OVERVIEW

This Quarterly Report on Form 10-Q should be read in conjunction with Citigroup's Annual Report on Form 10-K for the year ended December 31, 2015 filed with the U.S. Securities and Exchange Commission (SEC) on February 26, 2016 (2015 Annual Report on Form 10-K). Additional information about Citigroup is available on Citi's website at www.citigroup.com. Citigroup's recent annual reports on Form 10-K, quarterly reports on Form 10-Q, proxy statements, as well as other filings with the SEC, are available free of charge through Citi's website by clicking on the "Investors" page and selecting "All SEC Filings." The SEC's website also contains current reports, information statements, and other information regarding Citi at www.sec.gov.

Certain reclassifications, including a realignment of certain businesses, have been made to the prior periods' financial statements to conform to the current period's presentation. For additional information on certain recent reclassifications, see Notes 1 and 3 to the Consolidated Financial Statements and Citi's Current Report on Form 8-K furnished to the SEC on April 11, 2016.

Throughout this report, "Citigroup," "Citi" and "the Company" refer to Citigroup Inc. and its consolidated subsidiaries.

Citigroup is managed pursuant to the following segments:

The following are the four regions in which Citigroup operates. The regional results are fully reflected in the segment results above.

(1) For reporting purposes, Asia GCB includes the results of operations of EMEA GCB for all periods presented.

(2) North America includes the U.S., Canada and Puerto Rico, Latin America includes Mexico and Asia includes Japan.

3

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

EXECUTIVE SUMMARY

Citi's first quarter of 2016 results of operations reflected a challenging macro environment characterized by market volatility and continued uncertainties. While these issues somewhat abated during the latter part of the quarter, the overall environment during the quarter drove year-over-year revenue declines in Citi's market sensitive businesses, primarily its markets and investment banking businesses in the Institutional Clients Group (ICG) as well as its wealth management business in Asia Global Consumer Banking (GCB). Due in part to this environment, Citi announced additional repositioning actions during the quarter, incurring a charge of roughly \$400 million in Citicorp to further streamline operations and reduce capacity in certain areas while maintaining its client-facing capabilities.

As described further in this Executive Summary, despite the challenging environment during the quarter, Citi showed continued progress in several areas. In North America GCB, Citi's ongoing investments in Citi-branded cards drove growth in average loans and purchase sales, and the accrual and transaction businesses in ICG - treasury and trade solutions, corporate lending, private bank and securities services - exhibited continued growth in the aggregate. In Citicorp, loans increased 5% and deposits increased 6% while Citi's overall balance sheet decreased by 1% (each excluding the impact of foreign currency translation into U.S. dollars for reporting purposes (FX translation)). Citi utilized approximately \$1.6 billion in deferred tax assets (DTAs) (for additional information, see "Income Taxes" below), which contributed to a net increase of \$6 billion of regulatory capital during the quarter and Citi's Common Equity Tier 1 Capital ratio, on a fully implemented basis, of 12.3% as of March 31, 2016. In addition, despite the higher repositioning charge during the quarter, Citigroup's expenses declined by 3% overall.

As noted above, while the macro and market environment somewhat stabilized during the latter part of the first quarter of 2016, Citi expects the operating environment to continue to be challenging, as many risks and uncertainties remain. For a more detailed discussion of these risks and uncertainties, see each respective business' results of operations, "Managing Global Risk" and "Forward-Looking Statements" below as well as the "Risk Factors" section in Citi's 2015 Annual Report on Form 10-K.

First Quarter 2016 Summary Results

Citigroup

Citigroup reported net income of \$3.5 billion, or \$1.10 per share, compared to \$4.8 billion, or \$1.51 per share, in the prior-year period. Results in the first quarter of 2015 included negative \$73 million (negative \$47 million after-tax) of CVA/DVA.

Excluding the impact of CVA/DVA in the prior-year period (for information on Citi's adoption in the first quarter of 2016 of a new accounting standard relating to the reporting

of CVA/DVA, see Notes 1 and 22 to the Consolidated Financial Statements), Citigroup also reported net income of \$3.5 billion in the first quarter of 2016, or \$1.10 per share, compared to \$4.8 billion, or \$1.52 per share, in the prior-year period. (Citi's results of operations excluding the impact of CVA/DVA are non-GAAP financial measures.) The 27% decrease from the prior-year period was primarily driven by lower revenues and a higher cost of credit, partially offset by lower expenses.

Citi's revenues were \$17.6 billion in the first quarter of 2016, a decrease of 11% from the prior-year period. Excluding CVA/DVA in the first quarter of 2015, revenues were also down 11% from the prior-year period, as Citicorp revenues decreased 9% and Citi Holdings revenues decreased 31%. Excluding CVA/DVA in the first quarter of 2015 and the impact of FX translation (which lowered revenues by approximately \$600 million in the first quarter of 2016

compared to the prior- year period), Citigroup revenues decreased 9% from the prior-year period, driven by a 6% decrease in Citicorp revenues and a 29% decrease in Citi Holdings' revenues. (Citi's results of operations excluding the impact of FX translation are non-GAAP financial measures.)

Expenses

Citigroup expenses decreased 3% versus the prior-year period as lower expenses in Citi Holdings, lower legal and related expenses and the impact of FX translation were partially offset by the higher repositioning costs and ongoing investments in Citicorp. Citigroup expenses in the first quarter of 2016 included legal and related expenses of \$166 million, compared to \$388 million in the prior-year period and \$491 million of repositioning costs, compared to \$16 million in the prior-year period. FX translation lowered expenses by approximately \$377 million in the first quarter of 2016 compared to the prior-year period.

Citicorp expenses increased 2% driven by the higher repositioning costs, which Citi expects will yield expense savings in future periods, and ongoing investments in the franchise, partially offset by efficiency savings and the impact of FX translation. Citicorp expenses in the first quarter of 2016 included legal and related expenses of \$226 million, compared to \$317 million in the prior-year period, and \$394 million of repositioning costs, compared to \$4 million in the prior-year period.

Citi Holdings' expenses were \$828 million, down 40% from the prior-year period, primarily driven by the ongoing decline in Citi Holdings assets as well as lower legal and related expenses, partially offset by higher repositioning costs.

Credit Costs

Citi's total provisions for credit losses and for benefits and claims of \$2.0 billion increased 7% from the prior-year period, as a net loan loss reserve build was partially offset by lower net credit losses.

Net credit losses of \$1.7 billion declined 12% versus the prior-year period. Consumer net credit losses declined 23% to

\$1.5 billion, mostly reflecting continued improvements in North America Citi-branded cards in Citicorp as well as the improvement in the North America mortgage portfolio and ongoing divestiture activity within Citi Holdings. Corporate net credit losses increased \$218 million to \$211 million, primarily related to the continued deterioration in the energy and energy-related portfolio (for additional information, see “Institutional Clients Group” and “Credit Risk—Corporate Credit” below).

The net build of allowance for loan losses and unfunded lending commitments was \$233 million in the first quarter of 2016, compared to a \$239 million release in the prior-year period. Citicorp’s net reserve build was \$266 million, compared to a net loan loss reserve release of \$62 million in the prior-year period. The build in the first quarter of 2016 was primarily driven by net loan loss reserve builds in ICG, including approximately \$260 million for energy and energy-related exposures. Outside of the energy-related sectors, Citi’s credit quality largely remained stable during the quarter. The allowance for loan losses attributable to energy and energy-related loans in ICG represented 4.2% of funded exposures as of the first quarter of 2016.

Citi Holdings’ net reserve release decreased \$144 million from the prior-year period to \$33 million, primarily reflecting the impact of asset sales.

For additional information on Citi’s consumer and corporate credit costs and allowance for loan losses, see “Credit Risk” below.

Capital

As noted above, Citi continued to grow its regulatory capital during the first quarter of 2016, even as it returned approximately \$1.5 billion of capital to its shareholders in the form of common stock repurchases and dividends. Citigroup’s Tier 1 Capital and Common Equity Tier 1 Capital ratios, on a fully implemented basis, were 13.8% and 12.3% as of March 31, 2016, respectively, compared to 12.1% and 11.1% as of March 31, 2015 (all based on the Basel III Advanced Approaches for determining risk-weighted assets). Citigroup’s Supplementary Leverage ratio as of March 31, 2016, on a fully implemented basis, was 7.4%, compared to 6.4% as of March 31, 2015. For additional information on Citi’s capital ratios and related components, including the impact of Citi’s DTAs on its capital ratios, see “Capital Resources” below.

Citicorp

Citicorp net income decreased 32% from the prior-year period to \$3.2 billion. CVA/DVA, recorded in ICG, was negative \$69 million (negative \$44 million after-tax) in first quarter of 2015 (for a summary of CVA/DVA by business within ICG, see “Institutional Clients Group” below). Excluding CVA/DVA in the first quarter of 2015, Citicorp’s net income also decreased 32% from the prior-year period, primarily driven by the lower revenues, higher expenses and higher cost of credit.

Citicorp revenues decreased 9% from the prior-year period to \$16.1 billion. Excluding CVA/DVA in the first quarter of 2015, Citicorp revenues also decreased 9% from the prior-year period, reflecting a 12% decrease in ICG revenues and a 6% decrease in GCB revenues. As referenced above,

excluding CVA/DVA in the prior-year period and the impact of FX translation, Citicorp’s revenues decreased 6%, mostly driven by the decline in revenues in Citi’s market sensitive businesses and the impact of continued investments in Citi-branded cards, each as referred to above.

GCB revenues of \$7.8 billion decreased 6% versus the prior-year period. Excluding the impact of FX translation, GCB revenues decreased 3%, as decreases in North America GCB and Asia GCB were partially offset by an increase in Latin America GCB. North America GCB revenues decreased 4% to \$4.9 billion, as lower revenues in Citi-branded cards and retail banking were partially offset by higher revenues in Citi retail services. Citi-branded cards revenues of \$1.9 billion were down 6% versus the prior-year period, reflecting continued increased acquisition and rewards costs as investments in business growth continued, partially offset by the impact of growth in average loans and purchase sales. Citi retail services revenues of \$1.7 billion increased 3% versus the prior-year period, primarily driven by gains on the sale of two small cards portfolios. Retail banking revenues decreased 8% from the prior-year period to \$1.3 billion. Excluding the previously-disclosed \$110 million gain on the sale of branches in Texas in the prior-year period,

retail banking revenues were largely unchanged as continued growth in loans and checking deposits as well as improved deposit spreads were offset by lower mortgage gain on sale revenues.

North America GCB average deposits of \$181 billion were largely unchanged year-over-year and average retail banking loans of \$53 billion grew 11%. Average branded card loans of \$65 billion increased 1%, while branded card purchase sales of \$46 billion increased 12% versus the prior-year period. Average retail services loans of \$44 billion were largely unchanged, while retail services purchase sales of \$17 billion increased 2% versus the prior-year period. For additional information on the results of operations of North America GCB for the first quarter of 2016, see “Global Consumer Banking- North America GCB” below.

International GCB revenues (consisting of Latin America GCB and Asia GCB (which includes EMEA GCB for reporting purposes)) decreased 11% versus the prior-year period to \$2.9 billion. Excluding the impact of FX translation, international GCB revenues decreased 2% versus the prior-year period. Latin America GCB revenues increased 2% versus the prior-year period, as the impact of growth in retail banking loans, deposits and card purchase sales was partially offset by continued declines in card balances. Asia GCB revenues declined 4% versus the prior-year period, driven by lower investment sales revenues reflecting the weak market sentiment as well as continued regulatory pressure in cards, partially offset by volume growth. For additional information on the results of operations of Latin America GCB and Asia GCB for the first quarter of 2016, including the impact of FX translation, see “Global Consumer Banking” below. Year-over-year, international GCB average deposits of \$115 billion increased 5%, average retail loans of \$87 billion increased 1%, investment sales of \$12 billion decreased 38%, average card loans of \$23 billion increased 2% and card purchase sales of \$22 billion increased 4%, all excluding the impact of FX translation.

ICG revenues were \$8.0 billion in the first quarter of 2016, down 11% from the prior-year period. Excluding CVA/DVA in the first quarter of 2015, ICG revenues decreased 12% driven by a 15% decrease in Markets and securities services revenues and a 9% decrease in Banking revenues.

Banking revenues of \$4.0 billion (excluding CVA/DVA in the first quarter of 2015 and the impact of mark-to-market gains on hedges related to accrual loans within corporate lending (see below)) decreased 6%, compared to the prior-year period, driven by lower industry-wide investment banking activity partially offset by growth in treasury and trade solutions and the private bank. Investment banking revenues of \$875 million decreased 27% versus the prior-year period. Advisory revenues decreased 23% to \$227 million versus strong performance in the prior-year period. Debt underwriting revenues decreased 22% to \$530 million and equity underwriting revenues decreased 49% to \$118 million, largely driven by the industry-wide slowdown in activity levels during the quarter.

Private bank revenues (excluding CVA/DVA in the first quarter of 2015) increased 5% to \$746 million from the prior-year period, primarily driven by higher loan and deposit balances. Corporate lending revenues decreased 26% to \$389 million, including \$66 million of mark-to-market losses on hedges related to accrual loans, compared to a \$52 million gain in the prior-year period. Excluding the impact of FX translation and the mark-to-market impact of loan hedges, corporate lending revenues decreased 2% versus the prior-year period, primarily driven by the absence of positive mark-to-market adjustments, partially offset by continued growth in average loans. Treasury and trade solutions revenues of \$2.0 billion increased 3% from the prior-year period. Excluding the impact of FX translation, treasury and trade solutions revenues increased 8%, as continued growth in transaction volumes and increased spreads were partially offset by lower trade revenues.

Markets and securities services revenues of \$4.1 billion (excluding CVA/DVA in the first quarter of 2015) decreased 15% from the prior-year period. Fixed income markets revenues of \$3.1 billion (excluding CVA/DVA in the first quarter of 2015) decreased 11% from the prior-year period, reflecting lower activity levels and a less favorable environment in securitized products and commodities, partially offset by growth in rates and currencies. Equity markets revenues of \$706 million (excluding CVA/DVA in the first quarter of 2015) decreased 19% versus the prior-year period, reflecting the impact of lower volumes in cash equities as well as weaker performance in derivatives. Securities services revenues of \$562 million increased 3% versus the prior-year period, largely reflecting a gain on sale, partially offset by the impact of FX translation. For additional information on the results of operations of ICG for the first quarter of 2016, see “Institutional Clients Group” below.

Corporate/Other revenues were \$274 million, up 29% from the prior-year period, mostly reflecting higher investment income. For additional information on the results of operations of Corporate/Other for the first quarter of 2016, see “Corporate/Other” below.

Citicorp end-of-period loans increased 4% to \$573 billion from the prior-year period, driven by a 6% increase in corporate loans and a 1% increase in consumer loans. Excluding the impact of FX translation, Citicorp loans grew 5%, with 7% growth in corporate loans and 2% growth in consumer loans.

Citi Holdings

Citi Holdings’ net income was \$346 million in the first quarter of 2016, compared to net income of \$149 million in the prior-year period. CVA/DVA was negative \$4 million (negative \$3 million after-tax) in the first quarter of 2015. Excluding the impact of CVA/DVA in the prior-year period, Citi Holdings’ net income was \$346 million, compared to \$152 million in the prior-year period, primarily reflecting lower expenses and lower credit costs, partially offset by lower revenues.

Citi Holdings’ revenues were \$1.5 billion down 31% from the prior-year period. Excluding CVA/DVA in the first quarter of 2015, Citi Holdings’ revenues also decreased 31% from the prior-year period, primarily driven by the overall wind-down of the portfolio, partially offset by a net gain on asset sales. For additional information on the results of operations of Citi Holdings for the first quarter of 2016, see “Citi Holdings” below.

At the end of the current quarter, Citi Holdings’ assets were \$73 billion, 44% below the prior-year period, and represented approximately 4% of Citi’s total GAAP assets. Citi Holdings’ risk-weighted assets were \$130 billion as of March 31, 2016, a decrease of 29% from the prior-year period, and represented 11% of Citi’s risk-weighted assets

under Basel III (based on the Advanced Approaches for determining risk-weighted assets).

The supplemental information presented in the table above reflects Citigroup's consolidated GAAP balance sheet by reporting segment as of March 31, 2016. The respective segment information depicts the assets and liabilities managed by each segment as of such date. While this presentation is not defined by GAAP, Citi believes that these non-GAAP financial measures enhance investors' understanding of the balance sheet components managed by the underlying business segments, as well as the beneficial inter-relationships of the asset and liability dynamics of the balance sheet components among Citi's business segments.

(1) Consolidating eliminations for total Citigroup and Citigroup parent company assets and liabilities are recorded within the Corporate/Other segment.

(2) The total stockholders' equity and the majority of long-term debt of Citigroup reside in the Citigroup parent company Consolidated Balance Sheet. Citigroup allocates stockholders' equity and long-term debt to its businesses through inter-segment allocations as shown above.

(3)

Represents the attribution of Citigroup's liquidity assets (primarily consisting of cash and available-for-sale securities) to the various businesses based on Liquidity Coverage Ratio (LCR) assumptions.

CITICORP

Citicorp is Citigroup's global bank for consumers and businesses and represents Citi's core franchises. Citicorp is focused on providing best-in-class products and services to customers and leveraging Citigroup's unparalleled global network, including many of the world's emerging economies. Citicorp is physically present in approximately 100 countries, many for over 100 years, and offers services in over 160 countries and jurisdictions. Citi believes this global network provides a strong foundation for servicing the broad financial services needs of its large multinational clients and for meeting the needs of retail, private banking, commercial, public sector and institutional clients around the world.

Citicorp consists of the following operating businesses: Global Consumer Banking (which consists of consumer banking businesses in North America, EMEA, Latin America and Asia) and Institutional Clients Group (which includes Banking and Markets and securities services). Citicorp also includes Corporate/Other. At March 31, 2016, Citicorp had approximately \$1.7 trillion of assets and \$925 billion of deposits, representing approximately 96% of Citi's total assets and 99% of Citi's total deposits.

As previously announced, Citi's consumer businesses in Argentina, Brazil and Colombia, which previously were reported as part of Latin America GCB, are reported as part of Citi Holdings for all periods as of the first quarter of 2016. In addition, Citi's consumer businesses in Venezuela and remaining indirect investment in Banco de Chile, also previously reported as part of Latin America GCB, are reported as part of ICG for all periods as of the first quarter of 2016. For additional information, see "Citicorp" in Citi's 2015 Annual Report on Form 10-K.

GLOBAL CONSUMER BANKING

Global Consumer Banking (GCB) consists of Citigroup's four geographical consumer banking businesses that provide traditional banking services to retail customers through retail banking, including commercial banking, and Citi-branded cards and Citi retail services (for additional information on these businesses, see "Citigroup Segments" above). GCB is focused on its priority markets of the U.S., Mexico and Asia with 2,703 branches in 19 countries as of March 31, 2016. At March 31, 2016, GCB had approximately \$385 billion of assets and \$303 billion of deposits.

GCB's overall strategy is to leverage Citi's global footprint and seek to be the preeminent bank for the emerging affluent and affluent consumers in large urban centers. In credit cards and in certain retail markets, Citi serves customers in a somewhat broader set of segments and geographies.

NORTH AMERICA GCB

North America GCB provides traditional retail banking, including commercial banking, and its Citi-branded cards and Citi retail services card products to retail customers and small to mid-size businesses, as applicable, in the U.S. North America GCB's U.S. cards product portfolio includes its proprietary portfolio (including the Citi Double Cash, Thank You and Value cards) and co-branded cards (including, among others, American Airlines and Hilton Worldwide) within Citi-branded cards as well as its co-brand and private label relationships within Citi retail services.

As of March 31, 2016, North America GCB's 729 retail bank branches are concentrated in the six key metropolitan areas of New York, Chicago, Miami, Washington, D.C., Los Angeles and San Francisco. Also as of March 31, 2016, North America GCB had approximately 10.8 million retail banking customer accounts, \$53.5 billion of retail banking loans and \$183.7 billion of deposits. In addition, North America GCB had approximately 111.9 million Citi-branded and Citi retail services credit card accounts, with \$107.4 billion in outstanding card loan balances.

1Q16 vs. 1Q15

Net income decreased by 25% due to lower revenues, higher expenses and a net loan loss reserve build, partially offset by lower net credit losses.

Revenues decreased 4%, reflecting lower revenues in retail banking and Citi-branded cards, partially offset by higher revenues in Citi retail services.

Retail banking revenues decreased 8%. Excluding the previously-disclosed \$110 million gain on sale of branches in Texas in the prior-year period, revenues were largely unchanged as continued growth in average loans (11%), average checking deposits (6%) and deposit spreads were offset by lower mortgage gain on sale revenues largely reflecting lower mortgage refinance activity and lower margins. Consistent with GCB's strategy, North America GCB closed or sold 51 branches during the current quarter (a 7% decline from year-end 2015).

Cards revenues decreased 2%. In Citi-branded cards, revenues decreased 6%, primarily reflecting the continued increased acquisition and rewards costs as well as the continued impact of high customer payment rates. The continued investment spending in Citi-branded cards has resulted, in part, in growth in average active accounts (4%), average loans (1%) and purchase sales (12%).

Citi retail services revenues increased 3% due to gains on sales of two small cards portfolios, partially offset by higher contractual partner payments. Purchase sales increased 2% while average loans were largely unchanged, despite the impact of the card portfolio sales.

Expenses increased 7%, primarily due to higher repositioning charges and the continued investment spending (including marketing, among other areas), higher volume-related expenses and higher regulatory and compliance costs, partially offset by ongoing cost reduction initiatives, including as a result of the branch rationalization strategy. Provisions increased 17%, largely due to a net loan loss reserve build (approximately \$80 million), compared to a loan loss reserve release in the prior-year period, partially offset by lower net credit losses (3%). The decline in net credit losses was primarily due to Citi-branded cards (down 8% to \$455 million). The net loan loss reserve build was driven by energy and energy-related exposures in the commercial banking portfolio within retail banking. (For additional information on Citi's energy and energy-related exposures within commercial banking within GCB, see "Credit Risk—Commercial Credit"

below.)

North America GCB continues to expect to make additional investments in its U.S. cards businesses during the remainder of 2016, including investments in connection with Citi's planned acquisition of the Costco portfolio, the closing of which is currently expected to occur in June 2016, as well as the impact of renewing certain important partnership programs in a competitive environment (see also "Risk Factors—Operational Risks" in Citi's 2015 Annual Report on Form 10-K). While North America GCB believes these investments are necessary for the growth of its U.S. cards businesses, they will continue to reduce the pretax earnings of the businesses during the remainder of 2016.

LATIN AMERICA GCB

Latin America GCB provides traditional retail banking, including commercial banking, and its Citi-branded card products to retail customers and small to mid-size businesses in Mexico through Banco Nacional de Mexico, or Banamex, Mexico's second-largest bank.

At March 31, 2016, Latin America GCB had 1,493 retail branches, with approximately 27.9 million retail banking customer accounts, \$20.1 billion in retail banking loans and \$28.3 billion in deposits. In addition, the business had approximately 5.6 million Citi-branded card accounts with \$5.3 billion in outstanding loan balances. As discussed above, Citi's consumer businesses in Argentina, Brazil and Colombia are reported as part of Citi Holdings for all periods as of the first quarter of 2016.

- (2) Presentation of this metric excluding FX translation is a non-GAAP financial measure.

NM Not Meaningful

The discussion of the results of operations for Latin America GCB below excludes the impact of FX translation for all periods presented. Presentations of the results of operations, excluding the impact of FX translation, are non-GAAP financial measures. For a reconciliation of certain of these metrics to the reported results, see the table above.

1Q16 vs. 1Q15

Net income decreased 5% as higher expenses and a net loan loss reserve build were partially offset by higher revenues and lower net credit losses.

Revenues increased 2%, primarily due to volume growth in retail banking and cards purchase sales, partially offset by lower revenues from business divestitures as well as continued declines in card balances. Revenues were also impacted by continued slow economic growth in Mexico.

Retail banking revenues increased 5%, primarily due to the volume growth, including an increase in average loans (9%), average deposits (11%) and deposit spreads, partially offset by a decline in loan spreads. Cards revenues decreased 4%, driven by continued higher payment rates resulting from the business' focus on higher credit quality customers which also drove a decline in average loans (3%). These declines were partially offset by growth in purchase sales (7%). Latin America GCB expects the cards payment rates and revenues to continue to remain under pressure during the remainder of 2016.

Expenses increased 1%, primarily due to higher technology investments, volume-related costs, higher repositioning charges and higher compensation expense, partially offset by lower legal and related costs, the impact of business divestitures and ongoing efficiency savings.

Provisions increased 3% as a net loan loss reserve build was partially offset by lower net credit losses. Net credit losses decreased 8%, largely reflecting lower net credit losses incurred in the cards portfolio due the focus on higher credit quality customers. The net loan loss reserve build increased \$27 million, primarily due to lower releases related to the commercial banking portfolio and cards.

ASIA GCB

Asia GCB provides traditional retail banking, including commercial banking, and its Citi-branded card products to retail customers and small to mid-size businesses, as applicable. As of March 31, 2016, Citi's most significant revenues in the region were from Singapore, Hong Kong, Korea, India, Australia, Taiwan, Indonesia, Malaysia, Thailand and the Philippines. In addition, for reporting purposes, Asia GCB includes the results of operations of EMEA GCB, which provides traditional retail banking and Citi-branded card products to retail customers, primarily in Poland, Russia and the United Arab Emirates.

At March 31, 2016, on a combined basis, the businesses had 481 retail branches, approximately 17.2 million retail banking customer accounts, \$68.7 billion in retail banking loans and \$90.7 billion in deposits. In addition, the businesses had approximately 16.6 million Citi-branded card accounts with \$17.6 billion in outstanding loan balances.

NM Not meaningful

The discussion of the results of operations for Asia GCB below excludes the impact of FX translation for all periods presented. Presentations of the results of operations, excluding the impact of FX translation, are non-GAAP financial measures. For a reconciliation of certain of these metrics to the reported results, see the table above.

1Q16 vs. 1Q15

Net income decreased 37% due to lower revenues, higher expenses and higher cost of credit.

Revenues decreased 4%, primarily due to a slowdown in investment sales within the wealth management business reflecting lower customer transaction activity as well as the continued, albeit abating, impact of regulatory changes in cards, partially offset by volume growth.

Retail banking revenues decreased 6%, mainly due to the decline in investment sales revenue, particularly in Singapore, Hong Kong, China, India and Taiwan, reflecting the weaker customer sentiment due to slower economic growth and market volatility during the current quarter. This decline in revenues was partially offset by growth in deposit products (3% increase in average deposits).

Cards revenues decreased 2%, primarily due to spread compression reflecting the ongoing impact of regulatory changes, particularly in Singapore, Taiwan, Malaysia, Indonesia, Hong Kong and Australia. Although cards purchase sales growth slowed during the current quarter (3%) due to the market environment, stabilizing payment rates contributed to continued growth in average loans (4%).

Expenses increased 6%, primarily due to repositioning charges in the current quarter, higher investment spending and compensation expense, partially offset by efficiency savings.

Provisions increased 19%, primarily due to a higher net loan loss reserve release in the prior-year period. Overall credit quality remained stable across the region.

INSTITUTIONAL CLIENTS GROUP

Institutional Clients Group (ICG) provides corporate, institutional, public sector and high-net-worth clients around the world with a full range of wholesale banking products and services, including fixed income and equity sales and trading, foreign exchange, prime brokerage, derivative services, equity and fixed income research, corporate lending, investment banking and advisory services, private banking, cash management, trade finance and securities services. ICG transacts with clients in both cash instruments and derivatives, including fixed income, foreign currency, equity and commodity products.

ICG revenue is generated primarily from fees and spreads associated with these activities. ICG earns fee income for assisting clients in clearing transactions, providing brokerage and investment banking services and other such activities. Revenue generated from these activities is recorded in Commissions and fees and Investment banking. In addition, as a market maker, ICG facilitates transactions, including holding product inventory to meet client demand, and earns the differential between the price at which it buys and sells the products. These price differentials and the unrealized gains and losses on the inventory are recorded in Principal transactions. Other primarily includes mark-to-market gains and losses on credit derivatives, gains and losses on available-for-sale (AFS) securities and other non-recurring gains and losses. Interest income earned on inventory and loans held less interest paid to customers on deposits is recorded as Net interest revenue. Revenue is also generated from transaction processing and assets under custody and administration.

ICG's international presence is supported by trading floors in approximately 80 countries and a proprietary network in over 95 countries and jurisdictions. At March 31, 2016, ICG had approximately \$1.3 trillion of assets and \$607 billion of deposits, while two of its businesses, securities services and issuer services, managed approximately \$14.8 trillion of assets under custody compared to \$15.5 trillion at the end of the prior-year period. The decline in assets under custody from the prior-year period was primarily due to the impact of FX translation and a decline in market volumes.

(1) Excludes CVA/DVA in the first quarter of 2015, consistent with previous presentations. For additional information, see Notes 1 and 22 to the Consolidated Financial Statements.

Hedges on accrual loans reflect the mark-to-market on credit derivatives used to economically hedge the corporate loan accrual portfolio. The fixed premium costs of these hedges are netted against the corporate lending revenues to reflect the cost of credit protection.

First quarter of 2016 includes a charge of approximately \$180 million reflecting the write down of virtually all of Citi's net investment in Venezuela as a result of changes in the exchange rate during the quarter (see "Country Risk" below).

NM Not meaningful

The discussion of the results of operations for ICG below excludes the impact of CVA/DVA for the first quarter of 2015. Presentations of the results of operations, excluding the impact of CVA/DVA and the impact of gains/(losses) on hedges on accrual loans, are non-GAAP financial measures. For a reconciliation of these metrics to the reported results, see the table above.

1Q16 vs. 1Q15

Net income decreased 35%, primarily driven by lower revenues, higher expenses and higher credit costs.

Revenues decreased 12%, reflecting lower revenues in Markets and securities services (decrease of 15%) and lower revenues in Banking (decrease of 9%, decrease of 6% excluding the gains/(losses) on hedges on accrual loans), particularly the market-sensitive businesses of fixed income and equity markets and investment banking. Citi expects revenues in ICG, particularly in its Markets and securities services businesses, will likely continue to reflect the overall market environment.

Within Banking:

Investment banking revenues decreased 27%, largely reflecting an industry-wide slowdown in activity levels, particularly in North America. Advisory revenues decreased 23%, reflecting strong performance in the prior-year period and lower market activity. Equity underwriting revenues decreased 49% driven by the lower market activity and a decline in wallet share resulting from continued share fragmentation. Debt underwriting revenues decreased 22%, primarily due to a 21% decline in market activity.

Treasury and trade solutions revenues increased 3%. Excluding the impact of FX translation, revenues increased 8% as continued growth in deposit balances in EMEA, Asia and Latin America and improved spreads, particularly in North America, were partially offset by continued declines in trade balances and spreads, particularly Asia and EMEA. End-of-period deposit balances increased 8% (also 8% excluding the impact of FX translation), while average trade loans decreased 2% (unchanged excluding the impact of FX translation), as the business maintained origination volumes while reducing lower spread assets and increasing asset sales to optimize returns.

Corporate lending revenues decreased 26%. Excluding the impact of gains/(losses) on hedges on accrual loans, revenues decreased 4%. Excluding the impact of FX translation and gains/(losses) on hedges on accrual loans, revenues decreased 2% as the absence of positive mark-to-market adjustments compared to the prior-year period was partially offset by continued growth in average loan balances.

Private bank revenues increased 5%, reflecting strength in North America and EMEA, primarily due to growth in loan volumes and deposit balances, partially offset by lower capital markets activity, particularly in Asia.

Within Markets and securities services:

Fixed income markets revenues decreased 11%, driven by EMEA, primarily due to lower activity levels and a less favorable environment due to macroeconomic uncertainty. The decrease in revenues resulted from a decline in spread products revenues (credit markets and securitized markets, partially offset by municipals), as well as lower commodities revenues. This decline was partially offset by continued strength in rates and currencies revenues (increase of 5%), particularly during the latter part of the current quarter, due to higher revenues in overall G10 products, partially offset by local markets.

Equity markets revenues decreased 19%, driven by North America, EMEA and Asia, primarily reflecting the impact of lower volumes in cash equities as well as weaker trading performance in derivatives, partially offset by strength in prime finance.

Securities services revenues increased 3%, primarily reflecting a modest gain on sale of a private equity fund services business, partially offset by the impact of FX translation.

Expenses increased 5% as higher legal and related costs and repositioning charges, investment spending and regulatory and compliance costs were partially offset by lower compensation expense and the impact of FX translation.

