the Company over the term of a loan based on the interest rate stated in the loan and is included in interest income.

Comparative figures: Certain prior year amounts have been adjusted to conform to the current year's presentation.

3. Cash and cash equivalents

Cash and cash equivalents are not restricted as to withdrawal or use. As of December 31, the equivalent United States dollars are denominated in the following currencies:

	December 31,	
	2007	2006
Bank accounts		
United States dollar	\$ 1,387,158	\$ 4,298,418
Cayman Islands dollar	3,079,161	2,014,485

7. Property, plant and equipment and construction in progress

	December 31,	
	2007	2006
Land	\$ 2,515,810	\$ 1,081,045
Buildings	11,861,214	11,686,321
Plant and equipment	44,723,010	42,364,299
Distribution system	19,743,075	19,244,035
Office furniture, fixtures and equipment	1,817,214	1,608,082
Vehicles	1,026,566	1,014,408
Leasehold improvements	202,592	202,592
Lab equipment	28,855	26,705
	81,918,336	77,227,487
Less accumulated depreciation	21,936,822	16,998,129
Property, plant and equipment, net	\$ 59,981,514	\$ 60,229,358
Construction in progress	\$ 4,989,779	\$ 3,339,011

As of December 31, 2007, the Company had outstanding capital commitments of approximately \$1.7 million. It is the Company's policy to maintain adequate insurance for loss or damage to all fixed assets that may be susceptible to loss. The Company does not insure its underground distribution system, which cost approximately \$10.4 million. During the years ended December 31, 2007 and 2006, \$2,687,785 and \$27,663,291 of construction in progress was placed in service, respectively. Depreciation expense was \$5,133,212, \$3,723,438 and \$2,156,478 for the years ended December 31, 2007, 2006 and 2005, respectively.

8. Investment in affiliate

The Company owns 50% of the outstanding voting common shares and a 43.5% equity interest in the profits of Ocean Conversion (BVI) Ltd. (OC-BVI). The Company also owns certain profit sharing rights in OC-BVI that raise its effective interest in the profits of OC-BVI to approximately 45%. Pursuant to a management services agreement, OC-BVI pays the Company monthly fees for certain engineering and administrative services.

OC-BVI's sole customer is the Ministry of Communications and Works of the Government of the British Virgin Islands (the Ministry) to which it sells bulk water under the terms of the Water Supply Agreement between the parties dated May 1990 (the 1990 Agreement). Through December 31, 2007, all of the water sold to the Ministry was produced by OC-BVI's desalination plant located at Baughers Bay, Tortola (the Baughers Bay plant), which has a capacity of 1.7 million U.S. gallons per day.

During 2007 OC-BVI completed, for a total cost of approximately \$8 million, the construction of a 700,000 U.S. gallons per day desalination plant located at Bar Bay, Tortola (the Bar Bay plant). The Company provided OC-BVI with a \$3 million loan to fund part of this plant's construction costs, of which \$2,875,000 remained outstanding as of December 31, 2007. Principal on this loan is payable in quarterly installments of \$125,000 with a final balloon payment of \$2 million due on August 31, 2009 and interest on the loan is due quarterly at the rate of LIBOR plus 3.5%. As of December 31, 2007, OC-BVI had failed to make the November 2007 scheduled principal payment on the loan but brought the loan current with respect to all scheduled principal payments as of March 2008. OC-BVI constructed this plant in response to what it believes is an extreme shortage of, and a pressing demand for, potable

water on the eastern end of Tortola and anticipated entering into a bulk water supply agreement with the Ministry. However, due in part to the Baughers Bay dispute discussed below, OC-BVI had not reached an agreement with Ministry and the Bar Bay plant had not commenced operations as of March 14, 2008.

Summarized financial information of OC-BVI is presented as follows:

	December 31,	
	2007	2006
Current assets	\$ 8,804,073	\$ 4,212,588
Non-current assets	11,136,583	10,557,481
Total assets	\$ 19,940,656	\$ 14,770,069

Non-current liabilities	5,500,256	2,145,188
Total liabilities	\$ 8,197,709	\$ 6,622,372
	Year Ended December 31,	
	2007	2006
Water sales	\$ 8,955,491	\$ 8,047,783
Cost of water sales	\$ 2,909,889	\$ 3,251,740
Income from operations	\$ 3,559,324	\$ 2,922,317
Net income	\$ 3,914,000	\$ 3,171,160

The Company's investment in OC-BVI is comprised of the following:

	December 31,	
	2007	2006
Equity investment (including profit sharing rights)	\$ 14,626,848	\$ 12,595,704
Loan receivable - Bar Bay plant construction	2,875,000	3,000,000
	\$ 17,501,848	\$ 15,595,704

For the years ended December 31, 2007, 2006, and 2005, the Company recognized approximately \$1.6 million, \$1.4 million and \$1.4 million, respectively, in income from its equity investment in the earnings of OC-BVI. For those same years, the Company recognized approximately \$669,000, \$1,500,000 and \$680,000, respectively, in revenues from its management services agreement with OC-BVI. The Company also recognized approximately \$445,000, \$508,000 and \$485,000 in other income for the years ended December 31, 2007, 2006 and 2005, respectively, from its profit-sharing agreement with OC-BVI. In addition to the Company's loans to, and equity investment in, OC-BVI of approximately \$17.5 million, the Company's recorded value of the OC-BVI management services agreement, which is reflected as an intangible asset on the Company's consolidated balance sheet, was approximately \$856,000 as of December 31, 2007 (see Note 10). OC-BVI owed the Company approximately \$660,000 for unpaid management fees and operating advances as of December 31, 2007, which is included in accounts receivable in the Company's consolidated balance sheet and was subsequently collected in 2008.

Baughers Bay dispute:

In October 2006, OC-BVI notified the Company that the Ministry had asserted a purported right of ownership of the Baughers Bay plant pursuant to the terms of the 1990 Agreement and had invited OC-BVI to submit a proposal for its continued involvement in the production of water at the Baughers Bay plant in light of the Ministry's planned assumption of ownership.

Under the terms of the 1990 Agreement, upon the expiration of the initial seven year term in May 1999, the agreement would automatically be extended for another seven year term unless the Ministry provided notice, at least eight months prior to such expiration, of its decision to purchase the plant from OC-BVI for approximately \$1.42 million.

In correspondence between the parties from late 1998 through early 2000, the Ministry indicated that the BVI Government was prepared to exercise the option to purchase the plant but would be amenable to negotiating a new water supply agreement, and that it considered the 1990 Agreement to be in force on a monthly basis until negotiations between the BVI Government and OC-BVI were concluded. Occasional discussions were held between the parties since 2000 without resolution of the matter. OC-BVI has continued to supply water to the Ministry and has expended approximately \$4.7 million to significantly expand the production capacity of the plant beyond that contemplated in the 1990 Agreement.

OC-BVI submitted a proposal to the Ministry in late 2006 to continue to supply water from the Baughers Bay plant. The Ministry held discussions with OC-BVI regarding a new contract but did not formally respond to OC-BVI's proposal. Early in 2007 the Ministry unilaterally took the position that until such time as a new agreement is reached on the ownership of the plant and the price for the water produced by the plant, the Ministry would only pay that amount of OC-BVI's billings that the Ministry purports constitutes OC-BVI's costs of producing the water. At its proposed interim price, the Ministry would pay only approximately 30% of the amounts billed by OC-BVI pending a new agreement. OC-BVI responded to the Ministry that the amount the Ministry proposed to pay was significantly less than OC-BVI's production costs. Payments made by the Ministry to OC-BVI since the Ministry's assumption of this reduced price have been sporadic and as of December 31, 2007 OC-BVI had received payment for less than 22% of the amounts it billed the Ministry for the year then ended. On November 15, 2007, OC-BVI issued a demand letter to the BVI Government for

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents**CONSOLIDATED WATER CO. LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

approximately \$6.2 million representing amounts that OC-BVI claimed were due by the BVI Government for water sold and delivered plus interest and legal fees. In response to OC-BVI's demand for payment, the BVI Government issued a letter dated November 19, 2007 that reasserted its claim that ownership of the Baughers Bay plant has passed to the BVI Government and rejected OC-BVI's claim for payment. OC-BVI advised the BVI Government in correspondence dated November 21, 2007 that it was demanding that the dispute between OC-BVI and the BVI Government be submitted to arbitration pursuant to the terms of the 1990 Agreement. On the following day, OC-BVI's management was informed that the BVI Government had filed a lawsuit with the Eastern Caribbean Supreme Court seeking ownership of the Baughers Bay plant. OC-BVI has informed the Company that it intends to vigorously pursue its rights to full payment for water sold and delivered to the BVI Government and to defend against any action that the BVI Government owns any interest in the Baughers Bay plant and that it believes this dispute will be resolved to its satisfaction.

As of December 31, 2007 OC-BVI had \$8.2 million in gross accounts receivable balances due from the BVI Government. In January 2008 the BVI Government remitted a partial payment on these receivables to OC-BVI of \$3.5 million.

The Company accounts for its investment in OC-BVI in accordance with Accounting Principles Board Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock. This accounting pronouncement requires recognition of a loss on an equity investment that is other than temporary, and indicates that a current fair value of an equity investment that is less than its carrying amount may indicate a loss in the value of the investment. To test for possible impairment of its investment in OC-BVI, the Company estimated its fair value as of December 31, 2007. In making this estimate, Company management calculated the expected cash flow from its investment in OC-BVI using the guidance set forth under the FASB Statement of Financial Accounting Concepts No. 7, Using Cash Flow Information and Present Value in Accounting Measurements. In accordance with this FASB statement the Company (i) identified various possible outcomes of the Baughers Bay dispute and negotiations for a contract on the new Bar Bay plant; (ii) estimated the cash flows associated with each possible outcome, and (iii) assigned a probability to each outcome based upon discussions held to date by OC-BVI's management with the BVI Government and OC-BVI's legal counsel. The resulting probability-weighted sum represents the expected cash flows, and the Company's best estimate of future cash flows, to be derived from its investment in OC-BVI. The Company determined that the fair value of its investment in OC-BVI, as based upon these expected cash flows, exceeded its carrying value for its investment in OC-BVI as of December 31, 2007 and therefore no loss should be recognized on this investment. The identification of the possible outcomes for the Baughers Bay dispute and Bar Bay negotiations, the projections of cash flows for each outcome, and the assignment of relative probabilities to each outcome all represent significant estimates made by the Company's management. The ultimate resolution of the Baughers Bay and Bar Bay issues may differ significantly from management's estimates and may result in actual cash flows from OC-BVI that vary materially from the expected cash flows used by Company management in determining OC-BVI's fair value at December 31, 2007. If OC-BVI and the BVI Government are unable to agree on a new contract for Baughers Bay and this matter proceeds to resolution through the Courts, the Ministry's right of ownership under the 1990 Agreement could be found to be enforceable, in which case OC-BVI could lose its water supply arrangement with the Ministry or may be forced to accept a water supply arrangement with the Ministry on less favorable terms, and if the BVI Government exercises its purported right, OC-BVI could lose ownership of the Baughers Bay plant. Even if OC-BVI is able to refute the Ministry's purported right of ownership, OC-BVI may elect to accept a new contract on less favorable terms. OC-BVI may be unsuccessful in negotiating a contract for the Bar Bay plant on terms it finds acceptable. Any of these or other possible outcomes could result in actual cash flows from the Company's investment in OC-BVI that are significantly lower than management's estimate. In such case, the Company could be required to record an impairment charge to reduce the carrying value of its investment in OC-BVI. Such impairment charge would reduce the Company's earnings and could have a material adverse impact on its results of operations and financial condition.

9. Consolidated Water (Bermuda) Limited

In June 2006, the Company formed a Bermuda-based affiliate, Consolidated Water (Bermuda) Limited (CW-Bermuda) with two other shareholders. The Company owns 40% of the equity interest and voting rights of CW-Bermuda. In January 2007, CW-Bermuda entered into a contract with the Government of Bermuda for the design, construction and sale of a desalination plant to be located on Tynes Bay along the northern coast of Bermuda. Under the agreement, CW-Bermuda will construct the plant and operate it for 12 months after its commissioning and sale to the Government of Bermuda. CW-Bermuda will receive approximately \$10.7 million in revenues under the contract for the construction of the plant and its operation.

The Company has entered into a management services agreement with CW-Bermuda for the design, construction and operation of the Tynes Bay plant, under which it receives fees for direct services, purchasing activities and proprietary technology. The Company will also loan CW-Bermuda up to \$7.5 million under a revolving facility to construct the plant.

Because (i) the equity investment in CW-Bermuda is not sufficient to permit it to finance its activities without the loan from the Company; (ii) the other investors in CW-Bermuda have no obligation to absorb any significant amount of its losses should losses arise; and (iii) the Company expects economic benefits from CW-Bermuda that are significantly greater than the Company's voting rights of 40%, CW-Bermuda constitutes a variable interest entity (VIE) as defined by FIN 46(R). The Company is the primary beneficiary of CW-Bermuda and, accordingly, consolidates the results of CW-Bermuda in its financial statements as required under FIN 46(R). The consolidated assets and liabilities of CW-Bermuda amounted to approximately \$1,679,000 and \$1,140,000 respectively, as of December 31, 2007. The Company has not provided any guarantees related to CW-Bermuda, and any creditors of the VIE do not have recourse to the general credit of Consolidated Water Co. Ltd. as a result of including CW-Bermuda in the consolidated financial statements. The results of CW-Bermuda are reflected in the Company's services segment.

The accompanying notes are an integral part of these consolidated financial statements.

CONSOLIDATED WATER CO. LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

10. Intangible assets

Effective February 1, 2003, the Company acquired 100% of the outstanding voting common shares of DesalCo Limited, its wholly-owned subsidiary DesalCo (Barbados) Ltd., and Ocean Conversion (Cayman) Limited. A portion of the purchase price was allocated to the following identifiable intangible assets.

(a) As part of the acquisition of DesalCo Limited, the Company originally attributed \$726,902 to an intangible asset which was adjusted in 2004 by \$129,454 for a total balance of \$856,356. This represents the fair value of a Management Services Agreement originally dated December 4, 2000, under which DesalCo Limited provides management and engineering services to Ocean Conversion (BVI) Ltd., an affiliated company. The original agreement was amended on February 7, 2003 such that there is no expiration term. Management of the Company has determined that this intangible asset has an indefinite life, and therefore it is not being amortized.

(b) As part of the acquisition of DesalCo Limited, the Company attributed \$337,149 to another intangible asset, the DWEER Distribution Agreement between DesalCo Limited and DWEER Technology Limited, which expires on October 31, 2009. Under this agreement, DesalCo Limited was granted an exclusive right, within certain geographical areas in the Caribbean, Central and South America, to distribute certain patented equipment which can increase the operational efficiency of reverse osmosis seawater desalination plants. The estimated fair value attributable to the intangible asset of the DWEER Distribution Agreement is being amortized over the remaining term of the seven-year agreement and has a weighted average remaining useful life of 1.9 years.

(c) As part of the acquisition of Ocean Conversion (Cayman) Limited, the Company originally attributed \$4,598,785 to intangible assets, which was adjusted in 2004 by \$213,289 for a total balance of \$4,385,496. This represents the fair value of three Water Production and Supply Agreements between Ocean Conversion (Cayman) Limited and the Government of the Cayman Islands, dated April 25, 1994, June 18, 1997 and December 31, 2001. Under these agreements, Ocean Conversion (Cayman) Limited built reverse osmosis seawater desalination plants for the Government of the Cayman Islands. Ocean Conversion (Cayman) Limited operates the plants until the expiration of the agreement term, as extended, at which time the plant operations will be transferred to the Government of the Cayman Islands for no consideration. The carrying amounts attributable to the intangible assets of the Water Production and Supply Agreements are being amortized over the remaining term of the agreements, which are approximately 6, 3 and 7 years, respectively, and have a weighted average remaining useful life of 1.6 years.

