RATIONALE FOR THE TRANSACTION AND PRICING FACTORS

The Company develops, constructs, operates and manages large thermal power plants in China nationwide. It is the largest independent power producer in China.

The Company is able to gain more management experience and improve its management abilities through the management of the Entrusted Power Plants,

Edgar Filing: HUANENG POWER INTERNATIONAL INC - Form 6-K

thereby minimizing competition with related parties. By reason of the above, the Company will be able to further strengthen its leading position in the power generation market of the PRC. At the same time of streamlining the management structure of the thermal power generation assets of the Huaneng Group, it also paves the way for the further integration of the power generation assets of the Huaneng Group.

The Entrusted Management would also enable the Company to obtain direct knowledge in the development status of more power markets, thereby exploring new development opportunities. The Entrusted Management will be the main driving force of the Company's future development.

The service fee payable by Huaneng Group and HIPDC comprises the following three components:

- (i) costs (including set-up, operational and other recurrent items to be incurred by the Company in managing the Entrusted Power Plants), namely RMB46 million per annum;
- (ii) a premium to cover estimation risks which represents 10% of the costs, namely RMB4.6 million per annum; and
- (iii) an incentive / penalty component which is calculated based on the confirmed results and does not exceed 15% of the costs, namely either an incentive or a penalty of not more than RMB6.9 million.

The total service fee will be adjusted annually by reference to the inflation rate of the previous year as published by the State Statistic Department and the salary component will be adjusted by the percentage increase approved by the board of the Company. This methodology is consistent with international practice and is equitable to the shareholders.