Provisions increased \$304 million to \$390 million, primarily reflecting net credit losses of \$211 million (negative \$1 million in the prior-year period) and a net loan loss reserve build of \$179 million (\$87 million in the period-year period). This higher cost of credit included approximately \$115 million of net credit losses and an approximately \$260

million net loan loss reserve build related to energy and energy-related exposures, largely due to continued low oil prices in the current quarter as well as the impact of regulatory guidance. (For additional information on Citi's corporate energy and energy-related exposures, see "Credit Risk—Corporate Credit" below.)

Cost of credit in ICG during the remainder of 2016 will largely depend on the price of oil and other commodity prices, any additional potential impact of regulatory guidance as well as macroeconomic conditions. To the extent oil prices remain low, or deteriorate further, ICG expects to incur additional loan loss reserve builds and net credit losses in its corporate energy and energy-related portfolios, which would likely be significant, and Citi's corporate non-accrual loans would be negatively impacted. Such events as well as macroeconomic conditions would also negatively impact Citi's other corporate credit portfolios.

CORPORATE/OTHER

Corporate/Other includes certain unallocated costs of global staff functions (including finance, risk, human resources, legal and compliance), other corporate expenses and unallocated global operations and technology expenses, Corporate Treasury and discontinued operations. At March 31, 2016, Corporate/Other had \$51 billion of assets, or 3% of Citigroup's total assets.

In millions of dollars	First Quarter			%
	2016	2015	Change	
Net interest revenue	\$94	\$(27)		NM

Noncontrolling interests	(8)	10		NM
Net income (loss)	\$(23)	\$(34)	32	%

NM Not meaningful

1Q16 vs. 1Q15

The net loss was \$23 million, compared to a net loss of \$34 million in the prior-year period, largely reflecting lower expenses and higher revenues.

Revenues increased 29%, primarily due to higher investment income.

Expenses decreased 23%, largely driven by lower legal and related expenses and the impact of FX translation, partially offset by higher repositioning charges and higher regulatory and compliance costs.

CITI HOLDINGS

Citi Holdings contains the remaining businesses and portfolios of assets that Citigroup has determined are not central to its core Citicorp businesses. Consistent with this determination, as of the first quarter of 2016, Citi's consumer businesses in Argentina, Brazil and Colombia are reported as part of Citi Holdings for all periods.

As of March 31, 2016, Citi Holdings assets were approximately \$73 billion, a decrease of 44% year-over-year and 10% from December 31, 2015. The decline in assets of \$8 billion from December 31, 2015 primarily consisted of divestitures and run-off. As of March 31, 2016, Citi had signed agreements to reduce Citi Holdings GAAP assets by an additional \$10 billion, the significant majority of which are expected to be completed during the remainder of 2016, subject to regulatory approvals and other closing conditions.

Also as of March 31, 2016, consumer assets in Citi Holdings were approximately \$62 billion, or approximately 85% of Citi Holdings assets. Of the consumer assets, approximately \$36 billion, or 58%, consisted of North America mortgages (residential first mortgages and home equity loans). As of March 31, 2016, Citi Holdings represented approximately 4% of Citi's GAAP assets and 11% of its risk-weighted assets under Basel III (based on the Advanced Approaches for determining risk-weighted assets).

⁽¹⁾ Excludes CVA/DVA in the first quarter of 2015, consistent with previous presentations. For additional information, see Notes 1 and 22 to the Consolidated Financial Statements.

NM Not meaningful

The discussion of the results of operations for Citi Holdings below excludes the impact of CVA/DVA for the first quarter of 2015. Presentations of the results of operations, excluding the impact of CVA/DVA, are non-GAAP financial measures. For a reconciliation of these metrics to the reported results, see the table above.

1Q16 vs. 1Q15

Net income was \$346 million, compared to \$152 million in the prior-year period, primarily due to lower expenses and lower net credit losses, partially offset by lower revenues and a lower net loan loss reserve release. Given the significant asset sales and declines in overall Citi Holdings' assets to date, as well as the higher level of net gains from asset sales in the current quarter (see below), Citi Holdings does not expect to generate the same level of net income as in the current quarter and expects to largely "break even" during the remainder of 2016.

Revenues decreased 31%, primarily driven by the overall wind-down of the portfolio, partially offset by higher net gains on asset sales in the current quarter.

Expenses declined 40%, primarily due to the ongoing decline in assets and lower legal and related costs, partially offset by higher repositioning costs.

Provisions decreased 63%, driven by lower net credit losses, partially offset by a lower net loss reserve release. Net credit losses declined 70%, primarily due to overall lower asset levels as well as continued improvements in North America mortgages. The net reserve release decreased 81% to \$33 million, primarily due to the impact of asset sales.

OFF-BALANCE SHEET ARRANGEMENTS

The table below shows where a discussion of Citi's various off-balance sheet arrangements may be found in this Form 10-Q. For additional information on Citi's off-balance sheet arrangements, see "Off-Balance Sheet Arrangements" and Notes 1, 22 and 27 to the Consolidated Financial Statements in Citigroup's 2015 Annual Report on Form 10-K.

CAPITAL RESOURCES

Overview

Capital is used principally to support assets in Citi's businesses and to absorb credit, market, and operational losses. Citi primarily generates capital through earnings from its operating businesses. Citi may augment its capital through issuances of common stock, noncumulative perpetual preferred stock and equity issued through awards under employee benefit plans, among other issuances. During the first quarter of 2016, Citi continued to raise capital through a noncumulative perpetual preferred stock issuance amounting to approximately \$1.0 billion, resulting in a total of approximately \$17.8 billion outstanding as of March 31, 2016. In addition, during the first quarter of 2016, Citi returned a total of approximately \$1.5 billion of capital to common shareholders in the form of share repurchases (approximately 31 million common shares) and dividends.

Further, Citi's capital levels may also be affected by changes in accounting and regulatory standards as well as the impact of future events on Citi's business results, such as corporate and asset dispositions.

Capital Management

Citigroup's capital management framework is designed to ensure that Citigroup and its principal subsidiaries maintain sufficient capital consistent with each entity's respective risk profile, management targets, and all applicable regulatory standards and guidelines. For additional information regarding Citi's capital management, see "Capital Resources—Capital Management" in Citigroup's 2015 Annual Report on Form 10-K.

Capital Planning and Stress Testing

Citi is subject to an annual assessment by the Federal Reserve Board as to whether Citi has effective capital planning processes as well as sufficient regulatory capital to absorb losses during stressful economic and financial conditions, while also meeting obligations to creditors and counterparties and continuing to serve as a credit intermediary. This annual assessment includes two related programs: The Comprehensive Capital Analysis and Review (CCAR) and Dodd-Frank Act Stress Testing (DFAST). For additional information regarding Citi's capital planning and stress testing, see "Capital Resources—Current Regulatory Capital Standards—Capital Planning and Stress Testing" and "Risk Factors—Regulatory Risks" in Citigroup's 2015 Annual Report on Form 10-K.

Current Regulatory Capital Standards

Citi is subject to regulatory capital standards issued by the Federal Reserve Board which constitute the U.S. Basel III rules. These rules establish an integrated capital adequacy framework, encompassing both risk-based capital ratios and leverage ratios. For additional information regarding the risk-based capital ratios, Tier 1 Leverage ratio, and Supplementary Leverage ratio, see "Capital Resources—Current Regulatory Capital Standards" in Citigroup's 2015 Annual Report on Form 10-K.

GSIB Surcharge

The Federal Reserve Board also adopted a rule which imposes a risk-based capital surcharge upon U.S. bank holding companies that are identified as global systemically important bank holding companies (GSIBs), including Citi. GSIB surcharges under the rule initially range from 1.0% to 4.5% of total risk-weighted assets. Citi's initial GSIB surcharge effective January 1, 2016 is 3.5%. However, Citi's efforts in addressing quantitative measures of its systemic importance have resulted in a reduction of Citi's estimated GSIB surcharge to 3%, effective January 1, 2017. For additional information regarding the identification of a GSIB and the methodology for annually determining the GSIB surcharge, see "Capital Resources—Current Regulatory Capital Standards—GSIB Surcharge" in Citigroup's 2015 Annual Report on Form 10-K.

Transition Provisions

The U.S. Basel III rules contain several differing, largely multi-year transition provisions (i.e., "phase-ins" and "phase-outs"). Citi considers all of these transition provisions as being fully implemented on January 1, 2019 (full

implementation). For additional information regarding the transition provisions under the U.S. Basel III rules, including with respect to the GSIB surcharge, see “Capital Resources—Current Regulatory Capital Standards—Transition Provisions” in Citigroup’s 2015 Annual Report on Form 10-K.

Citigroup's Capital Resources Under Current Regulatory Standards

During 2015 and thereafter, Citi is required to maintain stated minimum Common Equity Tier 1 Capital, Tier 1 Capital and Total Capital ratios of 4.5%, 6% and 8%, respectively. Citi's effective minimum Common Equity Tier 1 Capital, Tier 1 Capital and Total Capital ratios during 2016, inclusive of the 25% phase-in of both the 2.5% Capital Conservation Buffer and 3.5% GSIB surcharge (all of which is to be composed of Common Equity Tier 1 Capital), are 6%, 7.5%, and 9.5%, respectively. Citi's effective and stated minimum Common Equity Tier 1 Capital, Tier 1 Capital and Total Capital ratios during 2015 were equivalent at 4.5%, 6%, and 8%, respectively.

Furthermore, to be "well capitalized" under current federal bank regulatory agency definitions, a bank holding company must have a Tier 1 Capital ratio of at least 6%, a Total Capital ratio of at least 10%, and not be subject to a Federal Reserve Board directive to maintain higher capital levels.

The following table sets forth the capital tiers, total risk-weighted assets, risk-based capital ratios, quarterly adjusted average total assets, Total Leverage Exposure and leverage ratios under current regulatory standards (reflecting Basel III Transition Arrangements) for Citi as of March 31, 2016 and December 31, 2015.

Citigroup Capital Components and Ratios Under Current Regulatory Standards (Basel III Transition Arrangements)

In millions of dollars, except ratios	March 31, 2016		December 31, 2015	
	Advanced Approaches	Standardized Approach	Advanced Approaches	Standardized Approach
	Common Equity Tier 1 Capital	\$169,924	\$169,924	\$173,862
Tier 1 Capital	178,091	178,091	176,420	176,420
Total Capital (Tier 1 Capital + Tier 2 Capital) ⁽¹⁾	201,658	214,472	198,746	211,115
Total Risk-Weighted Assets	1,210,107	1,148,945	1,190,853	1,138,711
Common Equity Tier 1 Capital ratio ⁽²⁾	14.04	% 14.79	% 14.60	% 15.27
Tier 1 Capital ratio ⁽²⁾	14.72	15.50	14.81	15.49
Total Capital ratio ⁽²⁾	16.66	18.67	16.69	18.54
In millions of dollars, except ratios	March 31, 2016	December 31, 2015		
Quarterly Adjusted Average Total Assets ⁽³⁾	\$1,724,940	\$1,732,933		
Total Leverage Exposure ⁽⁴⁾	2,305,454	2,326,072		
Tier 1 Leverage ratio	10.32	%	10.18	%
Supplementary Leverage ratio	7.72		7.58	

Under the Advanced Approaches framework eligible credit reserves that exceed expected credit losses are eligible for inclusion in Tier 2 Capital to the extent the excess reserves do not exceed 0.6% of credit risk-weighted assets, (1) which differs from the Standardized Approach in which the allowance for credit losses is eligible for inclusion in Tier 2 Capital up to 1.25% of credit risk-weighted assets, with any excess allowance for credit losses being deducted in arriving at credit risk-weighted assets.

(2) As of March 31, 2016 and December 31, 2015, Citi's reportable Common Equity Tier 1 Capital, Tier 1 Capital, and Total Capital ratios were the lower derived under the Basel III Advanced Approaches framework.

(3) Tier 1 Leverage ratio denominator.

(4) Supplementary Leverage ratio denominator.

As indicated in the table above, Citigroup's capital ratios at March 31, 2016 were in excess of the stated and effective minimum requirements under the U.S. Basel III rules. In addition, Citi was also "well capitalized" under current federal bank regulatory agency definitions as of March 31, 2016.

Citigroup Risk-Weighted Assets Under Current Regulatory Standards
(Basel III Advanced Approaches with Transition Arrangements)

In millions of dollars	March 31, 2016	December 31, 2015
Credit Risk ⁽¹⁴⁾	\$807,758	\$791,036
Market Risk	77,349	74,817
Operational Risk	325,000	325,000
Total Risk-Weighted Assets	\$1,210,107	\$1,190,853

(1) Issuance costs of \$178 million and \$147 million related to preferred stock outstanding at March 31, 2016 and December 31, 2015, respectively, are excluded from common stockholders' equity and netted against preferred stock in accordance with Federal Reserve Board regulatory reporting requirements, which differ from those under U.S. GAAP.

(2) In addition, includes the net amount of unamortized loss on HTM securities. This amount relates to securities that were previously transferred from AFS to HTM, and non-credit related factors such as changes in interest rates and liquidity spreads for HTM securities with other-than-temporary impairment.

(3) The transition arrangements for significant regulatory capital adjustments and deductions impacting Common Equity Tier 1 Capital and/or Additional Tier 1 Capital are set forth in the chart entitled "Basel III Transition Arrangements: Significant Regulatory Capital Adjustments and Deductions", as presented in Citigroup's 2015 Annual Report on Form 10-K.

(4) Common Equity Tier 1 Capital is adjusted for accumulated net unrealized gains (losses) on cash flow hedges included in AOCI that relate to the hedging of items not recognized at fair value on the balance sheet.

(5) The cumulative impact of changes in Citigroup's own creditworthiness in valuing liabilities for which the fair value option has been elected and own-credit valuation adjustments on derivatives are excluded from Common Equity Tier 1 Capital, in accordance with the U.S. Basel III rules.

(6) Includes goodwill "embedded" in the valuation of significant common stock investments in unconsolidated financial institutions.

(7) Of Citi's approximately \$46.3 billion of net DTAs at March 31, 2016, approximately \$21.0 billion of such assets were includable in regulatory capital pursuant to the U.S. Basel III rules, while approximately \$25.3 billion of such assets were excluded in arriving at regulatory capital. Comprising the excluded net DTAs was an aggregate of approximately \$27.0 billion of net DTAs arising from net operating loss, foreign tax credit and general business credit carry-forwards as well as temporary differences, of which \$17.6 billion were deducted from Common Equity Tier 1 Capital and \$9.4 billion were deducted from Additional Tier 1 Capital. Serving to reduce the approximately \$27.0 billion of aggregate excluded net DTAs was approximately \$1.7 billion of net DTLs primarily associated with goodwill and certain other intangible assets. Separately, under the U.S. Basel III rules, goodwill and these other intangible assets are deducted net of associated DTLs in arriving at Common Equity Tier 1 Capital.

(8) Assets subject to 10%/15% limitations include MSRs, DTAs arising from temporary differences and significant common stock investments in unconsolidated financial institutions. At March 31, 2016 and December 31, 2015, the deduction related only to DTAs arising from temporary differences that exceeded the 10% limitation.

(9) Represents Citigroup Capital XIII trust preferred securities, which are permanently grandfathered as Tier 1 Capital under the U.S. Basel III rules, as well as non-grandfathered trust preferred securities which are eligible for inclusion in Tier 1 Capital during 2015 in an amount up to 25% of the aggregate outstanding principal amounts of such issuances as of January 1, 2014. The remaining 75% of non-grandfathered trust preferred securities are eligible for inclusion in Tier 2 Capital during 2015 in accordance with the transition arrangements for non-qualifying capital instruments under the U.S. Basel III rules. As of December 31, 2015, however, the entire amount of non-grandfathered trust preferred securities was included within Tier 1 Capital, as the amounts outstanding did not exceed the respective threshold for exclusion from Tier 1 Capital. Effective January 1, 2016, non-grandfathered trust preferred securities are not eligible for inclusion in Tier 1 Capital, but are eligible for inclusion in Tier 2 Capital subject to full phase-out by January 1, 2022. During 2016, non-grandfathered trust

preferred securities are eligible for inclusion in Tier 2 Capital in an amount up to 60% of the aggregate outstanding principal amounts of such issuances as of January 1, 2014.

- (10) 50% of the minimum regulatory capital requirements of insurance underwriting subsidiaries must be deducted from each of Tier 1 Capital and Tier 2 Capital.

- (11) Effective July 2015, banking entities are required to be in compliance with the so-called “Volcker Rule” of the Dodd-Frank Act that prohibits conducting certain proprietary investment activities and limits their ownership of, and relationships with, covered funds. Accordingly, Citi is required by the “Volcker Rule” to deduct from Tier 1 Capital all permitted ownership interests in covered funds that were acquired after December 31, 2013.

- (12) Under the transition arrangements of the U.S. Basel III rules, non-qualifying subordinated debt issuances which consist of those with a fixed-to-floating rate step-up feature where the call/step-up date has not passed are eligible for inclusion in Tier 2 Capital during 2015 up to 25% of the aggregate outstanding principal amounts of such issuances as of January 1, 2014. Effective January 1, 2016, non-qualifying subordinated debt issuances are not eligible for inclusion in Tier 2 Capital.

- (13) Advanced Approaches banking organizations are permitted to include in Tier 2 Capital eligible credit reserves that exceed expected credit losses to the extent that the excess reserves do not exceed 0.6% of credit risk-weighted assets.

- (14) Under the U.S. Basel III rules, credit risk-weighted assets during the transition period reflect the effects of transitional arrangements related to regulatory capital adjustments and deductions and, as a result, will differ from credit risk-weighted assets derived under full implementation of the rules.

Citigroup Capital Rollforward Under Current Regulatory Standards
(Basel III Advanced Approaches with Transition Arrangements)

Net change in Operational Risk-Weighted Assets	\$—
Total Risk-Weighted Assets, end of period	\$1,210,107

Retail exposures decreased during the three months ended March 31, 2016 primarily due to reductions in cards

(1) exposures attributable to seasonal holiday spending repayments, residential mortgage sales and runoffs, and divestitures within the Citi Holdings portfolio, partially offset by an increase in other retail exposures.

(2) Wholesale exposures increased during the three months ended March 31, 2016 primarily due to an increase in loans held for sale and the impact of FX translation, partially offset by a decrease in commitments.

(3) Repo-style transactions increased during the three month ended March 31, 2016 primarily driven by market related movements and model enhancements.

(4) OTC derivatives increased during the three months ended March 31, 2016 primarily driven by an increase in exposures and volatility, as well as model enhancements.

(5) Derivatives CVA increased during the three months ended March 31, 2016 primarily driven by increased volatility and model enhancements.

(6) Other exposures include cleared transactions, unsettled transactions, assets other than those reportable in specific exposure categories and non-material portfolios.

(7) Supervisory 6% multiplier does not apply to derivatives CVA.

(8) Risk levels increased during the three months ended March 31, 2016 primarily due to an increase in exposure levels subject to Value at Risk and Stressed Value at Risk as well as an increase in assets subject to standard specific risk charges, partially offset by a reduction in positions subject to securitization charges and the ongoing assessment regarding the applicability of the market risk capital rules to certain securitization positions.

(9) Risk-weighted assets declined during the three months ended March 31, 2016 due to updated model volatility inputs.

Capital Resources of Citigroup's Subsidiary U.S. Depository Institutions Under Current Regulatory Standards
 Citigroup's subsidiary U.S. depository institutions are also subject to regulatory capital standards issued by their respective primary federal bank regulatory agencies, which are similar to the standards of the Federal Reserve Board. During 2016, Citi's primary subsidiary U.S. depository institution, Citibank, is subject to effective minimum Common Equity Tier 1 Capital, Tier 1 Capital and Total Capital ratios, inclusive of the 25% phase-in of the 2.5% Capital Conservation Buffer, of 5.125%, 6.625% and

8.625%, respectively. Citibank's effective and stated minimum Common Equity Tier 1 Capital, Tier 1 Capital and Total Capital ratios during 2015 were equivalent at 4.5%, 6%, and 8%, respectively.

The following table sets forth the capital tiers, total risk-weighted assets, risk-based capital ratios, quarterly adjusted average total assets, Total Leverage Exposure and leverage ratios under current regulatory standards (reflecting Basel III Transition Arrangements) for Citibank, Citi's primary subsidiary U.S. depository institution, as of March 31, 2016 and December 31, 2015.

Citibank Capital Components and Ratios Under Current Regulatory Standards (Basel III Transition Arrangements)

In millions of dollars, except ratios	March 31, 2016		December 31, 2015		
	Advanced Approaches	Standardized Approach	Advanced Approaches	Standardized Approach	
Common Equity Tier 1 Capital	\$128,899	\$128,899	\$127,323	\$127,323	
Tier 1 Capital	128,899	128,899	127,323	127,323	
Total Capital (Tier 1 Capital + Tier 2 Capital) ⁽¹⁾	140,163	151,413	138,762	149,749

Total Capital ratio ⁽²⁾⁽³⁾	15.23	15.02	15.44	14.99	
In millions of dollars, except ratios	March 31, 2016	December 31, 2015			
Quarterly Adjusted Average Total Assets ⁽⁴⁾	\$1,305,264	\$1,298,560			
Total Leverage Exposure ⁽⁵⁾	1,841,046	1,838,941			
Tier 1 Leverage ratio ⁽³⁾	9.88	% 9.80			%
Supplementary Leverage ratio	7.00	6.92			

Under the Advanced Approaches framework eligible credit reserves that exceed expected credit losses are eligible for inclusion in Tier 2 Capital to the extent the excess reserves do not exceed 0.6% of credit risk-weighted assets, (1) which differs from the Standardized Approach in which the allowance for credit losses is eligible for inclusion in Tier 2 Capital up to 1.25% of credit risk-weighted assets, with any excess allowance for credit losses being deducted in arriving at credit risk-weighted assets.

(2) As of March 31, 2016 and December 31, 2015, Citibank's reportable Common Equity Tier 1 Capital, Tier 1 Capital, and Total Capital ratios were the lower derived under the Basel III Standardized Approach framework.

Beginning January 1, 2015, Citibank must maintain minimum Common Equity Tier 1 Capital, Tier 1 Capital, Total Capital, and Tier 1 Leverage ratios of 6.5%, 8%, 10% and 5%, respectively, to be considered "well capitalized" under

(3) the revised Prompt Corrective Action (PCA) regulations applicable to insured depository institutions as established by the U.S. Basel III rules. For additional information, see "Capital Resources—Current Regulatory Capital Standards—Prompt Corrective Action Framework" in Citigroup's 2015 Annual Report on Form 10-K.

(4) Tier 1 Leverage ratio denominator.

(5) Supplementary Leverage ratio denominator.

As indicated in the table above, Citibank's capital ratios at March 31, 2016 were in excess of the stated and effective minimum requirements under the U.S. Basel III rules. In addition, Citibank was also "well capitalized" as of

March 31, 2016 under the revised PCA regulations which became effective January 1, 2015.

Impact of Changes on Citigroup and Citibank Capital Ratios Under Current Regulatory Capital Standards

The following tables present the estimated sensitivity of Citigroup's and Citibank's capital ratios to changes of \$100 million in Common Equity Tier 1 Capital, Tier 1 Capital and Total Capital (numerator), and changes of \$1 billion in Advanced Approaches and Standardized Approach risk-weighted assets, quarterly adjusted average total assets, as well as Total Leverage Exposure (denominator), under current regulatory capital standards (reflecting Basel III

Transition Arrangements), as of March 31, 2016. This information is provided for the purpose of analyzing the impact that a change in Citigroup's or Citibank's financial position or results of operations could have on these ratios. These sensitivities only consider a single change to either a component of capital, risk-weighted assets, quarterly adjusted average total assets, or Total Leverage Exposure. Accordingly, an event that affects more than one factor may have a larger basis point impact than is reflected in these tables.

Impact of Changes on Citigroup and Citibank Risk-Based Capital Ratios (Basel III Transition Arrangements)

In basis points	Common Equity Tier 1 Capital ratio		Tier 1 Capital ratio		Total Capital ratio	
	Impact of \$100 million change in Common Equity Tier 1 Capital	Impact of \$1 billion change in risk-weighted assets	Impact of \$100 million change in Tier 1 Capital	Impact of \$1 billion change in risk-weighted assets	Impact of \$100 million change in Total Capital	Impact of \$1 billion change in risk-weighted assets

Citigroup	0.6	0.6	0.4	0.3
Citibank	0.8	0.8	0.5	0.4

Citigroup Broker-Dealer Subsidiaries

At March 31, 2016, Citigroup Global Markets Inc., a U.S. broker-dealer registered with the SEC that is an indirect wholly owned subsidiary of Citigroup, had net capital, computed in accordance with the SEC's net capital rule, of approximately \$7.0 billion, which exceeded the minimum requirement by approximately \$5.6 billion.

Moreover, Citigroup Global Markets Limited, a broker-dealer registered with the United Kingdom's Prudential Regulation Authority (PRA) that is also an indirect wholly owned subsidiary of Citigroup, had total capital of \$17.8 billion at March 31, 2016, which exceeded

the PRA's minimum regulatory capital requirements.

In addition, certain of Citi's other broker-dealer subsidiaries are subject to regulation in the countries in which they do business, including requirements to maintain specified levels of net capital or its equivalent. Citigroup's other broker-dealer subsidiaries were in compliance with their capital requirements at March 31, 2016.

Basel III (Full Implementation)

Citigroup's Capital Resources Under Basel III
(Full Implementation)

Citi currently estimates that its effective minimum Common Equity Tier 1 Capital, Tier 1 Capital and Total Capital ratio requirements under the U.S. Basel III rules, on a fully implemented basis, inclusive of the 2.5% Capital Conservation Buffer and the Countercyclical Capital Buffer at its current level of 0%, as well as assuming a 3% GSIB surcharge, may be 10%, 11.5% and 13.5%, respectively.

Further, under the U.S. Basel III rules, Citi must also comply with a 4% minimum Tier 1 Leverage ratio requirement and an effective 5% minimum Supplementary Leverage ratio requirement.

The following table sets forth the capital tiers, total risk-weighted assets, risk-based capital ratios, quarterly adjusted average total assets, Total Leverage Exposure and leverage ratios, assuming full implementation under the U.S. Basel III rules, for Citi as of March 31, 2016 and December 31, 2015.

Citigroup Capital Components and Ratios Under Basel III (Full Implementation)

In millions of dollars, except ratios	March 31, 2016		December 31, 2015	
	Advanced Approaches	Standardized Approach	Advanced Approaches	Standardized Approach
Common Equity Tier 1 Capital	\$153,023	\$153,023	\$146,865	\$146,865

Under the Advanced Approaches framework eligible credit reserves that exceed expected credit losses are eligible for inclusion in Tier 2 Capital to the extent the excess reserves do not exceed 0.6% of credit risk-weighted assets, (1) which differs from the Standardized Approach in which the allowance for credit losses is eligible for inclusion in Tier 2 Capital up to 1.25% of credit risk-weighted assets, with any excess allowance for credit losses being deducted in arriving at credit risk-weighted assets.

(2) As of March 31, 2016 and December 31, 2015, Citi's Common Equity Tier 1 Capital, Tier 1 Capital, and Total Capital ratios were the lower derived under the Basel III Advanced Approaches framework.

(3) Citi's Basel III capital ratios and related components, on a fully implemented basis, are non-GAAP financial measures.

(4) Tier 1 Leverage ratio denominator.

(5) Supplementary Leverage ratio denominator.

Common Equity Tier 1 Capital Ratio

Citi's Common Equity Tier 1 Capital ratio was 12.3% at March 31, 2016, compared to 12.1% at December 31, 2015 (all based on application of the Advanced Approaches for determining total risk-weighted assets). The quarter-over-quarter increase in the ratio was largely attributable to quarterly net income of \$3.5 billion, beneficial net movements in AOCI, and the favorable effects attributable to DTA utilization of approximately \$1.6 billion, offset in part by an increase in risk-weighted assets as well as the return of approximately \$1.5 billion of capital to common shareholders.

Components of Citigroup Capital Under Basel III (Advanced Approaches with Full Implementation)

In millions of dollars	March 31, 2016	December 31, 2015
Common Equity Tier 1 Capital		
Citigroup common stockholders' equity ⁽¹⁾	\$209,947	\$205,286
Add: Qualifying noncontrolling interests	143	145
Regulatory Capital Adjustments and Deductions:

Less: Cumulative unrealized net gain related to changes in fair value of financial liabilities attributable to own creditworthiness, net of tax ⁽³⁾	562	441
Less: Intangible assets:		
Goodwill, net of related deferred tax liabilities (DTLs) ⁽⁴⁾	21,935	21,980
Identifiable intangible assets other than mortgage servicing rights (MSRs), net of related DTLs	3,332	3,586
Less: Defined benefit pension plan net assets	870	794
Less: Deferred tax assets (DTAs) arising from net operating loss, foreign tax credit and general business credit carry-forwards ⁽⁵⁾	23,414	23,659
Less: Excess over 10%/15% limitations for other DTAs, certain common stock investments, and MSRs ⁽⁵⁾⁽⁶⁾	7,254	8,723
Total Common Equity Tier 1 Capital	\$153,023	\$146,865
Additional Tier 1 Capital		
Qualifying perpetual preferred stock ⁽¹⁾	\$17,575	\$16,571
Qualifying trust preferred securities ⁽⁷⁾	1,366	1,365
Qualifying noncontrolling interests	31	31
Regulatory Capital Deductions:		
Less: Minimum regulatory capital requirements of insurance underwriting subsidiaries ⁽⁸⁾	228	229
Less: Permitted ownership interests in covered funds ⁽⁹⁾	625	567
Total Additional Tier 1 Capital	\$18,119	\$17,171
Total Tier 1 Capital (Common Equity Tier 1 Capital + Additional Tier 1 Capital)	\$171,142	\$164,036
Tier 2 Capital		
Qualifying subordinated debt ⁽¹⁰⁾	\$22,664	\$20,744
Qualifying trust preferred securities ⁽¹¹⁾	337	342
Qualifying noncontrolling interests	40	41
Excess of eligible credit reserves over expected credit losses ⁽¹²⁾	766	1,163
Regulatory Capital Deduction:		
Less: Minimum regulatory capital requirements of insurance underwriting subsidiaries ⁽⁸⁾	228	229
Total Tier 2 Capital	\$23,579	\$22,061
Total Capital (Tier 1 Capital + Tier 2 Capital) ⁽¹³⁾	\$194,721	\$186,097

(1) Issuance costs of \$178 million and \$147 million related to preferred stock outstanding at March 31, 2016 and December 31, 2015, respectively, are excluded from common stockholders' equity and netted against preferred stock in accordance with Federal Reserve Board regulatory reporting requirements, which differ from those under

U.S. GAAP.

38

- (2) Common Equity Tier 1 Capital is adjusted for accumulated net unrealized gains (losses) on cash flow hedges included in AOCI that relate to the hedging of items not recognized at fair value on the balance sheet.
The cumulative impact of changes in Citigroup's own creditworthiness in valuing liabilities for which the fair value
- (3) option has been elected and own-credit valuation adjustments on derivatives are excluded from Common Equity Tier 1 Capital, in accordance with the U.S. Basel III rules.
- (4) Includes goodwill "embedded" in the valuation of significant common stock investments in unconsolidated financial institutions.
Of Citi's approximately \$46.3 billion of net DTAs at March 31, 2016, approximately \$17.3 billion of such assets were includable in regulatory capital pursuant to the U.S. Basel III rules, while approximately \$29.0 billion of such assets were excluded in arriving at Common Equity Tier 1 Capital. Comprising the excluded net DTAs was an aggregate of approximately \$30.7 billion of net DTAs arising from net operating loss, foreign tax credit and
- (5) general business credit carry-forwards as well as temporary differences that were deducted from Common Equity Tier 1 Capital. Serving to reduce the approximately \$30.7 billion of aggregate excluded net DTAs was approximately \$1.7 billion of net DTLs primarily associated with goodwill and certain other intangible assets. Separately, under the U.S. Basel III rules, goodwill and these other intangible assets are deducted net of associated DTLs in arriving at Common Equity Tier 1 Capital.
Assets subject to 10%/15% limitations include MSRs, DTAs arising from temporary differences and significant
- (6) common stock investments in unconsolidated financial institutions. At March 31, 2016 and December 31, 2015, the deduction related only to DTAs arising from temporary differences that exceeded the 10% limitation.
- (7) Represents Citigroup Capital XIII trust preferred securities, which are permanently grandfathered as Tier 1 Capital under the U.S. Basel III rules.
- (8) 50% of the minimum regulatory capital requirements of insurance underwriting subsidiaries must be deducted from each of Tier 1 Capital and Tier 2 Capital.
Effective July 2015, banking entities are required to be in compliance with the "Volcker Rule" of the Dodd-Frank
- (9) Act that prohibits conducting certain proprietary investment activities and limits their ownership of, and relationships with, covered funds. Accordingly, Citi is required by the "Volcker Rule" to deduct from Tier 1 Capital all permitted ownership interests in covered funds that were acquired after December 31, 2013.
- (10) Non-qualifying subordinated debt issuances which consist of those with a fixed-to-floating rate step-up feature where the call/step-up date has not passed are excluded from Tier 2 Capital.
- (11) Represents the amount of non-grandfathered trust preferred securities eligible for inclusion in Tier 2 Capital under the U.S. Basel III rules, which will be fully phased-out of Tier 2 Capital by January 1, 2022.
Advanced Approaches banking organizations are permitted to include in Tier 2 Capital eligible credit reserves
- (12) that exceed expected credit losses to the extent that the excess reserves do not exceed 0.6% of credit risk-weighted assets.
- (13) Total Capital as calculated under Advanced Approaches, which differs from the Standardized Approach in the treatment of the amount of eligible credit reserves includable in Tier 2 Capital.