(d) On September 17, 2003, the Company signed a new agreement with its Belize customer for the provision of water from a seawater desalination plant for an initial term of 23 years. The new agreement was effective on June 1, 2004 after certain conditions precedent were met or waived. The carrying amount of the Belize Water Production and Supply Agreement was revalued in 2003 to its fair market value upon signing of the new agreement. The revised carrying amount which was previously being amortized over its weighed average useful life of 10.75 years is now being amortized over the term of the new 23-year agreement and now has a weighted average remaining useful life of 18.1 years.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Amortization for each of the next five years is expected to be as follows:

2008	\$ 639,251
2009	234,854
2010	154,326
2011	66,192
2012	66,192
Thereafter	864,729

11. Goodwill

As of January 1, 2002, the Company adopted SFAS No. 142 Goodwill and Other Intangible Assets, and in accordance with this statement goodwill is not amortized, but is analyzed for impairment annually.

The reporting segments are tested for impairment in the fourth quarter by comparing the fair value of the reporting segments to the carrying value. The fair value is determined using discounted cash flow methodology based on management's best estimates for each segment. As of December 31, 2007, the Company's impairment tests did not result in an impairment loss.

12. Dividends

Quarterly interim dividends were declared in respect of Class A common stock and redeemable preferred stock as follows:

	2007	2006	2005
March 31,	\$0.0650	\$0.0600	\$0.0575
June 30	0.0650	0.0600	0.0600
September 30	0.0650	0.0600	0.0600
December 31		0.0600	0.0600

Dividends as stated have been adjusted for a 2-for-1 stock split in August, 2005.

Interim dividends for the first three quarters were paid during each respective year. The Board of Directors declared an interim dividend for the fourth quarter of 2007 in January 2008 for shareholders of record on January 15, 2008.

These quarterly interim dividends are subject to no further ratification and consequently the fourth quarter interim dividends have been recorded as a liability in each respective year. Included in dividends payable at December 31, 2007 are unclaimed dividends of \$60,719 (2006: \$120,140).

The accompanying notes are an integral part of these consolidated financial statements.

13. Long term debt

	December 31,	
	2007	2006
Fixed rate bonds bearing interest at a rate of 5.95%; repayable in quarterly installments of \$526,010; secured through an inter-creditor agreement with the Republic Bank & Trust by substantially all of the Company's assets. Redeemable in full at any time after August 4, 2009 at a premium of 1.5% of the outstanding principal and accrued interest on the bonds on the date of redemption	\$ 14,270,995	\$ 15,480,595
Royal Bank of Canada loan due in 2007, bearing interest at Nassau Prime Lending Rate plus 1.5%; payable in quarterly installments of principal and Interest (7.0% as of December 31, 2006)		92,498
Series A bonds bearing interest at the annual fixed rate of 7.5%, payable quarterly; maturing on June 30, 2015	10,000,000	10,000,000
Total long term debt	24,270,995	25,573,093
Less discount	770,402	918,433
Less current portion	1,142,255	1,154,067
Long term debt, excluding current portion	\$ 22,358,338	\$ 23,500,593

In addition to these facilities, as of December 31, 2007, the Company has available but unused lines of credit with Scotiabank for \$2,000,000, bearing interest at the floating base rate as established by Cayman Islands Class A licensed banks from time to time, and with Royal Bank of Canada for \$500,000, bearing interest at the Nassau Prime Lending Rate plus 1.0%.

The Company has collateralized all borrowings under the Scotiabank term loan due February 6, 2010 and the \$2,000,000 unused line of credit by providing Scotiabank with a first debenture over fixed and floating assets, a first legal charge over land and buildings, a security interest in all insurance policies and claims, a reimbursement agreement for standby letters of credit, a pledge of capital stock of each subsidiary and guarantees and negative pledges from each company where a majority interest exists.

On July 1, 2005, CW-Bahamas sold \$10,000,000 Series A bonds solely to Bahamian citizens and permanent resident investors in The Bahamas. The bonds mature on June 30, 2015, at which time the outstanding principal amount must be paid in full. The bonds accrue interest at the annual fixed rate of 7.5% of the outstanding principal amount and interest payments are payable to the bondholders each year in March, June, September and December. Waterfields has the option to redeem the bonds in whole or in part without penalty commencing after June 30, 2008.

CW-Bahamas has a credit facility with Royal Bank of Canada that consists of a BAH\$500,000 revolving working capital loan. The obligations under the credit facility are secured by the assets CW-Bahamas. Borrowings under the working capital loan accrue interest at the Nassau Prime rate plus 1.50% per annum. No amounts were outstanding under this facility at December 31, 2007.

The credit facility contains certain covenants applicable to CW-Bahamas, including restrictions on additional debt, guarantees and sale of assets. The credit facility limits the payment of dividends by CW-Bahamas to available cash

flow (as defined in the governing loan agreement). The credit facility also contains a financial covenant requiring CW-Bahamas to maintain a ratio of total liabilities to tangible net worth (each as defined in the loan agreement) of not greater than 2 to 1.

All obligations under the credit facility are repayable on demand. CW-Bahamas was not in compliance with the financial covenant of this facility as of December 31, 2007.

As of December 31, 2007, the aggregate debt repayment obligations over the next five years are as follows:

2008	\$ 1,142,255
2009	1,229,071
2010	1,322,483
2011	1,422,991
2012	1,531,134
Thereafter	16,852,659
	\$ 23,500,593

The accompanying notes are an integral part of these consolidated financial statements.

14. Share capital and additional paid-in capital and stock split

Redeemable preferred stock (preferred shares) is issued under the Company s Employee Share Incentive Plan as discussed in Note 21 and carries the same voting and dividend rights as ordinary shares of common stock (ordinary share). Preferred shares vest over four years and convert to common stock on a share for share basis on the fourth anniversary of each grant date. Preferred shares are only redeemable with the Company s agreement. Upon liquidation, preferred shares rank in preference to the ordinary shares to the extent of the par value of the preferred shares and any related additional paid in capital.

The Company has an Option Deed in place which is designed to deter coercive takeover tactics. Pursuant to this plan, holders of ordinary shares and preferred shares were granted options which entitle them to purchase 1/100 of a share of Class B stock at an exercise price of \$50.00 if a person or group acquires or commences a tender offer for 20% or more of the Company s ordinary shares. Option holders (other than the acquiring person or group) will also be entitled to buy, for the \$37.50 exercise price, ordinary shares with a then market value of \$100.00 in the event a person or group actually acquires 20% or more of the Company s ordinary shares. Options may be redeemed at \$0.01 under certain circumstances. 145,000 of the Company s authorized but unissued ordinary shares have been reserved for issue as Class B stock. The Class B stock has priority over ordinary shares with respect to dividend and voting rights. No Class B stock options have been exercised or redeemed up to December 31, 2007. In March 2007, the Board of Directors extended the expiration date of the Option Deed through July 2017.

In December 2006, the Company completed an offering of 1,725,000 of common shares that raised approximately \$40.1 million in net proceeds.

15. Cost of Revenues and General and Administrative Expenses

	Year Ended December 31,		
	2007	2006	2005
Cost of revenues consist of:

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

16. Earnings per share

Basic earnings per common share (EPS) is calculated by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period. The computation of diluted EPS assumes the issuance of common shares for all potential common shares outstanding during the reporting period. In addition, the dilutive effect of stock options is considered in earnings per common share calculations, if dilutive, using the treasury stock method.

The following summarizes information related to the computation of basic and diluted earnings per share for the respective years ended December 31:

	2007	2006	2005
Net income	\$ 11,387,651	\$ 7,521,126	\$ 5,514,258
Less: Dividends paid and earnings attributable on preferred shares	(5,509)	(6,461)	(9,128)
Net income available to common shares in the determination of basic earnings per common share	\$ 11,382,142	\$ 7,514,665	\$ 5,505,130
Weighted average number of common shares in the determination of basic earnings per ordinary share	14,404,732	12,440,195	11,767,573
Plus:			
Weighted average number of preferred shares outstanding during the year	22,488	28,502	27,757
Potential dilutive effect of unexercised options	68,144	268,789	366,077
Weighted average number of shares used for determining diluted earnings per common share	14,495,364	12,737,486	12,161,407

Table of Contents**CONSOLIDATED WATER CO. LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Revenues from the Cayman Island operations were \$26,753,395 in 2007 (2006: \$21,812,403 and 2005: \$19,931,745). Revenues from all foreign country operations were \$22,396,452 in 2007 (2006: \$16,416,805 and 2005: \$6,255,460). Included in the revenues from foreign countries is \$13,320,226 in 2007 (2006: \$10,107,906 and 2005: \$4,735,016) from the operations in Bahamas, \$1,545,518 in 2007 (2006: \$1,302,609 and 2005: \$1,109,743) from our operations in Belize and \$237,856 in 2007 (2006: \$430,309 and 2005: \$410,701) from our operations in Barbados. For the year ended December 31, 2007, revenues in the amount of \$13,060,632 (2006: \$9,912,088 and 2005: \$4,594,570) were earned from the Water and Sewerage Corporation of The Bahamas (WSC) and revenues in the amount of \$7,490,485 (2006: \$7,088,782 and 2005: \$6,020,125) were earned from the Water Authority-Cayman . Revenues from the WSC represented 27% (2006: 26% and 2005: 18%) of total revenues and revenues from the Water Authority-Cayman represented 15% (2006: 19% and 2005: 23%) of total revenues. These revenues are included in the Bulk segment.

During the year ended December 31, 2007, revenues which were earned in the Service segment from the Bulk segment through various management service agreements and an engineering service agreement amounted to \$668,888 (2006: \$1,491,964 and 2005: \$679,963). Any intercompany amounts included in this amount have been eliminated in accordance with the basis of consolidation.

As of December 31, 2007 and 2006, property, plant and equipment located in the Cayman Islands was \$24,055,700 and \$22,569,023, respectively. Property, plant and equipment in all the foreign country operations was \$35,925,814 and \$37,660,335 at December 31, 2007 and 2006, respectively. Included in property, plant and equipment from foreign operations is \$32,769,427 in 2007 and \$35,630,151 in 2006, from the operations in the Bahamas and \$1,680,136 in 2007 and \$1,842,798 in 2006 from our operations in Belize.

18. Related party transactions

In 2003, DWEER Technology Ltd., the owner of the DWEER technology, licensed the worldwide rights to the DWEER technology to Calder AG, a Swiss company. On February 26, 2004, we entered into a distributorship agreement with Calder AG, pursuant to which we have the exclusive right to distribute and sell in the Caribbean the products manufactured by Calder AG using the DWEER technology. The agreement expires in October 2009. William T. Andrews, Ph.D, a director of our Company, and his spouse indirectly own 35% of the issued and outstanding shares of Calder AG. Dr. Andrews also is the Vice-Chairman of the Board of Directors of Calder AG. In addition, Dr. Andrews and his spouse own 100% of the issued and outstanding shares of DWEER Technology Ltd. During 2007, we paid US\$179,243 to Calder AG under the distributorship agreement.

The Company paid consulting fees of approximately \$93,000, \$54,000 and \$nil for the years ended 2007, 2006 and 2005, respectively, to Wilmer F. Pergande, a Director of the Company.

On May 25, 2005, OC-BVI entered into a twenty-five year lease agreement with Bar Bay Estate Holdings Limited (Bar Bay), a private company incorporated in the Territory of the British Virgin Islands, pursuant to which OC-BVI agreed to lease from Bar Bay approximately 50,000 square feet of land on Tortola, British Virgin Islands on which the above mentioned seawater desalination plant and wells were constructed. Under the terms of the lease agreement, a lease premium payment of \$750,000 was made on June 10, 2005, annual lease and easement payments of \$15,020 are due annually and royalty payments of 2.87% of annual sales are payable quarterly. A Director of Sage Water Holdings (BVI) Limited, the latter of which currently owns 100% of the non-voting stock, 50% of the voting common stock and 50% of the profit sharing rights of OC-BVI, is also a Director of OC-BVI and holds 50% of the outstanding shares of Bar Bay.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents**CONSOLIDATED WATER CO. LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

As of December 31, 2007, the amounts receivable from OC-BVI relating to revenue earned of \$668,888 (2006: \$1,491,963) was \$290,946 (2006: \$387,862).

19. Commitments and contingencies

On April 1, 2005, the Company signed a lease for approximately 5,451 square feet of office space at the Regatta Business Park, West Bay Road, Grand Cayman, Cayman Islands. The term of the lease was three years at \$196,240 per annum. The Company exercised an option to extend the lease for a further three year period in October 2007, effective May 1 2008, at an increased annual rental payment of \$215,864 per annum.

On July 25, 2005, the Company entered into a lease agreement with KTR Quorum LLC (KTR), pursuant to which its wholly-owned subsidiary Aquilex, Inc. agreed to lease from KTR approximately 7,142 square feet of office and warehouse space in Deerfield Beach, Florida for a period of five years.

Future minimum lease payments under non-cancelable operating leases as of December 31, 2007 are as follows:

2008	\$302,167
2009	311,494
2010	314,363
2011	99,805

Total rental expense for each of the years ended December 31, 2007, 2006 and 2005 was \$367,932, \$331,931, and \$162,729 respectively.

The Company is obligated to supply water, where feasible, to customers in the Cayman Islands within its license area in accordance with the terms of the license. Royalties are paid to the Government of the Cayman Islands at the rate of 7.5% of gross water sales.

The Company has seven water supply agreements under which it is required to provide minimum water quantities. As part of the acquisition of the Company's interests in Ocean Conversion (Cayman) Limited, with the approval of Scotiabank (Cayman Islands) Ltd., the Company has guaranteed the performance of Ocean Conversion (Cayman) Limited to the Cayman Islands government, pursuant to the water supply contract with the Water Authority-Cayman dated April 25, 1994, as amended.

As a result of the Company's acquisition of interests in CW-Bahamas, it guaranteed the performance of CW-Bahamas to the Water & Sewerage Corporation of the Bahamas (WSC) in relation to the water supply contract between CW-Bahamas and the WSC. In the event that CW-Bahamas cannot provide the minimum water quantity per the contract, it must reimburse the WSC for the cost of water they have to obtain from other sources, at the per U.S. gallon rate charged by CW-Bahamas to the WSC.

Through performance and operation bonds, the Royal Bank of Canada, Nassau, has made guarantees in the amount of approximately \$4.9 million to WSC that the Company shall duly perform and observe all terms and provisions pursuant to contracts between the parties. In the event of default, the Royal Bank of Canada, Nassau, shall satisfy and discharge any damages sustained by WSC up to the guaranteed amount. The Company has guaranteed reimbursement to the bank for any payments made thereon.

On November 17, 2006, Gruppozecca Bahamas Limited (GBL) filed a Statement of Claim in the Supreme Court of the Commonwealth of the Bahamas against Consolidated Water (Bahamas) Limited (CW-Bahamas) seeking damages in excess of \$950,000 for CW-Bahamas' alleged breach of its obligations under an agreement between GBL and CW-Bahamas relating to the construction of a desalination plant in the Commonwealth of the Bahamas. The Company believes that the claims made by GBL against CW-Bahamas are without merit, and intends to vigorously defend against such claims.

From time to time the Company is involved in legal proceedings or claims arising in the normal course of business. As of December 31, 2007, other than already disclosed, the Company was not aware of any legal proceedings or claims, either threatened or pending, that Company management believes would result in a material adverse effect on the Company's financial position.

