CNB FINANCIAL CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(UNAUDITED)

BASIS OF PRESENTATION

The accompanying consolidated financial statements have been prepared pursuant to rules and regulations of the Securities and Exchange Commission (SEC) and in compliance with accounting principles generally accepted in the United States of America. Because this report is based on an interim period, certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted.

In the opinion of management of the registrant, the accompanying consolidated financial statements as of September 30, 2008 and for the quarters and nine months ended September 30, 2008 and 2007 include all adjustments, consisting of only normal recurring adjustments, necessary for a fair presentation of the financial condition and the results of operations for the periods. The financial performance reported for CNB Financial Corporation (the Corporation) for the three and nine month periods ended September 30, 2008 is not necessarily indicative of the results to be expected for the full year. This information should be read in conjunction with the Corporation s Annual Report to shareholders and Form 10-K for the period ended December 31, 2007.

FAIR VALUE OPTION AND FAIR VALUE MEASUREMENTS

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement No. 157, Fair Value Measurements. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. This Statement establishes a fair value hierarchy about the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. The standard is effective for fiscal years beginning after November 15, 2007. In February 2008, the FASB issued Staff Position (FSP) 157-2, Effective Date of FASB Statement No. 157. This FSP delays the effective date of FAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. The impact of adoption was not material.

In February 2007, the FASB issued Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities. The standard provides companies with an option to report selected financial assets and liabilities at fair value and establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. The new standard is effective for the Corporation on January 1, 2008. As of January 1, 2008, the Corporation elected the fair value option for certain investment securities. The effect of the adoption is described in the Fair Value Option note.

Table of Contents

STOCK COMPENSATION

The Corporation has a stock incentive plan for key employees and independent directors. The Stock incentive plan, which is administered by a committee of the Board of Directors, provides for up to 625,000 shares of common stock in the form of nonqualified options or restricted stock. For key employees, the plan vesting is one-fourth of the granted options or restricted stock per year beginning one year after the grant date with 100% vested on the fourth anniversary of the grant. For independent directors, the vesting schedule is one-third of the granted options per year beginning one year after the grant date with 100% vested on the third anniversary of the grant.

Compensation expense for the restricted stock awards is recognized over the requisite service period noted above based on the fair value of the shares at the date of grant. Unearned restricted stock awards are recorded as a reduction of shareholders equity until earned. Compensation expense resulting from these restricted stock awards was approximately $35,000 and $112,000 for the three and nine months ended September 30, 2008 and $25,000 and $69,000 for the three and nine months ended September 30, 2007. As of June 30, 2008, there was approximately $299,000 of total unrecognized compensation cost related to unvested restricted stock awards.

A summary of changes in unvested restricted stock awards for the three months ended September 30, 2008 and 2007 follows:

	September 30, 2008		September 30, 2007	
	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
Nonvested at beginning of period	27,941	$ 14.03	23,440	$ 14.11
Granted				
Vested	(750)	13.86	(750)	13.86
Forfeited				
Nonvested at end of period	27,191	$ 14.03	22,690	$ 14.11

A summary of changes in unvested restricted stock awards for the nine months ended September 30, 2008 and 2007 follows:

	September 30, 2008		September 30, 2007	
	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
Nonvested at beginning of period	22,688	$ 14.12	14,654	$ 13.81
Granted	12,433	13.91	11,929	14.39
Vested	(7,930)	14.08	(3,893)	13.81
Forfeited				
Nonvested at end of period	27,191	$ 14.03	22,690	$ 14.11

FAIR VALUE

Fair Value Option

Management elected to adopt Statement No. 159 for its investment in perpetual preferred equity securities issued by the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation as well as its investment in all other equity securities that are traded on a national stock exchange. Management elected the fair value option for these securities to provide financial statement users with greater visibility into the Corporation s financial instruments that do not have a defined maturity date.