Issuance costs of \$31 million related to preferred stock issued during the three months ended March 31, 2016 are (1) excluded from common stockholders' equity and netted against preferred stock in accordance with Federal Reserve Board regulatory reporting requirements, which differ from those under U.S. GAAP.

(2)

Citi issued approximately \$1.0 billion of qualifying perpetual preferred stock during the three months ended March 31, 2016, which was partially offset by the netting of issuance costs of \$31 million.

Edgar Filing: CITIGROUP INC - Form 10-Q

Citigroup Risk-Weighted Assets Under Basel III (Full Implementation) at March 31, 2016

Total risk-weighted assets under both the Basel III Advanced Approaches and the Standardized Approach increased from year-end 2015 primarily due to an increase in credit risk-weighted assets resulting from higher derivative exposures and the impact of FX translation, partially offset by a reduction in cards exposures as well as the ongoing decline in Citi Holdings assets. In addition, further contributing to the increase in credit risk-weighted assets under the Advanced Approaches were infrastructure enhancements related to OTC derivatives and derivatives CVA.

Citigroup Risk-Weighted Assets Rollforward (Basel III Advanced Approaches with Full Implementation)

In millions of dollars	Three Months Ended March 31, 2016
Total Risk-Weighted Assets, beginning of period	\$1,216,277

Changes in Market Risk-Weighted Assets	
Net increase in risk levels ⁽⁸⁾	\$5,304
Net decrease due to model and methodology updates ⁽⁹⁾	(2,772)
Net increase in Market Risk-Weighted Assets	\$2,532
Net change in Operational Risk-Weighted Assets	\$—
Total Risk-Weighted Assets, end of period	\$1,239,575

- Retail exposures decreased during the three months ended March 31, 2016 primarily due to reductions in
- (1) qualifying revolving (cards) exposures attributable to seasonal holiday spending repayments, residential mortgage sales and runoffs, and divestitures within the Citi Holdings portfolio, partially offset by an increase in other retail exposures.
 - (2) Wholesale exposures increased during the three months ended March 31, 2016 primarily due to an increase in loans held for sale and the impact of FX translation, partially offset by a decrease in commitments.
 - (3) Repo-style transactions increased during the three month ended March 31, 2016 primarily driven by market related movements and model enhancements.
 - (4) OTC derivatives increased during the three months ended March 31, 2016 primarily driven by an increase in exposures and volatility, as well as model enhancements.
 - (5) Derivatives CVA increased during the three months ended March 31, 2016 primarily driven by increased volatility and model enhancements.
 - (6) Other exposures include cleared transactions, unsettled transactions, assets other than those reportable in specific exposure categories and non-material portfolios.
 - (7) Supervisory 6% multiplier does not apply to derivatives CVA.
- Risk levels increased during the three months ended March 31, 2016 primarily due to an increase in exposure
- (8) levels subject to Value at Risk and Stressed Value at Risk as well as an increase in assets subject to standard specific risk charges, partially offset by a reduction in positions subject to securitization charges and the ongoing assessment regarding the applicability of the market risk capital rules to certain securitization positions.
 - (9) Risk-weighted assets declined during the three months ended March 31, 2016 due to updated model volatility inputs.

Supplementary Leverage Ratio

Citigroup's Supplementary Leverage ratio was 7.4% for the first quarter of 2016, compared to 7.1% for the fourth quarter of 2015. The growth in the ratio quarter-over-quarter was principally driven by an increase in Tier 1 Capital attributable largely to quarterly net income of \$3.5 billion, favorable net changes in AOCI components, the beneficial effects associated with approximately \$1.6 billion of DTA utilization, as well as an overall reduction in Total Leverage Exposure resulting from a net decrease in

on-balance sheet assets and reductions in certain derivative and other off-balance sheet exposures, partially offset by the return of approximately \$1.5 billion of capital to common shareholders.

The following table sets forth Citi's Supplementary Leverage ratio and related components, assuming full implementation under the U.S. Basel III rules, for the three months ended March 31, 2016 and December 31, 2015.

Citigroup Basel III Supplementary Leverage Ratio and Related Components (Full Implementation)

In millions of dollars, except ratios	March 31, 2016	December 31, 2015
Tier 1 Capital	\$ 171,142	\$ 164,036
Total Leverage Exposure (TLE)		
On-balance sheet assets ⁽¹⁾	\$ 1,777,571	\$ 1,784,248
Certain off-balance sheet exposures: ⁽²⁾		
Potential future exposure (PFE) on derivative contracts	203,694	206,128
Effective notional of sold credit derivatives, net ⁽³⁾	70,973	76,923
Counterparty credit risk for repo-style transactions ⁽⁴⁾	26,381	25,939
Unconditionally cancellable commitments	57,306	58,699
Other off-balance sheet exposures	222,160	225,450
Total of certain off-balance sheet exposures	\$ 580,514	\$ 593,139
Less: Tier 1 Capital deductions	57,658	59,538
Total Leverage Exposure	\$ 2,300,427	\$ 2,317,849
Supplementary Leverage ratio	7.44	% 7.08

(1) Represents the daily average of on-balance sheet assets for the quarter.

(2) Represents the average of certain off-balance sheet exposures calculated as of the last day of each month in the quarter.

(3) Under the U.S. Basel III rules, banking organizations are required to include in TLE the effective notional amount of sold credit derivatives, with netting of exposures permitted if certain conditions are met.

(4) Repo-style transactions include repurchase or reverse repurchase transactions and securities borrowing or securities lending transactions.

Citibank's Supplementary Leverage ratio, assuming full implementation under the U.S. Basel III rules, was 6.9% for the first quarter of 2016, compared to 6.7% for the fourth quarter of 2015. The growth in the ratio quarter-over-quarter was principally driven by Tier 1 Capital benefits resulting from quarterly net income, favorable movements in certain AOCI components, and DTA utilization, partially offset by cash dividends paid by Citibank to its parent, Citicorp, and which were subsequently remitted to Citigroup.

Regulatory Capital Standards Developments

For additional information regarding other recent regulatory capital standards developments, see “Capital Resources—Regulatory Capital Standards Developments” in Citigroup’s 2015 Annual Report on Form 10-K. Standardized Measurement Approach for Operational Risk

In March 2016, the Basel Committee on Banking Supervision (Basel Committee) issued a consultative document which proposes revisions to the operational risk capital framework applicable to the Advanced Approaches for calculating risk-weighted assets. The consultative document introduces the Standardized Measurement Approach (SMA).

Operational risk capital is derived under the SMA through the combination of two components, a so-called “Business Indicator Component” and a “Loss Component”. The Business Indicator Component, primarily reflective of various income statement elements (i.e., a modified gross income indicator), is calculated as the sum of the three year average of its components. The Loss Component reflects the operational loss exposure of a banking organization that can be inferred from internal loss experience, and is based on a 10 year average. Moreover, the Loss Component distinguishes between, and weighs more heavily, loss events above €10 million and €100 million. The Loss Component is translated into an Internal Loss Multiplier which modifies the Business Indicator Component in deriving a banking organization’s operational risk capital requirement. The Internal Loss Multiplier was calibrated by the Basel Committee such that a banking organization with operational losses on par with the industry average will have a multiplier of approximately 1 (i.e., an operational risk capital requirement substantially equal to its Business Indicator Component).

Prior to finalizing the proposal, the Basel Committee will be conducting a comprehensive quantitative impact study so as to assist with assessing the final design and calibration of the operational risk capital framework. If the U.S. banking agencies were to adopt the Basel Committee’s proposal unchanged, Citi’s operational risk-weighted assets could increase significantly.

Reducing Variation in Credit Risk-Weighted Assets - Constraints on the Use of Internal Model Approaches

In March 2016, the Basel Committee issued a consultative document which proposes to revise the internal ratings-based approaches (IRB) in order to reduce complexity and excessive variability between banking organizations in the derivation of credit risk-weighted assets. The proposal revises the IRB approaches, in part, by prohibiting the use of such approaches for certain so-called “low default” exposures, including those to banks and other financial institutions, as well as large corporations. Moreover, the proposal also prohibits the use of the IRB approaches for

equity exposures in the banking book.

Additionally, in order to ensure a minimum level of conservatism, simplicity and comparability for other exposures where the IRB approaches would still be permissible, the proposal establishes floors by exposure type regarding the estimation of certain model parameters used in the derivation of credit risk-weighted assets, and also provides greater specification as to permissible parameter estimation practices under the IRB approaches.

Further, the proposal indicates the Basel Committee is considering whether to impose an aggregate capital floor which would be calibrated in the range of 60% - 90% of total risk-weighted assets as calculated under the Basel Committee’s standardized approaches.

The U.S. banking agencies may revise the Advanced Approaches under the U.S. Basel III rules in the future, based on any revisions adopted by the Basel Committee.

Revisions to the Basel III Leverage Ratio Framework

In April 2016, the Basel Committee issued a consultative document which proposes certain revisions as to the design and calibration of the Basel III leverage ratio (similar to the U.S. Basel III Supplementary Leverage ratio). Among the proposed revisions are those with respect to the exposure measure (i.e., the denominator of the ratio) in relation to the treatment of derivative exposures, provisions, and off-balance sheet exposures.

Additionally, the proposal also requests feedback from market participants as to the form in which any higher Basel III leverage ratio requirement may be imposed on banking organizations identified as GSIBs.

Tangible Common Equity, Tangible Book Value Per Share and Book Value Per Share

Tangible common equity (TCE), as currently defined by Citi, represents common equity less goodwill and other intangible assets (other than MSRs). Other companies may calculate TCE in a different manner. TCE and tangible book

value per share are non-GAAP financial measures.

In millions of dollars or shares, except per share amounts	March 31, December

MANAGING GLOBAL RISK

For Citi, effective risk management is of primary importance to its overall operations. Accordingly, Citi's risk management process has been designed to monitor, evaluate and manage the principal risks it assumes in conducting its activities. Specifically, the activities that Citi engages in, and the risks those activities generate, must be consistent with Citi's mission and value proposition, the key principles that guide it, and Citi's risk appetite.

For more information on Citi's management of global risk, including its three lines of defense, see "Managing Global Risk" in Citi's 2015 Annual Report on Form 10-K.

CREDIT RISK

For additional information on credit risk, including Citi's credit risk management, measurement and stress testing, see "Credit Risk" and "Risk Factors" in Citi's 2015 Annual Report on Form 10-K.

CONSUMER CREDIT

North America Consumer Mortgage Lending

Overview

Citi's North America consumer mortgage portfolio consists of both residential first mortgages and home equity loans. At March 31, 2016, Citi's North America consumer mortgage portfolio was \$78.7 billion (compared to \$79.7 billion at December 31, 2015), of which the residential first mortgage portfolio was \$56.8 billion (compared to \$56.9 billion at December 31, 2015), and the home equity loan portfolio was \$21.9 billion (compared to \$22.8 billion at December 31, 2015). At March 31, 2016, \$17.6 billion of residential first mortgages were recorded in Citi Holdings, with the remaining \$39.2 billion recorded in Citicorp. At March 31, 2016, \$18.2 billion of home equity loans was recorded in Citi Holdings, with the remaining \$3.7 billion recorded in Citicorp.

For additional information on Citi's North America consumer mortgage portfolio, see Note 14 to the Consolidated Financial Statements and "Credit Risk—North America Consumer Mortgage Lending" in Citi's 2015 Annual Report on Form 10-K.

North America Consumer Mortgage Quarterly Credit Trends—Net Credit Losses and Delinquencies—Residential First Mortgages

The following charts detail the quarterly credit trends for Citi's residential first mortgage portfolio in North America.

North America Residential First Mortgage - EOP Loans

In billions of dollars

North America Residential First Mortgage - Net Credit Losses

In millions of dollars

Note: CMI refers to loans originated by CitiMortgage. CFNA refers to loans originated by CitiFinancial. Totals may not sum due to rounding.

- (1) Decrease in 4Q'15 EOP loans primarily reflects the transfer of CFNA residential first mortgages to held-for-sale and classification as Other assets at year-end 2015. This transfer did not impact net credit losses in 4Q'15.
- (2) Decrease in 1Q'16 net credit losses primarily reflects the transfer of CFNA residential first mortgage to held-for-sale and classification as Other assets at year-end 2015.
- (3) Year-over-year change in the S&P/Case-Shiller U.S. National Home Price Index.
- (4) Year-over-year change as of January 2016.

North America Residential First Mortgage Delinquencies-Citi Holdings

In billions of dollars

Note: Days past due excludes (i) U.S. mortgage loans that are guaranteed by U.S. government-sponsored agencies because the potential loss predominantly resides with the U.S. agencies, and (ii) loans recorded at fair value. Totals may not sum due to rounding.

- (1) Decrease in 4Q'15 delinquencies primarily reflects the transfer of CFNA residential first mortgages to held-for-sale and classification as Other assets at year-end 2015.

Net credit losses in the North America residential first mortgage portfolio significantly improved during the first quarter of 2016 primarily due to the transfer of the CitiFinancial loans to held-for-sale at year-end 2015 as well as improvements in the home price index (HPI).

Overall improvement in delinquencies during the quarter was largely driven by asset sales and continued overall improvement in economic performance. Credit performance from quarter to quarter could continue to be impacted by the amount of delinquent loan sales or transfers to held-for-sale, as well as overall trends in HPI and interest rates.

North America Residential First Mortgages—State Delinquency Trends

The following tables set forth the six U.S. states and/or regions with the highest concentration of Citi's residential first mortgages.

State ⁽¹⁾	March 31, 2016					December 31, 2015								
	ENR ⁽²⁾	ENR Distribution	90+DPD %	LTV > 100% ⁽³⁾	Refreshed FICO	ENR ⁽²⁾	ENR Distribution	90+DPD %	LTV > 100% ⁽³⁾	Refreshed FICO				
CA	\$19.638	%	0.3	%	1	%	754	\$19.237	%	0.2	%	1	%	754
NY/NJ/CT ⁽⁴⁾	13.0	25	0.7	1	752	12.7	25	0.8	1	751				
VA/MD	2.2	4	1.2	4	719	2.2	4	1.2	2	719

Total	\$51.8100	%	0.7	%	1	%	740	\$51.5100	%	0.7	%	1	%	738

Note: Totals may not sum due to rounding.

(1) Certain of the states are included as part of a region based on Citi's view of similar HPI within the region.

Ending net receivables. Excludes loans in Canada and Puerto Rico, loans guaranteed by U.S. government agencies, (2) loans recorded at fair value and loans subject to long term standby commitments (LTSCs). Excludes balances for which FICO or LTV data are unavailable.

(3) LTV ratios (loan balance divided by appraised value) are calculated at origination and updated by applying market price data.

(4) New York, New Jersey, Connecticut, Florida and Illinois are judicial states.

Foreclosures

A substantial majority of Citi's foreclosure inventory consists of residential first mortgages. At March 31, 2016, Citi's foreclosure inventory included approximately \$0.1 billion, or 0.2%, of the total residential first mortgage portfolio, unchanged from December 31, 2015, based on the dollar amount of ending net receivables of loans in foreclosure inventory, excluding loans that are guaranteed by U.S. government agencies and loans subject to LTSCs.

North America Consumer Mortgage Quarterly Credit Trends—Net Credit Losses and Delinquencies—Home Equity Loans

Citi's home equity loan portfolio consists of both fixed-rate home equity loans and loans extended under home equity lines of credit. Fixed-rate home equity loans are fully amortizing. Home equity lines of credit allow for amounts to be drawn for a period of time with the payment of interest only and then, at the end of the draw period, the then-outstanding amount is converted to an amortizing loan (the interest-only payment feature during the revolving period is standard for this product across the industry). After conversion, the home equity loans typically have a 20-year amortization period. As of March 31, 2016, Citi's home equity loan portfolio of \$21.9 billion consisted of \$6.1 billion of fixed-rate home equity loans and \$15.8 billion of loans extended under home equity lines of credit (Revolving HELOCs).

Revolving HELOCs

As noted above, as of March 31, 2016, Citi had \$15.8 billion of Revolving HELOCs, of which \$4.6 billion had commenced amortization (compared to \$4.2 billion at December 31, 2015) and \$11.2 billion were still within their revolving period and have not commenced amortization, or "reset," (compared to \$12.3 billion at December 31, 2015). The following chart indicates the FICO and combined loan-to-value (CLTV) characteristics of Citi's Revolving

HELOCs portfolio and the year in which they reset:

North America Home Equity Lines of Credit Amortization – Citigroup

Total ENR by Reset Year

In billions of dollars as of March 31, 2016

Note: Totals may not sum due to rounding.

Approximately 29% of Citi's total Revolving HELOCs portfolio had commenced amortization as of March 31, 2016 (compared to 25% as of December 31, 2015). Of the remaining Revolving HELOCs portfolio, approximately 62% will commence amortization during the remainder of 2016–2017. Before commencing amortization, Revolving HELOC

borrowers are required to pay only interest on their loans. Upon amortization, these borrowers will be required to pay both interest, usually at a variable rate, and principal that amortizes typically over 20 years, rather than the typical 30-year amortization. As a result, Citi's customers with Revolving HELOCs that reset could experience "payment shock" due to the higher required payments on the loans.

While it is not certain what ultimate impact this payment shock could have on Citi's delinquency rates and net credit losses, Citi currently estimates that the monthly loan payment for its Revolving HELOCs that reset during the remainder of 2016–2017 could increase on average by approximately \$370, or 165%. Increases in interest rates could further increase these payments given the variable nature of the interest rates on these loans post-reset. Of the Revolving HELOCs that will commence amortization during the remainder of 2016–2017, approximately \$0.7 billion, or 9%, of the loans have a CLTV greater than 100% as of March 31, 2016. Borrowers' high loan-to-value positions, as well as the cost and availability of refinancing options, could limit borrowers' ability to refinance their Revolving HELOCs as these loans begin to reset.

Approximately 6.7% of the Revolving HELOCs that have begun amortization as of March 31, 2016 were 30+ days past due, compared to 3.5% of the total outstanding home equity loan portfolio (amortizing and non-amortizing). This compared to 6.7% and 3.2%, respectively, as of December 31, 2015. As newly amortizing loans continue to season, the delinquency rate of the amortizing Revolving HELOC portfolio and total home equity loan portfolio is expected to continue to increase. Delinquencies on newly amortizing loans have tended to peak between four and six months after reset. Resets to date have generally occurred during a period of historically low interest rates, improving HPI and a favorable economic environment, which Citi believes has likely reduced the overall "payment shock" to the borrower. Citi continues to monitor this reset risk closely and will continue to consider any potential impact in determining its allowance for loan loss reserves. In addition, management continues to review and take additional actions to offset potential reset risk, such as a borrower outreach program to provide reset risk education and proactively working with high-risk borrowers through a specialized single point of contact unit. For further information on reset risk, see "Risk Factors—Credit and Market Risks" in Citi's 2015 Annual Report on Form 10-K.

Net Credit Losses and Delinquencies

The following charts detail the quarterly credit trends for Citi's home equity loan portfolio in North America:

North America Home Equity - EOP Loans

In billions of dollars

North America Home Equity - Net Credit Losses

In millions of dollars

Note: Totals may not sum due to rounding.

North America Home Equity Loan Delinquencies - Citi Holdings

In billions of dollars

Note: Totals may not sum due to rounding.

As evidenced by the tables above, net credit losses in the North America home equity loan portfolio continued to improve during the first quarter of 2016, largely driven by the continued improvement in HPI.

Given the limited market in which to sell delinquent home equity loans to date, as well as the relatively smaller number of home equity loan modifications and modification programs (see Note 14 to the Consolidated Financial Statements), Citi's

ability to reduce delinquencies or net credit losses in its home equity loan portfolio in Citi Holdings, whether pursuant to deterioration of the underlying credit performance of these loans, the reset of the Revolving HELOCs (as discussed above) or otherwise, is more limited as compared to residential first mortgages.

North America Home Equity Loans—State Delinquency Trends

The following tables set forth the six U.S. states and/or regions with the highest concentration of Citi's home equity loans:

(1) End-of-period (EOP) loans include interest and fees on credit cards.

(2) The ratios of 90+ days past due and 30–89 days past due are calculated based on EOP loans, net of unearned income.

The 90+ days past due balances for North America—Citi-branded and North America—Citi retail services are generally (3) still accruing interest. Citigroup's policy is generally to accrue interest on credit card loans until 180 days past due, unless notification of bankruptcy filing has been received earlier.

(4) The 90+ days and 30–89 days past due and related ratios for Citicorp North America exclude U.S. mortgage loans that are guaranteed by U.S. government-sponsored entities since the potential loss predominantly resides within the

U.S. government-sponsored entities. The amounts excluded for loans 90+ days past due and (EOP loans) were \$456 million (\$1.1 billion), \$491 million (\$1.1 billion) and \$534 million (\$1.1 billion) at March 31, 2016, December 31, 2015 and March 31, 2015, respectively. The amounts excluded for loans 30–89 days past due (EOP loans have the same adjustment as above) were \$86 million, \$87 million and \$111 million at March 31, 2016, December 31, 2015 and March 31, 2015, respectively.

(5) For reporting purposes, Asia GCB includes the results of operations of EMEA GCB for all periods presented.

The 90+ days and 30–89 days past due and related ratios for Citi Holdings North America exclude U.S. mortgage

(6) loans that are guaranteed by U.S. government-sponsored entities since the potential loss predominantly resides within the U.S. government-sponsored entities. The amounts excluded for loans 90+ days past

due (and EOP loans) for each period were \$1.3 billion (\$1.9 billion), \$1.5 billion (\$2.2 billion) and \$1.8 billion (\$2.5 billion) at March 31, 2016, December 31, 2015 and March 31, 2015, respectively. The amounts excluded for loans 30–89 days past due (EOP loans have the same adjustment as above) for each period were \$0.2 billion, \$0.2 billion and \$0.2 billion at March 31, 2016, December 31, 2015 and March 31, 2015, respectively.

The March 31, 2016, December 31, 2015 and March 31, 2015 loans 90+ days past due and 30–89 days past due and (7) related ratios for North America exclude \$9 million, \$11 million and \$12 million, respectively, of loans that are carried at fair value.

(8) Represents loans classified as Consumer loans on the Consolidated Balance Sheet that are not included in the Citi Holdings consumer credit metrics.

(1) Average loans include interest and fees on credit cards.

(2) The ratios of net credit losses are calculated based on average loans, net of unearned income.

As a result of the entry into an agreement to sell OneMain Financial (OneMain), OneMain was classified as held-for-sale (HFS) beginning March 31, 2015. As a result of HFS accounting treatment, approximately \$74

(3) million of net credit losses (NCLs) were recorded as a reduction in revenue (Other revenue) during the fourth quarter of 2015. Accordingly, these NCLs are not included in this table. Loans HFS are excluded from this table as they are recorded in Other assets.

(4) For reporting purposes, Asia GCB includes the results of operations of EMEA GCB for all periods presented.

(5) Represents NCLs on loans classified as Consumer loans on the Consolidated Balance Sheet that are not included in the Citi Holdings consumer credit metrics.

CORPORATE CREDIT

Consistent with its overall strategy, Citi's corporate clients are typically large, multi-national corporations which value Citi's global network. Citi aims to establish relationships with these clients that encompass multiple products, consistent with client needs, including cash management and trade services, foreign exchange, lending, capital markets and M&A advisory.

Corporate Credit Portfolio

The following table sets forth Citi's corporate credit portfolio within ICG (excluding private bank), before consideration of collateral or hedges, by remaining tenor for the periods indicated:

In billions of dollars	At March 31, 2016				At December 31, 2015			
	Due within 1 year	Greater than 1 year but within 5 years	Greater than 5 years	Total exposure	Due within 1 year	Greater than 1 year but within 5 years	Greater than 5 years	Total exposure
Direct outstandings (on-balance sheet) ⁽¹⁾	\$ 104	\$ 103	\$ 24	\$ 231	\$ 98	\$ 97	\$ 25	\$ 220
Unfunded lending commitments (off-balance sheet) ⁽²⁾	103	225	23	351	99	231	26	356
Total exposure	\$ 207	\$ 328	\$ 47	\$ 582	\$ 197	\$ 328	\$ 51	\$ 576

(1)Includes drawn loans, overdrafts, bankers' acceptances and leases.

(2)Includes unused commitments to lend, letters of credit and financial guarantees.

Portfolio Mix—Geography, Counterparty and Industry

Citi's corporate credit portfolio is diverse across geography and counterparty. The following table shows the percentage by region based on Citi's internal management geography:

	March 31, 2016		December 31, 2015	
North America	56	%	56	%
EMEA	25		25	
Asia	12		12	
Latin America	7		7	
Total	100	%	100	%

The maintenance of accurate and consistent risk ratings across the corporate credit portfolio facilitates the comparison of credit exposure across all lines of business, geographic regions and products. Counterparty risk ratings reflect an estimated probability of default for a counterparty and are derived primarily through the use of validated statistical models, scorecard models and external agency ratings (under defined circumstances), in combination with consideration of factors specific to the obligor or market, such as management experience, competitive position, regulatory environment and commodity prices. Facility risk ratings are assigned that reflect the probability of default of

the obligor and factors that affect the loss-given-default of the facility, such as support or collateral. Internal obligor ratings that generally correspond to BBB and above are

considered investment grade, while those below are considered non-investment grade. Citigroup also has incorporated climate risk assessment and reporting criteria for certain obligors, as necessary. Factors evaluated include consideration of climate risk to an obligor's business and physical assets and, when relevant, consideration of cost-effective options to reduce greenhouse gas emissions.

The following table presents the corporate credit portfolio by facility risk rating as a percentage of the total corporate credit portfolio:

	Total Exposure		
	March 31, 2016		
	December 31, 2015		
AAA/AA/A	48	% 48	%
BBB	35	35	
BB/B	15	15	
CCC or below	2	2	
Unrated	—	—	
Total	100	% 100	%

Note: Total exposure includes direct outstandings and unfunded lending commitments.

Citi's corporate credit portfolio is also diversified by industry. The following table shows the allocation of Citi's total corporate credit portfolio by industry:

	Total Exposure		
	March 31, 2016	December 31, 2015	%
Transportation and industrial	21	20	%
Consumer retail and health	16	16	
Power, chemicals, commodities and metals and mining	12	11	
Technology, media and telecom	11	12	
Energy ⁽¹⁾	8	9	
Banks/broker-dealers/finance companies	7	7	
Real estate	6	6	
Hedge funds	5	5	
Insurance and special purpose entities	5	5	
Public sector	5	5	
Other industries	4	4	
Total	100	100	%

Note: Total exposure includes direct outstandings and unfunded lending commitments.

(1) In addition to this exposure, Citi has energy-related exposure within the "Public sector" (e.g., energy-related state-owned entities) and "Transportation and industrial" sector (e.g., off-shore drilling entities) included in the table above. As of March 31, 2016, Citi's total exposure to these energy-related entities remained largely consistent with the prior quarter, at approximately \$6 billion, of which approximately \$4 billion consisted of direct outstanding funded loans.

Exposure to the Energy and Energy-Related Sector

As of March 31, 2016, Citi's total corporate credit exposure to the energy and energy-related sector (see footnote 1 to the table above) was approximately \$57 billion, with approximately \$22 billion of direct outstanding funded loans, or 4% of Citi's total outstanding loans. This compared to approximately \$58 billion of total corporate credit exposure and \$21 billion of direct outstanding funded loans as of December 31, 2015. In addition, as of March 31, 2016, approximately 72% of Citi's total corporate credit energy and energy-related exposure was in the United States, United Kingdom and Canada (unchanged when compared to December 31, 2015). Also as of March 31, 2016, approximately 73% of Citi's total energy and energy-related exposures were rated investment grade compared to approximately 80% as of December 31, 2015. While the portfolio did experience ratings downgrades during the quarter due to the sustained low oil prices as well as the impact of regulatory guidance, this was partially offset by paydowns and other improvements in the overall underlying portfolio.

During the first quarter of 2016, Citi built additional energy and energy-related loan loss reserves of approximately \$260 million, and incurred approximately \$115 million of net credit losses in the portfolio. As of March 31, 2016, Citi held loan loss reserves against its

funded energy and energy-related loans equal to approximately 4.2% of these loans, with a funded reserve ratio of over 10% on the non-investment grade portion of the portfolio.

For information on Citi's energy and energy-related exposures within GCB's commercial banking business within retail banking, see "Commercial Credit—GCB Commercial Banking Exposure to the Energy and Energy-Related Sector" below.

Credit Risk Mitigation

As part of its overall risk management activities, Citigroup uses credit derivatives and other risk mitigants to hedge portions of the credit risk in its corporate credit portfolio, in addition to outright asset sales. The results of the

mark-to-market and any realized gains or losses on credit derivatives are reflected primarily in Other revenue on the Consolidated Statement of Income.

At March 31, 2016 and December 31, 2015, \$36.6 billion and \$34.5 billion, respectively, of the corporate credit portfolio was economically hedged. Citigroup's expected loss model used in the calculation of its loan loss reserve does not include the favorable impact of credit derivatives and other mitigants that are marked to market. In addition, the reported amounts of direct outstandings and unfunded lending commitments in the tables above do not reflect the impact of these hedging transactions. The credit protection was economically hedging underlying corporate credit portfolio exposures with the following risk rating distribution:

Rating of Hedged Exposure

	March 31, December 31,			
	2016		2015	
AAA/AA/A	19	%	21	%
BBB	53		48	
BB/B	25		27	
CCC or below	3		4	
Total	100	%	100	%

The credit protection was economically hedging underlying corporate credit portfolio exposures with the following industry distribution:

Industry of Hedged Exposure

	March 31, December 31,			
	2016		2015

Banks/broker-dealers	4		4	
Other industries	1		1	
Total	100	%	100	%

COMMERCIAL CREDIT

GCB Commercial Banking Exposure to the Energy and Energy-Related Sector

In addition to the total corporate credit exposure to the energy and energy-related sector described above, Citi's commercial banking business, reported within GCB retail banking, had total credit exposure to the energy and energy-related sector of approximately \$2.1 billion at March 31, 2016, with approximately \$1.4 billion of direct outstanding funded loans, or 4% of the total outstanding commercial banking loans. This compared to approximately \$2.4 billion of total credit exposure and \$1.6 billion of direct outstanding funded energy and energy-related loans as of December 31, 2015. In addition, as of March 31, 2016, approximately 88% of commercial banking's total credit exposure to the energy and energy-related sector was in the U.S. (compared to approximately 85% at December 31, 2015). Approximately 29% of commercial banking's total energy and energy-related exposure was rated investment grade at March 31, 2016 (compared to approximately 52% as of December 31, 2015).

During the first quarter of 2016, Citi built additional energy and energy-related loan loss reserves by approximately \$80 million, and did not incur any net credit losses on this commercial banking portfolio. As of March 31, 2016, Citi held loan loss reserves against its funded energy and energy-related commercial banking loans equal to approximately 9.6% of these loans.

(1) Loans secured primarily by real estate.

Unearned income on consumer loans primarily represents unamortized origination fees, costs, premiums and discounts. Prior to December 31, 2015, these items were more than offset by prepaid interest on loans outstanding issued by OneMain Financial. The sale of OneMain Financial was completed on November 16, 2015.

(3) Unearned income on corporate loans primarily represents interest received in advance but not yet earned on loans originated on a discount basis.

(4) All periods exclude loans that are carried at fair value.

(1) Recoveries have been reduced by certain collection costs that are incurred only if collection efforts are successful.

(2) Includes all adjustments to the allowance for credit losses, such as changes in the allowance from acquisitions, dispositions, securitizations, FX translation, purchase accounting adjustments, etc.