As of December 31, 2007, we are subject to interest rate risk related to our \$2,875,000 loan to OC-BVI that bears interest at the three month LIBOR plus 3.5% per annum.

In July 2007, the Cayman Islands Government awarded Ocean Conversion (Cayman) Limited, a ten-year Design-Build-Sell-Operate contract for a seawater desalination plant on Frank Sound on Grand Cayman Island. The design capacity of the new plant will be 2.38 million U.S. gallons per day with a contract guarantee for the delivery of 2.14 million U.S. gallons per day to the customer, the Water Authority-Cayman. It is anticipated that this project will be completed in late 2008.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents

**CONSOLIDATED WATER CO. LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

20. Stock Based Compensation

The Company has the following stock compensation plans that form part of employees' remuneration:

Employee Share Incentive Plan (Preferred Shares)

The Company awards preferred shares for \$nil consideration under the Employee Share Incentive Plan as part of compensation for certain eligible employees, excluding Directors and certain Officers, that require future services as a condition to the delivery of ordinary shares. In addition, options are granted to purchase preferred shares at a fixed price, determined annually, which will typically represent a discount to the market value of the common stock. In consideration for preferred shares, the Company issues shares of common stock on a share for share basis. Under the plan, the conversion is conditional on the grantee's satisfying requirements outlined in the award agreements. Preferred shares are only redeemable with the Company's approval. Each employee's option to purchase preferred shares must be exercised within 30 days of the grant date, which is the 90th day after the date of the auditor's opinion on the financial statements for the relevant year.

Employee Share Option Plan (Common Stock Options)

In 2001, the Company introduced an employee stock option plan for certain long-serving employees of the Company. Under the plan, these employees are granted in each calendar year, as long as the employee is a participant in the Employee Share Incentive Plan, options to purchase ordinary shares. The price at which the option may be exercised will be the closing market price on the grant date, which is the 90th day after the date of the auditor's opinion on the financial statements for the relevant year. The number of options each employee is granted is equal to five times the sum of (i) the number of preferred shares which that employee receives for \$nil consideration and (ii) the number of preferred share options which that employee exercises in that given year. Options may be exercised during the period commencing on the fourth anniversary of the grant date and ending on the thirtieth day after the fourth anniversary of the grant date.

Non-Executive Directors' Share Plan

In 1999, the Company introduced a stock grant plan, which forms part of Directors' remuneration. Under the plan, Directors receive a combination of cash and common stock in consideration of remuneration for their participation in Board meetings. All Directors are eligible except Executive Officers, who are covered by individual employment contracts, and the Government elected board member. The number of common stock granted is calculated with reference to a strike price that is set on October 1 of the year preceding the grant. Stock granted during the year ended December 31, 2007 totaled 5,250 (2006: 5,907) at a strike price of \$24.57 (2006: \$19.30).

Directors and Senior Management Stock Compensation

Effective January 1, 2004, the option plan for senior management was amended as part of renegotiations of employee contracts. The amended contracts terminated the stock option plans for all years commencing from January 1, 2004. Effective January 1, 2006, the Company adopted SFAS No. 123(R), Share-Based Payment, which requires the measurement and recognition of compensation cost at fair value for all share-based payments, including stock options. As a result of adopting SFAS 123(R), stock compensation expense of \$125,843 and \$372,425 was charged to earnings for the years ended December 31, 2007 and 2006, respectively. The impact of adopting SFAS 123(R) on basic and diluted earnings per share for the years ended December 31, 2007 and 2006 was \$0.02 and \$0.03 per share, respectively. For the year ended December 31, 2005 \$256,032 was charged to earnings in accordance with APB Opinion No. 25.

The fair value of each option award is estimated on the date of grant using a Black-Scholes option-pricing model that uses the assumptions noted in the table below. Expected volatilities are based on historical volatilities of the Company's common stock. The Company uses historical data to estimate option exercise and post-vesting termination behavior. The expected term of options granted is based on historical data and represents the period of time that options granted are expected to be outstanding. The Company uses historical data to estimate stock option exercises and forfeitures within its valuation model. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of the grant.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents

CONSOLIDATED WATER CO. LTD.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The significant weighted average assumptions for the years ended December 31, 2007, 2006 and 2005 were as follows:

	2007	2006	2005
Risk free interest rate	4.82%	5.05%	3.79%
Expected option life	2.00 years	2.90 years	2.49 years
Expected volatility	37.44%	33.66%	30.81%
Expected dividend yield	0.91%	0.90%	1.22%

A summary of the Company's stock option activity for the year ended December 31, 2007 is as follows:.

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value (1)
Outstanding at beginning of year	376,754	\$ 10.34		
Granted	3,590	24.41		
Exercised	(357,749)	9.91		
Forfeited	(1,130)	19.77		
Outstanding at end of year	21,465	\$ 19.50	1.77 years	\$ 122,159
Exercisable at end of year	0	\$		\$ 0

(1) The intrinsic value of a stock option represents the amount by which the fair value of the underlying stock, measured by reference to the closing price of the ordinary shares of \$25.19 in the Nasdaq Global Select Market on December 31, 2007, exceeds the exercise price of the

option.

At December 31, 2007, 21,465 non-vested options were outstanding with a weighted average exercise price of \$19.50 and an average remaining contractual life of 1.77 years. The total remaining unrecognized compensation costs related to unvested stock-based arrangements was \$52,330 at December 31, 2007 and is expected to be recognized over a weighted average period of 1.77 years.

The following table summarizes the weighted average fair value of options at date of grant and the intrinsic value of options exercised during the years ended December 31, 2007, 2006 and 2005:

	2007	2006	2005
Options granted with an exercise price below market price on the date of grant:			
Employees preferred share options	\$ 6.65	\$ 15.93	\$ 10.35
Overall weighted average	\$ 6.65	\$ 15.93	\$ 10.35
Options granted with an exercise price at market price on the date of grant:			
Management employees	\$	\$	\$
Employees ordinary share options	\$ 10.49	\$ 8.08	\$ 5.39
Overall weighted average	\$ 10.49	\$ 8.08	\$ 5.39
Total intrinsic value of options exercised	\$5,082,472	\$4,252,174	\$2,754,336

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents**21. Pension benefits**

Staff pension plans are offered to all employees in the Cayman Islands. The plans are administered by third party pension plan providers and are defined contribution plans whereby the Company matches the contribution of the first 5% of each participating employee's salary up to \$72,000. The total amount recognized as an expense under the plan during the year ended December 31, 2007 was \$168,820 (2006: \$150,997 and 2005: \$146,241).

22. Financial instruments**Credit risk:**

The Company is not exposed to significant credit risk on the vast majority of customer accounts as the policy is to cease supply of water to customers' accounts that are more than 45 days overdue. The Company's exposure to credit risk is concentrated on receivables from its Bulk water customers. The balances from these customers are current or an allowance has been made for collection as at December 31, 2007. Management does not anticipate any significant losses on these concentrations.

Interest rate risk:

Substantially all of the Company's outstanding debt consists of fixed rate obligations and therefore the Company is not subject to interest-rate risk arising from fluctuations of LIBOR or prime lending rates. The Company has a \$30 million short term certificate of deposit. As of December 31, 2007, the Company is subject to interest rate risk related to its \$2,875,000 loan to OC-BVI that bears interest at the three month LIBOR plus 3.5% per annum.

Foreign exchange risk:

All relevant foreign currencies have fixed exchange rates to the United States dollar as detailed under the foreign currency accounting policy note. If any of these fixed exchange rates become floating exchange rates, the Company's results of operations could be adversely affected.

Fair values:

As of December 31, 2007 and 2006, the carrying amounts of cash and cash equivalents, accounts receivable, accounts payable and other liabilities and dividends payable approximate fair values due to the short term maturities of these assets and liabilities. Management considers that the carrying amounts for loans receivable and long term debt due to Republic Bank & Trust, the Royal Bank of Canada and Series A bond holders at December 31, 2007 approximate their fair value.

23. Non cash transactions:

The Company executed the following non-cash transactions:

	2007	2006	2005
Note received for plant facility sold	\$1,738,000	\$897,000	\$
Issuance of 11,346, 2,135 and 8,970, respectively, of common shares for services rendered	251,377	43,326	150,716
Issuance of 2,600, 3,587 and 5,544, respectively, of redeemable preferred shares for services rendered	47,856	130,078	111,434
Issuance of 9,364 of common shares issued under senior management employment agreements in lieu of cash bonuses			145,040
Conversion of 5,698, 12,244 and 4,182 shares in 2007, 2006 and 2005, respectively, of redeemable preferred shares to common shares	3,419	7,346	2,510
Dividends declared but not paid		849,470	828,709

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents**24. Impact of recent accounting standards pronouncements****Adoption of New Accounting Standards:**

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 123(R), *Share-Based Payment*. See *Stock Compensation* above for further discussion of the effect of adopting this standard. In May 2005, the Financial Accounting Standards Board (FASB) issued SFAS No. 154, *Accounting for Changes and Error Corrections*, a replacement of APB Opinion No. 20 and SFAS No. 3. The standard is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005. The application of this standard did not have an effect on the Company's financial statements.

In March 2005, the FASB issued Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations*, an interpretation of FASB Statement No. 143 (FIN 47). The application of this Interpretation did not have an effect on the Company's financial statements.

In July 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109* (FIN 48). The application of this Interpretation did not have an effect on the Company's financial statements.

In September 2006, the Securities and Exchange Commission (SEC) released Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108), which is effective for fiscal years ending on or after November 15, 2006. SAB 108 provides guidance on how the effects of prior-year uncorrected financial statement misstatements should be considered in quantifying a current year misstatement. SAB 108 requires public companies to quantify misstatements using both an income statement (rollover) and balance sheet (iron curtain) approach and evaluate whether either approach results in a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. If prior year errors that had been previously considered immaterial now are considered material based on either approach, no restatement is required so long as management properly applied its previous approach and all relevant facts and circumstances were considered. Adjustments considered immaterial in prior years under the method previously used, but now considered material under the dual approach required by SAB 108, are to be recorded upon initial adoption of SAB 108. There were no cumulative effect adjustments recorded in 2007.

Effect of Newly Issued But Not Yet Effective Accounting Standards:

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 establishes a fair value hierarchy about the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. The standard is effective for fiscal years beginning after November 15, 2007. The Company has not completed its evaluation of the impact of the adoption of this standard.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). This Standard allows companies to elect to follow fair value accounting for certain financial assets and liabilities in an effort to mitigate volatility in earnings without having to apply complex hedge accounting provisions. SFAS 159 is applicable only to certain financial instruments and is effective for fiscal years beginning after November 15, 2007. We do not anticipate that adoption of SFAS 159 will have a material impact on our financial condition, results of operations or cash flows.

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* (SFAS 141(R)). This Standard retains the fundamental acquisition method of accounting established in Statement 141; however, among other things, SFAS 141(R) requires recognition of assets and liabilities of noncontrolling interests acquired, fair value measurement of consideration and contingent consideration, expense recognition for transaction costs and certain integration costs, recognition of the fair value of contingencies, and adjustments to income tax expense for changes in an acquirer's existing valuation allowances or uncertain tax positions that result from the business combination. The Standard is effective for annual reporting periods beginning after December 15, 2008 and shall be applied prospectively. We have not yet completed our assessment of what impact SFAS 141(R), will have on our financial condition, results of operations or cash flows.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*. This Standard changes the way consolidated net income is presented, requiring consolidated net income to report amounts attributable to both the parent and the noncontrolling interest but earnings per share will be based on amounts attributable to the parent. It also establishes protocol for recognizing certain ownership changes as equity transactions or gain or loss and requires presentation of noncontrolling ownership interest as a component of consolidated equity. The Standard is effective for annual reporting periods beginning after December 15, 2008 and shall be applied prospectively. We have not yet completed our assessment of what impact SFAS 160 will have on our financial condition, results of operations or cash flows.

The accompanying notes are an integral part of these consolidated financial statements.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors

Ocean Conversion (BVI) Ltd.

We have audited the accompanying consolidated balance sheets of Ocean Conversion (BVI) Ltd. and its subsidiary (the Company) as of December 31, 2007 and 2006, and the related consolidated statements of income, stockholders equity and cash flows for each of the years in the three-year period ended December 31, 2007. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the auditing standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, also assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material aspects, the financial position of Ocean Conversion (BVI) Ltd. and subsidiary as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2007, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 3 to the consolidated financial statements, the Company is involved in a dispute with the BVI Government, which is the Company's sole customer. The consolidated financial statements do not include any adjustments that might result from the ultimate outcome of this dispute.

Table of Contents

**OCEAN CONVERSION (BVI) LTD.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

1. Principal activity

Ocean Conversion (BVI) Ltd. (OC-BVI) was incorporated in the British Virgin Islands under the Companies Act, Cap 285, on May 14, 1990 and is engaged in the production and sale of potable water to the Government of the British Virgin Islands (the BVI Government). OC-BVI has an agreement with the BVI Government, its sole customer, to produce and supply a guaranteed quantity and quality of potable water. This agreement provides for specific penalties should OC-BVI not be able to provide the guaranteed quantity of water.

On January 24, 1992, OC-BVI amended the original agreement with the BVI Government to allow for the expansion of OC-BVI s plant located at Baughers Bay, Tortola in order to increase its production capacity from 360,000 imperial gallons of water to 510,000 imperial gallons per day. Under this agreement, the BVI Government had the option to purchase this plant in May 1999 at a cost of \$1,420,000 or renew the agreement for a period of seven years. The BVI Government did not exercise its option to purchase the plant but advised OC-BVI of its desire to continue the agreement on a month-to-month basis until a new agreement is negotiated. In October 2006, the BVI Government notified OC-BVI that it was asserting a right of ownership of the Baughers Bay plant and invited OC-BVI to submit a proposal for continued involvement in the production of water at the Baughers Bay plant see Note 3.

JVD Ocean Desalination Ltd. (JVD), a majority owned affiliate of OC-BVI, was incorporated on January 2, 2003 and began producing potable water for the Government on July 10, 2003.

2. Accounting policies

Basis of preparation: The consolidated financial statements presented are prepared in accordance with accounting principles generally accepted in the United States of America.

Basis of consolidation: The consolidated financial statements include the financial statements of Ocean Conversion (BVI) Ltd. and its majority owned subsidiary, JVD Ocean Desalination Ltd. (collectively, the Company). All significant intercompany balances and transactions have been eliminated.

Use of estimates: The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management of the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Significant items subject to estimates and assumptions include the carrying value of property, plant and equipment and inventory. Actual results could differ from those estimates.

Cash and cash equivalents: Cash and cash equivalents are comprised of cash at banks on call and highly liquid deposits with an original maturity of three months or less. Cash and cash equivalents are not restricted as to withdrawal or use.

Trade accounts receivable: Trade accounts receivable are recorded at the invoiced amounts based on meter readings reduced by appropriate allowances for estimated uncollectible amounts. The allowance for doubtful accounts is the Company s best estimate of the amount of probable credit losses in the Company s existing accounts receivable balance. The Company determines the allowance based on historical write-off experience.

Interest income: The Company earns interest income on trade accounts receivable based on the overdue invoices from its customer. The interest is recorded on an accrual basis.

Inventory: Inventory primarily includes replacement spares and parts that are valued at the lower of cost or net realizable value on a first-in, first-out basis.

Table of Contents**OCEAN CONVERSION (BVI) LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

Impairment of long-lived assets: In accordance with Statement of Financial Accounting Standards (SFAS) No. 144,

Accounting for Impairment or Disposal of Long-Lived Assets, such as property, plant and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount by which the carrying amount exceeds the fair value of the asset.