Table of Contents

These securities had previously been classified as available for sale and carried at fair value with unrealized gains and losses, net of tax, recorded in accumulated other comprehensive income. The carrying value of the securities for which the fair value option was elected at January 1, 2008 was $7,017,976 and included a net unrealized loss of $793,231. As a result of adopting Statement No. 159, the after tax effect of the net unrealized loss was removed from accumulated other comprehensive income which increased this balance by $515,600. The offset was recorded as a reduction to retained earnings as a cumulative effect adjustment.

Fair value changes included in earnings for the three and nine months ended September 30, 2008 were ($1,032,000) and ($2,057,000) for unrealized losses and ($348,000) and ($602,000) for realized losses on sales. Dividend income for the three and nine months ended September 30, 2008 of $37,000 and $209,000 is recorded based on cash dividends and comprises the Dividends line item in the accompanying consolidated statement of income.

Fair Value Measurement

Statement No. 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Statement No. 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Assets and Liabilities Measured on a Recurring Basis

Assets and liabilities measured at fair value on a recurring basis are summarized below (in thousands):

		Fair Value Measurements at Reporting Date Using		
Description	**September 30, 2008**	**Quoted Prices in Active Markets for Identical Assets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
Assets:				
Securities Available For Sale	$ 191,997	$ 27,438	$ 157,326	$ 7,233
Trading securities	1,804	1,804		
Liabilities,				
Interest rate swap	154		154	

Table of Contents

The table below presents a reconciliation and income statement classification of gains and losses for all securities available for sale measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the three months ended September 30, 2008 (in thousands):

Beginning balance, July 1, 2008	$ 1,401
Total gains or losses (realized/unrealized):	
Included in earnings	
Included in other comprehensive loss	(1,695)
Purchases, issuances, and settlements	3,204
Transfers in and/or out of Level 3	4,323
Ending balance, September 30, 2008	$ 7,233

The table below presents a reconciliation and income statement classification of gains and losses for all securities available for sale measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the nine months ended September 30, 2008 (in thousands):

Beginning balance, January 1, 2008	$ 1,526
Total gains or losses (realized/unrealized):	
Included in earnings	
Included in other comprehensive loss	(1,996)
Purchases, issuances, and settlements	9,202
Transfers in and/or out of Level 3	(1,499)
Ending balance, June 30, 2008	$ 7,233

All securities transferred from Level 2 to Level 3 in the 3 rd quarter were trust preferred securities. The primary reason for the transfer into Level 3 was due to inactivity in the market for trust preferreds that resulted in a lack of comparable trades that could be used to establish a benchmark for valuation. For these trust preferred securities, fair value was determined by using the proprietary valuation software of an independent investment advisor. Significant assumptions required for the valuation included discount rates, auction calls, prepayments, and recovery rates associated with existing defaults and deferrals.

There were no changes in unrealized gains or losses reported in earnings for the three and nine months ended September 30, 2008 for Level 3 assets that are still held at September 30, 2008.

Assets and Liabilities Measured on a Non-Recurring Basis

Assets measured at fair value on a non-recurring basis are summarized below (in thousands):

		Fair Value Measurements at Reporting Date Using		
Description	**September 30, 2008**	**Quoted Prices in Active Markets for Identical Assets (Level 1)**	**Significant Other Observable Inputs (Level 2)**	**Significant Unobservable Inputs (Level 3)**
Assets,				
Impaired loans	$ 2,255		$ 2,255	

Impaired loans, which are measured for impairment using the fair value of collateral for collateral dependent loans, had a carrying amount of $3,455, with a valuation allowance of $1,200. The fair value of collateral is primarily measured using independent appraisals. The additional provision for loan losses recorded during the three months and nine months ended September 30, 2008 was not significant.

Table of Contents

SECURITIES

Securities available for sale at September 30, 2008 and December 31, 2007 were as follows (in thousands):

	September 30, 2008				December 31, 2007

At September 30, 2008, there were no holdings of securities of any one issuer, other than the U.S. Government and its agencies, in an amount greater than 10% of shareholders equity.