(3) The first quarter of 2016 includes a reduction of approximately \$148 million related to the sale or transfers to held-for-sale (HFS) of various loan portfolios, including a reduction of \$29 million related to the transfers of a real estate loan portfolio to HFS. Additionally, the first quarter includes an increase of approximately \$63 million related to FX translation.

(4) The fourth quarter of 2015 includes a reduction of approximately \$1.1 billion related to the sale or transfers to HFS of various loan portfolios, including a reduction of \$1.1 billion related to the transfers of a real estate loan portfolio to HFS. Additionally, the fourth quarter includes a reduction of approximately \$35 million related to FX translation.

(5) The fourth quarter of 2015 includes a reclassification of \$271 million of Allowance for loan losses to allowance for unfunded lending commitments, included in the Other line item. This reclassification reflects the re-attribution of \$271 million in allowance for credit losses between the funded and unfunded portions of the corporate credit portfolios and does not reflect a change in the underlying credit performance of these portfolios.

(6) The third quarter of 2015 includes a reduction of approximately \$110 million related to the sale or transfers to HFS of various loan portfolios, including a reduction of \$14 million related to a transfer of a real estate loan portfolio to HFS. Additionally, the third quarter includes a reduction of approximately \$255 million related to FX translation.

(7) The second quarter of 2015 includes a reduction of approximately \$88 million related to the sale or transfers to held-for-sale (HFS) of various loan portfolios, including a reduction of \$34 million related to a transfer of a real estate loan portfolio to HFS. Additionally, the second quarter of 2015 includes a reduction of approximately \$39 million related to FX translation.

(8) The first quarter of 2015 includes a reduction of approximately \$1.0 billion related to the sale or transfers to HFS of various loan portfolios, including a reduction of \$281 million related to a transfer of a real estate loan portfolio to HFS. Additionally, the first quarter of 2015 includes a reduction of approximately \$145 million related to FX translation.

(9) March 31, 2016, December 31, 2015, September 30, 2015, June 30, 2015 and March 31, 2015 exclude \$4.8 billion, \$5.0 billion, \$5.5 billion, \$6.5 billion and \$6.6 billion, respectively, of loans which are carried at fair value.

(10) Represents additional credit reserves recorded as Other liabilities on the Consolidated Balance Sheet.

(11) Allowance for loan losses represents management's best estimate of probable losses inherent in the portfolio, as well as probable losses related to large individually evaluated impaired loans and troubled debt restructurings. See "Significant Accounting Policies and Significant Estimates" and Note 1 to the Consolidated Financial Statements in Citi's 2015 Annual Report on Form 10-K. Attribution of the allowance is made for analytical purposes only and the entire allowance is available to absorb probable credit losses inherent in the overall portfolio.

Allowance for Loan Losses

The following tables detail information on Citi's allowance for loan losses, loans and coverage ratios:

In billions of dollars	March 31, 2016			
	Allowance for loan losses	Loans net of unearned income	Allowance as a percentage of loans ⁽¹⁾	
North America cards ⁽²⁾	\$4.5	\$ 107.5	4.2	%
North America mortgages ⁽³⁾	1.6	78.7	2.0	
North America other	0.6	13.3	4.5	
International cards	1.5	25.6	5.9	
International other ⁽⁴⁾	1.6	92.8	1.7	
Total consumer	\$9.8	\$ 317.9	3.1	%
Total corporate	2.9	300.9	1.0	
Total Citigroup	\$12.7	\$ 618.8	2.1	%

(1) Allowance as a percentage of loans excludes loans that are carried at fair value.

(2) Includes both Citi-branded cards and Citi retail services. The \$4.5 billion of loan loss reserves represented approximately 15 months of coincident net credit loss coverage.

Of the \$1.6 billion, approximately \$1.5 billion was allocated to North America mortgages in Citi Holdings. Of the \$1.6 billion, approximately \$0.5 billion and \$1.1 billion are determined in accordance with ASC 450-20 and ASC 310-10-35 (troubled debt restructurings), respectively. Of the \$78.7 billion in loans, approximately \$72.0 billion and \$6.7 billion of the loans are evaluated in accordance with ASC 450-20 and ASC 310-10-35 (troubled debt restructurings), respectively. For additional information, see Note 15 to the Consolidated Financial Statements.

(3) Includes mortgages and other retail loans.

(4) Includes mortgages and other retail loans.

In billions of dollars	December 31, 2015			
	Allowance for loan losses	Loans net of unearned income	Allowance as a percentage of loans ⁽¹⁾	
North America cards ⁽²⁾	\$4.5	\$ 113.4	4.0	%
North America mortgages ⁽³⁾	1.7	79.6	2.1	
North America other	0.5	13.0	3.8	
International cards	1.6	26.7	6.0	
International other ⁽⁴⁾	1.5	93.1	1.6	
Total consumer	\$9.8	\$ 325.8	3.0	%
Total corporate	2.8	291.8	1.0	
Total Citigroup	\$12.6	\$ 617.6	2.1	%

(1) Allowance as a percentage of loans excludes loans that are carried at fair value.

(2) Includes both Citi-branded cards and Citi retail services. The \$4.5 billion of loan loss reserves represented approximately 15 months of coincident net credit loss coverage.

Of the \$1.7 billion, approximately \$1.6 billion was allocated to North America mortgages in Citi Holdings. Of the \$1.7 billion, approximately \$0.6 billion and \$1.1 billion are determined in accordance with ASC 450-20 and ASC 310-10-35 (troubled debt restructurings), respectively. Of the \$79.6 billion in loans, approximately \$72.3 billion and \$7.1 billion of the loans are evaluated in accordance with ASC 450-20 and ASC 310-10-35 (troubled debt restructurings), respectively. For additional information, see Note 15 to the Consolidated Financial Statements.

(3) Includes mortgages and other retail loans.

(4) Includes mortgages and other retail loans.

Non-Accrual Loans and Assets and Renegotiated Loans

There is a certain amount of overlap among non-accrual loans and assets and renegotiated loans. The following summary provides a general description of each category:

Non-Accrual Loans and Assets:

Corporate and consumer (commercial market) non-accrual status is based on the determination that payment of interest or principal is doubtful.

A corporate loan may be classified as non-accrual and still be performing under the terms of the loan structure.

Payments received on corporate non-accrual loans are generally applied to loan principal and not reflected as interest income. Approximately 46% and 45% of Citi's corporate non-accrual loans were performing at March 31, 2016 and December 31, 2015, respectively.

Consumer non-accrual status is generally based on aging, i.e., the borrower has fallen behind on payments.

Mortgage loans in regulated bank entities discharged through Chapter 7 bankruptcy, other than FHA insured loans, are classified as non-accrual. Non-bank mortgage loans discharged through Chapter 7 bankruptcy are classified as non-accrual at 90 days or more past due. In addition, home equity loans in regulated bank entities are classified as non-accrual if the related residential first mortgage loan is 90 days or more past due.

North America Citi-branded cards and Citi retail services are not included because, under industry standards, credit card loans accrue interest until such loans are charged off, which typically occurs at 180 days contractual delinquency.

Renegotiated Loans:

Includes both corporate and consumer loans whose terms have been modified in a troubled debt restructuring (TDR).

Includes both accrual and non-accrual TDRs.

Non-Accrual Loans and Assets

The table below summarizes Citigroup's non-accrual loans as of the periods indicated. Non-accrual loans may still be current on interest payments. In situations where Citi reasonably expects that only a portion of the principal owed will ultimately be collected, all payments received are reflected as a reduction of principal and not as interest income. For all other non-accrual loans, cash interest receipts are generally recorded as revenue.

As set forth in the tables below, Citi's corporate non-accrual loans within Citicorp increased during the first quarter of 2016 by 47% or approximately \$730 million, with approximately \$500 million of such increase related to energy and energy-related exposures (for additional information on these exposures, see "Corporate Credit" above). Approximately two-thirds of the total additions to corporate non-accrual loans during the quarter remained performing as of March 31, 2016.

	Mar. 31, 2016	Dec. 31, 2015	Sept. 30, 2015	Jun. 30, 2015	Mar. 31, 2015

Citi Holdings	2,158	2,210	3,433	3,745	4,027
Total consumer non-accrual loans	\$3,601	\$3,658	\$4,829	\$5,261	\$5,572

Excludes purchased distressed loans, as they are generally accreting interest. The carrying value of these loans was (1) \$236 million at March 31, 2016, \$250 million at December 31, 2015, \$320 million at September 30, 2015, \$343 million at June 30, 2015 and \$398 million at March 31, 2015.

The increase in corporate non-accrual loans during the third quarter of 2015 primarily related to Citi's North America energy and energy-related corporate credit exposure. For additional information, see "Credit Risk—Corporate Credit" in Citi's 2015 Annual Report on Form 10-K.

(3) The December 31, 2015 decline includes the impact related to the transfer of approximately \$8 billion of mortgage loans to Loans, held-for-sale (HFS) (included within Other assets).

(4) For reporting purposes, Asia GCB includes the results of operations of EMEA GCB for all periods presented.

The changes in Citigroup's non-accrual loans were as follows:

In millions of dollars	Three months ended March 31, 2016			Three months ended March 31, 2015		
	Corporate	Consumer	Total	Corporate	Consumer	Total

Allowance for loan losses as a percentage of NAL ⁽¹⁾	98	101	98	98	96

The allowance for loan losses includes the allowance for Citi's credit card portfolios and purchased distressed loans, (1) while the non-accrual loans exclude credit card balances (with the exception of certain international portfolios) and purchased distressed loans as these continue to accrue interest until charge-off.

(2) The December 31, 2015 decline includes the impact related to the transfer of approximately \$8 billion of mortgage loans to Loans, held-for-sale (HFS) (included within Other assets).

Renegotiated Loans

The following table presents Citi's loans modified in TDRs.

In millions of dollars	Mar. 31, 2016	Dec. 31, 2015
Corporate renegotiated loans ⁽¹⁾		
In U.S. offices		
Commercial and industrial ⁽²⁾	\$20	\$25
Mortgage and real estate ⁽³⁾	105	104
Loans to financial institutions	2	5
Other	264	273
	\$391	\$407
In offices outside the U.S.		
Commercial and industrial ⁽²⁾	\$199	\$111
Mortgage and real estate ⁽³⁾	34	33
Other	39	45
	\$272	\$189
Total corporate renegotiated loans	\$663	\$596
Consumer renegotiated loans ⁽⁴⁾⁽⁵⁾⁽⁶⁾⁽⁷⁾		
In U.S. offices		
Mortgage and real estate ⁽⁸⁾	\$6,633	\$7,058
Cards	1,349	1,396

Cards	549	555
Installment and other	494	514
	\$1,567	\$1,543
Total consumer renegotiated loans	\$9,623	\$10,076

(1) Includes \$355 million and \$258 million of non-accrual loans included in the non-accrual assets table above at March 31, 2016 and December 31, 2015, respectively. The remaining loans are accruing interest.

(2) In addition to modifications reflected as TDRs at March 31, 2016, Citi also modified \$263 million commercial loans risk rated "Substandard Non-Performing" or worse (asset category defined by banking regulators) all within offices in the U.S. These modifications were not considered TDRs because the modifications did not involve a concession (a required element of a TDR for accounting purposes).

(3) In addition to modifications reflected as TDRs at March 31, 2016, Citi also modified \$13 million of commercial real estate loans risk rated "Substandard Non-Performing" or worse (asset category defined by banking regulators) in offices inside the U.S. These modifications were not considered TDRs because the modifications did not involve a concession (a required element of a TDR for accounting purposes).

(4) Includes \$1,772 million and \$1,852 million of non-accrual loans included in the non-accrual assets table above at March 31, 2016 and December 31, 2015, respectively. The remaining loans are accruing interest.

(5) Includes \$95 million and \$53 million of commercial real estate loans at March 31, 2016 and December 31, 2015, respectively.

(6) Includes \$70 million and \$128 million of other commercial loans at March 31, 2016 and December 31, 2015, respectively.

(7) Smaller-balance homogeneous loans were derived from Citi's risk management systems.

(8) Reduction in the first quarter of 2016 includes \$251 million related to TDRs sold or transferred to held-for-sale.

LIQUIDITY RISK

For additional information on funding and liquidity at Citigroup, including its objectives, management and measurement, see “Liquidity Risk” and “Risk Factors” in Citi’s 2015 Annual Report on Form 10-K.

High-Quality Liquid Assets (HQLA)

	Citibank			Non-Bank and Other ⁽¹⁾			Total		
	Mar. 31, 2016	Dec. 31, 2015	Mar. 31, 2015	Mar. 31, 2016	Dec. 31, 2015	Mar. 31, 2015	Mar. 31, 2016	Dec. 31, 2015	Mar. 31, 2015
In billions of dollars									
Available cash	\$74.2	\$52.4	\$76.1	\$24.5	\$16.9	\$18.3	\$98.7	\$69.3	\$94.5

Foreign government debt ⁽²⁾	86.8	84.8	96.9	19.6	14.9	13.4	106.4	99.7	110.3
Other investment grade	1.1	1.0	1.2	1.6	1.2	1.9	2.7	2.2	3.1
Total HQLA (EOP)	\$348.7	\$312.1	\$345.6	\$68.8	\$66.4	\$54.9	\$417.5	\$378.5	\$400.5
Total HQLA (AVG)	\$335.1	\$325.8	—	\$65.0	\$63.4	—	\$400.1	\$389.2	—

Note: Except as indicated, amounts set forth in the table above are as of period end and may increase or decrease intra-period in the ordinary course of business. For securities, the amounts represent the liquidity value that potentially could be realized, and thus exclude any securities that are encumbered, as well as the haircuts that would be required for securities financing transactions. The Federal Reserve Board has proposed requiring disclosure of HQLA, the Liquidity Coverage Ratio and related components on an average basis each quarter, as compared to end-of-period (for additional information, see “Liquidity Coverage Ratio (LCR)” below). Citi has presented in this Form 10-Q the average information on these metrics currently available, which includes average total HQLA, average LCR and average net outflows under the LCR for the periods 1Q’16 and 4Q’15; 1Q’15 and other component information is not currently available.

(1) “Non-Bank and Other” includes the parent holding company (Citigroup), Citi’s broker-dealer subsidiaries and other non-bank subsidiaries that are consolidated into Citigroup as well as Banamex and Citibank (Switzerland) AG. Banamex and Citibank (Switzerland) AG account for approximately \$8 billion of the “Non-Bank and Other” HQLA balance as of March 31, 2016.

Foreign government debt includes securities issued or guaranteed by foreign sovereigns, agencies and multilateral development banks. Foreign government debt securities are held largely to support local liquidity requirements and Citi’s local franchises, and principally include government bonds from India, Korea, Mexico, Poland and Singapore.

As set forth in the table above, Citi’s total HQLA increased sequentially on both an end-of-period and average basis, driven primarily by increases in deposit balances.

Citi’s HQLA as set forth above does not include Citi’s available borrowing capacity from the Federal Home Loan Banks (FHLB) of which Citi is a member, which was approximately \$37 billion as of March 31, 2016 (compared to \$36 billion as of December 31, 2015 and \$38 billion as of March 31, 2015) and maintained by eligible collateral pledged to such banks. The HQLA also does not include Citi’s borrowing capacity at the U.S. Federal Reserve Bank

discount window or other central banks, which would be in addition to the resources noted above.

In general, Citi's liquidity is fungible across legal entities within its bank group. Citi's bank subsidiaries, including Citibank, can lend to the Citi parent and broker-dealer entities in accordance with Section 23A of the Federal Reserve Act. As of March 31, 2016, the capacity available for lending to these entities under Section 23A was approximately \$14 billion, compared to \$17 billion as of both December 31, 2015 and March 31, 2015, subject to certain eligible non-cash collateral requirements.

Loans

The table below sets forth the end-of-period loans, by business and/or segment, and the total average loans for each of the periods indicated:

In billions of dollars	Mar. 31, 2016	Dec. 31, 2015	Mar. 31, 2015

Private bank, markets and securities services and other	108.2	105.3	97.8
Total	\$300.8	\$291.6	\$283.1
Total Citicorp	573.4	568.6	553.9
Total Citi Holdings	45.4	49.0	67.2
Total Citigroup loans (EOP)	\$618.8	\$617.6	\$621.1
Total Citigroup loans (AVG)	\$612.2	\$625.1	\$634.8

(1) For reporting purposes, includes EMEA GCB for all periods presented.

End-of-period loans remained relatively unchanged both year-over-year and quarter-over-quarter. Excluding the impact of FX translation, Citigroup's end-of-period loans increased 1% year-over-year and remained relatively unchanged sequentially, as growth in Citicorp offset continued reductions in Citi Holdings.

Excluding the impact of FX translation, Citicorp loans increased 5% year-over-year. GCB loans grew 2% year-over-year, driven by 4% growth in North America, including 2% growth in Citi-branded cards. International GCB loans remained relatively unchanged, as reductions in mortgages was offset by continued growth in personal loans and cards. ICG loans increased 7% year-over-year. Within ICG, corporate loans increased 10% driven by both new business and the funding of transaction-related commitments to target market clients. While treasury and trade solutions loans declined 1%, private bank, markets and securities services loans grew 11% year-over-year driven by continued opportunities to support client activities.

Citi Holdings loans decreased 32% year-over-year driven by \$18 billion of reductions in North America mortgages, including transfers to held-for-sale (see Note 14 to the Consolidated Financial Statements).

Deposits

The table below sets forth the end-of-period deposits, by business and/or segment, and the total average deposits for each of the periods indicated:

In billions of dollars	Mar. 2016	Dec. 2015	Mar. 2015
Global Consumer Banking			
North America	\$183.7	\$181.6	\$181.6
Latin America	28.3	28.7	29.0
Asia ⁽¹⁾	90.7	87.6	89.5
Total	\$302.7	\$297.9	\$300.1
Institutional Clients Group			
Treasury and trade solutions (TTS)	415.0	392.1	386.5
Banking ex-TTS	114.6	118.8	104.4
Markets and securities services	77.5	76.7	80.5
Total	\$607.1	\$587.7	\$571.3
Corporate/Other	15.6	12.0	12.3
Total Citicorp	\$925.4	\$897.6	\$883.7
Total Citi Holdings	9.2	10.3	15.9
Total Citigroup deposits (EOP)	\$934.6	\$907.9	\$899.6
Total Citigroup deposits (AVG)	\$911.7	\$908.8	\$899.5

(1) For reporting purposes, includes EMEA GCB for all periods presented.

End-of-period deposits increased 4% year-over-year and 3% quarter-over-quarter. Excluding the impact of FX translation, Citigroup's end-of-period deposits increased 5% year-over-year and 2% sequentially, despite continued reductions in Citi Holdings deposits.

Excluding the impact of FX translation, Citicorp deposits grew 6% year-over-year. Within Citicorp, GCB deposits

increased 2% year-over-year, driven by 4% growth in international deposits. ICG deposits increased 7% year-over-year, driven by increased operating flows from new and existing clients within treasury and trade solutions. The decline in Citi Holdings deposits from the prior-year period was primarily driven by the now-complete transfer of Morgan Stanley Smith Barney (MSSB) deposits to Morgan Stanley.

Long-Term Debt

The weighted-average maturities of unsecured long-term debt issued by Citigroup and its affiliates (including Citibank) with a remaining life greater than one year (excluding remaining trust preferred securities outstanding) was

approximately 7.0 years as of March 31, 2016, a slight increase from both the prior-year period and sequentially, due primarily to the issuance of longer-dated debt securities during the first quarter of 2016 including in response to proposed total loss-absorbing capacity, or TLAC, requirements (for additional information on TLAC, see “Liquidity Risk— Long-Term Debt— Total Loss Absorbing Capacity (TLAC)” and “Risk Factors— Liquidity Risks” in Citi’s 2015 Annual Report on Form 10-K).

Citi’s long-term debt outstanding at the parent includes senior and subordinated debt and what Citi refers to as customer-related debt, consisting of structured notes, such as equity- and credit-linked notes, as well as non-structured notes. Citi’s issuance of customer-related debt is generally driven by customer demand and supplements benchmark debt issuance as a source of funding for Citi’s parent entities. Citi’s long-term debt at the bank also includes FHLB advances and securitizations.

Long-Term Debt Outstanding

The following table sets forth Citi's total long-term debt outstanding for the periods indicated:

	Mar.	Dec.	Mar.
In billions of dollars	31,	31,	31,
	2016	2015	2015
Parent			
Benchmark debt:			
Senior debt	\$94.0	\$90.3	\$96.7
Subordinated debt	29.4	26.9	25.5
Trust preferred	1.7	1.7	1.7
Customer-related debt:			
Structured debt	23.6	21.8	21.9
Non-structured debt	3.3	3.0	5.0
Local country and other ⁽¹⁾	4.1	2.4	1.0
Total parent	\$156.1	\$146.1	\$151.8
Bank			
FHLB borrowings	\$17.1	\$17.8	\$16.3
Securitized ⁽²⁾	28.7	30.9	35.2
Local country and other ⁽¹⁾	6.0	6.5	7.2
Total bank	\$51.7	\$55.2	\$58.7
Total long-term debt	\$207.8	\$201.3	\$210.5

Note: Amounts represent the current value of long-term debt on Citi's Consolidated Balance Sheet which, for certain debt instruments, includes consideration of fair value, hedging impacts and unamortized discounts and premiums.

(1) Local country debt includes debt issued by Citi's affiliates in support of their local operations.

(2) Predominantly credit card securitizations, primarily backed by Citi-branded credit card receivables.

Citi's total long-term debt outstanding decreased year-over-year but increased sequentially. Year-over-year, long-term debt decreased primarily due to continued reductions in securitizations at the bank entities, partially offset by issuances at the parent. Sequentially, long-term debt increased primarily due to the issuance of senior and subordinated debt at the parent during the first quarter of 2016, partially offset by continued declines in securitizations at the bank entities.

As part of its liability management, Citi has considered, and may continue to consider, opportunities to repurchase its long-term debt pursuant to open market purchases, tender offers or other means. Such repurchases help reduce Citi's overall funding costs and assist it in meeting regulatory changes and requirements. During the first quarter of 2016, Citi repurchased an aggregate of approximately \$0.5 billion of its outstanding long-term debt.

Long-Term Debt Issuances and Maturities

The table below details Citi's long-term debt issuances and maturities (including repurchases and redemptions) during the periods presented:

	1Q16		4Q15		1Q15	
In billions of dollars	Maturities	Issuances	Maturities	Issuances	Maturities	Issuances
Parent						
Benchmark debt:						
Senior debt	\$4.3	\$ 5.2	\$12.8	\$ 5.2	\$5.1	\$ 6.1

Edgar Filing: CITIGROUP INC - Form 10-Q

Subordinated debt	—	1.5	0.9	1.5	0.4	1.0
Trust preferred	—	—	—	—	—	—
Customer-related debt:

Total long-term debt	\$ 11.5	\$33.7	\$37.0	\$31.9	\$19.6	\$10.7	\$10.2	\$ 64.8	\$207.8

Secured Funding Transactions and Short-Term Borrowings

Citi supplements its primary sources of funding with short-term borrowings. Short-term borrowings generally include (i) secured funding transactions (securities loaned or sold under agreements to repurchase, or repos) and (ii) to a lesser extent, short-term borrowings consisting of commercial paper and borrowings from the FHLB and other market participants. See Note 17 to the Consolidated Financial Statements for further information on Citigroup's and its affiliates' outstanding short-term borrowings. Citi has purposefully reduced its commercial paper and other short-term borrowings, including FHLB borrowings, as it continued to grow its high-quality deposits.

Secured Funding

Secured funding is primarily accessed through Citi's broker-dealer subsidiaries to fund efficiently both secured lending activity and a portion of securities inventory held in the context of market making and customer activities. Citi also executes a smaller portion of its secured funding transactions through its bank entities, which is typically collateralized by foreign government debt securities. Generally, daily changes in the level of Citi's secured funding are primarily due to fluctuations in secured lending activity in the matched book (as described below) and securities inventory.

Secured funding of \$157 billion as of March 31, 2016 declined 10% from the prior-year period and increased 7% sequentially. Excluding the impact of FX translation, secured funding decreased 11% from the prior-year period and increased 6% sequentially, both driven by normal business activity. Average balances for secured funding were

approximately \$163 billion for the quarter ended March 31, 2016.

The portion of secured funding in the broker-dealer subsidiaries that funds secured lending is commonly referred to as "matched book" activity. The majority of this activity is secured by high quality, liquid securities such as U.S. Treasury securities, U.S. agency securities and foreign government debt securities. Other secured funding is secured by less liquid securities, including equity securities, corporate bonds and asset-backed securities. The tenor of Citi's matched book liabilities is generally equal to or longer than the tenor of the corresponding matched book assets.

The remainder of the secured funding activity in the broker-dealer subsidiaries serves to fund securities inventory held in the context of market making and customer activities. To maintain reliable funding under a wide range of market conditions, including under periods of stress, Citi manages these activities by taking into consideration the quality of the underlying collateral, and stipulating financing tenor. The weighted average maturity of Citi's secured funding of less liquid securities inventory was greater than 110 days as of March 31, 2016.

Citi manages the risks in its secured funding by conducting daily stress tests to account for changes in capacity, tenors, haircut, collateral profile and client actions. Additionally, Citi maintains counterparty diversification by establishing concentration triggers and assessing counterparty reliability and stability under stress. Citi generally sources secured funding from more than 150 counterparties.

Liquidity Coverage Ratio (LCR)

In addition to internal measures that Citi has developed for a 30-day stress scenario, Citi also monitors its liquidity by reference to the LCR, as calculated pursuant to the U.S. LCR rules.

Generally, the LCR is designed to ensure that banks maintain an adequate level of HQLA to meet liquidity needs under an acute 30-day stress scenario. The LCR is calculated by dividing HQLA by estimated net outflows over a stressed 30-day period, with the net outflows determined by applying prescribed outflow factors to various categories of liabilities, such as deposits, unsecured and secured wholesale borrowings, unused lending commitments and derivatives-related exposures, partially offset by inflows from assets maturing within 30 days. Banks are required to calculate an add-on to address potential maturity mismatches between contractual cash outflows and inflows within the 30-day period in determining the total amount of net outflows. The minimum LCR requirement is 90% effective January 2016, increasing to 100% in January 2017.

In November 2015, the Federal Reserve Board issued proposed rules which would require additional disclosures relating to the LCR of large financial institutions, including Citi. Among other things, the proposed rules would require Citi to disclose its average HQLA, LCR and inflows and outflows each quarter, as compared to end-of-period amounts as Citi previously disclosed. In addition, the proposed rules would require disclosure of Citi's calculation of the maturity mismatch add-on as well as other qualitative disclosures. The comment period on the proposed rules ended on February 2, 2016 and, while the Board proposed a July 1, 2016 effective date for these disclosures, final rules have not yet been implemented.

The table below sets forth the components of Citi's LCR calculation and HQLA in excess of net outflows as of the periods indicated:

In billions of dollars	Mar. 31, 2016	Dec. 31, 2015	Mar. 31, 2015	
HQLA	\$400.1	\$389.2	\$400.5	
Net outflows	333.3	344.4	361.0	
LCR	120	% 113	% 111	%
HQLA in excess of net outflows	\$66.8	\$44.8	\$39.5	

Note: Amounts for 1Q'16 and 4Q'15 set forth in the table above are presented on an average basis; amounts for 1Q'15 are presented end-of-period (see the discussion preceding the table above). Accordingly, data in 1Q'16 and 4Q'15 is not directly comparable to data in 1Q'15.

As set forth in the table above, Citi's LCR increased sequentially driven both by the increase in HQLA as discussed above, as well as lower net outflows due to a lengthening in the maturity of both deposits and repos.

Net Stable Funding Ratio (NSFR)

On April 26, 2016, the FDIC and the OCC issued a proposed rule to implement the Basel III NSFR requirement, and the Federal Reserve Board is expected to consider a proposed NSFR rule in early May 2016.

Based on the FDIC and OCC proposal, the U.S. proposed NSFR is largely consistent with the Basel Committee's final NSFR rules (for additional information, see "Liquidity Risk— Liquidity Monitoring and Measurement" in Citi's 2015 Annual Report on Form 10-K). In general, the NSFR assesses the availability of a bank's stable funding against a required level. A bank's available stable funding would include portions of equity, deposits and long-term debt, while its required stable funding would be based on the liquidity characteristics of its assets, derivatives and commitments. Standardized weightings would be required to be applied to the various asset and liabilities classes. The ratio of available stable funding to required stable funding would be required to be greater than 100%. The proposal would require full implementation of the NSFR beginning January 1, 2018. Citi continues to review this recently-issued proposal.

Credit Ratings

The table below sets forth the ratings for Citigroup and Citibank as of March 31, 2016. While not included in the table below, the long-term and short-term ratings of Citigroup Global Markets Inc. (CGMI) were A/A-1 at Standard & Poor's and A+/F1 at Fitch as of March 31, 2016. The long-term and short-term ratings of Citigroup Global Markets Holdings Inc. (CGMHI) were BBB+/A-2 at Standard & Poor's and A/F1 at Fitch as of March 31, 2016.

	Citigroup Inc.			Citibank, N.A.		
	Senior debt	Commercial paper	Outlook	Long-term	Short-term	Outlook
Fitch Ratings (Fitch)	A	F1	Stable	A+	F1	Stable
Moody's Investors Service (Moody's)	Baa1	P-2	Stable	A1	P-1	Stable
Standard & Poor's (S&P)	BBB+ A-2		Stable	A	A-1	Watch Positive

Potential Impacts of Ratings Downgrades

Ratings downgrades by Moody's, Fitch or S&P could negatively impact Citigroup's and/or Citibank's funding and liquidity due to reduced funding capacity, including derivatives triggers, which could take the form of cash obligations and collateral requirements.

The following information is provided for the purpose of analyzing the potential funding and liquidity impact to Citigroup and Citibank of a hypothetical, simultaneous ratings downgrade across all three major rating agencies. This analysis is subject to certain estimates, estimation methodologies, and judgments and uncertainties. Uncertainties include potential ratings limitations that certain entities may have with respect to permissible counterparties, as well as general subjective counterparty behavior. For example, certain corporate customers and markets counterparties could re-evaluate their business relationships with Citi and limit transactions in certain contracts or market instruments with Citi. Changes in counterparty behavior could impact Citi's funding and liquidity, as well as the results of operations of certain of its businesses. The actual impact to Citigroup or Citibank is unpredictable and may differ materially from the potential funding and liquidity impacts described below. For additional information on the impact of credit rating changes on Citi and its applicable subsidiaries, see "Risk Factors—Liquidity Risks" in Citi's 2015 Annual Report on Form 10-K.

Citigroup Inc. and Citibank—Potential Derivative Triggers

As of March 31, 2016, Citi estimates that a hypothetical one-notch downgrade of the senior debt/long-term rating of Citigroup Inc. across all three major rating agencies could impact Citigroup's funding and liquidity due to derivative triggers by approximately \$0.8 billion, compared to \$0.6 billion as of December 31, 2015. Other funding sources, such as securities financing transactions and other margin requirements, for which there are no explicit triggers, could also be adversely affected.

As of March 31, 2016, Citi estimates that a hypothetical one-notch downgrade of the senior debt/long-term rating of Citibank across all three major rating agencies could impact Citibank's funding and liquidity by approximately \$1.3 billion, unchanged from December 31, 2015, due to derivative triggers.

In total, Citi estimates that a one-notch downgrade of Citigroup and Citibank, across all three major rating agencies, could result in aggregate cash obligations and collateral requirements of approximately \$2.1 billion, compared to \$1.9 billion as of December 31, 2015 (see also Note 21 to the Consolidated Financial Statements). As set forth under "High-Quality Liquid Assets" above, the liquidity resources of Citibank were approximately \$335 billion and the liquidity resources of Citi's non-bank and other entities were approximately \$65 billion, for a total of approximately \$400 billion as of March 31, 2016. These liquidity resources are available in part as a contingency for the potential events described above.

In addition, a broad range of mitigating actions are currently included in Citigroup's and Citibank's contingency funding plans. For Citigroup, these mitigating factors include, but are not limited to, accessing surplus funding capacity from existing clients, tailoring levels of secured lending, and adjusting the size of select trading books and collateralized borrowings from certain Citibank subsidiaries. Mitigating actions available to Citibank include, but are not limited to, selling or financing highly liquid government securities, tailoring levels of secured lending, adjusting the size of select trading assets, reducing loan originations and renewals, raising additional deposits, or borrowing from the FHLB or central banks. Citi believes these mitigating actions could substantially reduce the funding and liquidity risk, if any, of the potential downgrades described above.

Citibank—Additional Potential Impacts

In addition to the above derivative triggers, Citi believes that a potential one-notch downgrade of Citibank's senior debt/long-term rating by S&P could also have an adverse impact on the commercial paper/short-term rating of Citibank. As of March 31, 2016, Citibank had liquidity commitments of approximately \$10.0 billion to consolidated asset-backed commercial paper conduits, unchanged from December 31, 2015 (as referenced in Note 20 to the Consolidated Financial Statements).