Property, plant and equipment: Property, plant and equipment is stated at cost less accumulated depreciation. Depreciation is calculated using a straight line method with an allowance for estimated residual values. Rates are determined based on the estimated useful lives of the assets as follows:

Plant and equipment	4 to 40 years
Office furniture, fixtures and equipment	3 to 10 years
Vehicles	3 to 10 years
Lab equipment	3 to 10 years

Additions to property, plant and equipment consist of the cost of the contracted services, direct labor and materials. Assets under construction are recorded as additions to property, plant and equipment upon completion of the projects. Depreciation commences in the month of addition.

Construction in progress: The cost of borrowed funds directly attributable to the acquisition and construction of qualifying assets, which are assets that necessarily take a substantial period of time to be ready for their intended use, are added to the cost of those assets until such time as the assets are substantially ready for use or sale.

Water sales and cost of water sales: The Government is billed monthly based on meter readings performed at or near each month end and in accordance with the water sales agreement, which stipulates minimum monthly charges for water service.

Repairs and maintenance: All repair and maintenance costs are expensed as incurred.

Comparative amounts: Certain prior year amounts have been adjusted to conform to the current year's presentation.

3. Dispute with BVI Government.

In October 2006, the Ministry of Communications and Works of the Government of the British Virgin Islands (the Ministry) notified OC-BVI that it was asserting a purported right of ownership of the Baughers Bay plant pursuant to the terms of the Water Supply Agreement between the parties dated May 1990 (the 1990 Agreement) and was inviting OC-BVI to submit a proposal for its continued involvement in the production of water at the Baughers Bay plant in light of the Ministry's planned assumption of ownership. The Ministry is OC-BVI's sole customer and substantially all of its revenues are generated from the Baughers Bay plant.

Under the terms of the 1990 Agreement, upon the expiration of the initial seven year term in May 1999, the agreement would automatically be extended for another seven year term unless the Ministry provided notice, at least eight months prior to such expiration, of its decision to purchase the plant from OC-BVI for approximately \$1.42 million.

In correspondence between the parties from late 1998 through early 2000, the Ministry indicated that the BVI Government was prepared to exercise the option to purchase the plant but would be amenable to negotiating a new water supply agreement, and that it considered the 1990 Agreement to be in force on a monthly basis until negotiations between the BVI Government and OC-BVI were concluded. Occasional discussions were held between the parties since 2000 without resolution of the matter. OC-BVI has continued to supply water to the Ministry and has expended approximately \$4.7 million to significantly expand the production capacity of the plant beyond that contemplated in the 1990 Agreement.

Table of Contents**OCEAN CONVERSION (BVI) LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

OC-BVI submitted a proposal to the Ministry in late 2006 to continue to supply water from the Baughers Bay plant. The Ministry held discussions with OC-BVI regarding a new contract but did not formally respond to OC-BVI's proposal. Early in 2007 the Ministry unilaterally took the position that until such time as a new agreement is reached on the ownership of the plant and the price for the water produced by the plant, the Ministry would only pay that amount of OC-BVI's billings that the Ministry purports constitutes OC-BVI's costs of producing the water. At its proposed interim price, the Ministry would pay only approximately 30% of the amounts billed by OC-BVI pending a new agreement. OC-BVI responded to the Ministry that the amount the Ministry proposed to pay was significantly less than OC-BVI's production costs. Payments made by the Ministry to OC-BVI since the Ministry's assumption of this reduced price have been sporadic and as of December 31, 2007 OC-BVI had received payment for less than 22% of the amounts it billed the Ministry for the year then ended. On November 15, 2007, OC-BVI issued a demand letter to the BVI Government for approximately \$6.2 million representing amounts that OC-BVI claimed were due by the BVI Government for water sold and delivered plus interest and legal fees. In response to OC-BVI's demand for payment, the BVI Government issued a letter dated November 19, 2007 that reasserted its claim that ownership of the Baughers Bay plant has passed to the BVI Government and rejected OC-BVI's claim for payment. OC-BVI advised the BVI Government in correspondence dated November 21, 2007 that it was demanding that the dispute between OC-BVI and the BVI Government be submitted to arbitration pursuant to the terms of the 1990 Agreement. On the following day, OC-BVI's management was informed that the BVI Government had filed a lawsuit with the Eastern Caribbean Supreme Court seeking ownership of the Baughers Bay plant. OC-BVI intends to vigorously pursue its rights to full payment for water sold and delivered to the BVI Government and to defend against any action that the BVI Government owns any interest in the Baughers Bay plant.

As of December 31, 2007 OC-BVI had \$8.2 million in gross accounts receivable balances due from the BVI Government. In January 2008 the BVI Government remitted a partial payment on these receivables to OC-BVI of \$3.5 million.

During 2007 OC-BVI completed, for a total cost of approximately \$8 million, the construction of a 700,000 U.S. gallons per day desalination plant located at Bar Bay, Tortola (the Bar Bay plant). OC-BVI constructed this plant in response to what it believes is an extreme shortage of, and a pressing demand for, potable water on the eastern end of Tortola and anticipated entering into a bulk water supply agreement with the Ministry. However, due to the Baughers Bay dispute OC-BVI had not reached an agreement with the Ministry and the Bar Bay plant had not commenced operations as of March 2008.

To test for possible impairment of its long-lived assets as of December 31, 2007 as required under SFAS 144 the Company estimated the future expected cash flows from its Baughers Bay and Bar Bay plants using the guidance set forth under the FASB Statement of Financial Accounting Concepts No. 7, Using Cash Flow Information and Present Value in Accounting Measurements. In accordance with this FASB statement the Company (i) identified various possible outcomes of the Baughers Bay dispute and negotiations for a contract on the new Bar Bay plant; (ii) estimated the cash flows associated with each possible outcome, and (iii) assigned a probability to each outcome based upon discussions held to date with the BVI Government and OC-BVI's legal counsel. The resulting probability-weighted sum represents the expected cash flows, and the Company's best estimate of future cash flows, to be derived from the Baughers Bay and Bar Bay plants. The Company determined that the sum of the future undiscounted cash flows for the Baughers Bay and Bar Bay plants, as based upon these expected cash flows, exceeded the carrying values for these assets as of December 31, 2007 and therefore no impairment charge was required for these long-lived assets.

The identification of the possible outcomes for the Baughers Bay dispute and Bar Bay negotiations, the projections of cash flows for each outcome, and the assignment of relative probabilities to each outcome all represent significant estimates made by the Company's management. The ultimate resolution of the Baughers Bay and Bar Bay issues may differ significantly from the Company's estimates and may result in actual cash flows from the plants that vary materially from the expected cash flows the Company used in determining that an impairment charge was not required for the Company's long-lived assets. If OC-BVI and the BVI Government are unable to agree on a new contract for

Baughers Bay and this matter proceeds to resolution through the Courts, the Ministry's right of ownership under the 1990 Agreement could be found to be enforceable, in which case OC-BVI could lose its water supply arrangement with the Ministry or may be forced to accept a water supply arrangement with the Ministry on less favorable terms, and if the BVI Government exercises its purported right, OC-BVI could lose ownership of the Baughers Bay plant. Even if OC-BVI is able to refute the Ministry's purported right of ownership, OC-BVI may elect to accept a new contract on less favorable terms. OC-BVI may be unsuccessful in negotiating a contract for the Bar Bay plant on terms it finds acceptable. Any of these or other possible outcomes could result in actual cash flows from the Baughers Bay and Bar Bay plants that are significantly lower than the Company's estimates. In such case, the Company could be required to record an impairment charge to reduce the carrying value of its long lived

Table of Contents**OCEAN CONVERSION (BVI) LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

assets. Such impairment charge would reduce the Company's earnings and could have a material adverse impact on its results of operations and financial condition. Failure to negotiate a new contract for either the Baughers Bay or Bar Bay plant could affect the Company's ability to continue as a going concern.

4. Inventory

Inventory consists of:

	December 31,	
	2007	2006
Consumables stock	\$ 83,490	\$ 55,543
Spare parts stock	383,869	369,679
Total	\$ 467,359	\$ 425,222

5. Property, plant and equipment and construction in progress

Property, plant and equipment consist of:

	December 31,	
	2007	2006
Plant and equipment	\$ 9,545,707	\$ 9,517,475
Office furniture, fixtures and equipment	61,363	61,363
Vehicles	71,600	71,600
Tools & test equipment	18,431	18,431
	9,697,101	9,668,869
Accumulated depreciation	(7,138,358)	(6,738,916)
Property, plant and equipment, net of Bar Bay plant and equipment	2,558,743	2,929,953
Bar Bay plant and equipment	7,739,227	
Property, plant and equipment, net	\$ 10,297,970	\$ 2,929,953
Construction in progress	\$ 196,113	\$ 7,627,528

Bar Bay plant and equipment represents costs incurred to construct a 700,000 U.S. gallons per day desalination plant at Bar Bay, Tortola, British Virgin Islands. This plant was under construction during 2006 and completed during 2007. While operationally ready at December 31, 2007 this plant had not been placed into service as of March 2008 pending negotiation of a contract for the plant with the BVI Government see Note 3.

6. Long term debt

	December 31,	
	2007	2006
	\$ 2,875,000	\$ 3,000,000

CWCO loan bearing interest at three month LIBOR plus 3.5% (8.20% at December 31, 2007) per annum, with interest calculated daily and payable quarterly. The loan is payable in eight (8) quarterly principal payments of \$125,000 commencing on August 31, 2007, plus a final principal payment of \$2,000,000 due on August 31, 2009, plus quarterly payments of accrued interest

Total long term debt	2,875,000	3,000,000
Less current portion	(625,000)	(3,000,000)
Long term debt, excluding current portion	\$ 2,250,000	\$

On May 25, 2005, the Company entered into a loan agreement with Consolidated Water Co. Ltd. (CWCO), a Cayman Islands company which owns 50% of the Company's voting shares. Under this agreement CWCO loaned the Company \$3.0 million for the design and construction of the Bar Bay plant in Tortola. The loan principal was originally due and payable on June 1, 2007 and interest accrues at the LIBOR rate plus 3.5% and is payable quarterly on amounts drawn down commencing July 2005. The loan can be repaid at any time without penalty and is secured by a debenture on all of the Company's assets. On August 24, 2007, the loan agreement was amended such that the loan is payable in eight quarterly principal payments of \$125,000 commencing on August 31, 2007, plus a final principal payment of \$2,000,000 due on August 31, 2009, plus quarterly payments of accrued interest. The Company was delinquent on one payment of principal as of December 31, 2007 but made this payment subsequent to year end and is current on all payments due under the agreement as of March 2008. The Company's failure to obtain new agreements with the BVI Government for its Baughers Bay and Bar Bay plants by September 2007 constituted an event of default under the loan agreement. However, in March 2008 the Company obtained a waiver of this default through January 1, 2009 from CWCO.

Table of Contents

OCEAN CONVERSION (BVI) LTD.
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

7. Commitments

The Company leases property adjacent to the Baughers Bay plant upon which it has installed wells and pipelines necessary for the production of water, with lease payments totaling \$18,055 annually through the year 2015. In addition, on May 25, 2005, the Company entered into a twenty five year lease agreement with Bar Bay Estate Holdings Limited (Bar Bay), a private company incorporated in the Territory of the British Virgin Islands, pursuant to which the Company agreed to lease from Bar Bay approximately 50,000 square feet of land on Tortola, British Virgin Islands on which a seawater desalination plant and wells will be constructed. Under the terms of the lease agreement, a lease premium payment of \$750,000 was made on June 10, 2005, annual lease and easement payments of \$15,600 are due annually and royalty payments of 2.87% of annual sales, as defined in the lease agreement, are payable quarterly. Sage Water Holdings (BVI) Limited, currently owns 100% of the non-voting stock, 50% of the voting common stock and 50% of the profit sharing rights of OC-BVI. A Director of Sage Water Holdings is also a Director of OC-BVI and holds 50% of the outstanding shares of Bar Bay.

Future minimum lease payments under non-cancelable operating leases at December 31, 2007 are as follows:

2008	\$ 63,075
2009	63,075
2010	63,075
2011	63,075
2012	63,075
Thereafter	1,179,897

Total rental expense for each of the years ended December 31, 2007, 2006 and 2005 was \$33,655, \$33,655, and \$33,655, respectively.

8. Expenses

	Year Ended December 31,

Table of Contents**OCEAN CONVERSION (BVI) LTD.****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****9. Related party transactions**

Pursuant to an amended and restated Management Services Agreement dated December 1, 2003 between DesalCo Limited. (a wholly-owned subsidiary of CWCO) and the Company, DesalCo Limited provides the Company with management, administration, finance, operations, maintenance, engineering and purchasing services, and is entitled to be reimbursed for all reasonable expenses incurred on behalf of the Company. The Company incurred fees of \$528,119, \$466,401 and \$452,843 related to this management service agreement for the years ended December 31, 2007, 2006 and 2005, respectively, and as of December 31, 2007 had accounts payable of \$605,446 (2006: \$890,299) due to DesalCo Limited. for fees and expenses paid by DesalCo Ltd. on behalf of the Company.

Pursuant to a Management Services Memorandum effected January 1, 2004 between the Class B Directors who at any point in time represent Sage Water Holdings (BVI) Limited, and the Company, the Class B directors provide the Company with delegated operational matters, general management of local business matters, donation, sponsorship and public relations activities, and are entitled to an annual fixed fee of \$60,000 and a profit sharing bonus equal to 2% of the Company's income before depreciation, interest (income and expense), and other expenses not directly related to the operation of the Company. The Company incurred fees of \$185,000, \$154,047 and \$108,762 related to this management service memorandum for the years ended December 31, 2007, 2006 and 2005, respectively and as of December 31, 2007 had accounts payable of \$10,119 (2006: \$26,030) due to Sage Water Holdings (BVI) Ltd.

As of December 31, 2007, the Company had accounts payable of \$125,197 (2006: \$119,367) related to the reimbursement of expenses paid by CWCO and DesalCo (Barbados) Limited.

10. Profit sharing obligation

	December 31,	
	2007	2006
Opening balance	\$ 2,111,412	\$ 1,508,714
Additions	1,240,094	1,007,698
Distributions	(101,250)	(405,000)
Ending balance	\$ 3,250,256	\$ 2,111,412

In 1993, the Company and its existing shareholders at that time, entered into two Share Repurchase and Profit Sharing Agreements (the Agreements) to repurchase 225,000 shares each from those shareholders (the Parties), whose shares were issued in exchange for guarantees of the Company's long term debt. The Agreements were subsequently approved by special resolution at an Extraordinary Meeting of all the Company's shareholders.

Under the terms of the Agreements, the Company, in exchange for the above-mentioned shares, granted the Parties, profit sharing rights in the Company's profits for as long as the Company remains in business as a going concern. The Agreement states that where the Company has profits available for the payment of dividends and pays a dividend from there, a distribution shall be made to each of the Parties equal to 202,500 (2006: 202,500) times the dividend per share received by the remaining shareholders and paid concurrently with such dividend. The factor of 202,500 (2006: 202,500) shall be subject to amendment by the same proportion and at the same time as changes take place or adjustments are made in respect of the remaining shareholders.

The current shareholders and an affiliate of a current shareholder have acquired these profit sharing rights. The Company has recorded an obligation at December 31, 2007 for the maximum profit shares payable to the Parties if all retained earnings were to be distributed as dividends and profit shares.

Table of Contents

11. Taxation

Under the terms of the water sale agreements with the Government, the Company is exempt from all non-employee taxation in the British Virgin Islands.