Securities with unrealized losses at September 30, 2008 and December 31, 2007, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, are as follows (in thousands):

September 30, 2008	Less than 12 Months		12 Months or More		Total	
Description of Securities	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss
U.S. Treasury	$	$	$	$	$	$

The Corporation evaluates securities for other-than-temporary impairment on a quarterly basis, or more frequently when economic or market conditions warrant such an evaluation. Consideration is given to the length of time and the extent to which fair value has been less than cost, the financial condition and near term prospects of the issuer, and the intent and ability of the Corporation to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. In analyzing an issuer s financial condition, the Corporation may

consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and results of reviews of the issuer s financial condition.

12

Table of Contents

At September 30, 2008, approximately 39% of the total unrealized losses relate to structured trust preferred securities, primarily from issuers in the financial services industry. There is no indication of any significant deterioration of the creditworthiness of the underlying institutions of the various trust preferred pools. These unrealized losses are predominantly attributable to liquidity disruptions within the credit markets and the generally stressed condition within the financial services industry. The remainder of the unrealized losses is attributable to changes in interest rates, and the Corporation has both the intent and ability to hold the debt securities for the foreseeable future. As a result, based on the detailed evaluation process described above, management does not believe any of the individual unrealized losses on debt securities represents an other-than-temporary impairment.

LOANS

Total loans at September 30, 2008 and December 31, 2007 are summarized as follows (in thousands):

	September 30, 2008	December 31, 2007
Commercial, industrial and agricultural	$ 243,267	$ 218,839
Residential mortgage	204,856	176,470
Commercial mortgage	169,610	160,585
Consumer and other	58,653	47,647
	$ 676,386	$ 603,541

The Corporation s outstanding loans and related unfunded commitments are primarily concentrated within Central and Western Pennsylvania. The Corporation attempts to limit concentration within specific industries by utilizing dollar limitations to single industries or customers, and by entering into participation agreements with third parties. Collateral requirements are established based on management s assessment of the customer.

DEPOSITS

Total deposits at September 30, 2008 and December 31, 2007 are summarized as follows (in thousands):

	Percentage Change	September 30, 2008	December 31, 2007
Checking, non-interest bearing	18.1%	$ 107,420	$ 90,994
Checking, interest bearing	37.8%	235,865	171,216
Savings accounts	117.3%	118,055	54,339
Certificates of deposit	1.0%	346,093	342,608
	22.4%	$ 807,433	$ 659,157

EARNINGS PER SHARE

Basic earnings per share is computed by dividing net income by the weighted average number of shares outstanding during the period. Restricted stock awards are considered outstanding as they become earned. Diluted earnings per share is computed using the weighted average number of shares determined for the basic computation plus the dilutive effect of potential common shares issuable under stock compensation plans.

Table of Contents

The computation of basic and diluted EPS is shown below (in thousands except per share data):

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
Basic earnings per share computation:				
Net income	$ 372	$ 2,410	$ 4,550	$ 6,714
Gross weighted average shares outstanding	8,564	8,562	8,565	8,742
Less: Average unearned restricted stock	23	19	24	19
Net weighted average shares outstanding	8,541	8,543	8,541	8,723
Basic earnings per share	$ 0.04	$ 0.28	$ 0.53	$ 0.77
Diluted earnings per share computation:				
Net income	$ 372	$ 2,410	$ 4,550	$ 6,714
Weighted average shares outstanding for basic EPS	8,541	8,543	8,541	8,723
Add: Dilutive effects of assumed exercise of stock options	21	21	23	24
Weighted average shares and potentially dilutive shares	8,562	8,564	8,564	8,747
Diluted earnings per share	$ 0.04	$ 0.28	$ 0.53	$ 0.77

The following potential average common shares were anti-dilutive and not considered in computing diluted earnings per share because the exercise price of the options was greater than the average stock price for the periods, or the fair value of the restricted stock plan shares at the date of grant was greater than the average stock price for the periods.