In addition to the above-referenced liquidity resources of certain Citibank and Banamex entities, Citibank could reduce the funding and liquidity risk, if any, of the potential downgrades described above through mitigating actions, including repricing or reducing certain commitments to commercial paper conduits. In the event of the potential downgrades described above, Citi believes that certain corporate customers could re-evaluate their deposit relationships with Citibank. This re-evaluation could result in clients adjusting their discretionary deposit levels or changing their depository institution, which could potentially reduce certain deposit levels at Citibank. However, Citi could choose to adjust pricing, offer alternative deposit products to its existing customers or seek to attract deposits from new customers, in addition to the mitigating actions referenced above.

MARKET RISK

Market risk emanates from both Citi's trading and non-trading portfolios. Trading portfolios comprise all assets and liabilities marked-to-market, with results reflected in earnings. Non-trading portfolios include all other assets and liabilities.

For additional information, see "Market Risk" and "Risk Factors" in Citi's 2015 Annual Report on Form 10-K.

Market Risk of Non-Trading Portfolios

For additional information on Citi's net interest revenue (for interest rate exposure purposes), interest rate risk and interest rate risk measurement, see "Market Risk of Non-Trading Portfolios" in Citi's 2015 Annual Report on Form 10-K.

The following table sets forth the estimated impact to Citi's net interest revenue, AOCI and the Common Equity Tier 1 Capital ratio (on a fully implemented basis), each assuming an unanticipated parallel instantaneous 100 basis point increase in interest rates.

In millions of dollars (unless otherwise noted)	Mar. 31, 2016	Dec. 31, 2015	Mar. 31, 2015
Estimated annualized impact to net interest revenue			
U.S. dollar ⁽¹⁾	\$1,362	\$1,419	\$1,263
All other currencies	587	635	611
Total	\$1,949	\$2,054	\$1,874
As a percentage of average interest-earning assets	0.13	%0.13	%0.12
Estimated initial impact to AOCI (after-tax) ⁽²⁾	\$(4,950)	\$(4,837)	\$(3,931)
Estimated initial impact on Common Equity Tier 1 Capital ratio (bps) ⁽³⁾	(57)	(57)	(45)

Certain trading-oriented businesses within Citi have accrual-accounted positions that are excluded from the estimated impact to net interest revenue in the table since these exposures are managed economically in combination with mark-to-market positions. The U.S. dollar interest rate exposure associated with these businesses was \$(240) million for a 100 basis point instantaneous increase in interest rates as of March 31, 2016.

(1) Includes the effect of changes in interest rates on AOCI related to investment securities, cash flow hedges and pension liability adjustments.

(2) The estimated initial impact to the Common Equity Tier 1 Capital ratio considers the effect of Citi's deferred tax asset position and is based on only the estimated initial AOCI impact above.

The sequential decrease in the estimated impact to net interest revenue primarily reflected changes in the balance sheet composition, including changes in the deposit mix, partially offset by an increasing capital base. The sequential increase in the estimated impact to AOCI primarily reflected changes in the composition of Citi Treasury's investment and interest rate derivatives portfolio.

In the event of an unanticipated parallel instantaneous 100 basis point increase in interest rates, Citi expects the negative impact to AOCI would be offset in stockholders' equity through the combination of expected incremental net interest revenue and the expected recovery of the impact on AOCI through accretion of Citi's investment portfolio over a period of time. As of March 31, 2016, Citi expects that the negative

\$5.0 billion impact to AOCI in such a scenario could potentially be offset over approximately 28 months.

The following table sets forth the estimated impact to Citi's net interest revenue, AOCI and the Common Equity Tier 1 Capital ratio (on a fully implemented basis) under four different changes in interest rate scenarios for the U.S. dollar and Citi's other currencies. While Citi also monitors the impact of a parallel decrease in interest rates, a 100 basis point decrease in short-term interest rates is not meaningful, as it would imply negative interest rates in many of Citi's markets.

In millions of dollars (unless otherwise noted)	Scenario 1	Scenario 2	Scenario 3	Scenario 4
Overnight rate change (bps)	100	100	—	—
10-year rate change (bps)	100	—	100	(100)
Estimated annualized impact to net interest revenue				
U.S. dollar	\$1,362	\$1,363	\$121	\$(211)
All other currencies	587	544	33	(34)
Total	\$1,949	\$1,907	\$154	\$(245)
Estimated initial impact to AOCI (after-tax) ⁽¹⁾	\$(4,950)	\$(3,018)	\$(2,269)	\$1,896
Estimated initial impact to Common Equity Tier 1 Capital ratio (bps) ⁽²⁾	(57)	(34)	(27)	22

Note: Each scenario in the table above assumes that the rate change will occur instantaneously. Changes in interest rates for maturities between the overnight rate and the 10-year rate are interpolated.

(1) Includes the effect of changes in interest rates on AOCI related to investment securities, cash flow hedges and pension liability adjustments.

(2) The estimated initial impact to the Common Equity Tier 1 Capital ratio considers the effect of Citi's deferred tax asset position and is based on only the estimated AOCI impact above.

As shown in the table above, the magnitude of the impact to Citi's net interest revenue and AOCI is greater under scenario 2 as compared to scenario 3. This is because the combination of changes to Citi's investment portfolio, partially offset by changes related to Citi's pension liabilities, results in a net position that is more sensitive to rates at shorter and intermediate term maturities.

Over the past year, a number of central banks, including the European Central Bank, the Bank of Japan and the Swiss National Bank, have implemented negative interest rates, and additional governmental entities could do so in the future. While negative interest rates can adversely impact net interest revenue (as well as net interest margin), Citi has, to date, been able to partially offset the impact of negative rates in these jurisdictions through a combination of business and Citi Treasury interest rate risk mitigation activities, including applying negative rates to client accounts (for additional information on Citi Treasury's ongoing interest rate mitigation activities, see "Market Risk—Market Risk of Non-Trading Portfolios" in Citi's 2015 Annual Reporting on Form 10-K).

Changes in Foreign Exchange Rates—Impacts on AOCI and Capital

As of March 31, 2016, Citi estimates that an unanticipated parallel instantaneous 5% appreciation of the U.S. dollar against all of the other currencies in which Citi has invested capital could reduce Citi's tangible common equity (TCE) by approximately \$1.5 billion, or 0.82% of TCE, as a result of changes to Citi's foreign currency translation adjustment in AOCI, net of hedges. This impact would be primarily due to changes in the value of the Mexican peso, the Euro and the Japanese Yen.

This impact is also before any mitigating actions Citi may take, including ongoing management of its foreign currency translation exposure. Specifically, as currency movements change the value of Citi's net investments in foreign-currency-denominated capital, these movements also change the value of Citi's risk-weighted assets denominated in those currencies. This, coupled with Citi's foreign currency hedging strategies, such as foreign currency borrowings, foreign currency forwards and other currency hedging instruments, lessens the impact of foreign currency movements on Citi's Common Equity Tier 1 Capital ratio. Changes in these hedging strategies, as well as hedging costs, divestitures and tax impacts, can further impact the actual impact of changes in foreign exchange rates on Citi's capital as compared to an unanticipated parallel shock, as described above.

The effect of Citi's ongoing management strategies with respect to changes in foreign exchange rates and the impact of these changes on Citi's TCE and Common Equity Tier 1 Capital ratio are shown in the table below. For additional information on the changes in AOCI, see Note 18 to the Consolidated Financial Statements.

In millions of dollars (unless otherwise noted)	For the quarter ended		
	Mar. 31, 2016	Dec. 31, 2015	Mar. 31, 2015
Change in FX spot rate ⁽¹⁾	2.1	%(1.1)	%(4.5)
Change in TCE due to FX translation, net of hedges	\$396	\$(696)	\$(1,763)

Edgar Filing: CITIGROUP INC - Form 10-Q

As a percentage of TCE	0.2	%	(0.4)%	(1.0)%
Estimated impact to Common Equity Tier 1 Capital ratio (on a fully implemented basis)

to changes in FX translation, net of hedges (bps)						

(1) FX spot rate change is a weighted average based upon Citi's quarterly average GAAP capital exposure to foreign countries.

Interest Revenue/Expense and Net Interest Margin

	1st Qtr.	4th Qtr.	1st Qtr.	Change
In millions of dollars, except as otherwise noted	2016	2015	2015	1Q16 vs. 1Q15
Interest revenue ⁽¹⁾	\$14,286	\$14,491	\$14,724	(3)%
Interest expense	2,940	2,900	3,028	(3)
Net interest revenue ⁽¹⁾⁽²⁾	\$11,346	\$11,591	\$11,696	(3)%
Interest revenue—average rate	3.68 %	3.66 %	3.67 %	1 bps
Interest expense—average rate	0.99	0.96	0.96	3 bps
Net interest margin	2.92	2.92	2.92	— bps
Interest-rate benchmarks				
Two-year U.S. Treasury note—average rate	0.84 %	0.84 %	0.60 %	24 bps
10-year U.S. Treasury note—average rate	1.91	2.19	1.97	(6) bps
10-year vs. two-year spread	107	bps 135	bps 137	bps

Note: All interest expense amounts include FDIC deposit insurance assessments.

Net interest revenue includes the taxable equivalent adjustments related to the tax-exempt bond portfolio (based on (1) the U.S. federal statutory tax rate of 35%) of \$119 million, \$126 million, and \$124 million for the three months ended March 31, 2016, December 31, 2015 and March 31, 2015, respectively.

(2) Excludes expenses associated with certain hybrid financial instruments, which are classified as Long-term debt and accounted for at fair value.

Citi's net interest margin (NIM) is calculated by dividing gross interest revenue less gross interest expense by average interest earning assets. Citi's NIM was 2.92% in the first quarter of 2016, unchanged sequentially as the sale of higher-yielding assets in OneMain Financial in the fourth quarter of 2015 was offset by the impact of higher interest rates.

As noted in the tables above, Citi's interest expense includes the impact of FDIC deposit insurance assessments. As previously disclosed, as part of the Dodd-Frank Act, the FDIC is required to ensure that its deposit insurance fund reserve ratio reaches 1.35% by September 30, 2020. In March

2016, the FDIC issued a final rule that imposes on insured depository institutions with at least \$10 billion in assets, which includes Citibank, a surcharge of 4.5 basis points per annum until the fund reaches the required ratio, which the FDIC estimates would take approximately two years. The FDIC has stated it expects that surcharges will commence in the second half of 2016. Based on its current assessment base, Citi estimates the net impact to Citibank would be approximately \$500 million over the two-year period.

Net interest revenue includes the taxable equivalent adjustments related to the tax-exempt bond portfolio (based on (1) the U.S. federal statutory tax rate of 35%) of \$119 million, \$126 million, and \$124 million for the three months ended March 31, 2016, December 31, 2015 and March 31, 2015, respectively.

(2) Interest rates and amounts include the effects of risk management activities associated with the respective asset categories.

(3) Monthly or quarterly averages have been used by certain subsidiaries where daily averages are unavailable.

(4) Detailed average volume, Interest revenue and Interest expense exclude Discontinued operations. See Note 2 to the Consolidated Financial Statements.

(5) Average rates reflect prevailing local interest rates, including inflationary effects and monetary corrections in certain countries.

(6) Average volumes of securities borrowed or purchased under agreements to resell are reported net pursuant to ASC 210-20-45. However, Interest revenue excludes the impact of ASC 210-20-45.

(7) The fair value carrying amounts of derivative contracts are reported net, pursuant to ASC 815-10-45, in Non-interest-earning assets and Other non-interest-bearing liabilities.

(8)

Interest expense on Trading account liabilities of ICG is reported as a reduction of Interest revenue. Interest revenue and Interest expense on cash collateral positions are reported in interest on Trading account assets and Trading account liabilities, respectively.

(9) Includes cash-basis loans.

(10) Includes brokerage receivables.

Market Risk of Trading Portfolios

For additional information on Citi's market risk of trading portfolios, see "Market Risk—Market Risk of Trading Portfolios" in Citi's 2015 Annual Report on Form 10-K.

Value at Risk

As of March 31, 2016, Citi estimates that the conservative features of its VAR calibration contribute an approximate 22% add-on (compared to 17% at December 31, 2015) to what would be a VAR estimated under the assumption of stable and perfectly normal distributed markets. The increase is largely reflective of market volatility during the first quarter of 2016.

As set forth in the table below, Citi's average Trading VAR and average Trading and Credit Portfolio VAR as of March 31, 2016 were largely unchanged sequentially as changes in interest rate exposure were mostly offset by changes in foreign exchange exposure in the markets sequentially and securities services businesses within ICG. Trading VAR as of March 31, 2016 decreased sequentially due to a change of risk profile in equity markets within ICG, as well as an increase in diversification benefit across businesses. Trading and Credit Portfolio VAR as of March 31, 2016 also decreased sequentially, although the decrease from Trading VAR was partially offset by an increase in CVA exposure.

In millions of dollars	First Quarter		Fourth Quarter		First Quarter	
	March 31, 2016	2016 Average	Dec. 31, 2015	2015 Average	March 31, 2015	2015 Average
Interest rate	\$ 37	\$ 41	\$ 37	\$ 35	\$ 63	\$ 60
Credit spread	62	64	56	64	71	75
Covariance adjustment ⁽¹⁾	(29)	(27)	(25)	(25)	(34)	(33)
Fully diversified interest rate and credit spread	\$ 70	\$ 78	\$ 68	\$ 74	\$ 100	\$ 102
Foreign exchange	25	29	27	35	29	31
Equity	9	15	17	15	25	16
Commodity	17	14	17	16	22	24
Covariance adjustment ⁽¹⁾	(62)	(56)	(53)	(61)	(69)	(66)
Total trading VAR—all market risk factors, including general and specific risk (excluding credit portfolios) ⁽²⁾	\$ 59	\$ 80	\$ 76	\$ 79	\$ 107	\$ 107
Specific risk-only component ⁽³⁾	\$ 7	\$ 7	\$ 11	\$ 7	\$ 8	\$ 6
Total trading VAR—general market risk factors only (excluding credit portfolios) ⁽²⁾	\$ 52	\$ 73	\$ 65	\$ 72	\$ 99	\$ 101
Incremental impact of the credit portfolio ⁽⁴⁾	\$ 29	\$ 28	\$ 22	\$ 28	\$ 30	\$ 24
Total trading and credit portfolio VAR	\$ 88	\$ 108	\$ 98	\$ 107	\$ 137	\$ 131

Covariance adjustment (also known as diversification benefit) equals the difference between the total VAR and the sum of the VARs tied to each individual risk type. The benefit reflects the fact that the risks within each and across (1) risk types are not perfectly correlated and, consequently, the total VAR on a given day will be lower than the sum of the VARs relating to each individual risk type. The determination of the primary drivers of changes to the covariance adjustment is made by an examination of the impact of both model parameter and position changes. (2) The total Trading VAR includes mark-to-market and certain fair value option trading positions in ICG and Citi Holdings, with the exception of hedges to the loan portfolio, fair value option loans and all CVA exposures. Available-for-sale and accrual exposures are not included.

- (3) The specific risk-only component represents the level of equity and fixed income issuer-specific risk embedded in VAR.
- (4) The credit portfolio is composed of mark-to-market positions associated with non-trading business units including Citi Treasury, the CVA relating to derivative counterparties and all associated CVA hedges. FVA and DVA are not included. The credit portfolio also includes hedges to the loan portfolio, fair value option loans and hedges to the leveraged finance pipeline within capital markets origination in ICG.

The table below provides the range of market factor VARs associated with Citi's total trading VAR, inclusive of specific risk:

	First		Fourth		First	
	Quarter		Quarter		Quarter	
	2016	2015	2015	2015	2015	2015
In millions of dollars	Low	High	Low	High	Low	High
Interest rate	\$29	\$64	\$28	\$54	\$39	\$84
Credit spread	56	69	56	74	66	94
Fully diversified interest rate and credit spread	\$66	\$97	\$65	\$93	\$86	\$127
Foreign exchange	24	40	23	52	20	43
Equity	9	24	12	23	9	26
Commodity	10	18	14	20	18	37
Total trading	\$59	\$106	\$70	\$104	\$85	\$140
Total trading and credit portfolio	85	131	93	133	108	158

Note: No covariance adjustment can be inferred from the above table as the high and low for each market factor will be from different close of business dates.

The following table provides the VAR for ICG, excluding the CVA relating to derivative counterparties, hedges of CVA, fair value option loans and hedges to the loan portfolio:

In millions of dollars	Mar. 31, 2016
Total—all market risk factors, including general and specific risk	\$ 56
Average—during quarter	\$ 75
High—during quarter	99
Low—during quarter	56

Regulatory VAR Back-testing

In accordance with Basel III, Citi is required to perform back-testing to evaluate the effectiveness of its Regulatory VAR model. Regulatory VAR back-testing is the process in which the daily one-day VAR, at a 99% confidence interval, is compared to the buy-and-hold profit and loss (i.e., the profit and loss impact if the portfolio is held constant at the

end of the day and re-priced the following day). Buy-and-hold profit and loss represents the daily mark-to-market profit and loss attributable to price movements in covered positions from the close of the previous business day. Buy-and-hold profit and loss excludes realized trading revenue, net interest, fees and commissions, intra-day trading profit and loss, and changes in reserves.

Based on a 99% confidence level, Citi would expect two to three days in any one year where buy-and-hold losses exceeded the Regulatory VAR. Given the conservative calibration of Citi's VAR model (as a result of taking the greater of short- and long-term volatilities and fat-tail scaling of volatilities), Citi would expect fewer exceptions under normal and stable market conditions. Periods of unstable market conditions could increase the number of back-testing exceptions.

As of March 31, 2016, there were no back-testing exceptions observed for Citi's Regulatory VAR for the prior 12 months.

COUNTRY RISK

For additional information on country risk at Citi, see “Country Risk” and “Risk Factors” in Citi’s 2015 Annual Report on Form 10-K.

Emerging Markets Exposures

Citi generally defines emerging markets as countries in Latin America, Asia (other than Japan, Australia and New Zealand), Central and Eastern Europe, the Middle East and Africa.

The following table presents Citicorp’s principal emerging markets assets as of March 31, 2016. For

purposes of the table below, loan amounts are generally based on the domicile of the borrower. For example, a loan to a Chinese subsidiary of a Switzerland-based corporation will generally be categorized as a loan in China. Trading account assets and investment securities are generally categorized below based on the domicile of the issuer of the security or the underlying reference entity (for additional information on the assets included in the table, see the footnotes to the table below).

As of March 31, 2016					As of Dec. 31, 2015	As of Mar. 31, 2015	GCB NCL Rate ⁽⁴⁾			
In billions of dollars	Trading account assets ⁽¹⁾	Investment securities ⁽²⁾	Corporate loans ⁽³⁾	GCB loans ⁽⁴⁾	Aggregate ⁽⁵⁾	Aggregate ⁽⁵⁾	Aggregate ⁽⁵⁾	1Q'16	4Q'15	1Q'15

Note: Aggregate may not cross-foot due to rounding. Prior periods have been reclassified to conform to current period presentation.

(1) Trading account assets are shown on a net basis and include derivative exposures where the underlying reference entity is located in that country. Does not include counterparty credit exposures.

(2)

Investment securities include securities available-for-sale, recorded at fair market value, and securities held-to-maturity, recorded at historical cost. Does not include investments accounted for under the equity method. Corporate loans reflect funded loans within ICG, excluding the private bank, net of unearned income. In addition to the funded loans disclosed in the table above, through its ICG businesses (excluding the private bank), Citi had unfunded commitments to corporate customers in the emerging markets of approximately \$34 billion as of March 31, 2016 (compared to \$35 billion as of each of the quarters ended December 31, 2015 and March 31, 2015); no single country accounted for more than \$4 billion of this amount. For information on ICG private bank loans, see the narrative to the table below.

(4) As previously announced, effective in the first quarter of 2016, Citi's consumer businesses in Argentina, Brazil and Colombia, which previously were reported as part of Latin America GCB, are reported as part of Citi Holdings, reflecting Citi's intention to exit these businesses. For purposes of the table above only, GCB loans and GCB NCL rate continue to reflect these exposures.

(5) Aggregate of Trading account assets, Investment securities, Corporate loans and GCB loans, based on the methodologies described above.

(6) For additional information on Citi's exposures in Argentina, see below.

Emerging Markets Trading Account Assets and Investment Securities

In the ordinary course of business, Citi holds securities in its trading accounts and investment accounts, including those above. Trading account assets are marked to market daily, with asset levels varying as Citi maintains inventory consistent with customer needs. Investment securities are recorded at either fair value or historical cost, based on the underlying accounting treatment, and are predominantly held as part of the local entity asset and liability management program or to comply with local regulatory requirements. In the markets in the table above, approximately 99% of Citi's investment securities were related to sovereign issuers as of March 31, 2016.

Emerging Markets Consumer Lending

GCB's strategy within the emerging markets is consistent with GCB's overall strategy, which is to leverage its global footprint to serve its target clients. The retail bank seeks to be the preeminent bank for the emerging affluent and affluent consumers in large urban centers. In credit cards and in certain retail markets, Citi serves customers in a somewhat broader set of segments and geographies. Commercial banking generally serves small- and middle-market enterprises operating in GCB's geographic markets, focused on clients that value Citi's global capabilities. Overall, Citi believes that its customers are more resilient than the overall market under a wide range of economic conditions. Citi's consumer business has a well-established risk appetite framework across geographies and products that reflects the business strategy and activities and establishes boundaries around the key risks that arise from the strategy and activities.

As of March 31, 2016, GCB had approximately \$101 billion of consumer loans outstanding to borrowers in the emerging markets, or approximately 37% of GCB's total loans, largely unchanged from December 31, 2015 and compared to \$106 billion (39%) as of March 31, 2015. Of the approximate \$101 billion as of March 31, 2016, the five largest emerging markets – Mexico, Korea, Singapore, Hong Kong and Taiwan – comprised approximately 28% of GCB's total loans. Within the emerging markets, 33% of Citi's GCB loans were mortgages, 23% were commercial banking loans, 25% were personal loans and 19% were credit card loans, each as of March 31, 2016.

Overall consumer credit quality remained generally stable in the first quarter of 2016, as net credit losses in the emerging markets were 1.7% of average loans, compared to 1.8% and 1.9% in the fourth quarter of 2015 and first quarter of 2015, respectively, consistent with Citi's target market strategy and risk appetite framework.

Emerging Markets Corporate Lending

Consistent with ICG's overall strategy, Citi's corporate clients in the emerging markets are typically large, multinational corporations that value Citi's global network. Citi aims to establish relationships with these clients that encompass multiple products, consistent with client needs, including cash management and trade services, foreign exchange, lending, capital markets and M&A advisory. Citi believes that its target corporate segment is more resilient under a wide range of economic conditions, and that its relationship-based approach to client service enables it to effectively manage the risks inherent in such relationships. Citi has a well-established risk appetite framework around its corporate lending activities, including risk-based limits and approval authorities and portfolio concentration boundaries. For additional information on Citi's corporate lending, see "Credit Risk—Corporate Credit" above.

As of March 31, 2016, corporate loans (excluding the private bank) were approximately \$99 billion in the emerging markets, representing approximately 43% of total corporate loans outstanding, compared to \$98 billion (44%) and \$102 billion (46%) as of December 31, 2015 and March 31, 2015, respectively. No single emerging markets country accounted for more than 6% of Citi's corporate loans as of the end of the first quarter of 2016.

As of March 31, 2016, over 70% of Citi's emerging markets corporate credit portfolio (excluding the private bank), including loans and unfunded lending commitments, was rated investment grade. The majority of the remainder was rated BB or B according to Citi's internal risk measurement system and methodology.

The private bank, which is part of ICG and primarily serves high-net-worth individuals, had approximately \$17 billion of loans in the emerging markets as of March 31, 2016, representing approximately 25% of the business's total loans outstanding, unchanged from December 31, 2015 and compared to \$18 billion (28%) as of March 31, 2015. Private bank loans are typically secured by liquid collateral or real estate and, consistent with the rest of the ICG loan portfolio, the business has a well-established risk appetite framework around its lending activities, including risk-based limits and approval authorities and portfolio concentration boundaries.

Overall ICG net credit losses in the emerging markets were 0.1% of average loans in the first quarter of 2016, compared to 0.2% and 0.0% in the fourth quarter of 2015 and first quarter of 2015, respectively. The ratio of non-accrual ICG loans to total loans in the emerging markets increased slightly to 0.6% as of March 31, 2016, compared to 0.4% and 0.5% as of December 31, 2015 and March 31, 2015, respectively.

Argentina

For additional information relating to Citi's exposures in Argentina, see "Country Risk—Argentina" in Citi's 2015 Annual Report on Form 10-K.

As of March 31, 2016, Citi's net investment in its Argentine operations was approximately \$756 million, compared to \$747 million at December 31, 2015.

At March 31, 2016, Citi had cumulative translation losses related to its investment in Argentina, net of qualifying net investment hedges, of approximately \$1.95 billion (pretax), which were recorded in stockholders' equity. This compared to \$1.88 billion (pretax) as of December 31, 2015. The cumulative translation losses would not be reclassified into earnings unless realized upon sale or liquidation of substantially all of Citibank's Argentine operations.

As noted above, Citi hedges currency risk in its net investment in Argentina to the extent possible and prudent. As of March 31, 2016, Citi's total hedges against its net investment in Argentina were approximately \$627 million (compared to \$821 million as of December 31, 2015). The \$627 million in total hedges at quarter-end consisted entirely of foreign currency forwards that were recorded as net investment hedges under ASC 815 (compared to \$567 million at December 31, 2015); Citi did not maintain any non-qualifying hedges on its net investment as of March 31, 2016.

As of March 31, 2016, Citi had total third-party assets of approximately \$3.8 billion in Citi Argentina (compared to \$4.4 billion at December 31, 2015), primarily composed of corporate and consumer loans and cash on deposit with and short-term paper issued by the Central Bank of Argentina. A significant portion of these assets was funded with local deposits. Included in the total assets were U.S.-dollar denominated assets of approximately \$545 million, compared to approximately \$918 million at December 31, 2015. The sequential decrease in U.S.-dollar-denominated assets was largely due to the Argentine government's loosening of foreign exchange controls toward the end of 2015. In addition to these foreign exchange and other economic risks, as widely reported, Argentina has been engaged in litigation in the U.S. with certain "holdout" bond investors who did not accept restructured bonds in the restructuring of Argentine debt after Argentina defaulted on its sovereign obligations in 2001. On April 22, 2016, Argentina made the final settlement payments to the pertinent investors and the U.S. district court lifted the injunction against Argentina, effectively ending the "holdout" litigation. Citi Argentina believes it should be able to resolve its pending disputes with the Argentine government, including Citi's suspension from certain capital markets activities.

Venezuela

For historical information on foreign exchange controls in Venezuela as well as Citi's exposures in Venezuela, see "Country Risk—Venezuela" in Citi's 2015 Annual Report on Form 10-K.

On March 10, 2016, new foreign exchange control rules went into effect in Venezuela establishing two types of foreign exchange rates: a floating exchange rate (the DICOM rate), which will be the default exchange rate, and a protected exchange rate (the DIPRO rate), to which Citi will not have access. The new rules eliminated the SICAD rate that Citi previously used to remeasure its net bolivar-denominated monetary assets.

While there continues to be uncertainty regarding certain aspects of Venezuela's new foreign exchange rules, Citi adopted the DICOM rate in remeasuring bolivar-denominated revenues, expenses and net monetary assets effective in the first quarter of 2016. As a result, Citi incurred a charge to earnings of approximately \$180 million in the quarter, recorded in ICG, which reflected the write down of virtually all of Citi's net investment in Venezuela.

INCOME TAXES

Deferred Tax Assets

For additional information on Citi's deferred tax assets (DTAs), see "Risk Factors—Operational Risks," "Significant Accounting Policies and Significant Estimates—Income Taxes" and Note 9 to the Consolidated Financial Statements in Citi's 2015 Annual Report on Form 10-K.

At March 31, 2016, Citigroup had recorded net DTAs of approximately \$46.3 billion, a decrease of \$1.6 billion from December 31, 2015. The decrease in DTAs was driven primarily by gains in Other comprehensive income and the continued generation of U.S. taxable earnings in Citicorp.

The following table summarizes Citi's net DTAs balance as of the periods presented. Of Citi's net DTAs as of March 31, 2016, those arising from net operating losses, foreign tax credit and general business credit carry-forwards are 100% deducted in calculating Citi's regulatory capital, while DTAs arising from temporary differences are deducted from regulatory capital if in excess of the 10%/15% limitations (see "Capital Resources" above). Approximately \$17.3 billion of the net DTAs was not deducted in calculating regulatory capital pursuant to full Basel III implementation standards as of March 31, 2016. Citigroup continually seeks to improve the regulatory capital benefits of its DTAs through tax planning actions, including third-party transactions, as appropriate.

Jurisdiction/Component DTAs balance

In billions of dollars	March 31, 2016	December 31, 2015
Total U.S.	\$43.9	\$ 45.2
Total foreign	2.4	2.6
Total	\$46.3	\$ 47.8

Effective Tax Rate

Citi's effective tax rate for the first quarter of 2016 was 29.7%, as compared with 30.6% in the first quarter of 2015. The lower effective tax rate predominately reflected the lower level of pre-tax income in the current quarter.

DISCLOSURE CONTROLS AND PROCEDURES

Citi's disclosure controls and procedures are designed to ensure that information required to be disclosed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, including without limitation that information required to be disclosed by Citi in its SEC filings is accumulated and communicated to management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO) as appropriate to allow for timely decisions regarding required disclosure. Citi's Disclosure Committee assists the CEO and CFO in their responsibilities to design, establish, maintain and evaluate the effectiveness of Citi's disclosure controls and procedures. The Disclosure Committee is responsible for, among other things, the oversight, maintenance and implementation of the disclosure controls and procedures, subject to the supervision and oversight of the CEO and CFO.

Citi's management, with the participation of its CEO and CFO, has evaluated the effectiveness of Citigroup's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of March 31, 2016 and, based on that evaluation, the CEO and CFO have concluded that at that date Citigroup's disclosure controls and procedures were effective.

DISCLOSURE PURSUANT TO SECTION 219 OF THE IRAN THREAT REDUCTION AND SYRIA HUMAN RIGHTS ACT

Pursuant to Section 219 of the Iran Threat Reduction and Syria Human Rights Act of 2012, which added Section 13(r) to the Securities Exchange Act of 1934, as amended, Citi is required to disclose in its annual or quarterly reports, as applicable, whether it or any of its affiliates knowingly engaged in certain activities, transactions or dealings relating to Iran or with individuals or entities that are subject to sanctions under U.S. law. Disclosure is generally required even where the activities, transactions or dealings were conducted in compliance with applicable law. Citi has no reportable activities pursuant to Section 219 for the first quarter of 2016.

FORWARD-LOOKING STATEMENTS

Certain statements in this Form 10-Q, including but not limited to statements included within the Management's Discussion and Analysis of Financial Condition and Results of Operations, are "forward-looking statements" within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. In addition, Citigroup also may make forward-looking statements in its other documents filed or furnished with the SEC, and its management may make forward-looking statements orally to analysts, investors, representatives of the media and others.

Generally, forward-looking statements are not based on historical facts but instead represent Citigroup's and its management's beliefs regarding future events. Such statements may be identified by words such as believe, expect, anticipate, intend, estimate, may increase, may fluctuate, and similar expressions or future or conditional verbs such as will, should, would and could.