12. Pension plan

Effective December 1, 2003, the Company established the MWM Global Retirement Plan (the Plan). The Plan is a defined contribution plan whereby the Company will contribute 5% of each participating employee's salary to the Plan. The total amount recognized as an expense under the plan during the year ended December 31, 2007 was \$13,876 (2006: \$11,230 and 2005: \$9,621).

13. Financial instruments

Credit risk:

Financial assets that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, accounts receivable and intercompany loans receivable. The Company's cash is placed with high credit quality financial institutions. The accounts receivable are due from the Company's sole customer, the BVI Government. As a result, the Company is subject to credit risk to the extent of any non-performance by the BVI Government.

Interest rate risk:

The interest rates and terms of the Company's loans are presented in Note 6 of these consolidated financial statements. The Company is subject to interest rate risk to the extent that the LIBOR rate may fluctuate.

Fair values:

As of December 31, 2007 and 2006, the carrying amounts of cash and cash equivalents, accounts receivable, prepaid expenses and other assets, accounts payable and accrued liabilities approximate fair values due to the short term maturities of these assets and liabilities. Management considers that the carrying amount for long term debt approximates fair value.

Table of Contents

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are the Company's controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934, as amended (the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be in this report is accumulated and communicated to its management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. Our management recognizes that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the possible controls and procedures.

Our management has evaluated, with the participation of its principal executive officer and principal financial officer, the effectiveness of its disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, the company's disclosure controls and procedures were effective.

Internal Control Over Financial Reporting

(a) Management's Annual Report on Internal Control Over Financial Reporting

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Company management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers and effected by the company's Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;

- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and

- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2007. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control - Integrated Framework*.

Based on our assessment, management believes that, as of December 31, 2007, the Company's internal control over financial reporting is effective.

The Company's independent registered public accounting firm, Rachlin LLP, has issued a report on the effectiveness of the Company's internal control over financial reporting. Their report appears in Item 8. Financial Statements and

Supplementary Data.

(b) Attestation Report of the Independent Registered Public Accounting Firm

See Item 8. Financial Statements and Supplementary Data.

(c) Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation of such internal control that occurred during the Company's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

* The Board of Directors has determined that each of such persons is an independent director under the corporate governance rules of The NASDAQ Stock Market LLC (NASDAQ)

Jeffrey M. Parker has been a director of our Company since 1980 and Chief Executive and Chairman of the Board since 1982. On January 1, 2004, Mr. Parker resigned as Chief Executive Officer, a position he held since 1994 but remained employed by the Company as Director responsible for investor relations and business expansion and Chairman of the Board. In addition to serving as our Chairman of the Board, Mr. Parker is a Chartered Accountant and practiced as Moore Stephens (Cayman Islands) Ltd., a member of Moore Stephens International Ltd until November 2007. From 1993 to 1995, Mr. Parker served as a director of The International Desalination Association representing the Caribbean & Latin America. Mr. Parker received his ACA designation as a chartered accountant in England and Wales in 1967, and his FCA designation in 1977. During the first quarter of 2008, Mr. Parker resigned from his employment with us as our Executive Chairman effective July 4, 2008 in order to pursue other interests. He will continue to serve as non-executive Chairman of our Board.

Frederick W. McTaggart has been a director of our company since 1998, President since October 2000 and Chief Executive Officer since January 1, 2004. Also on January 1, 2004, Mr. McTaggart resigned as Chief Financial Officer,

a position he held since February 2001. From April 1994 to October 2000, Mr. McTaggart was the Managing Director of the Water Authority-Cayman, the government-owned water utility serving certain areas of the Cayman Islands. He received his B.S. degree in Building Construction from the Georgia Institute of Technology in 1985. Mr. McTaggart is the brother of Mr. Gregory S. McTaggart, the Vice President of Cayman Operations.

David W. Sasnett has served as a director of our Company since December 2004 and in June 2006 became our Executive Vice President and Chief Financial Officer. From October 2005 until June 2006 Mr. Sasnett was the Chief Financial Officer of VoIP, Inc., a publicly-traded provider of communication services utilizing voice over internet protocol technology. Mr. Sasnett is an Executive Vice President and the former President of Secure Enterprises, LLC, a marketer and distributor of consumer products, a company he co-founded in 2003. During 2004, he was the Vice President of Finance and Controller for MasTec, Inc., a publicly-traded specialty contractor and infrastructure provider. Mr. Sasnett was employed from 1994 to 2002 by Catalina Lighting, Inc. and from 1996 to 2002 served as the Chief Financial Officer of Catalina Lighting, Inc., a publicly-traded manufacturer and distributor of residential lighting and other consumer products. Mr. Sasnett is presently serving on the Board of Directors of Web Safety, Inc., a publicly-traded company. His experience also includes more than 12 years with the accounting, auditing and consulting firm of Deloitte & Touche, LLP.

Gregory S. McTaggart is our Vice President of Cayman Operations. Mr. McTaggart joined our Company in January 1991 as our resident engineer and has served in his current capacity since 1994. For three years before joining us, Mr. McTaggart worked for the

Table of Contents

Caribbean Utilities Company, the electrical utility on Grand Cayman, as a mechanical engineer. Mr. McTaggart obtained his Bachelor of Mechanical Engineering from the Georgia Institute of Technology in 1986. Mr. McTaggart is the brother of Frederick W. McTaggart, who is the President, Chief Executive Officer and a director of our Company.

Robert B. Morrison was appointed Vice President of Purchasing & Information Technology in March 2003. Mr. Morrison holds the designation Certified Professional Purchaser and has more than twenty- five years of experience in the purchasing and logistics field. He joined DesalCo Limited as Purchasing Manager in June of 1996 in which position he also employed his more than 20 years of information technology experience as software and systems developer, network administrator and end user support resource for PC and mainframe environments. Prior to this, Mr. Morrison was Principal Purchasing Officer for the Ministry of Works & Engineering of the Bermuda government and Purchasing Manager for American-Standard in Toronto, Canada.

Gerard J. Pereira was appointed Vice President of Engineering in March 2003. Mr. Pereira obtained his Bachelor of Science and Master of Science in Chemical Engineering from the University of Waterloo, Ontario, Canada and joined Ocean Conversion (Cayman) Limited as Operations Engineer in 1995. He was promoted to Operations Manager of Ocean Conversion (Cayman) Limited in 1998, which post he held until our acquisition of that company.

Ramjeet Jerrybandan joined our Company in 1998 as the Operations Engineer in Grand Cayman. He was promoted to Operations Manager (Cayman) in 2005 and became our Vice President of Overseas Operations in May 2006. He obtained his Bachelor of Science degree in Industrial Engineering and his Master of Science degree in Engineering Management at the University of the West Indies. Mr. Jerrybandan holds an Advanced Diploma in Business Administration from the Association of Business Executives of London. He also has extensive training in the Information Technology field including industrial automation systems.

William T. Andrews became a director of our Company upon completion of our acquisition of DesalCo Limited in February 2003. Since 2002, he has been a director of DWEER Technology Ltd., and since 2007 he has been a director of ROVEX Ltd. companies which license patented high efficiency energy reduction pumping equipment for seawater reverse osmosis desalination. Since 2003, he has been Vice-Chairman of the Board of Directors of Calder AG. From 1991 to 2003, Dr. Andrews was Managing Director of DesalCo Limited. He was formerly President of Reliable Water Inc., and Vice President of Polymetrics Inc., focusing on seawater reverse osmosis desalination in both cases. Dr. Andrews attended universities in England, receiving a bachelor's degree in Physics from the University of Newcastle-upon-Tyne, and a doctorate in Atomic Physics at Oxford University, as a Rhodes Scholar. He is a registered Mechanical Engineer in California and Bermuda. Since 1976, Dr. Andrews has continuously been a member of the International Desalination Association (IDA). He was a director of IDA from 1995 until 2005, and had served as President during 2002/3. He is a member of the European Desalination Society.

Brian E. Butler has been a director of our Company since 1983. Mr. Butler, a full time resident of the Cayman Islands, has been the president since 1977 of Butler Property Development Group, a consortium of property development companies specializing in luxury resort projects in the Cayman Islands, Turks and Caicos Islands and British Columbia, Canada.

Steven A. Carr has served as a director of the Company since 1998. Mr. Carr is the President of Carr & Associates, a private investment firm located in Bryan, Texas. Mr. Carr received his Bachelor of Science degree from Texas A&M University in 1973 and his Master of Arts degree from the University of Texas in 1980. From 1972 to 1994, Mr. Carr held executive positions and participated in the ownership and management of a number of broadcast and telecommunications ventures throughout the United States. From 1998 to 2000, Mr. Carr served as an alternate director on our Board of Directors and was elected as a full director in May 2000. Mr. Carr is a director and chairman of the Trust Committee of the First National Bank of Bryan, and a director of Consolidated Water (Bahamas) Limited. He is Senior Lecturer at Texas A&M University's Mays Business School, a councilor of the Texas A&M Research Foundation, director of the 12th Man Foundation and serves on numerous other boards and councils.

Carson K. Ebanks became the Cayman Islands government nominated director of our Company in May of 2001. Mr. Ebanks was the Director of Planning for the Cayman Islands from 1991 – 1997. Since 1997, he has served the Cayman Islands Government as a Chief Officer currently for the Ministry of Community Services, Youth, Sports and Gender Affairs. Mr. Ebanks is a Justice of the Peace, a Fellow of the Royal Geographic Society and a member of the American Planning Association and a member of the Most Excellent Order of the British Empire. He holds a Bachelor

of Environmental Studies (Hons. Urban and Regional Planning Peace and Conflict Studies Minor) from the University of Waterloo and a Master of Arts Planning in Community and Regional Planning from the University of British Columbia. He is a trustee of the National Gallery of the Cayman Islands. Mr. Ebanks has served on the Boards of the Trustees for the Cayman Islands Museum, the Cayman Islands Civil Service Co-operative Credit Union, the Housing Development Corporation, the Water Authority-Cayman the National Roads Authority and is the Secretary General of the Cayman Islands Olympic Committee.

Table of Contents

Richard L. Finlay has served as a director of our Company since 1995. Mr. Finlay is an attorney and notary public and has practiced law in the Cayman Islands since 1992. Prior to that, Mr. Finlay served as Director of Legal Studies of the Cayman Islands Government from 1989 to 1992. From 1983 to 1989, Mr. Finlay was a partner with a Canadian law firm located in Regina, Canada. Mr. Finlay has served as the Cayman Islands representative to the International Company and Commercial Law Review and is a former editor of the Cayman Islands Law Bulletin.

Clarence B. Flowers, Jr. has been a director of our Company since 1991. Mr. Flowers is, and has been since 1985, the principal of Orchid Development Company, a real estate developer in the Cayman Islands. Mr. Flowers also serves as a director of C.L. Flowers & Son, which is the largest manufacturer of wall systems in the Cayman Islands, and Cayman National Bank, a retail bank.

Wilmer F. Pergande has been a director of our Company since 1978. Mr. Pergande is the principal of WF Pergande Consulting LLC currently providing consulting engineering services in the areas of desalination and fluid dynamics technologies. He retired in 2005 as the Global Leader for Desalination and Process Equipment for GE Infrastructure, Water and Process Technologies, a water desalination and treatment division of GE, which position he held since 2002. Mr. Pergande previously held the position of Vice-President of Special Projects, and CEO of a subsidiary, of Osmonics, Inc., a publicly-traded water treatment and purification company, until its acquisition by General Electric Co. Before joining Osmonics, Mr. Pergande was the Chief Executive Officer of Licon International, Inc., a publicly traded manufacturer of liquid separation and processing equipment. Previously, Mr. Pergande was the President of Mechanical Equipment Company, Inc., and held executive managerial positions with AquaChem Inc. both companies being manufacturers of seawater desalination equipment. In 2007, he was elected a Director of the International Desalination Association and also serves as its Secretary.

Leonard J. Sokolow became a director of our Company on June 1, 2006. From November 1999 until January 2007, Mr. Sokolow has been CEO and President of vFinance, Inc., a publicly-traded financial services company, which he co-founded. Since January 2007 Mr. Sokolow has been the Chairman and CEO of vFinance, Inc. Mr. Sokolow was Founder, Chairman and Chief Executive Officer of the Americas Growth Fund, Inc., a closed-end 1940 Act management investment company, from 1994 to 1998. From 1988 until 1993 Mr. Sokolow was EVP and General Counsel of Applicia, Inc., a publicly-traded appliance marketing and distribution company. From 1982 until 1988 Mr. Sokolow practiced corporate, securities and tax law and was one of the founding attorneys and a partner of an international boutique law firm. From 1980 until 1982 he worked as a CPA for Ernst & Young and KPMG Peat Marwick.

Raymond Whittaker has served as a director of our Company since 1988. Mr. Whittaker was the Managing Director of TransOcean Bank & Trust, Ltd., a bank and trust company located in the Cayman Islands and a subsidiary of Johnson International, Inc., a bank holding company located in Racine, Wisconsin from 1984 to December 2000. He is now the principal of his own company and management firm, FCM Ltd.

Composition of the Board of Directors

The Board of Directors is organized into three groups. Each group holds office for a three-year period and re-election of the Board members is staggered so that two-thirds of the Board members are not subject to re-election in any given year. The groups are organized alphabetically as follows:

Group 1	Group 2	Group 3
William T. Andrews	Carson K. Ebanks, JP	Wilmer F. Pergande
Brian E. Butler	Richard L. Finlay	Raymond Whittaker
Steven A. Carr	Clarence B. Flowers, Jr.	David W. Sasnett
	Frederick W. McTaggart	Leonard J. Sokolow
	Jeffrey M. Parker	

The directors of Group 1 were re-elected at our annual shareholders meeting in 2007. The directors in Group 2 will be eligible for re-election in 2008, Group 3 in 2009 and then Group 1 again in 2010.

Under our exclusive retail license in the Cayman Islands, which was transferred to our wholly-owned subsidiary, Cayman Water Company Limited in July 2003, the Cayman Islands government may nominate three persons to serve on the Board of Directors of the license holder. We must cause one of the persons nominated by the government to be

elected as a director. In May 2001, when the license was held by our parent company, Carson K. Ebanks, JP was elected as the government's nominee and was elected to our Board. The Government has not yet nominated their director for Cayman Water Company Limited.

Table of Contents

Governance of the Company

Pursuant to the Company's Memorandum of Association, Articles of Association and Cayman Islands law, the Company's business, property and affairs are managed under the direction of the Board of Directors. Members of the Board of Directors are kept informed of the Company's business through discussions with the Chief Executive Officer and other senior officers, by reviewing materials provided to them and by participating in meetings of the Board of Directors and its committees.

The Company typically schedules a meeting of the Board of Directors quarterly and in conjunction with its Annual General Meeting and expects that all Directors will attend, absent a valid reason, such as a scheduled conflict. The Board of Directors held nine meetings during 2007.

Each director other than Carson K. Ebanks attended at least 75% of the aggregate of: (i) The total number of meetings of the Board of Directors held during 2007, and (ii) the total number of meetings held by all committees of the Board of Directors on which he served during 2007.

If, in the future, the Board of Directors amends the Code of Business Conduct and Ethics or grants a waiver to our principal executive officer, principal financial officer or principal accounting officer with respect to the Code of Business Conduct and Ethics, the Company will post the amendment or a description of the waiver on the Investor Relations-Corporate Governance section of the Company's website.

Committees of the Board of Directors

The Board of Directors has the following four committees: (1) Executive, (2) Compensation, (3) Audit and (4) Nominations. Except for the Executive Committee, the Board of Directors has adopted a written charter for each of the other committees. Such charters are posted on the Investor Relations-Corporate Governance section of the Company's website: <http://www.cwco.com>.