	Three months ended September 30,		Nine months ended September 30,	
	2008	2007	2008	2007
Stock options	110,500	110,500	110,500	110,500
Restricted stock	23,102	19,489	19,198	9,202

DERIVATIVE INSTRUMENTS

Statement of Financial Accounting Standards No. 133, Accounting for Derivative Instruments and Hedging Activities (FAS 133), as amended and interpreted, establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. As required by FAS 133, the Corporation records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative and the resulting designation. Derivatives used to hedge the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives used to hedge the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges.

For derivatives designated as cash flow hedges, the effective portion of the changes in the fair value of the derivative is initially reported in other comprehensive income (outside of earnings) and subsequently reclassified into earnings when the hedged transaction affects earnings, and the ineffective portion of changes in the fair value of the derivative is recognized directly in earnings. The Corporation assesses the effectiveness of each hedging relationship by comparing the changes in cash flows of the derivative hedging instrument with the changes in cash flows of the designated hedged item or transaction.

Table of Contents

On August 1, 2008, the Corporation executed an interest rate swap agreement with a 5 year term to hedge $10 million of a subordinated note that was entered into by the Corporation during 2007. The Corporation s objective in using this derivative is to add stability to interest expense and to manage its exposure to interest rate risk. The interest rate swap involves the receipt of variable-rate amounts in exchange for fixed-rate payments over the life of the agreement without exchange of the underlying notional amount.

As of September 30, 2008, no derivatives were designated as fair value hedges or hedges of net investments in foreign operations. Additionally, the Corporation does not use derivatives for trading or speculative purposes and currently does not have any derivatives that are not designated as hedges.

At September 30, 2008, the derivative s fair value of $154,000 was included in other liabilities. No hedge ineffectiveness on the cash flow hedge was recognized during the quarter. At September 30, 2008, the variable rate on the subordinated debt was 4.37% (LIBOR plus 155 basis points) and the Corporation was paying 5.84% (4.29% fixed rate plus 155 basis points).

Interest expense recorded on the interest rate swap totaled $7,000 for the three and nine months ended September 30, 2008 and is reported as a component of interest expense on subordinated debentures. For the three and nine months ended September 30, 2008, the change in fair value of the interest rate swap reported in other comprehensive loss was $100,000 (net of taxes of $54,000). Amounts reported in accumulated other comprehensive loss related to the interest rate swap will be reclassified to interest expense as interest payments are made on the subordinated debentures. Such amounts reclassified from accumulated other comprehensive loss to interest expense in the next 12 months are not expected to be significant.

PARTICIPATION IN THE TREASURY CAPITAL PURCHASE PROGRAM

On October 3, 2008, the United States Congress passed the Emergency Economic Stabilization Act of 2008, which provides the U.S. Secretary of the Treasury with broad authority to implement certain actions to help restore stability and liquidity to U. S. markets. One of the provisions resulting from the Act is the Treasury Capital Purchase Program (CPP), which provides direct equity investment of perpetual preferred stock by the Treasury in qualified financial institutions. The program is voluntary and requires an institution to comply with a number of restrictions and provisions, including limits on executive compensation, stock redemptions and declaration of dividends. Applications must be submitted by November 14, 2008 and are subject to approval by the Treasury. The CPP provides for a minimum investment of 1% of Risk-Weighted Assets, with a maximum investment equal to the lesser of 3 percent of Total Risk-Weighted Assets or $25 billion. The perpetual preferred stock investment will have a dividend rate of 5% per year, until the fifth anniversary of the Treasury investment, and a dividend of 9% thereafter. The CPP also requires the Treasury to receive warrants for common stock equal to 15% of the capital invested by the Treasury. The Corporation is evaluating whether to apply for participation in the CPP. Participation in the program is not automatic and subject to approval by the Treasury.