Such statements are based on management's current expectations and are subject to risks, uncertainties and changes in circumstances. Actual results and capital and other financial conditions may differ materially from those included in these statements due to a variety of factors, including without limitation the precautionary statements included within each individual business' discussion and analysis of its results of operations above and in Citi's 2015 Annual Report on Form 10-K, the factors listed and described under "Risk Factors" in Citi's 2015 Annual Report on Form 10-K and the risks and uncertainties summarized below:

- the outcome of the Federal Reserve Board's review of Citi's 2016 Comprehensive Capital Analysis and Review (CCAR) submission and supervisory stress tests required under the Dodd-Frank Act and the potential impact such review could have on Citi's ability to return capital to shareholders and market perception of Citi;

- Citi's ability to adequately address the shortcomings identified by the Federal Reserve Board and FDIC as a result of their review of Citi's 2015 annual resolution plan submission;

- the ongoing regulatory changes and uncertainties faced by Citi in the U.S. and globally, including as a result of the Federal Reserve Board's recent proposal relating to single-counterparty credit limits, and the potential impact these changes and uncertainties could have on Citi's businesses, results of operations, financial condition, strategy or organizational structure and compliance risks and costs;

- the potential impact to Citi's delinquency rates, loan loss reserves, net credit losses and overall results of operations as Citi's revolving home equity lines of credit continue to "reset" (Revolving HELOCs), particularly as and if interest rates continue to increase;

- the potential impact to Citi's businesses, credit costs and overall results of operations and financial condition as a result of macroeconomic and geopolitical challenges and uncertainties, including as a result of continued depressed energy and other commodity prices and the outcome of

- the vote in the United Kingdom as to whether to remain in the European Union;

- the various risks faced by Citi as a result of its significant presence in the emerging markets, including among others foreign exchange controls and sociopolitical instability as well as the increased compliance and regulatory risks and costs;

- the potential impact concentrations of risk, such as Citi's credit risk to the U.S. government and its agencies and market risk arising from Citi's volume of transactions with counterparties in the financial services industry, could have on Citi's hedging strategies and results of operations;

- the uncertainties and potential operational difficulties to Citi and its liquidity planning arising from the Federal Reserve Board's total loss-absorbing capacity (TLAC) proposal, including uncertainties relating to any potential "grandfathering" of outstanding long-term debt and the potential impact on Citi's estimated liquidity needs;

- the potential impacts on Citi's liquidity and/or costs of funding as a result of external factors, including among others market disruptions and governmental fiscal and monetary policies as well as regulatory changes, such as the TLAC proposal;

- the impact of ratings downgrades of Citi or one or more of its more significant subsidiaries or issuing entities on Citi's funding and liquidity as well as the results of operations of certain of its businesses;

the potential impact on Citi's results of operations or financial condition as a result of its inability to maintain its co-branding and private label credit card relationships, renew these relationships on similar terms or operational difficulties of a particular retailer or merchant;

the potential impact to Citi from an increasing risk of continually evolving cybersecurity or other technological risks, including the theft, loss, misuse or disclosure of confidential client or customer information, damage to Citi's reputation, additional costs to Citi, regulatory penalties, legal exposure and financial losses;

Citi's ability to continue to utilize its DTAs (including the foreign tax credit component of its DTAs), and thus reduce the negative impact of the DTAs on Citi's regulatory capital, including as a result of movements in Citi's accumulated other comprehensive income (AOCI);

the potential impact to Citi if its interpretation or application of the extensive tax laws to which it is subject, such as withholding tax obligations, differs from those of the relevant governmental authorities;

the impact on the value of Citi's DTAs and its results of operations if corporate tax rates in the U.S. or certain state, local or foreign jurisdictions decline, or if other changes are made to the U.S. tax system;

the potential impact to Citi's results of operations and/or regulatory capital and capital ratios if Citi's risk models, including its Basel III risk-weighted asset models, are ineffective or require modification or enhancement;

Citi's ability to manage its overall level of expenses while at the same time continuing to successfully invest in identified areas of its businesses or operations;

Citi's ability to continue to wind-down Citi Holdings, and thus reduce the negative impact on Citi's regulatory capital, as well as maintain Citi Holdings at or above "break even" during 2016;

the potential impact on Citi's performance, including its competitive position and ability to effectively manage its businesses and continue to execute its strategy, if Citi is unable to hire and retain highly qualified employees for any reason;

the impact incorrect assumptions or estimates in Citi's financial statements, as well as ongoing changes to financial accounting and reporting standards or interpretations, could have on Citi's financial condition and results of operations and how it records and reports its financial condition and results of operations;

the heightened compliance requirements and risks to which Citi is subject, including reputational and legal risks, as well as the impact of increased compliance costs on Citi's expense management and investments initiatives;

the potential outcomes of the extensive legal and regulatory proceedings, investigations and other inquiries to which Citi is or may be subject at any given time, particularly given the increased severity of the remedies sought and potential collateral consequences to Citi arising from such outcomes;

potential changes to various aspects of the regulatory capital framework proposed or adopted by the Basel Committee on Banking Supervision and/or the U.S. banking agencies, such as those related to market risk (including as a result of the so-called "fundamental review of the trading book"), operational risk and credit risk, and the impact any such changes could have on Citi's regulatory capital ratios and/or their components; and

the potential impact of the U.S. Treasury's recent proposed changes to Section 385 of the U.S. tax code on Citi's intercompany borrowing activities.

Any forward-looking statements made by or on behalf of Citigroup speak only as to the date they are made, and Citi does not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the date the forward-looking statements were made.

(1)

Effective January 1, 2016, Citigroup early adopted the provisions of the amendment in ASU No. 2016-01, Financial Instruments—Overall (Subtopic 825-01): Recognition and Measurement of Financial Assets and Financial Liabilities, related to the presentation of DVA on fair value option liabilities. Accordingly, beginning in the first quarter 2016, the portion of the change in fair value of these liabilities related to changes in Citigroup's own credit spreads (DVA) is reflected as a component of Accumulated other comprehensive income (AOCI). The cumulative effect of this change in accounting resulted in a reclassification from Retained earnings to AOCI of an accumulated after-tax loss of approximately \$15 million at January 1, 2016.

Citi adopted ASU 2014-01 Investments-Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Affordable Housing, in the first quarter of 2015 on a retrospective basis. This adjustment to opening (2) Retained earnings represents the impact to periods prior to January 1, 2013 and is shown as an adjustment to the opening balance since 2015 is the earliest period presented in this statement. See Note 1 to the Consolidated Financial Statements for additional information.

(3) Common dividends declared were \$0.05 per share in the first quarter of 2016 and \$0.01 per share in the first quarter of 2015.

(4) Includes treasury stock related to (i) certain activity on employee stock option program exercises where the employee delivers existing shares to cover the option exercise, or (ii) under Citi's employee restricted or deferred stock programs where shares are withheld to satisfy tax requirements.

(5) For the three months ended March 31, 2016 and 2015, primarily consists of open market purchases under Citi's Board of Directors-approved common stock repurchase program.

The Notes to the Consolidated Financial Statements are an integral part of these Consolidated Financial Statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION AND ACCOUNTING CHANGES

Basis of Presentation

The accompanying unaudited Consolidated Financial Statements as of March 31, 2016 and for the three-month periods ended March 31, 2016 and 2015 include the accounts of Citigroup Inc. and its consolidated subsidiaries. In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation have been reflected. The accompanying unaudited Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and related notes included in Citigroup's Annual Report on Form 10-K for the fiscal year ended December 31, 2015 (2015 Annual Report on Form 10-K).

Certain financial information that is normally included in annual financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP), but is not required for interim reporting purposes, has been condensed or omitted.

Management must make estimates and assumptions that affect the Consolidated Financial Statements and the related footnote disclosures. While management makes its best judgment, actual results could differ from those estimates. Current market conditions increase the risk and complexity of the judgments in these estimates.

As noted above, the Notes to Consolidated Financial Statements are unaudited.

Throughout these Notes, "Citigroup," "Citi" and the "Company" refer to Citigroup Inc. and its consolidated subsidiaries. Certain reclassifications have been made to the prior periods' financial statements and notes to conform to the current period's presentation.

ACCOUNTING CHANGES

Recognition and Measurement of Financial Assets and Financial Liabilities

In January 2016, the FASB issued Accounting Standards Update (ASU) No. 2016-01, Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities, which addresses certain aspects of recognition, measurement, presentation, and disclosure of financial instruments.

This ASU requires entities to present separately in OCI the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk (DVA) when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. It will also require equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income, thus eliminating eligibility for the current available-for-sale category. However, Federal

Reserve Bank and Federal Home Loan Bank stock as well as exchange seats will continue to be presented at cost. Citi early-adopted only the provisions of this ASU related to presentation of DVA in OCI effective January 1, 2016, as permitted by the ASU. Accordingly, beginning in the first quarter 2016, the portion of the change in fair value of liabilities for which the fair value option was elected related to changes in Citigroup's own credit spreads (DVA) is reflected as a component of Accumulated other comprehensive income (AOCI), whereas, these amounts were previously recognized in Citigroup's revenues and net income. The impact of adopting this amendment resulted in a cumulative catch-up reclassification from retained earnings to AOCI of an accumulated after tax loss of approximately \$15 million at January 1, 2016. Financial statements for periods prior to 2016 were not subject to restatement under the provisions of this ASU. For additional information, see Note 18, Note 22 and Note 23 to the Consolidated Financial Statements. The Company is evaluating the effect that the other provisions of ASU 2016-01 will have on its Consolidated Financial Statements and related disclosures.

Accounting for Investments in Tax Credit Partnerships

In January 2014, the FASB issued ASU No. 2014-01, Investments—Equity Method and Joint Ventures (Topic 323): Accounting for Investments in Qualified Affordable Housing Projects. Any transition adjustment is reflected as an

adjustment to retained earnings in the earliest period presented (retrospective application).

The ASU is applicable to Citi's portfolio of low income housing tax credit (LIHTC) partnership interests. The new standard widens the scope of investments eligible to elect to apply a new alternative method, the proportional amortization method, under which the cost of the investment is amortized to tax expense in proportion to the amount of tax credits and other tax benefits received. Citi qualifies to elect the proportional amortization method under the ASU for its entire LIHTC portfolio. These investments were previously accounted for under the equity method, which resulted in losses (due to amortization of the investment) being recognized in Other revenue and tax credits and benefits being recognized in the Income tax expense line. In contrast, the proportional amortization method combines the amortization of the investment and receipt of the tax credits/benefits into one line, Income tax expense.

Citi adopted ASU 2014-01 in the first quarter of 2015.

The adoption of this ASU was applied retrospectively and cumulatively reduced Retained earnings by approximately \$349 million, Other assets by approximately \$178 million, and deferred tax assets by approximately \$171 million.

Consolidation

In February 2015, the FASB issued ASU No. 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, which intended to improve certain areas of consolidation guidance for legal entities such as limited partnerships, limited liability companies, and

securitization structures. The ASU reduced the number of consolidation models and became effective on January 1, 2016. Adoption of ASU 2015-02 did not have a material impact on the Company's Consolidated Financial Statements.

Consolidation-Collateralized Financing Entities

In August 2014, the FASB issued ASU No. 2014-13, Consolidation (Topic 810): Measuring the Financial Assets and the Financial Liabilities of a Consolidated Collateralized Financing Entity, which provides an alternative measurement method for consolidated collateralized financing VIEs to elect: (i) to measure their financial assets and liabilities separately under existing U.S. GAAP for fair value measurement with any differences in such fair values reflected in earnings; or (ii) to measure both their financial assets and liabilities using the more observable of the fair value of the financial assets or the fair value of the financial liabilities. The ASU became effective on January 1, 2016. Adoption of ASU 2014-13 did not have a material impact on the Company's Consolidated Financial Statements.

FUTURE APPLICATION OF ACCOUNTING STANDARDS

Recognition of Breakage for Certain Prepaid Stored-Value Products

In March 2016, the FASB issued ASU No. 2016-04, Liabilities—Extinguishment of Liabilities (Subtopic 405-20): Recognition of Breakage for Certain Prepaid Stored-Value Products, which was intended to address potential diversity in entities' practices related to the derecognition of the financial liability that is recorded when an entity issues a prepaid stored-value product. Typically, when the holder of a prepaid stored-value product redeems that product to make a purchase of goods or services, the issuing entity settles the transaction with the selling merchant, and the liability to the product holder is extinguished. However, in some cases, a prepaid stored-value product may be wholly or partially unused for an indefinite time period.

The ASU provides authoritative guidance describing the narrow circumstances in which an entity's liability for an unredeemed prepaid stored-value product may be extinguished. The amendment is effective on January 1, 2018; early adoption is permitted. Adoption of the ASU is not expected to have a material impact on the Company's Consolidated Financial Statements.

Revenue Recognition

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in GAAP when it becomes effective on January 1, 2018. Early application is permitted for annual periods beginning after December 15, 2016. The ASU is not applicable to financial instruments and, therefore, is not

expected to impact a majority of the Company's revenue, including net interest income. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures.

Accounting for Financial Instruments—Credit Losses

In December 2012, the FASB issued a proposed ASU, Financial Instruments—Credit Losses. This proposed ASU, or exposure draft, was issued for public comment in order to allow stakeholders the opportunity to review the proposal and provide comments to the FASB and does not constitute accounting guidance until a final ASU is issued.

The exposure draft contains proposed guidance developed by the FASB with the goal of improving financial reporting about expected credit losses on loans, securities and other financial assets held by financial institutions and other organizations. The exposure draft proposes a new accounting model intended to require earlier recognition of credit losses, while also providing additional transparency about credit risk.

The FASB's proposed model would utilize an "expected credit loss" measurement objective for the recognition of credit losses for loans, held-to-maturity securities and other receivables at the time the financial asset is originated or acquired and adjusted each period for changes in expected credit losses. For available-for-sale securities where fair

value is less than cost, credit-related impairment would be recognized in an allowance for credit losses and adjusted each period for changes in credit risk. This would replace the multiple existing impairment models in GAAP, which generally require that a loss be incurred before it is recognized.

The FASB's proposed model represents a significant departure from existing GAAP, and may result in material changes to the Company's accounting for financial instruments. The impact of the FASB's final ASU on the Company's Consolidated Financial Statements will be assessed when it is issued. The Company expects that the final ASU will be effective for Citi as of January 1, 2020. Early application is permitted for annual periods beginning January 1, 2019.

Lease Accounting

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842), which is intended to increase transparency and comparability of accounting for lease transactions. The ASU will require lessees to recognize all leases on the balance sheet as lease assets and lease liabilities and will require both quantitative and qualitative disclosures regarding key information about leasing arrangements. Lessor accounting is largely unchanged. The guidance is effective beginning January 1, 2019 with an option to early adopt. The Company is evaluating whether to early adopt and the effect that ASU 2016-02 will have on its consolidated financial statements, regulatory capital and related disclosures.

2. DISCONTINUED OPERATIONS AND SIGNIFICANT DISPOSALS

Discontinued Operations

The following Discontinued operations are recorded within the Corporate/Other segment.

Sale of Brazil Credicard Business

Citi sold its non-Citibank-branded cards and consumer finance business in Brazil (Credicard) in 2013 and reported it as Discontinued operations. Residual costs and resolution of certain contingencies from the disposal resulted in loss from Discontinued operations, net of taxes, of \$0 million and \$2 million for the three months ended March 31, 2016 and 2015, respectively.

Sale of Certain Citi Capital Advisors Business

Citi sold its liquid strategies business within Citi Capital Advisors (CCA) pursuant to two separate transactions in 2013 and reported them as Discontinued operations. Residual costs from the disposals resulted in income from Discontinued operations, net of taxes, of \$0 million and \$1 million for the three months ended March 31, 2016 and 2015, respectively.

Sale of Egg Banking plc Credit Card Business

Citi sold the Egg Banking plc (Egg) credit card business in 2011 and reported it as Discontinued operations. Residual costs from the disposal resulted in losses from Discontinued operations, net of taxes, of \$2 million and \$4 million for the three months ended March 31, 2016 and 2015, respectively.

Combined Results for Discontinued Operations

The following is summarized financial information for previous Discontinued operations for which Citi continues to have minimal residual costs associated with the sales:

	Three Months Ended March 31, 2016	2015
In millions of dollars		
Total revenues, net of interest expense ⁽¹⁾	\$—	\$—
Losses from discontinued operations	\$(3)	\$(8)
Gain on sale	—	—
Provision for income taxes	(1)	(3)
Losses from discontinued operations, net of taxes	\$(2)	\$(5)

(1) Total revenues include gain or loss on sale, if applicable.

Cash flows for the Discontinued operations were not material for all periods presented.

Significant Disposals

The following sales completed during 2016 and 2015 were identified as significant disposals. The major classes of assets and liabilities derecognized from the Consolidated Balance Sheet at closing and the income (loss) before taxes related to each business until the disposal date are presented below.

Novation of the 80% Primerica Coinsurance Agreement

During the first quarter of 2016, Citi completed a novation (an arrangement that extinguishes Citi's rights and obligations under a contract) of the Primerica 80% Coinsurance Agreement to a third party re-insurer, resulting in

revenue of \$422 million recorded in Other revenue (\$274 million after tax). Furthermore, the novation resulted in derecognition of \$1.5 billion available for-sale securities and cash, \$0.95 billion of deferred acquisition costs and \$2.7 billion of insurance liabilities.

Income before taxes, excluding the revenue upon novation, was as follows:

Three
Months
Ended
March
31,

In millions of dollars ~~2015~~ 2015

Income before taxes \$ ~~\$-35~~

Sale of OneMain Financial Business

On November 15, 2015, Citi sold its OneMain Financial business, which was reported in Citi Holdings, including 1,100 retail branches, 5,500 employees, and approximately 1.3 million customer accounts. OneMain Financial had approximately \$10.2 billion of assets, including \$7.8 billion of loans (net of allowance), and \$1.4 billion of available-for-sale securities. The total amount of liabilities sold was \$8.4 billion, including \$6.2 billion of long-term debt and \$1.1 billion of short-term borrowings. The transaction generated a pretax gain on sale of \$2.6 billion, recorded in Other revenue (\$1.6 billion after-tax) during the fourth quarter of 2015. However, when combined with the loss on redemption of certain long-term debt supporting remaining Citi Holdings' assets during the fourth quarter of 2015, the resulting net after-tax gain was \$0.8 billion.

Income before taxes was as follows:

Three
Months
Ended
March
31,

In millions of dollars ~~2015~~ 2015

Income before taxes \$ ~~\$-177~~

3. BUSINESS SEGMENTS

Citigroup's activities are conducted through the Global Consumer Banking (GCB), Institutional Clients Group (ICG), Corporate/Other and Citi Holdings business segments.

GCB includes a global, full-service consumer franchise delivering a wide array of banking, including commercial banking, credit card lending and investment services through a network of local branches, offices and electronic delivery systems and is composed of four GCB businesses: North America, EMEA, Latin America and Asia.

ICG is composed of Banking and Markets and securities services and provides corporate, institutional, public sector and high-net-worth clients in over 95 countries and jurisdictions with a broad range of banking and financial products and services.

Corporate/Other includes certain unallocated costs of global functions, other corporate expenses and net treasury results, unallocated corporate expenses, offsets to certain line-item reclassifications and eliminations, the results of discontinued operations and unallocated taxes.

Citi Holdings is composed of businesses and portfolios of assets that Citigroup has determined are not central to its core Citicorp businesses.

The accounting policies of these reportable segments are the same as those disclosed in Note 1 to the Consolidated

Financial Statements in Citi's 2015 Annual Report on Form 10-K.

The prior-period balances reflect reclassifications to conform the presentation to the current period's presentation. Effective January 1, 2016, the historical financial data was reclassified from Citicorp to Citi Holdings for the consumer businesses in Argentina, Brazil and Colombia that Citi intends to exit. These businesses, which previously were reported as part of Latin America Global Consumer Banking, are now reported as part of Citi Holdings. While Citi does not intend to exit its consumer businesses in Venezuela, these businesses are not significant, lending predominantly to support ICG activities, and are now reported as part of ICG. Similarly, Citi's remaining indirect investment in Banco de Chile is now reported as part of ICG. The following also reflects certain other regional reclassifications within ICG and certain other immaterial reclassifications. Citi's consolidated results remain unchanged for all periods presented as a result of the changes discussed above.

The following table presents certain information regarding the Company's continuing operations by segment:

	Revenues, net of interest expense		Provision (benefits) expense (income)		Income (loss) from continuing operations		Identifiable assets ⁽²⁾	
	2016	2015	2016	2015	2016	2015	March 31, 2016	December 31, 2015
In millions of dollars, except identifiable assets in billions								
Global Consumer Banking	\$7,770	\$8,302	\$646	\$917	\$1,231	\$1,712	\$385	\$381
Institutional Clients Group	8,036	9,077	818	1,365	1,959	2,974	1,292	1,217
Corporate/Other	274	212	(115)	(311)	(29)	(19)	51	52
Total Citicorp	\$16,080	\$17,591	\$1,349	\$1,971	\$3,161	\$4,667	\$1,728	\$1,650
Citi Holdings	1,475	2,145	130	149	347	150	73	81
Total	\$17,555	\$19,736	\$1,479	\$2,120	\$3,508	\$4,817	\$1,801	\$1,731

Includes Citicorp (excluding Corporate/Other) total revenues, net of interest expense, in North America of \$7.9 (1) billion and \$8.5 billion; in EMEA of \$2.2 billion and \$2.9 billion; in Latin America of \$2.2 billion and \$2.4 billion; and in Asia of \$3.5 billion and \$3.6 billion for the three months ended March 31, 2016 and 2015, respectively.

Includes pretax provisions for credit losses and for benefits and claims in the GCB results of \$1.5 billion and \$1.4 (2) billion; in the ICG results of \$390 million and \$86 million; and in Citi Holdings results of \$0.2 billion and \$0.5 billion for the three months ended March 31, 2016 and 2015, respectively.

4. INTEREST REVENUE AND EXPENSE

Interest revenue and Interest expense consisted of the following:

In millions of dollars	Three Months Ended	
	March 31,	
	2016	2015
Interest revenue		
Loan interest, including fees	\$ 9,760	\$ 10,555
Deposits with banks	219	183
Federal funds sold and securities borrowed or purchased under agreements to resell	647	642
Investments, including dividends	1,855	1,711
Trading account assets ⁽¹⁾	1,434	1,399
Other interest ⁽²⁾	252	110
Total interest revenue	\$ 14,167	\$ 14,600
Interest expense		
Deposits ⁽³⁾	\$ 1,204	\$ 1,326
Federal funds purchased and securities loaned or sold under agreements to repurchase	502	376
Trading account liabilities ⁽¹⁾	88	47
Short-term borrowings	100	119
Long-term debt	1,046	1,160
Total interest expense	\$ 2,940	\$ 3,028
Net interest revenue	\$ 11,227	\$ 11,572
Provision for loan losses	1,886	1,755
Net interest revenue after provision for loan losses	\$ 9,341	\$ 9,817

(1) Interest expense on Trading account liabilities of ICG is reported as a reduction of interest revenue from Trading account assets.

(2) During 2015, interest earned related to assets of significant disposals (primarily OneMain Financial) were reclassified into Other interest.

(3) Includes deposit insurance fees and charges of \$235 million and \$296 million for the three months ended March 31, 2016 and 2015, respectively.

5. COMMISSIONS AND FEES

The primary components of Commissions and fees revenue are trading-related fees, investment banking fees, fees related to trade and securities services in ICG and credit card and bank card fees.

Investment banking fees are substantially composed of underwriting and advisory revenues and are recognized when Citigroup's performance under the terms of a contractual arrangement is completed, which is typically at the closing of the transaction. Underwriting revenue is recorded in Commissions and fees, net of both reimbursable and non-reimbursable expenses, consistent with the AICPA Audit and Accounting Guide for Brokers and Dealers in Securities (codified in ASC 940-605-05-1). Expenses associated with advisory transactions are recorded in Other operating expenses, net of client reimbursements. Out-of-pocket expenses are deferred and recognized at the time the related revenue is recognized. In general, expenses incurred related to investment banking transactions that fail to close (are not consummated) are recorded gross in Other operating expenses.

Trading-related fees primarily include commissions and fees from the following: executing transactions for clients on exchanges and over-the-counter markets; sale of mutual funds, insurance and other annuity products; and assisting clients in clearing transactions, providing brokerage services and other such activities. Trading-related fees are recognized when earned in Commissions and fees. Gains or losses, if any, on these transactions are included in Principal transactions (see Note 6 to the Consolidated Financial Statements).

Credit card and bank card fees are primarily composed of interchange revenue and certain card fees, including annual fees, reduced by reward program costs and certain partner payments. Interchange revenue and fees are recognized when earned. Annual card fees are deferred and amortized on a straight-line basis over a 12-month period. Reward costs are recognized when points are earned by the customers. The following table presents Commissions and fees revenue:

	Three Months Ended March 31,	
In millions of dollars	2016	2015
Trading-related	\$601	\$634
Investment banking	574	938
Trade and securities services	406	435
Credit cards and bank cards	271	501
Other consumer ⁽¹⁾	158	180
Corporate finance ⁽²⁾	123	145
Checking-related	116	116
Loan servicing	96	95
Other	118	126
Total commissions and fees	\$2,463	\$3,170

⁽¹⁾ Primarily consists of fees for investment fund administration and management, third-party collections, commercial demand deposit accounts and certain credit card services.

⁽²⁾ Consists primarily of fees earned from structuring and underwriting loan syndications.

6. PRINCIPAL TRANSACTIONS

Principal transactions revenue consists of realized and unrealized gains and losses from trading activities. Trading activities include revenues from fixed income, equities, credit and commodities products and foreign exchange transactions which are managed on a portfolio basis characterized by primary risk. Not included in the table below is the impact of net interest revenue related to trading activities, which is an integral part of trading activities' profitability. See Note 4 to the Consolidated Financial Statements for information about

net interest revenue related to trading activities. Principal transactions include CVA (credit valuation adjustments on derivatives), FVA (funding valuation adjustments) on over-the-counter derivatives and, prior to 2016, DVA (debt valuation adjustments on issued liabilities for which the fair value option has been elected). These adjustments are discussed further in Note 22 to the Consolidated Financial Statements.

The following table presents principal transactions revenue:

In millions of dollars	Three Months Ended March 31,	
	2016	2015
Global Consumer Banking	\$ 145	\$ 156
Institutional Clients Group	1,574	2,197
Corporate/Other	110	(421)
Subtotal Citicorp	\$ 1,829	\$ 1,932
Citi Holdings	11	39
Total Citigroup	\$ 1,840	\$ 1,971
Interest rate risks ⁽¹⁾	\$ 807	\$ 1,197
Foreign exchange risks ⁽²⁾	613	86
Equity risks ⁽³⁾	50	114
Commodity and other risks ⁽⁴⁾	144	317
Credit products and risks ⁽⁵⁾	226	257
Total	\$ 1,840	\$ 1,971

Includes revenues from government securities and corporate debt, municipal securities, mortgage securities and other debt instruments. Also includes spot and forward trading of currencies and exchange-traded and (1) over-the-counter (OTC) currency options, options on fixed income securities, interest rate swaps, currency swaps, swap options, caps and floors, financial futures, OTC options and forward contracts on fixed income securities.

(2) Includes revenues from foreign exchange spot, forward, option and swap contracts, as well as foreign currency translation (FX translation) gains and losses.

(3) Includes revenues from common, preferred and convertible preferred stock, convertible corporate debt, equity-linked notes and exchange-traded and OTC equity options and warrants.

(4) Primarily includes revenues from crude oil, refined oil products, natural gas and other commodities trades.

(5) Includes revenues from structured credit products.

7. INCENTIVE PLANS

All equity awards granted since April 19, 2005 have been made pursuant to stockholder-approved stock incentive plans that are administered by the Personnel and Compensation Committee of the Citigroup Board of Directors, which is composed entirely of independent non-employee directors. For additional information on Citi's incentive plans, see Note 7 to the Consolidated Financial Statements in Citi's 2015 Annual Report on Form 10-K.

8. RETIREMENT BENEFITS

For additional information on Citi's retirement benefits, see Note 8 to the Consolidated Financial Statements in Citi's 2015 Annual Report on Form 10-K.

Pension and Postretirement Plans

The Company has several non-contributory defined benefit pension plans covering certain U.S. employees and has various defined benefit pension and termination indemnity plans covering employees outside the U.S.

The U.S. qualified defined benefit plan was frozen effective January 1, 2008 for most employees. Accordingly, no additional compensation-based contributions have been credited to the cash balance portion of the plan for existing plan participants after 2007. However, certain employees covered under the prior final pay plan formula continue to accrue benefits. The Company also offers postretirement health care and life insurance benefits to certain eligible U.S. retired employees, as well as to certain eligible employees outside the U.S.

The Company also sponsors a number of non-contributory, nonqualified pension plans. These plans, which are unfunded, provide supplemental defined pension benefits to certain U.S. employees. With the exception of certain employees covered under the prior final pay plan formula, the benefits under these plans were frozen in prior years. The plan obligations, plan assets and periodic plan expense for the Company's most significant pension and postretirement benefit plans (Significant Plans) are measured and disclosed quarterly, instead of annually. The Significant Plans captured approximately 90% of the Company's global pension and postretirement plan obligations as of March 31, 2016. All other plans (All Other Plans) are measured annually with a December 31 measurement date.

Net (Benefit) Expense

The following table summarizes the components of net (benefit) expense recognized in the Consolidated Statement of Income for the Company's pension and postretirement plans, for Significant Plans and All Other Plans, for the periods indicated.

In millions of dollars	Three Months Ended March 31,							
	Pension plans				Postretirement benefit plans			
	U.S. plans		Non-U.S. plans		U.S. plans		Non-U.S. plans	
	2016	2015	2016	2015	2016	2015	2016	2015
Qualified plans								
Benefits earned during the period	\$1	\$2	\$ 38	\$ 44	\$ —	\$ —	\$ 3	\$ 4
Interest cost on benefit obligation	141	137	73	80	8	8	24	27
Expected return on plan assets	(218)	(222)	(72)	(84)	(2)	—	(21)	(29)
Amortization of unrecognized								
Prior service benefit	—	(1)	—	—	—	—	(3)	(3)
Net actuarial loss	36	37	19	21	—	—	8	11
Curtailement gain ⁽¹⁾	—	—	(3)	—	—	—	—	—
Settlement loss ⁽¹⁾	—	—	1	—	—	—	—	—
Net qualified plans (benefit) expense	\$(40)	\$(47)	\$ 56	\$ 61	\$ 6	\$ 8	\$ 11	\$ 10
Nonqualified plans expense	10	12	—	—	—	—	—	—
Total net (benefit) expense	\$(30)	\$(35)	\$ 56	\$ 61	\$ 6	\$ 8	\$ 11	\$ 10

(1)(Gains)/losses due to curtailment and settlement relate to repositioning and divestiture activities.

Funded Status and Accumulated Other Comprehensive Income (AOCI)

The following tables summarize the funded status and amounts recognized in the Consolidated Balance Sheet for the Company's Significant Plans.

Net Amount Recognized

In millions of dollars	Three Months Ended March 31,			
	Pension plans		Postretirement benefit plans	
	U.S. plans 2016	Non-U.S. plans 2016	U.S. plans 2016	Non-U.S. plans 2016
Change in projected benefit obligation (PBO)				
Projected benefit obligation at beginning of period	\$ 13,943	\$ 6,534	\$ 817	\$ 1,291
Plans measured annually	—	(1,819)	—	(282)
Projected benefit obligation at beginning of period—Significant Plans	\$ 13,943	\$ 4,715	\$ 817	\$ 1,009

Net actuarial loss	(7,065)	(1,089)	(27)	(478)
Net amount recognized in equity (pretax)—Significant Plans	\$(7,065)	\$ (1,046)	\$(27)	\$ (369)

Accumulated benefit obligation at period end—Significant Plans \$14,506 \$ 4,618 \$839 \$ 1,039

(1) The U.S. pension plans include \$733 million relating to the U.S. nonqualified plans of the Company that are not funded.

The U.S. qualified pension plan is fully funded under specified Employee Retirement Income Security Act of (2) 1974, as amended (ERISA), funding rules as of January 1, 2016 and no minimum required funding is expected for 2016.

The following table shows the change in AOCI related to Company's benefit plans (Significant Plans and All Other Plans) for the periods indicated.

In millions of dollars	Three Months Ended March 31, 2016	Year Ended December 31, 2015
Beginning of period balance, net of tax ⁽¹⁾⁽²⁾	\$(5,116)	\$(5,159)
Actuarial assumptions changes and plan experience	(875)	898
Net asset gain (loss) due to difference between actual and expected returns	163	(1,457)
Net amortizations	56	236
Prior service (cost) credit	30	(6)
Curtailment/settlement gain ⁽³⁾	1	57
Foreign exchange impact and other	(102)	291
Change in deferred taxes, net	262	24
Change, net of tax	\$(465)	\$ 43
End of period balance, net of tax ⁽¹⁾⁽²⁾	\$(5,581)	\$(5,116)

(1) See Note 18 to the Consolidated Financial Statements for further discussion of net AOCI balance.

(2) Includes net-of-tax amounts for certain profit sharing plans outside the U.S.

(3) Gains due to curtailment and settlement relate to repositioning and divestiture activities.

Plan Assumptions

The Company utilizes a number of assumptions to determine plan obligations and expenses. Changes in one or a combination of these assumptions will have an impact on the Company's pension and postretirement PBO, funded status and (benefit) expense. Changes in the plans' funded status resulting from changes in the PBO and fair value of plan assets will have a corresponding impact on AOCI.