Executive Committee

The Executive Committee is comprised of Messrs. Frederick McTaggart, Finlay, Flowers, Parker and Whittaker. The Executive Committee did not meet during 2007. The functions of the Executive Committee include meeting to review the operations of the Company to ensure that any matters which must be dealt with before the next Board of Directors meeting are addressed in a timely matter.

Compensation Committee

The Compensation Committee for 2007 was comprised of Messrs. Ebanks, Flowers, Finlay, Pergande and Sokolow. The Compensation Committee met nine times during 2007.

The Compensation Committee is responsible for reviewing and approving the executive compensation program for the Company and its subsidiaries, assessing executive performance, making grants of salary and annual incentive compensation, approving certain employment agreements and reviewing and consulting with the Company's management regarding the Compensation Discussion and Analysis that is included in the Company's proxy statement for each annual meeting. The Board of Directors has adopted a written charter for the Compensation Committee. The Board of Directors has determined that all members of the Compensation Committee are independent directors, as such term is defined under the applicable rules of NASDAQ.

The composition of our Compensation Committee was changed in February 2008 and this Committee now consists of Messrs. Finlay, Pergande and Sokolow.

Audit Committee

The Board of Directors has an Audit Committee, which during 2007 was comprised of Messrs. Butler, Carr, Finlay, Sokolow and Whittaker. The Audit Committee met seven times during 2007.

The Audit Committee assists the Board of Directors in monitoring the financial reporting process, the internal control structure and the independence and performance of the internal audit department and the independent public accountants. Its primary duties are to serve as an independent and objective party to monitor the Company's financial process and internal control system, to review and appraise the audit effort of the Company's independent accountants and to provide an open avenue of communications among the independent

Table of Contents

accountants, financial and senior management and the Board of Directors. The Board of Directors has adopted a written charter for the Audit Committee and the Audit Committee reviews and reassesses the adequacy of its charter on an annual basis. During the year, the Board of Directors examined the composition of the Audit Committee in light of NASDAQ's corporate governance rules and the regulations promulgated by the Securities and Exchange Commission (SEC) applicable to audit committees. Based upon this examination, the Board of Directors has determined that all members of the Audit Committee are independent directors within the meaning of applicable rules and regulations of NASDAQ and the SEC. The Board of Directors has also determined that Mr. Sokolow qualifies as an audit committee financial expert as defined under applicable rules and regulations of NASDAQ and the SEC. The composition of our Audit Committee was changed in February 2008 and this Committee now consists of Messrs. Sokolow, Finlay, and Carr.

Nominations Committee

The Board of Directors has a Nominations Committee, which is comprised of Messrs. Carr, Pergande and Sokolow. The nominations committee met once during 2007.

The Nominations Committee makes recommendations to the Board of Directors regarding the size and composition of the Board of Directors, establishes procedures for the nomination process, recommends candidates for election to the Board of Directors and nominates officers for election by the Board of Directors. The Board of Directors has determined that all members of the Nominations Committee are independent directors, as such term is defined under the applicable rules of NASDAQ.

To recommend a prospective nominee for the Nominations Committee's consideration, a shareholder may submit the candidate's name and qualifications in writing to the Secretary of the Company, Consolidated Water Co. Ltd., Regatta Office Park, Windward Three, Fourth Floor, Grand Cayman, Cayman Islands.

Section 16(a) Beneficial Ownership Reporting Compliance

As a foreign private issuer, we are not subject to the requirements of Section 16(a) of the Securities Exchange Act of 1934, as amended.

Table of Contents

ITEM 11. EXECUTIVE COMPENSATION

COMPENSATION DISCUSSION & ANALYSIS

In this section, we provide an overview and analysis of our compensation program and policies, the material compensation decisions we have made under those programs and policies, and the material factors that we considered in making compensation decisions for our Named Executive Officers, as defined under the heading **Additional Information Regarding Executive Compensation**. Specific information regarding the compensation earned by or paid to our Named Executive Officers in 2007 is set forth in a series of tables under the heading **Additional Information Regarding Executive Compensation**. The discussion below is intended to help you understand the detailed information provided in those tables and put that information into context within our overall compensation program.

Overview of Compensation Program

The Compensation Committee (the **Committee**) of our Board of Directors has responsibility for establishing, implementing and continually monitoring adherence with our compensation philosophy, maintaining competitive compensation and structuring compensation to achieve our compensation objectives. Generally, the types of compensation and benefits we provide to our Named Executive Officers are similar to those provided to our other executive officers.

Compensation Philosophy and Objectives

The Committee believes that compensation paid to our Named Executive Officers should be directly aligned with our performance, and that compensation should be structured to ensure that a significant portion of our named executives officers' compensation opportunities are directly related to achievement of our financial and operational goals, such as meeting profitability targets, operating within the capital expenditures budget, securing new projects within the Caribbean, obtaining contract extensions with current customers and keeping current on the industry's engineering advances in seawater conversion technology, all of which impact shareholder value. The Committee evaluates both performance and compensation to ensure that we maintain our ability to attract and retain highly skilled and motivated employees in key positions and that compensation provided to key employees remains competitive relative to the compensation paid to similarly situated executives of our peer companies (our **Peer Companies**), which include California Water Service Company, American Water, Middlesex Water Company, York Water Company, United Utilities PLC, GE Water and Southwest Water Company. To that end, the Committee believes that the executive compensation packages we provide to our executives, including our Named Executive Officers, should include a mix of base salary and equity-based and incentive-based compensation.

Our compensation decisions with respect to our Named Executive Officer compensation opportunities are influenced by (a) the executive's level of responsibility and function within the Company, (b) our overall performance and profitability, and (c) our assessment of the competitive marketplace, including our competitors in our geographical business area such as GE Water, TSG Water Resources, Inc., VVNA Caribbean, LLC and Seven Seas Water Corp.

Setting Executive Compensation

Based on the foregoing philosophy and objectives, the Committee has structured our Named Executive Officers' base salary and equity-based and incentive-based compensation to motivate executives to achieve our business goals and reward the executives for achieving such goals. In furtherance of this, the Committee recently engaged Janney Montgomery Scott LLC (**Janney Montgomery**), an outside financial consulting firm and lead underwriter in our last public offering, to conduct a review of our total compensation program for our most highly compensated executive officers.

In determining the compensation of our Named Executive Officers as set forth in their most recent employment agreements, the Committee reviewed the American Water Works Association's 2005 Water Utility Compensation Survey, which covered salaries paid during 2002-2005 to executives employed by the top 625 water utility companies in the United States and again plans to purchase this survey based on 2007 salaries. The Committee also reviewed compensation paid to executives working at publicly-traded U.S. companies for which this information was available that are operating in the water business, including California Water Service Company, American Water, Middlesex Water Company, York Water Company and Southwest Water Company. Using this information, the Committee determined the total compensation of our Named Executive Officers, pursuant to their current employment agreements, adjusting upward between 20-25% to account for the cost of living in the Cayman Islands as compared to

that of the United States.

We compete with many companies for top executive-level management and technical talent and have been unsuccessful in the past when we attempted to recruit executives to relocate to the Cayman Islands. As such, the Committee generally sets compensation targets for our Named Executive Officers who live in the Cayman Islands that are 20-25% above the compensation paid to similarly situated U.S. executives of our Peer Companies in order to attract and to retain our Cayman Islands based Named Executive Officers. However, the Committee may set compensation for our Named Executive Officers above or below this standard as dictated by the experience level of the individual and market factors.

A significant percentage of the total compensation paid to our Named Executive Officers is allocated to incentive-based compensation, as a result of the philosophy and objectives mentioned above. In 2007, the annual bonuses paid to our Named Executive Officers ranged from 17%-79% of the total compensation paid to our Named Executive Officers.

Table of Contents

Role of Chief Executive Officer in Compensation Decisions

Our Chief Executive Officer recommends to the Compensation Committee a base salary within a designated range for each of our Vice-Presidents and our Chief Financial Officer. The Compensation Committee makes the final decision regarding base salary, based upon the range suggested by our Chief Executive Officer, and sets their other compensation components. Our Chief Executive Officer is not involved with the setting of compensation for the Chairman or himself.

2007 Executive Compensation Components

For the fiscal year ended December 31, 2007, the principal components of compensation for our Named Executive Officers were:

base salary;

equity-based compensation;

incentive-based compensation;

retirement and other benefits; and

perquisites and other personal benefits.

Base Salary

Base salaries for our executives are established based on the scope of their responsibilities and their prior relevant background, training, and experience, taking into account competitive market compensation paid by the companies represented in the compensation data the Committee reviewed for similar positions and the overall market demand for such executives at the time of hire or entry into employment agreements. As with total compensation, we believe that executive base salaries should be competitive with the salaries paid to executives in similar positions and with similar responsibilities in the companies of similar size to us represented in the compensation data reviewed. An executive's base salary is also evaluated together with other components of the executive's other compensation to ensure that the executive's total compensation is in line with our overall compensation philosophy and objectives.

Base salaries are reviewed annually and increased based upon (i) a need to realign base salaries with market levels for the same positions in the companies of similar size to us represented in the compensation data reviewed; (ii) an internal review of the executive's compensation, both individually and relative to other executive officers; (iii) the individual performance of the executive and (iv) an assessment of whether significant corporate goals were achieved. Additionally, we may adjust base salaries as warranted throughout the year for promotions or other changes in the scope or breadth of an executive's role or responsibilities.

Equity-Based Compensation

Under the terms of the employment agreement for our Chief Financial Officer that was effective through December 31, 2007, he was entitled to receive the equivalent in value of US\$40,000 of our ordinary shares annually. Such shares vest quarterly in increments of 12.5% over a two-year period beginning at the start of each year. For purposes of determining the number of ordinary shares equivalent in value to US\$40,000, we use the average of the closing bid and ask prices of the ordinary shares on the principal market on which our ordinary shares are traded for the five business days prior to the date that the amount of ordinary shares to be issued to our Chief Financial Officer is calculated.

We believe that equity ownership resulting from equity-based compensation earned by our Chief Financial Officer is an effective means of creating a long-term link between the compensation provided to our Chief Financial Officer with gains realized by our shareholders.

We entered into a new employment agreement with our Chief Financial Officer in January 2008 that supersedes his previous employment agreement effective January 1, 2008. The \$40,000 of equity-based compensation discussed above is not a component of compensation under this new agreement. However, any shares granted under the previous agreement through December 31, 2007 will continue to vest assuming this executive continues his employment with us.

Incentive-Based Compensation

Annual Bonus. A significant amount of total compensation for which our Named Executive Officers are entitled is comprised of an annual bonus. For 2007, our Chairman and Chief Executive Officer were entitled to an annual performance bonus equal to 1.5% and 2%, respectively, of net profit, subject to a cap measured as 40% and 50% of their respective base salaries and were also entitled to an annual incremental bonus equal to 15% and 5%, respectively, of the increase (if any) of net profit for a financial year over all prior years highest net profit. The annual bonuses paid to our Chairman and our Chief Executive Officer are paid 75% in cash and 25% in ordinary shares. Our Chief Financial Officer was entitled to an annual bonus for 2007 in an amount not less than 25% of his then current base salary based on meeting certain performance goals agreed to with our Chief Executive Officer. In 2007, our Chief Executive Officer set performance goals for the Chief Financial Officer with respect to various financial initiatives and the financial reporting process. The bonus paid to our Chief Financial Officer is paid in cash. For 2007, all Vice Presidents, except our Chief Financial Officer, were entitled to an annual bonus equal to 2.5% of the increase (if any) of net profit for a financial year over all prior years highest net profit, subject to a cap measured as 40% of their respective, then current base salaries. The annual bonuses, if any, paid to our Vice-Presidents may be paid, upon election by such Vice-President, in cash, in our ordinary shares or in a combination thereof (upon approval of our shareholders with regard to the ordinary shares to be issued).

Table of Contents

In its discretion, the Committee may award bonus payments to our Vice-Presidents or our Chief Financial Officer above or below the amounts specified in their respective employment agreements. These bonus provisions are intended, in accord with our compensation philosophies and objectives, to align executive interests with shareholder interests.

Unless the provisions in our Chief Executive Officer and Chairman's employment agreements relating to incentive compensation are amended, they will continue to receive incentive-based compensation as set forth above. The Committee plans to use the information to be provided by Janney Montgomery to determine if they consider our Named Executive Officers' salaries to be competitive. As the employment agreements of our other Named Executive Officers come up for renewal, the Committee plans to review the information to be provided by Janney Montgomery to determine if our Named Executive Officers' compensation levels are competitive and have the right mix of incentive-based compensation.

Equity Incentives. Through December 31, 2007, our Vice-Presidents were eligible to participate in an employee share incentive plan for our long-term employees who are not directors. We believe that equity ownership is one of the more effective means of creating a long-term link between the compensation provided to our Named Executive Officers and other key management personnel with gains realized by our shareholders.

Under the plan, employees are issued redeemable preferred shares on an annual basis at no cost based on a formula which takes into consideration the employee's salary and the total dividend paid to ordinary shareholders as a percentage of the total shareholder's equity in each year. If an employee remains employed by us for at least four years, we are obligated to exchange the redeemable preferred shares (whether or not the redeemable preferred shares have been held for four years) for the same number of ordinary shares. We are also obligated to exchange the redeemable preferred shares for an equal number of ordinary shares if an employee's employment with us or any of our affiliates terminates by reason of the employee's death, permanent disability or the employee reaches the age of 65 years. However, if an employee's employment with us or any of our affiliates terminates for any other reason, we may at any time up to and including the first anniversary of such termination, redeem the employee's redeemable preferred shares for cash equal to 75% of the average of the closing market price for our ordinary shares on each of the first seven trading days in the month of October of the year in which the redeemable preferred shares were issued to the employee.

Additionally, when an employee is issued redeemable preferred shares, the employee is also granted an option to purchase an equal number of redeemable preferred shares at approximately 75% of the average market price of the ordinary shares. The exercise price is determined using the average of the closing market price for our ordinary shares on each of the first seven trading days in the month of October of the year in which the redeemable preferred shares were issued to the employee. The grant date is determined as 90 days after the date of the auditor's certificate on the financial statements for the relevant year. This option expires, unless exercised by the employee, within thirty (30) days after the date of grant.

Under the new employment agreements consummated with our Chief Financial Officer and Vice Presidents that became effective January 1, 2008, such Executive Officers may no longer participate in the employee share incentive plan discussed above. Under their new agreements, these individuals have received options to purchase shares of our common stock under a proposed new equity incentive plan that will be presented for approval at our upcoming 2008 shareholders' meeting.

Pension Plan

As with every employer in the Cayman Islands, we are required by the National Pension Law to provide a pension plan for our employees in the Cayman Islands. We belong to the Cayman Islands Chamber Pension Plan, the Ocean Conversion Staff Pension Plan and the Fidelity Pension Plan in the Cayman Islands. The Chamber Pension Plan is a non-profit entity, which is administered by the Bank of Butterfield, the Ocean Conversion Staff Pension Plan has as its trustee Colonial Private Trustee Limited and is administered by the British Caymanian Insurance Company Ltd, and the Fidelity Pension Plan is administered by Fidelity Pension Services (Cayman) Limited who are also the trustees of the plan.