RECENT ACCOUNTING PRONOUNCEMENTS

In December 2007, the FASB issued FAS No. 141 (revised 2007), Business Combinations (FAS 141(R)), which establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any noncontrolling interest in an acquiree, including the recognition and measurement of goodwill acquired in a business combination. FAS No. 141(R) is effective for fiscal years beginning on or after December 15, 2008. Earlier adoption is prohibited. The adoption of this standard is not expected to have a material effect on the Corporation s results of operations or financial position.

Table of Contents

In December 2007, the FASB issued FAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51. FAS No. 160 amends ARB No. 51 to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. It clarifies that a noncontrolling interest in a subsidiary, which is sometimes referred to as minority interest, is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements. Among other requirements, this statement requires consolidated net income to be reported at amounts that include the amounts attributable to both the parent and the noncontrolling interest. It also requires disclosure, on the face of the consolidated income statement, of the amounts of consolidated net income attributable to the parent and to the noncontrolling interest. FAS No. 160 is effective for fiscal years beginning on or after December 15, 2008. Earlier adoption is prohibited. The adoption of this standard is not expected to have a material effect on the Corporation s results of operations or financial position.

In September 2006, the FASB reached consensus on the guidance provided by Emerging Issues Task Force Issue 06-4 (EITF 06-4), Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements. The guidance is applicable to endorsement split-dollar life insurance arrangements, whereby the employer owns and controls the insurance policy, that are associated with a postretirement benefit. EITF 06-4 requires that for a split-dollar life insurance arrangement within the scope of the Issue, an employer should recognize a liability for future benefits in accordance with FAS No. 106 (if, in substance, a postretirement benefit plan exists) or Accounting Principles Board Opinion No. 12 (if the arrangement is, in substance, an individual deferred compensation contract) based on the substantive agreement with the employee. EITF 06-4 is effective for fiscal years beginning after December 15, 2007. The adoption of this EITF did not have a material effect on the Corporation s results of operations or financial position.

In March 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-10 (EITF 06-10), Accounting for Collateral Assignment Split-Dollar Life Insurance Agreements. EITF 06-10 provides guidance for determining a liability for the postretirement benefit obligation as well as recognition and measurement of the associated asset on the basis of the terms of the collateral assignment agreement. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The adoption of this EITF did not have a material effect on the Corporation s results of operations or financial position.

In June 2007, the FASB ratified Emerging Issues Task Force Issue No. 06-11 (EITF 06-11), Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards. EITF 06-11 applies to share-based payment arrangements with dividend protection features that entitle employees to receive (a) dividends on equity-classified nonvested shares, (b) dividend equivalents on equity-classified nonvested share units, or (c) payments equal to the dividends paid on the underlying shares while an equity-classified share option is outstanding, when those dividends or dividend equivalents are charged to retained earnings under FAS No. 123R, Share-Based Payment, and result in an income tax deduction for the employer. A consensus was reached that a realized income tax benefit from dividends or dividend equivalents that are charged to retained earnings and are paid to employees for equity-classified nonvested equity shares, nonvested equity share units, and outstanding equity share options should be recognized as an increase in additional paid-in capital. EITF 06-11 is effective for fiscal years beginning after December 15, 2007, and interim periods within those fiscal years. The adoption of this EITF did not have a material effect on the Corporation s results of operations or financial position.

In March 2008, the FASB issued FAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, to require enhanced disclosures about derivative instruments and hedging activities. The new standard has revised financial reporting for derivative instruments and hedging activities by requiring more transparency about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under FAS No. 133, Accounting for Derivative Instruments and Hedging Activities, and how derivative instruments and related hedged items affect an entity s financial position, financial performance, and cash flows. FAS No. 161 requires disclosure of the fair values of derivative instruments and their gains and losses in a tabular format. It also requires entities to provide more information about their liquidity by requiring disclosure of derivative features that are credit risk-related. Further, it requires cross-referencing within footnotes to enable financial statement users to locate

important information about derivative instruments. FAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. The adoption of this standard is not expected to have a material effect on the Corporation s results of operations or financial position.