For the Company's Significant Plans, the discount rates at the respective period ended in the tables below are utilized to measure the period-end PBO and the net periodic (benefit) expense for the subsequent period. As a result of the quarterly measurement process, the net periodic (benefit) expense for the Significant Plans is calculated at each respective quarter-end based on the preceding quarter-end rates. The discount rates for the non-U.S. pension and postretirement plans relate to the Significant Plans only.

The discount rates utilized during the period in determining the pension and postretirement net (benefit) expense for the Significant Plans are as follows:

Net benefit (expense) assumed discount rates during the period	Three months ended	
	Mar. 31, 2016	Dec. 31, 2015
U.S. plans		
Qualified pension	4.40%	4.35%
Nonqualified pension	4.35	4.25
Postretirement	4.20	4.10
Non-U.S. plans		
Pension	0.75 to 13.20	0.75 to 13.30
Weighted average	5.37	5.30
Postretirement	8.60	8.55

The discount rates utilized at period-end in determining the pension and postretirement benefit obligations for the Significant Plans are as follows:

Edgar Filing: CITIGROUP INC - Form 10-Q

Plan obligations assumed discount rates at period ended	Mar. 31, 2016	Dec. 31, 2015
U.S. plans		
Qualified pension	3.95%	4.40%
Nonqualified pension	3.90	4.35
Postretirement	3.75	4.20
Non-U.S. plans		
Pension	0.35 - 12.30	0.75 to 13.20
Weighted average	5.14	5.37
Postretirement	8.45	8.60

Sensitivities of Certain Key Assumptions

The following table summarizes the estimated effect on the Company's Significant Plans quarterly expense of a one-percentage-point change in the discount rate:

Three Months Ended March 31, 2016

In millions of dollars One-percentage-point increase One-percentage-point decrease

Pension

U.S. plans	\$5	\$(10)
Non-U.S. plans	(5)	8

Postretirement

U.S. plans	\$1	\$(1)
Non-U.S. plans	(2)	3

Since the U.S. plans were frozen, the majority of the prospective service cost has been eliminated and the gain/loss amortization period was changed to the life expectancy for inactive participants. As a result, expense for the U.S. plans is driven more by interest costs than service costs and an increase in the discount rate would increase expense, while a decrease in the discount rate would decrease expense.

Contributions

The Company's funding practice for U.S. and non-U.S. pension plans is generally to fund to minimum funding requirements in accordance with applicable local laws and regulations. The Company may increase its contributions

above the minimum required contribution, if appropriate. In addition, management has the ability to change its funding practices. For the U.S. pension plans, there were no required minimum cash contributions during the first quarter of 2016.

The following table summarizes the actual Company contributions for the three months ended March 31, 2016 and 2015, as well as estimated expected Company contributions for the remainder of 2016 and the contributions made in the second, third and fourth quarters of 2015. Expected contributions are subject to change since contribution decisions are affected by various factors, such as market performance and regulatory requirements.

Summary of Company Contributions

In millions of dollars	Pension plans		Postretirement plans					
	U.S. plans	Non-U.S. plans	U.S. plans	Non-U.S. plans	U.S. plans	Non-U.S. plans		
Company contributions ⁽²⁾ for the three months ended March 31	\$15	\$11	\$32	\$26	\$14	\$20	\$2	\$7
Company contributions made or expected to be made expected during the remainder of the year	\$40	\$41	\$103	\$108	\$—	\$215	\$7	\$2

(1) The U.S. pension plans include benefits paid directly by the Company for the nonqualified pension plans.

(2) Company contributions are composed of cash contributions made to the plans and benefits paid directly to participants by the Company.

Defined Contribution Plans

The Company sponsors defined contribution plans in the U.S. and in certain non-U.S. locations, all of which are administered in accordance with local laws. The most significant defined contribution plan is the Citi Retirement Savings Plan (formerly known as the Citigroup 401(k) Plan) sponsored by the Company in the U.S.

Under the Citi Retirement Savings Plan, eligible U.S. employees receive matching contributions of up to 6% of their eligible compensation for 2016 and 2015, subject to statutory limits. Additionally, for eligible employees whose eligible compensation is \$100,000 or less, a fixed contribution of up to 2% of eligible compensation is provided.

The following table summarizes the actual Company contributions for the three months ended March 31, 2016 and 2015, respectively.

In millions of dollars	Three Months Ended March 31,	
	2016	2015
U.S. plans	\$96	\$101
Non-U.S. plans	68	74

Postemployment Plans

The Company sponsors U.S. postemployment plans that provide income continuation and health and welfare benefits to certain eligible U.S. employees on long-term disability.

The following table summarizes the components of net expense recognized in the Consolidated Statement of Income for the Company's U.S. postemployment plans.

	Three Months Ended March 31, 2016 2015	
In millions of dollars		
Service-related expense		
Interest cost on benefit obligation	1	1
Amortization of unrecognized		
Prior service benefit	(8)	(7)
Net actuarial loss	1	3
Total service-related benefit	\$(6)	\$(3)
Non-service-related expense	\$8	\$9
Total net expense	\$2	\$6

9. EARNINGS PER SHARE

The following is a reconciliation of the income and share data used in the basic and diluted earnings per share (EPS) computations:

	Three Months Ended March 31,	
	2016	2015
In millions, except per-share amounts		
Income from continuing operations before attribution of noncontrolling interests	\$3,508	\$4,817
Less: Noncontrolling interests from continuing operations	5	42
Net income from continuing operations (for EPS purposes)	\$3,503	\$4,775
Income (loss) from discontinued operations, net of taxes	(2)	(5)
Citigroup's net income	\$3,501	\$4,770
Less: Preferred dividends ⁽¹⁾	210	128
Net income available to common shareholders	\$3,291	\$4,642
Less: Dividends and undistributed earnings allocated to employee restricted and deferred shares with nonforfeitable rights to dividends, applicable to basic EPS	40	62
Net income allocated to common shareholders for basic EPS	\$3,251	\$4,580
Net income allocated to common shareholders for diluted EPS	\$3,251	\$4,580
Weighted-average common shares outstanding applicable to basic EPS	2,943.0	3,034.2
Effect of dilutive securities ⁽³⁾		
Options ⁽²⁾	0.1	4.9
Other employee plans	—	0.2
Adjusted weighted-average common shares outstanding applicable to diluted EPS	2,943.1	3,039.3
Basic earnings per share ⁽⁴⁾		
Income from continuing operations	\$1.11	\$1.51
Discontinued operations	—	—
Net income	\$1.10	\$1.51
Diluted earnings per share ⁽⁴⁾		
Income from continuing operations	\$1.11	\$1.51
Discontinued operations	—	—
Net income	\$1.10	\$1.51

(1) See Note 19 to the Consolidated Financial Statements for the potential future impact of preferred stock dividends.

During the first quarters of 2016 and 2015, weighted-average options to purchase 6.2 million and 0.9 million shares

(2) of common stock, respectively, were outstanding but not included in the computation of earnings per share because the weighted-average exercise prices of \$69.88 and \$195.47 per share, respectively, were anti-dilutive.

Warrants issued to the U.S. Treasury as part of the Troubled Asset Relief Program (TARP) and the loss-sharing agreement (all of which were subsequently sold to the public in January 2011), with exercise prices of \$178.50 and (3) \$106.10 per share for approximately 21.0 million and 25.5 million shares of Citigroup common stock, respectively.

Both warrants were not included in the computation of earnings per share in the first quarter of 2016 and 2015 because they were anti-dilutive.

(4) Due to rounding, earnings per share on continuing operations and discontinued operations may not sum to earnings per share on net income.

10. FEDERAL FUNDS, SECURITIES BORROWED, LOANED AND SUBJECT TO REPURCHASE AGREEMENTS

Federal funds sold and securities borrowed or purchased under agreements to resell, at their respective carrying values, consisted of the following:

In millions of dollars	March 31, December 31,	
	2016	2015
Federal funds sold	\$—	\$ 25
Securities purchased under agreements to resell	121,819	119,777
Deposits paid for securities borrowed	103,274	99,873
Total	\$ 225,093	\$ 219,675

Federal funds purchased and securities loaned or sold under agreements to repurchase, at their respective carrying values, consisted of the following:

In millions of dollars	March 31, December 31,	
	2016	2015
Federal funds purchased	\$ 376	\$ 189
Securities sold under agreements to repurchase	140,267	131,650
Deposits received for securities loaned	16,565	14,657
Total	\$ 157,208	\$ 146,496

The resale and repurchase agreements represent collateralized financing transactions. The Company executes these transactions primarily through its broker-dealer subsidiaries to facilitate customer matched-book activity and to efficiently fund a portion of the Company's trading inventory. Transactions executed by the Company's bank subsidiaries primarily facilitate customer financing activity.

To maintain reliable funding under a wide range of market conditions, including under periods of stress, Citi manages these activities by taking into consideration the quality of the underlying collateral and stipulating financing tenor. Citi manages the risks in its collateralized financing transactions by conducting daily stress tests to account for changes in capacity, tenors, haircut, collateral profile and client actions. Additionally, Citi maintains counterparty diversification by establishing concentration triggers and assessing counterparty reliability and stability under stress.

It is the Company's policy to take possession of the underlying collateral, monitor its market value relative to the amounts due under the agreements and, when necessary, require prompt transfer of additional collateral in order to maintain contractual margin protection. For resale and repurchase agreements, when necessary, the Company posts additional collateral in order to maintain contractual margin protection.

Collateral typically consists of government and government-agency securities, corporate and municipal bonds, equities, and mortgage-backed and other asset-backed securities.

The resale and repurchase agreements are generally documented under industry standard agreements that allow the prompt close-out of all transactions (including the liquidation of securities held) and the offsetting of obligations to return cash or securities by the non-defaulting party, following a payment default or other type of default under the relevant master agreement. Events of default generally include (i) failure to deliver cash or securities as required under the transaction, (ii) failure to provide or return cash or securities as used for margining purposes, (iii) breach of representation, (iv) cross-default to another transaction entered into among the parties, or, in some cases, their affiliates, and (v) a repudiation of obligations under the agreement. The counterparty that receives the securities in these transactions is generally unrestricted in its use of the securities, with the exception of transactions executed on a tri-party basis, where the collateral is maintained by a custodian and operational limitations may restrict its use of the securities.

A substantial portion of the resale and repurchase agreements is recorded at fair value, as described in Notes 22 and 23 to the Consolidated Financial Statements. The remaining portion is carried at the amount of cash initially advanced or received, plus accrued interest, as specified in the respective agreements.

The securities borrowing and lending agreements also represent collateralized financing transactions similar to the resale and repurchase agreements. Collateral typically consists of government and government-agency securities and

corporate debt and equity securities.

Similar to the resale and repurchase agreements, securities borrowing and lending agreements are generally documented under industry standard agreements that allow the prompt close-out of all transactions (including the liquidation of securities held) and the offsetting of obligations to return cash or securities by the non-defaulting party, following a payment default or other default by the other party under the relevant master agreement. Events of default and rights to use securities under the securities borrowing and lending agreements are similar to the resale and repurchase agreements referenced above.

A substantial portion of securities borrowing and lending agreements is recorded at the amount of cash advanced or received. The remaining portion is recorded at fair value as the Company elected the fair value option for certain securities borrowed and loaned portfolios, as described in Note 23 to the Consolidated Financial Statements. With respect to securities loaned, the Company receives cash collateral in an amount generally in excess of the market value of the securities loaned. The Company monitors the market value of securities borrowed and securities loaned on a daily basis and obtains or posts additional collateral in order to maintain contractual margin protection.

The enforceability of offsetting rights incorporated in the master netting agreements for resale and repurchase agreements and securities borrowing and lending agreements is evidenced to the extent that a supportive legal opinion has been obtained from counsel of recognized standing that provides the requisite level of certainty regarding the enforceability of these agreements, and that the exercise of

rights by the non-defaulting party to terminate and close-out transactions on a net basis under these agreements will not be stayed or avoided under applicable law upon an event of default including bankruptcy, insolvency or similar proceeding.

A legal opinion may not have been sought or obtained for certain jurisdictions where local law is silent or sufficiently ambiguous to determine the enforceability of offsetting rights or where adverse case law or conflicting regulation may cast doubt on the enforceability of such rights. In some jurisdictions and for some counterparty types, the insolvency law for a particular counterparty type may be nonexistent or unclear as overlapping regimes may exist. For example, this may be the case for certain sovereigns, municipalities, central banks and U.S. pension plans.

The following tables present the gross and net resale and repurchase agreements and securities borrowing and lending agreements and the related offsetting amount permitted under ASC 210-20-45. The tables also include amounts related to financial instruments that are not permitted to be offset under ASC 210-20-45 but would be eligible for offsetting to the extent that an event of default occurred and a legal opinion supporting enforceability of the offsetting rights has been obtained. Remaining exposures continue to be secured by financial collateral, but the Company may not have sought or been able to obtain a legal opinion evidencing enforceability of the offsetting right.

11. BROKERAGE RECEIVABLES AND BROKERAGE PAYABLES

The Company has receivables and payables for financial instruments sold to and purchased from brokers, dealers and customers, which arise in the ordinary course of business. The Company is exposed to risk of loss from the inability of brokers, dealers or customers to pay for purchases or to deliver the financial instruments sold, in which case the Company would have to sell or purchase the financial instruments at prevailing market prices. Credit risk is reduced to the extent that an exchange or clearing organization acts as a counterparty to the transaction and replaces the broker, dealer or customer in question.

The Company seeks to protect itself from the risks associated with customer activities by requiring customers to maintain margin collateral in compliance with regulatory and internal guidelines. Margin levels are monitored daily, and customers deposit additional collateral as required. Where customers cannot meet collateral requirements, the Company may liquidate sufficient underlying financial instruments to bring the customer into compliance with the required margin level.

Exposure to credit risk is impacted by market volatility, which may impair the ability of clients to satisfy their obligations to the Company. Credit limits are established and closely monitored for customers and for brokers and dealers engaged in forwards, futures and other transactions deemed to be credit sensitive.

Brokerage receivables and Brokerage payables consisted of the following:

In millions of dollars	March 31, December 31,	
	2016	2015
Receivables from customers	\$ 9,552	\$ 10,435
Receivables from brokers, dealers, and clearing organizations	25,709	17,248
Total brokerage receivables ⁽¹⁾	\$ 35,261	\$ 27,683
Payables to customers	\$ 38,014	\$ 35,653
Payables to brokers, dealers, and clearing organizations	20,243	18,069
Total brokerage payables ⁽¹⁾	\$ 58,257	\$ 53,722

⁽¹⁾ Brokerage receivables and payables are accounted for in accordance with the AICPA Audit and Accounting Guide for Brokers and Dealers in Securities as codified in ASC 940-320.

12. TRADING ACCOUNT ASSETS AND LIABILITIES

Trading account assets and Trading account liabilities are carried at fair value, other than physical commodities accounted for at the lower of cost or fair value, and consist of the following:

In millions of dollars	March 31, December 31,	
	2016	2015
Trading account assets		
Mortgage-backed securities ⁽¹⁾		
U.S. government-sponsored agency guaranteed	\$ 28,026	\$ 24,767
Prime	372	803
Alt-A	226	543
Subprime	570	516
Non-U.S. residential	312	523
Commercial	2,372	2,855
Total mortgage-backed securities	\$ 31,878	\$ 30,007
U.S. Treasury and federal agency securities		
U.S. Treasury	\$ 29,716	\$ 15,791
Agency obligations	2,447	2,005
Total U.S. Treasury and federal agency securities	\$ 32,163	\$ 17,796
State and municipal securities	\$ 3,642	\$ 2,696

Foreign government securities	62,923	56,609
Corporate	15,389	14,437
Derivatives ⁽²⁾	63,044	56,184
Equity securities	49,108	56,495
Asset-backed securities ⁽¹⁾	3,567	3,956
Other trading assets ⁽³⁾	12,033	11,776
Total trading account assets	\$273,747	\$249,956
Trading account liabilities		
Securities sold, not yet purchased	\$73,241	\$57,827
Derivatives ⁽²⁾	62,769	57,592
Other trading liabilities ⁽³⁾	136	2,093
Total trading account liabilities	\$136,146	\$117,512

The Company invests in mortgage-backed and asset-backed securities. These securitizations are generally considered VIEs. The Company's maximum exposure to loss from these VIEs is equal to the carrying amount of the securities, which is reflected in the table above. For mortgage-backed and asset-backed securitizations in which the Company has other involvement, see Note 20 to the Consolidated Financial Statements.

(1) Presented net, pursuant to enforceable master netting agreements. See Note 21 to the Consolidated Financial Statements for a discussion regarding the accounting and reporting for derivatives.

(2) Includes positions related to investments in unallocated precious metals, as discussed in Note 23 to the Consolidated Financial Statements. Also includes physical commodities accounted for at the lower of cost or fair value.

13. INVESTMENTS

Overview

The following table presents the Company's investments by category:

In millions of dollars	March 31, December 31,	
	2016	2015
Securities available-for-sale (AFS)	\$ 308,774	\$ 299,136
Debt securities held-to-maturity (HTM) ⁽¹⁾	36,890	36,215
Non-marketable equity securities carried at fair value ⁽²⁾	2,044	2,088
Non-marketable equity securities carried at cost ⁽³⁾	5,544	5,516
Total investments	\$ 353,252	\$ 342,955

(1) Carried at adjusted amortized cost basis, net of any credit-related impairment.

(2) Unrealized gains and losses for non-marketable equity securities carried at fair value are recognized in earnings.

(3) Primarily consists of shares issued by the Federal Reserve Bank, Federal Home Loan Banks, foreign central banks and various clearing houses of which Citigroup is a member.

The following table presents interest and dividend income on investments:

In millions of dollars	Three Months Ended March 31,	
	2016	2015
Taxable interest	\$ 1,704	\$ 1,593
Interest exempt from U.S. federal income tax	116	23
Dividend income	35	95
Total interest and dividend income	\$ 1,855	\$ 1,711

The following table presents realized gains and losses on the sale of investments. The gross realized investment losses exclude losses from other-than-temporary impairment (OTTI):

In millions of dollars	Three Months Ended March 31,	
	2016	2015
Gross realized investment gains	\$ 379	\$ 356
Gross realized investment losses	(193)	(49)
Net realized gains on sale of investments	\$ 186	\$ 307

The Company has sold certain debt securities that were classified as HTM. These sales were in response to significant deterioration in the creditworthiness of the issuers or securities or because the Company has collected a substantial portion (at least 85%) of the principal outstanding at acquisition of the security. In addition, certain other securities were reclassified to AFS investments in response to

significant credit deterioration. Because the Company generally intends to sell these reclassified securities, Citi recorded OTTI on the securities. The following table sets forth, for the periods indicated, the carrying value of HTM securities sold and reclassified to AFS, as well as the related gain (loss) or the OTTI losses recorded on these securities.

	Three Months Ended March 31, 2015
In millions of dollars	2015
Carrying value of HTM securities sold	\$27
Net realized gain (loss) on sale of HTM securities	— 2
Carrying value of securities reclassified to AFS	124
OTTI losses on securities reclassified to AFS	(5) ()

117

The Company invests in mortgage-backed and asset-backed securities. These securitizations are generally considered VIEs. The Company's maximum exposure to loss from these VIEs is equal to the carrying amount of the securities, which is reflected in the table above. For mortgage-backed and asset-backed securitizations in which the Company has other involvement, see Note 20 to the Consolidated Financial Statements.

The gross unrealized losses on state and municipal debt securities are primarily attributable to the effects of fair value hedge accounting. Specifically, Citi hedges the LIBOR-benchmark interest rate component of certain fixed-rate tax-exempt state and municipal debt securities utilizing LIBOR-based interest rate swaps. During the hedge period, losses incurred on the LIBOR-hedging swaps recorded in earnings were substantially offset by gains on the state and municipal debt securities attributable to changes in the LIBOR swap rate being hedged. However, because the LIBOR swap rate decreased significantly during the hedge period while the overall fair value of the municipal debt securities was relatively unchanged, the effect of reclassifying fair value gains on these securities from AOCI to earnings, attributable solely to changes in the LIBOR swap rate, resulted in net unrealized losses remaining in AOCI that relate to the unhedged components of these securities.

As discussed in more detail below, the Company conducts periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other-than-temporary. Any credit-related impairment related to debt securities is recorded in earnings as OTTI. Non-credit-related impairment is recognized in AOCI if the Company does not plan to sell and is not likely to be required to sell the security. For other debt securities with OTTI, the entire impairment is recognized in the Consolidated Statement of Income.

The table below shows the fair value of AFS securities that have been in an unrealized loss position for less than 12 months or for 12 months or longer:

For securities transferred to HTM from Trading account assets, amortized cost basis is defined as the fair value of the securities at the date of transfer plus any accretion income and less any impairments recognized in earnings subsequent to transfer. For securities transferred to HTM from AFS, amortized cost is defined as the original purchase cost, adjusted for the cumulative accretion or amortization of any purchase discount or premium, plus or minus any cumulative fair value hedge adjustments, net of accretion or amortization, and less any other-than-temporary impairment recognized in earnings.

HTM securities are carried on the Consolidated Balance Sheet at amortized cost basis, plus or minus any unamortized unrealized gains and losses and fair value hedge adjustments recognized in AOCI prior to reclassifying the securities from AFS to HTM. Changes in the values of these securities are not reported in the financial statements, except for the amortization of any difference between the carrying value at the transfer date and par value of the securities, and the recognition of any non-credit fair value adjustments in AOCI in connection with the recognition of any credit impairment in earnings related to securities the Company continues to intend to hold until maturity.

(3) The Company invests in mortgage-backed and asset-backed securities. These securitizations are generally considered VIEs. The Company's maximum exposure to loss from these VIEs is equal to the carrying amount of the securities, which is reflected in the table above. For mortgage-backed and asset-backed securitizations in which the Company has other involvement, see Note 20 to the Consolidated Financial Statements.

(4) The net unrealized losses recognized in AOCI on state and municipal debt securities are primarily attributable to the effects of fair value hedge accounting applied when these debt securities were classified as AFS. Specifically, Citi hedged the LIBOR-benchmark interest rate component of certain fixed-rate tax-exempt state and municipal debt securities utilizing LIBOR-based interest rate swaps. During the hedge period, losses incurred on the LIBOR-hedging swaps recorded in earnings were substantially offset by gains on the state and municipal debt securities attributable to changes in the LIBOR swap rate being hedged. However, because the LIBOR swap rate decreased significantly during the hedge period while the overall fair value of the municipal debt securities was relatively unchanged, the effect of reclassifying fair value gains on these securities from AOCI to earnings attributable solely to changes in the LIBOR swap rate resulted in net unrealized losses remaining in AOCI that relate to the unhedged components of these securities. Upon transfer of these debt securities to HTM, all hedges have been de-designated and hedge accounting has ceased.

During the second quarter of 2015, securities with a total fair value of approximately \$7.1 billion were transferred from AFS to HTM, consisting of \$7.0 billion of U.S. government agency mortgage-backed securities and \$0.1 billion of obligations of U.S. states and municipalities. The transfer reflects the Company's intent to hold these securities to maturity or to issuer call in order to reduce the impact of price volatility on AOCI and certain capital measures under Basel III. While these securities were transferred to HTM at fair value as of the transfer date, no (5) subsequent changes in value may be recorded, other than in connection with the recognition of any subsequent other-than-temporary impairment and the amortization of differences between the carrying values at the transfer date and the par values of each security as an adjustment of yield over the remaining contractual life of each security. Any net unrealized holding losses within AOCI related to the respective securities at the date of transfer, inclusive of any cumulative fair value hedge adjustments, will be amortized over the remaining contractual life of each security as an adjustment of yield in a manner consistent with the amortization of any premium or discount.

The Company has the positive intent and ability to hold these securities to maturity or, where applicable, the exercise of any issuer call options, absent any unforeseen significant changes in circumstances, including deterioration in credit or changes in regulatory capital requirements.

The net unrealized losses classified in AOCI primarily relate to debt securities previously classified as AFS that have been transferred to HTM, and include any cumulative fair

value hedge adjustments. The net unrealized loss amount also includes any non-credit-related changes in fair value of HTM securities that have suffered credit impairment recorded in earnings. The AOCI balance related to HTM securities is amortized over the remaining contractual life of the related securities as an adjustment of yield in a manner consistent with the accretion of any difference between the carrying value at the transfer date and par value of the same debt securities.

The table below shows the fair value of debt securities HTM that have been in an unrecognized loss position for less than 12 months and for 12 months or longer:

In millions of dollars	Less than 12 months		12 months or longer		Total	
	Fair value	Gross unrecognized losses	Fair value	Gross unrecognized losses	Fair value	Gross unrecognized losses

Excluded from the gross unrecognized losses presented in the above table are \$(414) million and \$(453) million of net unrealized losses recorded in AOCI as of March 31, 2016 and December 31, 2015, respectively, primarily related to

the difference between the amortized cost and carrying value of HTM securities that were reclassified from AFS. Substantially all of these net unrecognized losses relate to securities that have been in a loss position for 12 months or longer at March 31, 2016 and December 31, 2015.

The following table presents the carrying value and fair value of HTM debt securities by contractual maturity dates:

Evaluating Investments for Other-Than-Temporary Impairment

Overview

The Company conducts periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other-than-temporary.

An unrealized loss exists when the current fair value of an individual security is less than its amortized cost basis. Unrealized losses that are determined to be temporary in nature are recorded, net of tax, in AOCI for AFS securities. Losses related to HTM securities generally are not recorded, as these investments are carried at adjusted amortized cost basis. However, for HTM securities with credit-related losses, the credit loss is recognized in earnings as OTTI and any difference between the cost basis adjusted for the OTTI and fair value is recognized in AOCI and amortized as an adjustment of yield over the remaining contractual life of the security. For securities transferred to HTM from Trading account assets, amortized cost is defined as the fair value of the securities at the date of transfer, plus any accretion income and less any impairment recognized in earnings subsequent to transfer. For securities transferred to HTM from AFS, amortized cost is defined as the original purchase cost, adjusted for the cumulative accretion or amortization of any purchase discount or premium, plus or minus any cumulative fair value hedge adjustments, net of accretion or amortization, and less any impairment recognized in earnings.

Regardless of the classification of the securities as AFS or HTM, the Company assesses each position with an unrealized loss for OTTI. Factors considered in determining whether a loss is temporary include:

- the length of time and the extent to which fair value has been below cost;
- the severity of the impairment;
- the cause of the impairment and the financial condition and near-term prospects of the issuer;
- activity in the market of the issuer that may indicate adverse credit conditions; and
- the Company's ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery.

The Company's review for impairment generally entails:

- identification and evaluation of impaired investments;
- analysis of individual investments that have fair values less than amortized cost, including consideration of the length of time the investment has been in an unrealized loss position and the expected recovery period;
- consideration of evidential matter, including an evaluation of factors or triggers that could cause individual investments to qualify as having other-than-temporary impairment and those that would not support other-than-temporary impairment; and
- documentation of the results of these analyses, as required under business policies.

Debt

The entire difference between amortized cost basis and fair value is recognized in earnings as OTTI for impaired debt securities that the Company has an intent to sell or for which the Company believes it will more-likely-than-not be required to sell prior to recovery of the amortized cost basis. However, for those securities that the Company does not intend to sell and is not likely to be required to sell, only the credit-related impairment is recognized in earnings and any non-credit-related impairment is recorded in AOCI.

For debt securities, credit impairment exists where management does not expect to receive contractual principal and interest cash flows sufficient to recover the entire amortized cost basis of a security.

Equity

For equity securities, management considers the various factors described above, including its intent and ability to hold the equity security for a period of time sufficient for recovery to cost or whether it is more-likely-than-not that

the Company will be required to sell the security prior to recovery of its cost basis. Where management lacks that intent or ability, the security's decline in fair value is deemed to be other-than-temporary and is recorded in earnings. AFS equity securities deemed to be other-than-temporarily impaired are written down to fair value, with the full difference between fair value and cost recognized in earnings.

Management assesses equity method investments that have fair values that are less than their respective carrying values for OTTI. Fair value is measured as price multiplied by quantity if the investee has publicly listed securities. If the investee is not publicly listed, other methods are used (see Note 22 to the Consolidated Financial Statements). For impaired equity method investments that Citi plans to sell prior to recovery of value or would likely be required to sell, with no expectation that the fair value will recover prior to the expected sale date, the full impairment is recognized in earnings as OTTI regardless of severity and duration. The measurement of the OTTI does not include partial projected recoveries subsequent to the balance sheet date.

For impaired equity method investments that management does not plan to sell and is not likely to be required to sell prior to recovery of value, the evaluation of whether an impairment is other-than-temporary is based on (i) whether and when an equity method investment will recover in value and (ii) whether the investor has the intent and ability to hold that investment for a period of time sufficient to recover the value. The determination of whether the impairment is considered other-than-temporary considers the following indicators, regardless of the time and extent of impairment:

- the cause of the impairment and the financial condition and near-term prospects of the issuer, including any specific events that may influence the operations of the issuer;
- the intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value; and

the length of time and extent to which fair value has been less than the carrying value.

The sections below describe the Company's process for identifying credit-related impairments for security types that have the most significant unrealized losses as of March 31, 2016.

Mortgage-Backed Securities

For U.S. mortgage-backed securities (and in particular for Alt-A and other mortgage-backed securities that have significant unrealized losses as a percentage of amortized cost), credit impairment is assessed using a cash flow model that estimates the principal and interest cash flows on the underlying mortgages using the security-specific collateral and transaction structure. The model distributes the estimated cash flows to the various tranches of securities, considering the transaction structure and any subordination and credit enhancements that exist in that structure. The cash flow model incorporates actual cash flows on the mortgage-backed securities through the current period and then estimates the remaining cash flows using a number of assumptions, including default rates, prepayment rates, recovery rates (on foreclosed properties) and loss severity rates (on non-agency mortgage-backed securities).

Management develops specific assumptions using market data, internal estimates and estimates published by rating agencies and other third-party sources. Default rates are projected by considering current underlying mortgage loan performance, generally assuming the default of (i) 10% of current loans, (ii) 25% of 30–59 day delinquent loans, (iii) 70% of 60–90 day delinquent loans and (iv) 100% of 91+ day delinquent loans. These estimates are extrapolated along a default timing curve to estimate the total lifetime pool default

rate. Other assumptions contemplate the actual collateral attributes, including geographic concentrations, rating actions and current market prices.

Cash flow projections are developed using different stress test scenarios. Management evaluates the results of those stress tests (including the severity of any cash shortfall indicated and the likelihood of the stress scenarios actually occurring based on the underlying pool's characteristics and performance) to assess whether management expects to recover the amortized cost basis of the security. If cash flow projections indicate that the Company does not expect to recover its amortized cost basis, the Company recognizes the estimated credit loss in earnings.

State and Municipal Securities

The process for identifying credit impairments in Citigroup's AFS and HTM state and municipal bonds is primarily based on a credit analysis that incorporates third-party credit ratings. Citigroup monitors the bond issuers and any insurers providing default protection in the form of financial guarantee insurance. The average external credit rating, ignoring any insurance, is Aa3/AA-. In the event of an external rating downgrade or other indicator of credit impairment (i.e., based on instrument-specific estimates of cash flows or probability of issuer default), the subject bond is specifically reviewed for adverse changes in the amount or timing of expected contractual principal and interest payments.

For state and municipal bonds with unrealized losses that Citigroup plans to sell (for AFS only), would be more-likely-than-not required to sell (for AFS only) or will be subject to an issuer call deemed probable of exercise prior to the expected recovery of its amortized cost basis (for AFS and HTM), the full impairment is recognized in earnings.

Recognition and Measurement of OTTI

The total OTTI recognized in earnings follows:

OTTI on Investments and Other Assets

In millions of dollars

Three Months Ended March 31, 2016	
Other	Total
AFS	HTM Assets
(3)	

Impairment losses related to securities that the Company does not intend to sell nor will likely be required to sell:

Total OTTI losses recognized during the period	\$1	\$	—	\$	—	\$1
Less: portion of impairment loss recognized in AOCI (before taxes)	—	—	—	—	—	—
Net impairment losses recognized in earnings for securities that the Company does not intend to sell nor will likely be required to sell	\$1	\$	—	\$	—	\$1
Impairment losses recognized in earnings for securities that the Company intends to sell, would be more likely than not required to sell or will be subject to an issuer call deemed probable of exercise and FX losses	195	7	262	464		
Total impairment losses recognized in earnings	\$196	\$	7	\$262	\$465	

(1) Includes OTTI on non-marketable equity securities.

(2) Includes a \$160 million impairment related to AFS securities affected by changes in the Venezuela exchange rate during the quarter.

(3) The impairment charge is related to the carrying value of an equity investment.