Under the Cayman Islands National Pensions Law, all employees between the ages of 18 and 60 must contribute a specified minimum percentage of their earnings to a pension plan. Until recently, the exact percentage of contributions

varied according to the age of each employee. Since June 1, 2002, however, all employees must contribute 5% of their earnings to a pension plan. An employee also has the option of contributing more than the prescribed minimum. We are required to match the contribution of the first 5% of each participating employee's salary to a maximum of \$72,000. Employees earning more than \$72,000 are not required to make contributions on amounts over \$72,000. All contributions by our employees are collected by us and paid into the various pension plans on a monthly basis. All three plans are defined contribution plans, and as such the amount that an employee receives upon retirement is directly related to the amount contributed to the plan by the employee while working. Once an employee retires (employees become eligible for retirement at age 60 in the Cayman Islands), an employee has the following options for receiving benefits:

Receive a cash payout if the employee's retirement savings is less than \$6,000;

Transfer the retirement savings to a life annuity for investment by a life insurance company and payment of a regular income stream to the employee for the remainder of the employee's life (and the employee's spouse's life if the employee is married at the time of retirement); or

Transfer the retirement savings to a Retirement Savings Arrangement account with an approved provider or bank and receive regular income payments until the account is depleted.

Table of Contents

Perquisites and Other Personal Benefits

Pursuant to our Chief Executive Officer's employment agreement, we provide our Chief Executive Officer with a suitable vehicle, the monthly expense of which was \$250 in 2007. Pursuant to our Chief Financial Officer's employment agreement, we provide our Chief Financial Officer with a monthly automobile expense allowance which amounted to \$750 per month in 2007.

Termination-Based Compensation

Termination

Our Named Executive Officers' employment agreements may be terminated upon the occurrence of the following:

- i. the death of the Named Executive Officer;
- ii. the Named Executive Officer being adjudicated bankrupt;
- iii. the Named Executive Officer giving six months notice of termination; and
- iv. the Named Executive Officer being unable to discharge his duties due to physical or mental illness for a period of more than 60 days.

Additionally, our Chief Financial Officer's employment agreement may be terminated due to his conviction of a felony or his commission of an act or omission that could result in material harm to us or conduct justifying dismissal under Cayman Island law.

Our other Named Executive Officers' employment agreements may be terminated due to conduct by such Named Executive Officer justifying dismissal under Cayman Island law.

Upon termination due to the Named Executive Officer's inability to discharge his duties due to physical or mental illness for a period of more than 60 days, the Named Executive Officer will be relieved of his duties. In the case of all Named Executive Officers other than our Chief Financial Officer, we will pay such Named Executive Officer \$1,000 per year, provide medical insurance for him and his family, and contribute to a pension fund for the Named Executive Officer for a period of two years. In the case of our Chief Financial Officer, we will pay him \$1,000 per year and provide medical insurance for him and his family for a period of one year.

If our Chief Financial Officer's employment agreement is terminated by our Chief Financial Officer upon six months notice or due to his commission of an act or omission that could result in material harm to us, he will forfeit all unvested shares issued pursuant to his employment agreement. If his employment agreement is otherwise terminated or upon a Change in Control, as defined below, all unvested shares issued pursuant to his employment agreement will vest immediately.

Severance

Upon termination of employment, our Chairman, Chief Executive Officer and Chief Financial Officer are entitled to receive severance payments under their employment agreements. In determining whether to approve and setting the terms of such severance arrangements, the Committee recognizes that executives, especially highly ranked executives, often face challenges securing new employment following termination. Our Chairman and Chief Executive Officer's respective employment agreements provide for a lump sum severance payment equal to 24 months and our Chief Financial Officer's employment agreement provides for a lump sum severance payment of 12 months, of their then current respective base salary if their employment is terminated without cause or if their employment agreements are not renewed. The Committee negotiated our Chairman and Chief Executive Officer's severance packages to provide them an amount equal to their base salary for the length of their non-competition arrangement with us. Based upon the data reviewed by the Committee, we believe that our Chairman, Chief Executive Officer's and Chief Financial Officer's severance packages are generally in line with severance packages offered to executive chairmen, chief executive officers and chief financial officers of the companies of similar size and employee base.

Change in Control

Upon a Change in Control, as defined below, our Chief Financial Officer may elect to terminate his employment and receive a lump sum payment equal to three times his then current base salary. In determining whether to approve and setting the terms of such Change in Control arrangement, the Committee recognizes the importance to the Company and our shareholders of avoiding the distraction and

Table of Contents

loss of key management personnel that may occur in connection with rumored or actual fundamental corporate changes. A properly arranged Change in Control provision protects shareholder interests by enhancing employee focus during rumored or actual Change in Control activity through:

Incentives to remain with us despite uncertainties while a transaction is under consideration or pending; and

Assurance of compensation for terminated employees after a Change in Control.

Our Chief Financial Officer's employment agreement provides that, at his election, he may terminate his employment upon a Change in Control and receive a payment of 36 months of base his then current base salary. After reviewing the practices of companies represented in the compensation data we obtained, the Committee negotiated our Chief Financial Officer's Change in Control arrangement to provide him an amount equal to his base salary for three times the length of his non-competition arrangement with us. We believe that our Chief Financial Officer's Change in Control arrangement is generally in line with such arrangements offered to chief financial officers of the companies of similar size to us represented in the compensation data reviewed.

For the purposes of this discussion, a Change of Control means where: (i) any person, including a group as defined in Section 13(d)(3) of the Securities Exchange Act of 1934, as amended, publicly announces that such person or group has become the beneficial owner of more than 30% of the combined voting power (Controlling Voting Power) of our then outstanding securities that may be cast for the election of directors and (ii) the persons who were our directors before such event shall cease to constitute a majority of our Board of Directors, or any successor, as the direct or indirect result of any person or group acquiring Controlling Voting Power.

Compensation Committee Report

The Committee, comprised of independent directors, reviewed and discussed the above Compensation Discussion & Analysis (CD&A) with the Company's management. Based on the review and discussions, the Committee recommended to the Company's Board of Directors that the CD&A be included in this Annual Report on Form 10-K.

Gregory S. McTaggart <i>VP Cayman Operations</i>	2007	128,750	51,500				3,600	183,850
	2006	125,000	35,816				3,600	164,416
Robert B. Morrison <i>VP IT & Purchasing</i>	2007	128,750	51,500				3,600	183,850
	2006	125,000	35,867				3,600	164,467

1) Bonus amounts have been determined pursuant to the bonus terms outlined in our Named Executive Officers respective

employment agreements.

- 2) Under the terms of Mr. Sasnett's employment agreement effective for 2007, he was entitled to receive the equivalent in value of \$40,000 of our ordinary shares annually. Such shares vest quarterly in increments of 12.5% over a two-year period beginning on the date of grant.
- 3) There were no option awards during 2007 to Executive Management.
- 4) There was no non-equity incentive plan compensation during 2007 to Executive Management.
- 5) Represents
 - (i) pension plan contributions of \$3,600 for each of Frederick and Gregory McTaggart, Jeffrey Parker and Robert Morrison,
 - (ii) car allowance of

\$9,000
(2006:\$8,400)
for Mr. Sasnett;
and (iii) the cost
to us in the
amount of
\$3,000 for the
automobile used
by Frederick
McTaggart.

- 6) Mr. Sasnett assumed the position of Chief Financial Officer effective June 3, 2006. The 2006 information presented herein represents annualized compensation amounts paid for the period from June 2, 2006 to December 31, 2006.

Table of Contents**Grants of Plan-Based Awards**

Under the terms of Mr. Sasnett's employment agreement for 2007, he was entitled to receive the equivalent in value of \$40,000 of our ordinary shares annually. Such shares vest quarterly in increments of 12.5% over a two-year period beginning on the date of grant. The cash equivalent earned in 2007 related to this stock award in 2007 was \$40,000.

Employment Agreements*Frederick W. McTaggart-President and Chief Executive Officer*

On January 1, 2004, we entered into a three-year employment agreement with Frederick W. McTaggart, our President and Chief Executive Officer, pursuant to which he is paid US\$200,000 per annum. This agreement is subject to extension each year upon mutual agreement such that the term will be for three years from January 1st of the next following year. If we terminate Mr. Frederick McTaggart without cause, he is entitled to twice the annual remuneration set out in this agreement, adjusted for any annual increases received.

For each completed financial year, Mr. Frederick McTaggart was paid a bonus calculated as (a) 2% of the net profits for that financial year, before charging this bonus, dividends, or crediting any amounts arising from the re-valuation of our assets to a maximum of 50% of Mr. Frederick McTaggart's annual remuneration and (b) 5% of the amount by which our net profits for that financial year (calculated in the same manner as in (a) above) exceed the highest annual net profits earned by us in any prior financial year. This bonus was paid as to 75% in cash and 25% in our ordinary shares valued at the market price at the close of trading of the same on December 31st of the relevant financial year.

On September 14, 2007, we amended the employment agreement with Mr. McTaggart, commencing January 1, 2008, Mr. McTaggart's annual base salary increases from approximately \$230,000 to \$375,000. In addition, Mr. McTaggart's bonus after his 2007 fiscal year bonus will no longer be calculated as (a) 2% of the net profit of the Company's annual net profits, before charging the bonus amount, dividends, or crediting any amounts arising from the re-valuation of the Company's assets to a maximum of 50% of Mr. McTaggart's annual remuneration and (b) 5% of the amount by which the Company's net profits for that fiscal year exceeded the highest annual net profits earned by the Company in any prior fiscal year.

Pursuant to the terms of the amended employment agreement, Mr. McTaggart's bonus will be determined, at the sole discretion of the Company's Board of Directors, and will be paid in an amount not to exceed 100% of Mr. McTaggart's then-current annual compensation. The amount of the annual bonus, if any, will be calculated by the Board of Directors based upon their assessment of the performance of Mr. McTaggart in the following areas: (a) the Company achieving its budgeted net income and earnings per share targets, (b) Mr. McTaggart facilitating the Company's revenue growth through project extensions and new projects, (c) the Company staying within the approved capital expenditure budgets for operations, project extensions and new projects, (d) Mr. McTaggart fostering excellent communications with the Board of Directors and being receptive to input from the Board of Directors, (e) Mr. McTaggart executing any special projects as assigned by the Board of Directors, and (f) the development and maintenance of excellent customer relations.

The annual bonus, if any, will be paid 75% in cash and 25% in the Company's ordinary shares valued at the market price at the close of trading on December 31, of the relevant fiscal year (or if such day is not a trading day, at the close of trading on the preceding trading day). Finally, Mr. McTaggart will be entitled to a discretionary bonus in an amount and form as determined at the sole discretion of the Board of Directors. Pursuant to Nasdaq rules, the payment of a bonus in stock must be approved by the shareholders of the Company.

Jeffrey M. Parker-Chairman of the Board of Directors

On January 1, 2004, we entered into a three-year employment agreement with Jeffrey M. Parker, our Chairman of the Board of Directors, pursuant to which he was paid US\$165,000 per annum. This agreement is subject to extension each year upon mutual agreement and shall be extended such that the term shall be for three years from January 1st of the next following year. If we terminate Mr. Parker without cause, he is entitled to twice the annual remuneration set out in this agreement, adjusted for any annual increases received.

Table of Contents

For each completed fiscal year, Mr. Parker was paid a bonus calculated as (a) 1.5% of the net profits for that financial year, before charging this bonus, dividends, or crediting any amounts arising from the re-valuation of our assets to a maximum of 40% of Mr. Parkers annual remuneration and (b) 15% of the amount by which our net profits for that financial year (calculated in the same manner as in (a) above) exceed the highest annual net profits earned by us in any prior financial year. This bonus was paid as to 75% in cash and 25% in our ordinary shares valued at the market price at the close of trading of the same on December 31st of the relevant financial year.

On September 14, 2007, we amended the employment agreement with Mr. Parker. Commencing January 1, 2008, Mr. Parker s base salary increases from approximately \$190,000 to \$275,000. In addition, Mr. Parker s bonus after his 2007 fiscal year bonus will no longer be calculated as (a) 1.5% of the Company s annual net profits, before charging the bonus amount, dividends or crediting any amounts arising from the re-valuation of the Company s assets to a maximum of 40% of Mr. Parker s annual remuneration and (b) 15% of the amount by which the Company s net profits for that fiscal year exceeded the highest annual net profits earned by the Company in any prior fiscal year.

Pursuant to the terms of the amended employment agreement, Mr. Parker s bonus will be determined, at the sole discretion of the Company s Board of Directors, and will be paid in cash in an amount not to exceed 50% of Mr. Parker s then-current annual compensation. The amount of the annual bonus, if any, will be calculated by the Board of Directors based upon their assessment of the performance of Mr. Parker in the following areas: (a) new business development, (b) investor relations, (c) communication with the Board of Directors, (d) communication and collaboration with the Company s chief executive officer and chief financial officer; and special projects assigned by the Board of Directors. Finally, Mr. Parker will be entitled to a discretionary bonus in an amount and form as determined at the sole discretion of the Board of Directors.

During the first quarter of 2008, Mr. Parker resigned from his employment with us as Executive Chairman effective July 4, 2008 in order to pursue other interests. He will continue to serve as non-executive Chairman of our Board, but our obligations under his amended employment agreement will end effective July 4, 2008.

David W. Sasnett-Executive Vice President & Chief Financial Officer

On May 22, 2006, we entered into a 19-month employment agreement with David W. Sasnett, pursuant to which Mr. Sasnett began serving as our Executive Vice President and Chief Financial Officer effective June 3, 2006. Under the terms of the employment agreement, Mr. Sasnett was entitled to an annual base salary of US\$155,000, and a performance bonus equal to 25% of Mr. Sasnett s then current salary if benchmarks to be agreed upon by our Chief Executive Officer and Mr. Sasnett were met. We agreed to issue Mr. Sasnett a number of our ordinary shares having an aggregate value of US\$40,000. Such shares vest quarterly in increments of 12.5% over a two-year period beginning on May 22, 2006. If Mr. Sasnett terminates the Employment Agreement upon giving 90 day s notice after a Change of Control, we agreed to pay Mr. Sasnett an amount equal to twice his then current salary.

Under this previous agreement if Mr. Sasnett remains employed by us, we will issue Mr. Sasnett an additional number our ordinary shares having an aggregate value of US\$40,000 on each anniversary of the Employment Agreement, which shares will vest quarterly in increments of 12.5% over a two-year period beginning on the date of each such grant. The number of ordinary shares equivalent in value to US\$40,000 shall be determined using the average of the closing bid and asked prices of the ordinary shares on the principal market on which such ordinary shares are traded for the five business days prior to the date that the amount of such ordinary shares to be issued to Mr. Sasnett is calculated. Additionally, we provided Mr. Sasnett with an initial monthly automobile allowance of US\$700 that increased by \$50 per month on the first of each new fiscal year.

On January 15, 2008, we entered into a new two-year employment agreement with Mr. Sasnett. Under the terms the employment agreement, Mr. Sasnett is entitled to an annual base salary of \$221,000 and a performance bonus equal to 25% of Mr. Sasnett s then current base salary if performance goals to be agreed upon by the Company s Chief Executive Officer and Mr. Sasnett are met. The Board of Directors of the Company, may in its sole discretion, after taking into consideration the recommendations of the Company s Chief Executive Officer, pay Mr. Sasnett a bonus in excess of 25% of Mr. Sasnett s base salary. Mr. Sasnett is also entitled to a monthly automobile expense allowance of \$850. If the Chief Executive Officer of the Company or the Company decide not to extend the term of the Employment Agreement, the term of the Employment Agreement will expire on December 31 of the year in which such decision is made and the Company will be obligated to pay Mr. Sasnett, in cash, a severance payment equal to

his base salary on the expiration date.

Subject to the Company's shareholders approval of a new Equity Incentive Plan (the Plan) for all of the Company's officers, directors and key employees at the next annual meeting of shareholders, the Company granted Mr. Sasnett a stock option to purchase 22,200 ordinary shares at an exercise price of \$30.40 per share. The options will vest in tranches of 7,400 shares each on January 1, 2009, 2010 and 2011. The options expire three years from the applicable vesting date. If the shareholders do not approve the Plan, the

Table of Contents

Company must, within 30 days of the annual meeting of shareholders in 2008, pay Mr. Sasnett a lump sum equal to 25% of his base salary.