In May 2008, the FASB issued FAS No. 162, The Hierarchy of Generally Accepted Accounting Principles. This statement identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of nongovernmental entities that are presented in conformity with generally accepted accounting principles in the United States. The statement is effective 60 days following the Securities and Exchange Commission s approval of the Public Company Accounting Oversight Board amendments to AU Section 411, The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles. The adoption of this standard is not expected to have a material effect on the Corporation s results of operations or financial position.

In June 2008, the FASB ratified Staff Position No. EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities. This standard addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing earnings per share under the two-class method described in paragraphs 60 and 61 of FASB Statement No. 128, Earnings Per Share. This standard is effective for financial statements issued for fiscal years beginning after December 15, 2008 and interim periods within those years. The adoption of this standard is not expected to have a material effect on the Corporation s basic or diluted earnings per share.

In October 2008, the FASB issued FSP No. 157-3, Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active. This FSP clarifies the application of FAS No. 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. This FSP shall be effective upon issuance, including prior periods for which financial statements have not been issued. Revisions resulting from a change in the valuation technique or its application shall be accounted for as a change in accounting estimate. The disclosure provisions of FAS No. 154, Accounting Changes and Error Corrections, are not required for revisions resulting from a change in valuation technique or its application. The adoption of this standard is not expected to have a material effect on the Corporation s results of operations or financial position.

RECLASSIFICATIONS

Certain prior year amounts have been reclassified for comparative purposes.

ITEM 2

MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS

The following discussion and analysis of the consolidated financial statements of CNB Financial Corporation (the Corporation) is presented to provide insight into management s assessment of financial results. The Corporation s subsidiary CNB Bank (the Bank) provides financial services to individuals and businesses within the Bank s market area which is primarily made up of the west central Pennsylvania counties of Cambria, Clearfield, Centre, Elk, Jefferson and McKean. During 2005 the Bank entered the northwestern Pennsylvania county of Erie and began doing business as ERIEBANK. The Bank is subject to regulation, supervision and examination by the Pennsylvania State Department of Banking as well as the Federal Deposit Insurance Corporation. The financial condition and results of operations are not intended to be indicative of future performance. One of the Corporation s subsidiaries, CNB Securities Corporation, is incorporated in Delaware and currently maintains investments in debt and equity securities. County Reinsurance Company, also a subsidiary, is a Corporation of Arizona, and provides credit life and disability for customers of CNB Bank. CNB Insurance Agency, incorporated in Pennsylvania, provides for the sale

of nonproprietary annuities and other insurance products. Finally, Holiday Financial Services Corporation (Holiday) was formed in 2005 to facilitate the Corporation s entry into the consumer discount loan and finance business. Management s discussion and analysis should be read in conjunction with the consolidated financial statements and related notes.

Risk identification and management are essential elements for the successful management of the Corporation. In the normal course of business, the Corporation is subject to various types of risk, including interest rate, credit, and liquidity risk. These risks are controlled through policies and procedures established throughout the Corporation.

Interest rate risk is the sensitivity of net interest income and the market value of financial instruments to the direction and frequency of changes in interest rates. Interest rate risk results from various repricing frequencies and the maturity structure of the financial instruments owned by the Corporation. The Corporation uses its asset/liability management policy and systems to control, monitor and manage interest rate risk.

Credit risk represents the possibility that a customer may not perform in accordance to contractual terms. Credit risk results from loans with customers and the purchase of securities. The Corporation s primary credit risk is in the loan portfolio. The Corporation manages credit risk by following an established credit policy and through a disciplined evaluation of the adequacy of the allowance for loan losses. Also, the investment policy limits the amount of credit risk that may be taken in the securities portfolio.

Liquidity risk represents the inability to generate or otherwise obtain funds at reasonable rates to satisfy commitments to borrowers and obligations to depositors. The Corporation has established guidelines within its asset liability management policy to manage liquidity risk. These guidelines include contingent funding alternatives.

GENERAL OVERVIEW

During 2005, the Bank established a loan production office in Erie, Pennsylvania in order to begin offering commercial loan service to businesses located within Erie and Erie County. Management operated from temporary store locations during 2005 and 2006 and in the third quarter of 2007 opened its first new full service financial services store in Erie s west side. Another store was opened in the fourth quarter of 2007. We recently completed a third store which will serve as our ERIEBANK division headquarters, and a fourth store is under construction with completion scheduled for the fourth quarter of 2008. During the third quarter of 2008, the Corporation established a loan production office in Meadville, Pennsylvania as part of the expansion of its ERIEBANK franchise. Management believes that our ERIEBANK division, along with our traditional CNB Bank market areas, should provide the Bank with sustained loan and deposit growth during the remainder of 2008.

In the fourth quarter of 2005, the Corporation formed a new subsidiary and entered the consumer discount loan and finance business as Holiday Financial Services Corporation. In 2006, we opened three new offices in the communities of Hollidaysburg, Northern Cambria and Clearfield, Pennsylvania. Three additional offices in the communities of Bellefonte, Ridgway and Bradford, Pennsylvania were opened in 2007. In the second quarter of 2008, the Corporation opened another office which will service our ERIEBANK market area, bringing our total to eight. Although the consumer discount loan business is relatively new to the Corporation, management is making the necessary investments in experienced personnel and technology which we believe will facilitate the growth of Holiday Financial Services into a successful and profitable subsidiary of the corporation.

While non-interest costs are expected to increase with the growth of the Corporation s banking and consumer discount loan franchises, these new ventures will continue to provide growth in earning assets as well as enhanced non-interest income which we believe will more than offset these costs in 2008 and beyond. As such, the Corporation made the necessary investments in infrastructure and personnel over the past two years knowing that earnings were reduced in the near term due to costs increasing faster than related revenues.

The interest rate environment will continue to play an important role in the future earnings of the Corporation. Our net interest margin remained strong during the first nine months of 2008. Actions of the Federal Reserve during the first and third quarters of 2008 have resulted in decreases in short term interest rates and the shift to a more normalized yield curve which has benefited the Corporation primarily by reducing its cost of funds. Management will closely monitor our net interest margin throughout the remainder of 2008, as well as continue to apply a disciplined approach to managing our balance sheet, as the majority of the earnings of the Corporation continue to be derived from interest income. Due to our continued growth, non-interest income should be enhanced in several areas including service charges and fees as well as improved wealth management income. While our business plan continues to focus on commercial lending, we now offer a full service approach to servicing the needs of high net worth individuals through our Private Banking groups in both our CNB Bank and ERIEBANK franchises.

Management concentrates on return on average equity and earnings per share evaluations, plus other methods to measure and direct the performance of the Corporation. While past results are not an indication of future earnings, we feel the Corporation is well positioned to enhance core earnings through the remainder of 2008.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents totaled $68.6 million at September 30, 2008 compared to $26.6 million at December 31, 2007. The increase was primarily the result of deposit growth which exceeded loan growth by $76.7 million during the first nine months of 2008. Management elected to invest a significant portion of the cash generated from this deposit growth in federal fund accounts and other short-term cash accounts in order to meet liquidity needs. Management expects to maintain higher than normal levels of cash and cash equivalents throughout the remainder of 2008.

Management believes the liquidity needs of the Corporation are satisfied by the current balance of cash and cash equivalents, readily available access to traditional funding sources, and the portion of the investment and loan portfolios that mature within one year. These sources of funds will enable the Corporation to meet cash obligations and off-balance sheet commitments as they come due.