Gregory S. McTaggart-Vice President of Cayman Operations

On January 18, 2005, we entered into a two-year employment agreement with Gregory S. McTaggart, our Vice President of Cayman Operations, pursuant to which he is paid US\$105,000 per annum. This agreement is subject to extension each year if the Chief Executive Officer so determines and shall be extended for a further term not exceeding two years.

For each completed financial year, Mr. Gregory McTaggart will be paid a bonus calculated as 2.5% of the amount by which our net profits for that financial year (before charging this bonus, dividends, or crediting any amounts arising from the re-valuation of our assets) exceed the highest annual net profits earned by us in any prior financial year to a maximum of 40% of Mr. Gregory McTaggart's annual remuneration. This bonus shall be paid as to in cash or in our ordinary shares valued at the market price at the close of trading on December 31st of the relevant financial year (or if such day is not a trading day, at the close of trading on the preceding trading day), or as a combination of both at the Vice President election.

On January 11, 2008, we entered into a new employment agreement with Mr. McTaggart. Under the terms this employment agreement, Mr. McTaggart is entitled to an annual base salary of \$132,750 and a performance bonus of not less than 25% of Mr. McTaggart's base salary for the year pursuant to the completion of Performance Goals agreed between Mr. McTaggart and the Chief Executive Officer of the Company. The Board of Directors of the Company, may in its sole discretion, after taking into consideration the recommendations of the Company's Chief Executive Officer, pay Mr. McTaggart a bonus in excess of 25% of Mr. McTaggart's base salary. The performance bonus must be paid entirely in cash.

Subject to the Company's shareholders approval of a new Equity Incentive Plan (the Plan) for all of the Company's officers, directors and key employees at the next annual meeting of shareholders, the Company granted Mr. McTaggart a stock option to purchase 17,700 ordinary shares at an exercise price of \$30.40 per share. The options will vest in tranches of 5,900 shares each on January 1, 2009, 2010 and 2011. The options expire three years from the applicable vesting date. If the shareholders do not approve the Plan, the Company must, within 30 days of the annual meeting of shareholders in 2008, pay Mr. McTaggart a lump sum equal to 25% of his base salary.

Robert B. Morrison-Vice President of Purchasing and Information Technology

On January 17, 2005, we entered into a two-year employment agreement with Robert B. Morrison, our Vice President of Purchasing and Information Technology, pursuant to which he is paid US\$100,000 per annum. This agreement is subject to extension each year if the Chief Executive Officer so determines and shall be extended for a further term not exceeding two years.

For each completed financial year, Mr. Morrison will be paid a bonus calculated as 2.5% of the amount by which our net profits for that financial year (before charging this bonus, dividends, or crediting any amounts arising from the re-valuation of our assets) exceed the highest annual net profits earned by us in any prior financial year to a maximum of 40% of Mr. Morrison's annual remuneration. This bonus shall be paid as to in cash or in our ordinary shares valued at the market price at the close of trading on December 31st of the relevant financial year (or if such day is not a trading day, at the close of trading on the preceding trading day), or as a combination of both at the Vice President election.

On January 11, 2008, we entered into a new employment agreement with Mr. Morrison. Under the terms this employment agreement, Mr. Morrison is entitled to an annual base salary of \$132,750 and a performance bonus of not less than 20% of Mr. Morrison's base salary for the year pursuant to the completion of Performance Goals agreed between Mr. Morrison and the Chief Financial Officer of the Company. The Board of Directors of the Company, may in its sole discretion, after taking into consideration the recommendations of the Company's Chief Executive Officer, pay Mr. Morrison a bonus in excess of 20% of Mr. Morrison's base salary. The performance bonus must be paid entirely in cash.

Subject to the Company's shareholders approval of a new Equity Incentive Plan (the Plan) for all of the Company's officers, directors and key employees at the next annual meeting of shareholders, the Company granted Mr. Morrison a stock option to purchase 13,275 ordinary shares at an exercise price of \$30.40 per share. The options will vest in

tranches of 4,425 shares each on January 1, 2009, 2010 and 2011. The options expire three years from the applicable vesting date. If the shareholders do not approve the Plan, the Company must, within 30 days of the annual meeting of shareholders in 2008, pay Mr. Morrison a lump sum equal to 20% of his base salary.

Pursuant to the terms of the employment agreement, the Company will provide Mr. Morrison with a monthly automobile expense allowance of \$850. This will increase on January 1 of each subsequent year by \$50 per month during the term of this agreement.

Outstanding Equity Awards at Fiscal Year-End

There were no unvested stock awards outstanding on December 31, 2007 to any of our Named Executive Officers.

Table of Contents**Option Exercises and Stock Vested**

The following table shows the number of our ordinary shares acquired during 2007 upon the exercise of options.

Name	Option Awards		Stock Awards	
	Number of Shares Acquired on Exercise (#)	Value Realized on Exercise (\$)	Number of Shares Acquired on Vesting (#)	Value Realized on Vesting (\$)
Frederick W. McTaggart	87,580	1,198,532		
David W. Sasnett				
Jeffrey M. Parker	90,194	1,245,128		
Gregory S. McTaggart	63,444	872,672		
Robert B. Morrison				

Pension Benefits

We do not have any defined benefit plans and only offer defined contribution plans.

Non-Qualified Deferred Compensation

We do not have any non-qualified deferred contribution plans or other deferred compensation plans.

Potential Payments Upon Termination or Change of Control

The section below describes the payments that may be made to Named Executive Officers upon termination or Change in Control, as defined below, pursuant to individual agreements. For payments made to a participant upon a retirement other than in connection with termination or a Change in Control, see Pension Benefits above.

Termination

Our Named Executive Officers' employment agreements may be terminated upon the occurrence of the following:
the death of the Named Executive Officer;

the Named Executive Officer being adjudicated bankrupt;

the Named Executive Officer giving six months notice of termination; and

the Named Executive Officer being unable to discharge his duties due to physical or mental illness for a period of more than 60 days.

Additionally, our Chief Financial Officer's employment agreement may be terminated due to his conviction of a felony or his commission of an act or omission that could result in material harm to us. Our other Named Executive Officers' employment agreements may be terminated due to conduct by such Named Executive Officer justifying dismissal under Cayman Island law.

Upon termination due to the Named Executive Officer's inability to discharge his duties due to physical or mental illness for a period of more than 60 days, the Named Executive Officer will be terminated. In the case of all Named Executive Officers other than our Chief Financial Officer, we will pay such Named Executive Officer \$1,000 per year, provide medical insurance for him and his family, and contribute to a pension fund for the Named Executive Officer for a period of two years. In the case of our Chief Financial Officer, we will pay him \$1,000 per year and provide medical insurance for him and his family for a period of one year.

Assuming our Named Executive Officers' employment were terminated on December 31, 2007 due to the Named Executive Officer's inability to discharge his duties due to physical or mental illness for a period of more than 60 days, the compensation due to our Named Executive Officers would be as set forth in the following table.

Table of Contents

Name	Salary (\$)	Medical Insurance (\$)	Pension Fund Contribution (\$)	Total Compensation (\$)
Frederick W. McTaggart	2,000	22,368	7,200	31,568
David W. Sasnett (1)	2,000	16,716		18,716
Jeffrey M. Parker	2,000	7,386	7,200	16,586
Gregory S. McTaggart	2,000	7,386	7,200	16,586
Robert B. Morrison	2,000	16,744	7,200	25,944

- 1) At the present time Mr. Sasnett is not participating in our health insurance plan.

If our Chief Financial Officer terminates his employment agreement with six months prior notice or if we terminate his employment agreement due to his commission of an act or omission that could result in material harm to us, he will forfeit all unvested shares issued pursuant to his employment agreement. If his employment agreement is otherwise terminated or upon a Change in Control, as defined below, all unvested shares issued pursuant to his employment agreement will vest immediately.

Severance

Upon termination of employment, our Chairman, Chief Executive Officer and Chief Financial Officer are entitled to receive severance payments under their employment agreements. Our Chairman, Chief Executive Officer's and Chief Financial Officer's employment agreements provide for a lump sum severance payment equal to 24 months, 24 months and 12 months, respectively, of their then current respective base salary if their employment is terminated without cause or if their employment agreements are not renewed. The Committee negotiated our Chairman, Chief Executive Officer's and severance packages to provide them an amount equal to their base salary for the length of their non-competition arrangement with us. If our Chairman, Chief Executive Officer's Chief Financial Officer employment agreements were terminated on December 31, 2007, they would have received a lump sum payment of \$380,000, \$405,000 and \$460,000, respectively.

Change in Control

Upon a Change in Control, as defined below, our Chief Financial Officer may elect to terminate his employment and receive a lump sum payment equal to twice his then current base salary. In determining whether to approve and setting the terms of such Change in Control arrangement, the Committee recognizes the importance to us and our shareholders of avoiding the distraction and loss of key management personnel that may occur in connection with rumored or actual fundamental corporate changes. A properly arranged Change in Control provision protects shareholder interests by enhancing employee focus during rumored or actual Change in Control activity through:

Incentives to remain with us despite uncertainties while a transaction is under consideration or pending; and

Assurance of compensation for terminated employees after a Change in Control.

Our Chief Financial Officer's employment agreement provides that, at his election, he may terminate his employment upon a Change in Control and receive a payment of 24 months of his then current base salary as of December 31, 2007 and three times his then current salary effective January 1, 2008. After reviewing the practices of companies represented in the compensation data we obtained, the Committee negotiated our Chief Financial Officer's Change in Control arrangement to provide him an amount equal to his base salary for three times the length of his non-competition arrangement with us. We believe that our Chief Financial Officer's Change in Control arrangement is generally in line with such arrangements offered to chief financial officers of the companies of similar size to us

represented in the compensation data reviewed. If our Chief Financial Officer's employment agreement had been terminated on December 31, 2007, he would have received a lump sum payment of \$405,000.

For the purposes of this discussion, a Change of Control means where: (i) any person, including a group as defined in Section 13(d)(3) of the Securities Exchange Act of 1934, as amended, publicly announces that such person or group has become the beneficial owner of more than 50% of the combined voting power (Controlling Voting Power) of our then outstanding securities that may be cast for the election of directors and (ii) the persons who were our directors before such event shall cease to constitute a majority of our Board of Directors, or any successor, as the direct or indirect result of any person or group acquiring Controlling Voting Power.

Director Compensation

The following table sets forth a summary of the compensation earned by our non-employee directors and/or paid to certain of our non-employee directors in 2007.

Table of Contents

* The Board of Directors has determined that each of such persons is an independent director under the corporate governance rules of The NASDAQ Stock Market LLC (NASDAQ)

Director Compensation Policy

Each director who is not an executive officer is entitled to an annual retainer of US\$4,000 and an attendance fee of US\$2,800 for each Board of Directors meeting attended. Each director who is a member of the Audit Committee is entitled to an attendance fee of US\$900 for each Audit Committee meeting attended, except for the chairman of the Audit Committee who is entitled to US\$1,650 for each Audit Committee meeting attended. Each director who is a member of any other Committee is entitled to an attendance fee of US\$400 for each Committee meeting attended, except each chairman of the Committees who are entitled to an attendance fee of US\$900 for each Committee meeting attended. In addition, under the non-executive directors share grant plan, a director receives ordinary shares worth the share equivalent of US\$1,200 for each Board of Directors meeting and US\$600 for each Committee meeting attended. The ordinary shares are calculated by dividing the accumulated share attendance fees by the prevailing market price on October 1st of the preceding year.

Directors who are executive officers on our Board of Directors are not entitled to an annual retainer or any attendance fees.

Compensation Committee Interlocks and Insider Participation in Compensation Decisions

The Compensation Committee of the Board of Directors consists of Messrs. Ebanks, Flowers, Finlay, Pergande and Sokolow. No member of the Compensation Committee is, or at any time in the past has been, an officer or employee of the Company or any of its subsidiaries.

Table of Contents**ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDERS MATTERS**

The table below sets forth the beneficial ownership of our common shares, par value \$0.60 per share, of which 14,507,886 are outstanding as of March 10, 2008 and our redeemable preferred shares, par value \$0.60 per share, of which 21,082 are outstanding as of March 10, 2008 by:

each person or entity that we know beneficially owns more than 5% of our ordinary shares or redeemable preference shares;

each of our directors;

our Chief Executive Officer and each person who served as our Chief Financial Officer during the year ended December 31, 2007, and the three other most highly compensated executive officers who were serving as executive officers on December 31, 2007; and

all of our executive officers and directors as a group.

Financial
Statements.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Transactions With Related Persons

In 2003, DWEER Technology Ltd., the owner of the DWEER technology, licensed the worldwide rights to the DWEER technology to Calder AG, a Swiss company. On February 26, 2004, we entered into a distributorship agreement with Calder AG, pursuant to which we have the exclusive right to distribute and sell in the Caribbean the products manufactured by Calder AG using the DWEER technology. The agreement expires in October 2009.

William T. Andrews, Ph.D, a director of our Company and his spouse indirectly own 35% of the issued and outstanding shares of Calder AG. Dr. Andrews also is the Vice-Chairman of the Board of Directors of Calder AG. In addition, Dr. Andrews and his spouse own 100% of the issued and outstanding shares of DWEER Technology Ltd.

During 2007, we paid US\$179,243 to Calder AG under the distributorship agreement.

The Company paid consulting fees of approximately \$93,000, \$54,000 and \$_____ for the years ended 2007, 2006 and 2005, respectively, to Wilmer F. Pergande, a Director of the Company.

Table of Contents

The Company has a written policy regarding the review, approval or ratification of related person transactions. A related person transaction for the purposes of the policy is a transaction between the company and one of the Company's directors or nominees for director, executive officers or 5% shareholders, or a member of one of these person's immediate family, in which such person has a direct or indirect material interest and involves more than \$120,000. Under this policy, related person transactions are prohibited unless the Audit Committee has determined in advance that the transaction is in the best interests of the Company. In the event the Company enters into such a transaction without Audit Committee approval, the Audit Committee must promptly review its terms and may ratify the transaction if it determines it is appropriate.

The Board of Directors has determined that all of the current Directors, other than Messrs. Parker, McTaggart, Sasnett, and Andrews, are independent as such term is defined by the applicable listing standards of NASDAQ. The Board of Directors based this determination primarily on a review of the responses of the Directors to questions regarding their employment, affiliations and family and other relationships.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The following table shows the fees that the Company paid or accrued for the audit and other services provided by Rachlin LLP for the fiscal years ended December 31, 2007 and 2006.

	2007	2006
Audit	\$ 357,963	\$ 502,885
Audit-Related	86,167	63,320
Tax	6,000	
All Other		
Total	450,130	566,205

Audit Fees: This category includes the fees for the examination of the Company's consolidated financial statements and internal controls, review of the Company's Annual Report on Form 10-K and the quarterly reviews of the interim financial statements included in the Company's Quarterly Reports on Form 10-Q.

Audit-Related Fees: This category consists of services that are closely related to the financial audit process and primarily consists of review of reports filed and to be filed with the U.S. Securities and Exchange Commission and accounting advice relating thereto.

Tax Fees: This category relates to professional services for tax compliance, tax advice, and tax planning. No such services were provided to the Company during the years ended December 31, 2007 and 2006.

All audit services performed by Rachlin LLP were approved by the Audit Committee. The Audit Committee gives due consideration to the potential effect of non-audit services on maintaining the auditors independence.