SECURITIES

Securities increased $31.2 million or 19.2% since December 31, 2007. The increase is primarily the result of purchases of structured collateralized mortgage obligations from excess deposit growth not reinvested in loans. Most structured collateralized mortgage obligations that have been acquired during the first nine months of 2008 were issued by government sponsored entities.

Effective January 1, 2008, the Corporation adopted FASB Statement No. 159, T*he Fair Value Option for Financial Assets and Financial Liabilities* for its investment in perpetual preferred equity securities issued by the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac) as well as its investment in all other equity securities that are traded on a national stock exchange. The effect of adopting Statement No. 159 was to reduce retained earnings by $515 thousand at January 1, 2008. In addition, fair value changes included in earnings for the three and nine months ended September 30, 2008 were ($1,032,000) and ($2,057,000) for unrealized losses and ($348,000) and ($602,000) for realized losses on sales.

The Corporation holds a $2.0 million subordinated corporate bond issued by Lehman Brothers Holdings (Lehman). On September 15, 2008, Lehman declared bankruptcy resulting in a significant decline in the market value of the Lehman bond below cost. Management of the Corporation has deemed the decline to be other-than-temporary and, accordingly, recognized a charge to earnings of $2.0 million or $1.3 million, net of tax.

The Corporation holds 38,734 shares of Series F preferred stock issued by Fannie Mae and 30,000 shares of Series Q preferred stock issued by Freddie Mac. On September 7, 2008, the U.S. Treasury Department and the Federal Housing Finance Agency announced a plan to place Fannie Mae and Freddie Mac under conservatorship. As of June 30, 2008, the Corporation s current holdings in Fannie Mae and Freddie Mac had a combined fair value of approximately $1.9 million. Due to the significant decline in the fair value of these securities from June 30, 2008 to September 30, 2008, the Corporation recognized a charge to earnings of approximately $1.7 million or $1.1 million, net of tax, for the quarter ended September 30, 2008.

The Corporation generally buys into the market over time and does not attempt to time its transactions. In doing this, the highs and lows of the market are averaged into the portfolio and minimize the overall effect of different rate environments. Management monitors the earnings performance and the effectiveness of the liquidity of the securities portfolio on a regular basis through Asset/Liability Committee (ALCO) meetings. The ALCO also reviews and manages interest rate risk for the Corporation. Through active balance sheet management and analysis of the securities portfolio, the Corporation maintains sufficient liquidity to satisfy depositor requirements and various credit needs of its customers.

LOANS

The Corporation experienced an increase in loan demand during the first nine months of 2008. The Corporation s lending is primarily focused on the northwest and west central Pennsylvania markets and consists principally of commercial lending primarily to locally owned small businesses and retail lending which includes single-family residential mortgages and other consumer lending. Management continues to focus growth initiatives on commercial lending which it views as a competitive advantage.

At September 30, 2008, the Corporation had $671.2 million in loans outstanding, net of unearned discount, an increase of $71.5 million (or 11.9%) since December 31, 2007. The Corporation ran a successful home equity loan promotion during 2008, which was the primary reason for the growth in residential mortgages of $28.4 million or 16.1%. In addition, the Corporation experienced growth in commercial, industrial and agricultural loans as a result of new business relationships that were developed in both the Corporation s traditional market area and its ERIEBANK market area. The growth in consumer and other loans was primarily driven by the expansion of customer relationships in the markets served by Holiday Financial Services Corporation. Management expects negligible loan demand throughout the remainder of 2008 as a result of the softening of the economy in the Corporation s geographic area.

ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses is established by provisions for losses in the loan portfolio as well as overdrafts in deposit accounts. These provisions are charged against current income. Loans and overdrafts deemed not collectible are charged-off against the allowance while any subsequent collections are recorded as recoveries and increase the allowance.

Table of Contents

The table below shows activity within the allowance account (in thousands):

	Nine months ending September 30, 2008	Year ending December 31, 2007	Nine months ending September 30, 2007