Investments in Alternative Investment Funds That Calculate Net Asset Value per Share

The Company holds investments in certain alternative investment funds that calculate net asset value (NAV) per share, including hedge funds, private equity funds, funds of funds and real estate funds. The Company's investments include co-investments in funds that are managed by the Company and investments in funds that are managed by third parties. Investments in funds are generally classified as non-marketable equity securities carried at fair value. The fair values of these investments are estimated using the NAV per share of the Company's ownership interest in the funds, where it is not probable that the Company will sell an investment at a price other than the NAV.

In millions of dollars	Fair value		Unfunded commitments		Redemption frequency (if currently eligible) monthly, quarterly, annually	Redemption notice period
	March 31, 2016	December 31, 2015	March 31, 2016	December 31, 2015		
Hedge funds	\$2	\$ 3	\$ —	\$ —	Generally quarterly	10–95 days
Private equity funds ⁽¹⁾⁽²⁾	748	762	183	173	—	—
Real estate funds ⁽²⁾⁽³⁾	89	130	22	21	—	—
Total ⁽⁴⁾	\$839	\$ 895	\$ 205	\$ 194	—	—

(1) Private equity funds include funds that invest in infrastructure, leveraged buyout transactions, emerging markets and venture capital.

(2) With respect to the Company's investments in private equity funds and real estate funds, distributions from each fund will be received as the underlying assets held by these funds are liquidated. It is estimated that the underlying assets of these funds will be liquidated over a period of several years as market conditions allow. Private equity and real estate funds do not allow redemption of investments by their investors. Investors are permitted to sell or transfer their investments, subject to the approval of the general partner or investment manager of these funds,

which generally may not be unreasonably withheld.

(3) Includes several real estate funds that invest primarily in commercial real estate in the U.S., Europe and Asia.

(4) Included in the total fair value of investments above are \$0.8 billion and \$0.9 billion of fund assets that are valued using NAVs provided by third-party asset managers as of March 31, 2016 and December 31, 2015, respectively.

14. LOANS

Citigroup loans are reported in two categories—consumer and corporate. These categories are classified primarily according to the segment and subsegment that manage the loans.

Consumer Loans

Consumer loans represent loans and leases managed primarily by the GCB businesses in Citicorp and in Citi Holdings. The following table provides information by loan type for the periods indicated:

In millions of dollars	March 31, December 31,	
	2016	2015
In U.S. offices		
Mortgage and real estate ⁽¹⁾	\$ 79,128	\$ 80,281
Installment, revolving credit, and other	3,504	3,480
Cards	106,892	112,800
Commercial and industrial	6,793	6,407
	\$ 196,317	\$ 202,968
In offices outside the U.S.		
Mortgage and real estate ⁽¹⁾	\$ 47,831	\$ 47,062
Installment, revolving credit, and other	28,778	29,480
Cards	26,312	27,342
Commercial and industrial	17,697	17,741
Lease financing	139	362
	\$ 120,757	\$ 121,987
Total consumer loans	\$ 317,074	\$ 324,955
Net unearned income	\$ 826	830
Consumer loans, net of unearned income	\$ 317,900	\$ 325,785

(1) Loans secured primarily by real estate.

Citigroup has established a risk management process to monitor, evaluate and manage the principal risks associated with its consumer loan portfolio. Credit quality indicators that are actively monitored include delinquency status, consumer credit scores (FICO), and loan to value (LTV) ratios, each as discussed in more detail below.

Included in the loan table above are lending products whose terms may give rise to greater credit issues. Credit cards with below-market introductory interest rates and interest-only loans are examples of such products. These products are closely managed using credit techniques that are intended to mitigate their higher inherent risk.

During the three months ended March 31, 2016 and 2015, the Company sold and/or reclassified to held-for-sale \$2.7 billion and \$14.0 billion, respectively, of consumer loans. The Company did not have significant purchases of consumer loans during the three months ended March 31, 2016 or 2015.

Delinquency Status

Delinquency status is monitored and considered a key indicator of credit quality of consumer loans. Principally, the U.S. residential first mortgage loans use the Mortgage Bankers Association (MBA) method of reporting delinquencies, which considers a loan delinquent if a monthly payment has not been received by the end of the day immediately preceding the loan's next due date. All other loans use a method of reporting delinquencies that considers a loan delinquent if a monthly payment has not been received by the close of business on the loan's next due date. As a general policy, residential first mortgages, home equity loans and installment loans are classified as non-accrual when loan payments are 90 days contractually past due. Credit cards and unsecured revolving loans generally accrue interest until payments are 180 days past due. Home equity loans in regulated bank entities are classified as non-accrual if the related residential first mortgage is 90 days or more past due. Mortgage loans in regulated bank entities discharged through Chapter 7 bankruptcy, other than Federal Housing Administration (FHA)-insured loans, are classified as non-accrual. Commercial market loans are placed on a cash (non-accrual) basis when it is determined,

based on actual experience and a forward-looking assessment of the collectability of the loan in full, that the payment of interest or principal is doubtful or when interest or principal is 90 days past due.

The policy for re-aging modified U.S. consumer loans to current status varies by product. Generally, one of the conditions to qualify for these modifications is that a minimum number of payments (typically ranging from one to three) be made. Upon modification, the loan is re-aged to current status. However, re-aging practices for certain open-ended consumer loans, such as credit cards, are governed by Federal Financial Institutions Examination Council (FFIEC) guidelines. For open-ended consumer loans subject to FFIEC guidelines, one of the conditions for a loan to be re-aged to current status is that at least three consecutive minimum monthly payments, or the equivalent amount, must be received. In addition, under FFIEC guidelines, the number of times that such a loan can be re-aged is subject to limitations (generally once in 12 months and twice in five years). Furthermore, FHA and Department of Veterans Affairs (VA) loans are modified under those respective agencies' guidelines and payments are not always required in order to re-age a modified loan to current.

The following tables provide details on Citigroup's consumer loan delinquency and non-accrual loans:
Consumer Loan Delinquency and Non-Accrual Details at March 31, 2016

(1) Loans less than 30 days past due are presented as current.

(2) Includes \$34 million of residential first mortgages recorded at fair value.

(3) Excludes loans guaranteed by U.S. government-sponsored entities.

(4) Consists of residential first mortgages that are guaranteed by U.S. government-sponsored entities that are 30–89 days past due of \$0.3 billion and 90 days or more past due of \$2.0 billion.

(5) Fixed-rate home equity loans and loans extended under home equity lines of credit, which are typically in junior lien positions.

(6) Represents loans classified as consumer loans on the Consolidated Balance Sheet that are not included in the Citi Holdings consumer credit metrics.

Consumer Credit Scores (FICO)

In the U.S., independent credit agencies rate an individual's risk for assuming debt based on the individual's credit history and assign every consumer a "FICO" (Fair Isaac Corporation) credit score. These scores are continually updated by the agencies based upon an individual's credit actions (e.g., taking out a loan or missed or late payments).

The following tables provide details on the FICO scores attributable to Citi's U.S. consumer loan portfolio (commercial market loans are not included in the table since they are business based and FICO scores are not a primary driver in their credit evaluation). FICO scores are updated monthly for substantially all of the portfolio or, otherwise, on a quarterly basis for the remaining portfolio.

FICO score distribution in U.S. portfolio⁽¹⁾⁽²⁾ March 31, 2016

In millions of dollars	Less than 620	≥ 620 but less than 660	Equal to or greater than 660
Residential first mortgages	\$3,387	\$3,024	\$45,437
Home equity loans	2,032	1,700	16,995
Credit cards	7,430	9,837	87,333
Installment and other	337	271	2,581
Total	\$13,186	\$14,832	\$152,346

- (1) Excludes loans guaranteed by U.S. government entities, loans subject to long-term standby commitments (LTSCs) with U.S. government-sponsored entities and loans recorded at fair value.
- (2) Excludes balances where FICO was not available. Such amounts are not material.

FICO score distribution in U.S. portfolio⁽¹⁾⁽²⁾ December 31, 2015

In millions of dollars	Less than 620	≥ 620 but less than 660	Equal to or greater than 660
Residential first mortgages	\$3,483	\$3,036	\$45,047

Credit cards	7,341	10,072	93,194
Installment and other	337	270	2,662
Total	\$13,228	\$15,160	\$158,740

(1) Excludes loans guaranteed by U.S. government entities, loans subject to LTSCs with U.S. government-sponsored entities and loans recorded at fair value.

(2) Excludes balances where FICO was not available. Such amounts are not material.

Loan to Value (LTV) Ratios

LTV ratios (loan balance divided by appraised value) are calculated at origination and updated by applying market price data.

The following tables provide details on the LTV ratios attributable to Citi's U.S. consumer mortgage portfolios. LTV ratios are updated monthly using the most recent Core Logic Home Price Index data available for substantially all of the portfolio applied at the Metropolitan Statistical Area level, if available, or the state level if not. The remainder of the portfolio is updated in a similar manner using the Federal Housing Finance Agency indices.

LTV distribution in U.S. portfolio⁽¹⁾⁽²⁾ March 31, 2016

In millions of dollars	Less than or equal to 80%	Greater than 80% but less than or equal to 100%	Greater than 100%
Residential first mortgages	\$46,181	\$5,034	\$720

Total	\$59,427	\$9,847	\$3,281

(1) Excludes loans guaranteed by U.S. government entities, loans subject to LTSCs with U.S. government-sponsored entities and loans recorded at fair value.

(2) Excludes balances where LTV was not available. Such amounts are not material.

LTV distribution in U.S. portfolio⁽¹⁾⁽²⁾ December 31, 2015

In millions of dollars	Less than or equal to 80%	Greater than 80% but less than or equal to 100%	Greater than 100%
Residential first mortgages	\$46,559	\$4,478	\$626
Home equity loans	13,904	5,147	2,527
Total	\$60,463	\$9,625	\$3,153

(1) Excludes loans guaranteed by U.S. government entities, loans subject to LTSCs with U.S. government-sponsored entities and loans recorded at fair value.

(2) Excludes balances where LTV was not available. Such amounts are not material.

Impaired Consumer Loans

Impaired loans are those loans where Citigroup believes it is probable all amounts due according to the original contractual terms of the loan will not be collected. Impaired consumer loans include non-accrual commercial market loans, as well as smaller-balance homogeneous loans whose terms have been modified due to the borrower's financial difficulties and where Citigroup has granted a concession to the borrower. These modifications may include interest rate reductions and/or principal forgiveness. Impaired consumer loans exclude smaller-balance homogeneous loans that have not been modified and are carried on a non-accrual basis.

The following tables present information about total impaired consumer loans and for interest income recognized on impaired consumer loans:

In millions of dollars	Balance at March 31, 2016			Three months ended March 31, 2016 2015		
	Recorded investment ⁽¹⁾	Unpaid principal balance ⁽²⁾	Related specific allowance ⁽³⁾	Average carrying value ⁽⁴⁾	Interest income recognized ⁽⁵⁾	Interest income recognized ⁽⁵⁾
Mortgage and real estate						
Residential first mortgages	\$5,696	\$6,248	\$ 691	\$7,697	\$ 61	\$ 141
Home equity loans	1,364	1,921	408	1,629	9	17
Credit cards	1,899	1,935	601	1,991	41	44

Total ⁽⁸⁾	57,338	\$ 218	\$ —	\$ —	\$ 4		

(1) Post-modification balances include past due amounts that are capitalized at the modification date.

Post-modification balances in North America include \$20 million of residential first mortgages and \$5 million of home equity loans to borrowers who have gone through Chapter 7 bankruptcy in the three months ended March 31, (2)2016. These amounts include \$14 million of residential first mortgages and \$5 million of home equity loans that were newly classified as TDRs in the three months ended March 31, 2016, based on previously received OCC guidance.

Represents portion of contractual loan principal that is non-interest bearing but still due from the borrower. Such (3)deferred principal is charged off at the time of permanent modification to the extent that the related loan balance exceeds the underlying collateral value.

(4)

Represents portion of contractual loan principal that is non-interest bearing and, depending upon borrower performance, eligible for forgiveness.

(5) Represents portion of contractual loan principal that was forgiven at the time of permanent modification.

(6) Commercial banking loans are generally borrower-specific modifications and incorporate changes in the amount and/or timing of principal and/or interest.

(7) Post-modification balances in North America include \$66 million of residential first mortgages and \$15 million of home equity loans to borrowers who have gone through Chapter 7 bankruptcy in the three months ended March 31, 2015. These amounts include \$38 million of residential first mortgages and \$12 million of home equity loans that were newly classified as TDRs in the three months ended March 31, 2015, based on previously received OCC guidance.

(8) The above tables reflect activity for loans outstanding as of the end of the reporting period that were considered TDRs.

The following table presents consumer TDRs that defaulted for which the payment default occurred within one year of a permanent modification. Default is defined as 60 days past due, except for classifiably managed commercial banking loans, where default is defined as 90 days past due.

	Three Months Ended March 31,	
In millions of dollars	2016	2015

Corporate loans, net of unearned income	\$300,924	\$ 291,832

(1) Loans secured primarily by real estate.

The Company sold and/or reclassified to held-for-sale \$0.5 billion and \$0.6 billion of corporate loans during the three months ended March 31, 2016 and 2015, respectively. The Company did not have significant purchases of corporate loans classified as held-for-investment for the three months ended March 31, 2016 or 2015.

Delinquency Status

Citi generally does not manage corporate loans on a delinquency basis. Corporate loans are identified as impaired and placed on a cash (non-accrual) basis when it is determined, based on actual experience and a forward-looking assessment of the collectability of the loan in full, that the payment of interest or principal is doubtful or when interest or principal is 90 days past due, except when the loan is well collateralized and in the process of collection. Any interest accrued on impaired corporate loans and leases is reversed at 90 days past due and charged against current earnings, and interest is thereafter included in earnings only to the extent actually received in cash. When there is doubt regarding the ultimate collectability of principal, all cash receipts are thereafter applied to reduce the recorded investment in the loan. While corporate loans are generally managed based on their internally assigned risk rating (see further discussion below), the following tables present delinquency information by corporate loan type.

Corporate Loan Delinquency and Non-Accrual Details at March 31, 2016

In millions of dollars	30–89 days past due and accruing ⁽¹⁾	≥ 90 days past due and accruing ⁽¹⁾	Total past due and accruing	Total non-accrual ⁽²⁾	Total current ⁽³⁾	Total loans ⁽⁴⁾

Purchased distressed loans						5
Total	\$ 269	\$ 11	\$ 280	\$ 1,596	\$284,980	\$291,832

(1) Corporate loans that are 90 days past due are generally classified as non-accrual. Corporate loans are considered past due when principal or interest is contractually due but unpaid.

Non-accrual loans generally include those loans that are ≥ 90 days past due or those loans for which Citi believes, based on actual experience and a forward-looking assessment of the collectability of the loan in full, that the payment of interest or principal is doubtful.

(3) Corporate loans are past due when principal or interest is contractually due but unpaid. Loans less than 30 days past due are presented as current.

(4) Total loans include loans at fair value, which are not included in the various delinquency columns.

Citigroup has a risk management process to monitor, evaluate and manage the principal risks associated with its corporate loan portfolio. As part of its risk management process, Citi assigns numeric risk ratings to its corporate loan facilities based on quantitative and qualitative assessments of the obligor and facility. These risk ratings are reviewed at least annually or more often if material events related to the obligor or facility warrant. Factors considered in assigning the risk ratings include financial condition of the obligor, qualitative assessment of management and strategy, amount and sources of repayment, amount and type of collateral and guarantee arrangements, amount and type of any contingencies associated with the obligor, and the obligor's industry and geography.

The obligor risk ratings are defined by ranges of default probabilities. The facility risk ratings are defined by ranges of loss norms, which are the product of the probability of default and the loss given default. The investment grade rating categories are similar to the category BBB-/Baa3 and above as defined by S&P and Moody's. Loans classified according to the bank regulatory definitions as special mention, substandard and doubtful will have risk ratings within the non-investment grade categories.

Loans at fair value	4,760	4,971
Corporate loans, net of unearned income	\$300,924	\$ 291,832

(1) Recorded investment in a loan includes net deferred loan fees and costs, unamortized premium or discount, less any direct write-downs.

(2) Held-for-investment loans are accounted for on an amortized cost basis.

Impaired collateral-dependent loans and leases, where repayment is expected to be provided solely by the sale of the underlying collateral and there are no other available and reliable sources of repayment, are written down to the lower of cost or collateral value, less cost to sell. Cash-basis loans are returned to an accrual status when all contractual principal and interest amounts are reasonably assured of repayment and there is a sustained period of repayment performance, generally six months, in accordance with the contractual terms of the loan.

The following tables present non-accrual loan information by corporate loan type and interest income recognized on non-accrual corporate loans:

Non-Accrual Corporate Loans

Corporate Troubled Debt Restructurings

The following table presents corporate TDR activity at and for the three months ended March 31, 2016:

In millions of dollars	Carrying Value	TDRs involving changes in the amount and/or timing of principal payments ⁽¹⁾	TDRs involving changes in the amount and/or timing of interest payments ⁽²⁾	TDRs involving changes in the amount and/or timing of both principal and interest payments
Commercial and industrial	\$ 98	\$ —	—\$	—\$ 98
Mortgage and real estate	4	—	—	4
Total	\$ 102	\$ —	—\$	—\$ 102

TDRs involving changes in the amount or timing of principal payments may involve principal forgiveness or deferral of periodic and/or final principal payments. Because forgiveness of principal is rare for commercial loans, modifications typically have little to no impact on the loans' projected cash flows and thus little to no impact on the allowance established for the loans. Charge-offs for amounts deemed uncollectable may be recorded at the time of the restructuring or may have already been recorded in prior periods such that no charge-off is required at the time of the modification.

(2) TDRs involving changes in the amount or timing of interest payments may involve a below-market interest rate.

The following table presents corporate TDR activity at and for the three months ended March 31, 2015:

In millions of dollars	Carrying Value	TDRs involving changes in the amount and/or timing of principal payments ⁽¹⁾	TDRs involving changes in the amount and/or timing of interest payments ⁽²⁾	TDRs involving changes in the amount and/or timing of both principal and interest payments
Commercial and industrial	\$ —	\$ —	\$ —	—\$ —
Mortgage and real estate	1	1	—	—
Total	\$ 1	\$ 1	\$ —	—\$ —

(1) TDRs involving changes in the amount or timing of principal payments may involve principal forgiveness or deferral of periodic and/or final principal payments. Because forgiveness of principal is rare for commercial loans, modifications typically have little to no impact on the loans' projected cash flows and thus little to no impact on the allowance established for the loans. Charge-offs for amounts deemed uncollectable may be recorded at the time of the restructuring or may have already been recorded in prior periods such that no charge-off is required at the time

of the modification.

(2) TDRs involving changes in the amount or timing of interest payments may involve a below-market interest rate.

The following table presents total corporate loans modified in a TDR as well as those TDRs that defaulted and for which the payment default occurred within one year of a permanent modification. Default is defined as 60 days past due, except for classifiably managed commercial banking loans, where default is defined as 90 days past due.

In millions of dollars	TDR balances at March 31, 2016	TDR loans in payment default during the three months ended March 31, 2016		TDR loans in payment default during the three months ended March 31, 2015

Total provision for loan losses	\$1,886	\$1,755
Other, net ⁽²⁾	(76)	(1,194)
Allowance for loan losses at end of period	\$12,712	\$14,598
Allowance for credit losses on unfunded lending commitments at beginning of period	\$1,402	\$1,063
Provision (release) for unfunded lending commitments	71	(37)
Other, net	—	(3)
Allowance for credit losses on unfunded lending commitments at end of period ⁽³⁾	\$1,473	\$1,023
Total allowance for loans, leases, and unfunded lending commitments	\$14,185	\$15,621

(1) Recoveries have been reduced by certain collection costs that are incurred only if collection efforts are successful.

The first quarter of 2016 includes a reduction of approximately \$148 million related to the sale or transfers to held-for-sale (HFS) of various loan portfolios, including a reduction of \$29 million related to the transfers of a real estate loan portfolio to HFS. Additionally, the first quarter of 2016 includes an increase of approximately \$63

(2) million related to FX translation. The first quarter of 2015 includes a reduction of approximately \$1.0 billion related to the sale or transfers to HFS of various loan portfolios, including a reduction of \$281 million related to a transfer of a real estate loan portfolio to HFS. Additionally, the first quarter of 2015 includes a reduction of approximately \$145 million related to FX translation.

(3) Represents additional credit loss reserves for unfunded lending commitments and letters of credit recorded in Other liabilities on the Consolidated Balance Sheet.

16. GOODWILL AND INTANGIBLE ASSETS

Goodwill

The changes in Goodwill were as follows:

In millions of dollars

Balance, December 31, 2015	\$22,349
Foreign exchange translation and other	239
Divestitures	(13)
Balance at March 31, 2016	\$22,575

The goodwill impairment testing process, including the methodology and assumptions used to estimate the fair value of the reporting units, is disclosed in more detail in Note 1 of Citigroup's 2015 Annual Report on Form 10-K. During the first quarter of 2016, Citigroup announced its intention to exit its consumer businesses in Argentina, Brazil and Colombia. These businesses, which previously had been reported as part of Latin America GCB, are reported as part of Citi Holdings—Consumer Latin America beginning the first quarter of 2016. In addition, the other component businesses of Latin America GCB, except the Mexico consumer business, were either transferred to the ICG reporting units (Banking and Markets) or North America GCB reporting unit (International Personal Banking). Furthermore, the remaining businesses in EMEA GCB, except for the commercial business which was transferred to the ICG—Banking reporting unit, are reported under Asia GCB.

Goodwill balances associated with the transfers were allocated to each of the component businesses based on their relative fair values to the legacy reporting units. An interim goodwill impairment test was performed as of January 1, 2016 for the impacted reporting units resulting in no impairment under the legacy and current reporting unit structures. There were no other triggering events during the first quarter of 2016.

The fair values of the Company's reporting units substantially exceeded their carrying values and did not indicate a risk of impairment based on current valuations.

The following table shows reporting units with goodwill balances as of March 31, 2016.

In millions of dollars

Reporting unit ⁽¹⁾⁽²⁾	Goodwill
North America Global Consumer Banking	\$ 6,764
Asia Global Consumer Banking ⁽³⁾	4,895
Latin America Global Consumer Banking ⁽⁴⁾	1,220
ICG—Banking	3,091
ICG—Markets and Securities Services	6,536
Citi Holdings—Consumer Latin America	69
Total	\$ 22,575

(1) Citi Holdings—Other and Citi Holdings—ICG are excluded from the table as there is no goodwill allocated to them.

(2) Citi Holdings—Consumer EMEA, is excluded from the table as the entire reporting unit, together with allocated goodwill, is classified as held-for-sale as of March 31, 2016.

(3) Asia Global Consumer Banking includes the consumer businesses in UK, Russia, Poland, UAE and Bahrain beginning the first quarter of 2016.

(4) Latin America Global Consumer Banking contains only the consumer business in Mexico beginning the first quarter of 2016.

Intangible Assets

The components of intangible assets were as follows:

In millions of dollars	March 31, 2016			December 31, 2015		
	Gross carrying amount	Accumulated amortization	Net carrying amount	Gross carrying amount	Accumulated amortization	Net carrying amount
Purchased credit card relationships	\$7,585	\$ 6,542	\$ 1,043	\$7,606	\$ 6,520	\$ 1,086

Intangible assets (excluding MSR's)	\$ 3,721	\$ (123)	\$ (129)	\$ 24		\$ 3,493
Mortgage servicing rights (MSR's) ⁽¹⁾	1,781					1,781
Total intangible assets	\$ 5,502					\$ 5,017

(1) For additional information on Citi's MSR's, including the roll-forward for the three months ended March 31, 2016, see Note 20 to the Consolidated Financial Statements.

17. DEBT

Short-Term Borrowings

In millions of dollars	March 31, December 31,	
	2016	2015
	Balance	Balance
Commercial paper	\$ 9,994	\$ 9,995
Other borrowings ⁽¹⁾	10,899	11,084
Total	\$ 20,893	\$ 21,079

Includes borrowings from the Federal Home Loan Banks and other market participants. At March 31, 2016, (1) collateralized short-term advances from the Federal Home Loan Banks were \$29 million. At December 31, 2015, no amounts were outstanding.

Borrowings under bank lines of credit may be at interest rates based on LIBOR, CD rates, the prime rate or bids submitted by the banks. Citigroup pays commitment fees for its lines of credit.

Some of Citigroup's non-bank subsidiaries have credit facilities with Citigroup's subsidiary depository institutions, including Citibank. Borrowings under these facilities are secured in accordance with Section 23A of the Federal Reserve Act.

Citigroup Global Markets Holdings Inc. (CGMHI) has borrowing agreements consisting of facilities that CGMHI

has been advised are available, but where no contractual lending obligation exists. These arrangements are reviewed on an ongoing basis to ensure flexibility in meeting CGMHI's short-term requirements.

Long-Term Debt

In millions of dollars	March	December
	31, 2016	31, 2015
Citigroup Inc. ⁽¹⁾	\$149,140	\$142,157
Bank ⁽²⁾	51,718	55,131
Broker-dealer ⁽³⁾	6,977	3,987
Total	\$207,835	\$201,275

(1) Parent holding company, Citigroup Inc.

Represents Citibank entities as well as other bank entities. At March 31, 2016 and December 31, 2015,

(2) collateralized long-term advances from the Federal Home Loan Banks were \$17.1 billion and \$17.8 billion, respectively.

(3) Represents broker-dealer subsidiaries that are consolidated into Citigroup Inc., the parent holding company.

Long-term debt outstanding includes trust preferred securities with a balance sheet carrying value of \$1.7 billion at both March 31, 2016 and December 31, 2015.

The following table summarizes the Company's outstanding trust preferred securities at March 31, 2016:

Trust	Issuance date	Securities issued	Liquidation value ⁽¹⁾	Coupon rate ⁽²⁾	Junior subordinated debentures owned by trust		Maturity	Redeemable by issuer beginning
					Common	Amount		
					shares issued			

Edgar Filing: CITIGROUP INC - Form 10-Q

to parent

In millions of dollars, except share amounts

Citigroup Capital III	Dec. 1996	194,053	\$ 194	7.625%	6,003	\$200	Dec. 1, 2036	Not redeemable
Citigroup Capital XIII	Sept. 2010	89,840,000	2,246	7.875	1,000	2,246	Oct. 30, 2040	Oct. 30, 2015
Citigroup Capital XVIII	June 2007	99,901	144	6.829	50	144	June 28, 2067	June 28, 2017
Total obligated			\$ 2,584			\$2,590		

Note: Distributions on the trust preferred securities and interest on the subordinated debentures are payable semiannually for Citigroup Capital III and Citigroup Capital XVIII and quarterly for Citigroup Capital XIII.

(1) Represents the notional value received by investors from the trusts at the time of issuance.

(2) In each case, the coupon rate on the subordinated debentures is the same as that on the trust preferred securities.

18. CHANGES IN ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Changes in each component of Citigroup's Accumulated other comprehensive income (loss) were as follows:

In millions of dollars	Net unrealized gains (losses) on investment securities	Debt valuation adjustment (DVA) ⁽¹⁾	Cash flow hedges ⁽²⁾	Benefit plans ⁽³⁾	Foreign currency translation adjustment (CTA), net of hedges ⁽⁴⁾	Accumulated other comprehensive income (loss)
Balance, December 31, 2015	\$ (907)	\$ —	\$ (617)	\$(5,116)	\$(22,704)	\$(29,344)
Adjustment to opening balance, net of taxes ⁽¹⁾	—	(15)	—	—	—	(15)
Adjusted balance, beginning of period	\$ (907)	\$ (15)	\$ (617)	\$(5,116)	\$(22,704)	\$(29,359)
Other comprehensive income before reclassifications	2,026	192	291	(500)	654	2,663
Increase (decrease) due to amounts reclassified from AOCI	8	1	26	35	—	70
Change, net of taxes	\$ 2,034	\$ 193	\$ 317	\$(465)	\$654	\$ 2,733
Balance at March 31, 2016	\$ 1,127	\$ 178	\$ (300)	\$(5,581)	\$(22,050)	\$(26,626)

In millions of dollars	Net unrealized gains (losses) on investment securities	Cash flow hedges ⁽²⁾	Benefit plans ⁽³⁾	Foreign currency translation adjustment (CTA), net of hedges ⁽⁴⁾	Accumulated other comprehensive income (loss)
Balance, December 31, 2014	\$ 57	\$ (909)	\$(5,159)	\$(17,205)	\$(23,216)
Other comprehensive income before reclassifications	742	32	(131)	(2,062)	(1,419)
Increase (decrease) due to amounts reclassified from AOCI	(151)	54	41	—	(56)
Change, net of taxes	\$ 591	\$ 86	\$(90)	\$(2,062)	\$(1,475)
Balance, March 31, 2015	\$ 648	\$ (823)	\$(5,249)	\$(19,267)	\$(24,691)

Beginning in the first quarter of 2016, changes in DVA are reflected as a component of AOCI, pursuant to the

(1) adoption of only the provisions of ASU 2016-01 relating to the presentation of DVA on fair value option liabilities.

See Note 1 in the Consolidated Financial Statements for further information regarding this change.

(2) Primarily driven by Citigroup's pay fixed/receive floating interest rate swap programs that hedge the floating rates on liabilities.

(3) Primarily reflects adjustments based on the quarterly actuarial valuations of the Company's significant pension and postretirement plans, annual actuarial valuations of all other plans, and amortization of amounts previously recognized in other comprehensive income.

(4) Primarily reflects the movements in (by order of impact) the Japanese yen, euro, Brazilian real and Chilean peso against the U.S. dollar, and changes in related tax effects and hedges for the three months ended March 31, 2016.

(4) Primarily reflects the movements in (by order of impact) the euro, Mexican peso, British pound, and Brazilian real against the U.S. dollar, and changes in related tax effects and hedges for the three months ended March 31, 2015.

The pretax and after-tax changes in each component of Accumulated other comprehensive income (loss) were as follows:

In millions of dollars	Pretax	Tax effect	After-tax
Balance, December 31, 2015	\$(38,440)	\$9,096	\$(29,344)
Adjustment to opening balance ⁽¹⁾	(26))11	(15)
Adjusted balance, beginning of period	\$(38,466)	\$9,107	\$(29,359)
Change in net unrealized gains (losses) on investment securities	3,224	(1,190))2,034
Debt valuation adjustment (DVA)	307	(114))193
Cash flow hedges	481	(164))317
Benefit plans	(727))262	(465)
Foreign currency translation adjustment	513	141	654
Change	\$3,798	\$(1,065)	\$2,733
Balance, March 31, 2016	\$(34,668)	\$8,042	\$(26,626)

⁽¹⁾ Represents the (\$15) million adjustment related to the initial adoption of ASU 2016-01. See Note 1 in the Consolidated Financial Statements.

In millions of dollars	Pretax	Tax effect	After-tax
Balance, December 31, 2014	\$(31,060)	\$7,844	\$(23,216)
Change in net unrealized gains (losses) on investment securities	1,048	(457))591
Cash flow hedges	156	(70))86
Benefit plans	(121))31	(90)
Foreign currency translation adjustment	(2,302))240	(2,062)
Change	\$(1,219)	\$(256)	\$(1,475)
Balance, March 31, 2015	\$(32,279)	\$7,588	\$(24,691)

During the three months ended March 31, 2016 and 2015, the Company recognized pretax loss of \$114 million (\$70 million loss net of tax) and pretax gain of \$85 million (\$56 million gain net of tax), respectively, related to amounts reclassified out of AOCI into the Consolidated Statement of Income. See details in the table below:

	Increase (decrease) in AOCI due to amounts reclassified to Consolidated Statement of Income Three Months Ended March 31,	
In millions of dollars	2016	2015
Realized (gains) losses on sales of investments	\$(186)	\$(307)
OTTI gross impairment losses	203	72
Subtotal, pretax	\$17	\$(235)
Tax effect	(9)84
Net realized (gains) losses on investment securities, after-tax ⁽¹⁾	\$8	\$(151)
Realized DVA (gains) losses on fair value option liabilities	\$1	\$—
Subtotal, pretax	\$1	\$—
Tax effect	—	—
Net realized debt valuation adjustment, after-tax	\$1	\$—
Interest rate contracts	\$16	\$46
Foreign exchange contracts	26	40
Subtotal, pretax	\$42	\$86
Tax effect	(16)(32
Amortization of cash flow hedges, after-tax ⁽²⁾	\$26	\$54
Amortization of unrecognized Prior service cost (benefit)	\$(10)(11
Net actuarial loss	66	75
Curtailment/settlement impact ⁽³⁾	(2)—
Subtotal, pretax	\$54	\$64
Tax effect	(19)(23
Amortization of benefit plans, after-tax ⁽³⁾	\$35	\$41
Foreign currency translation adjustment	\$—	\$—
Total amounts reclassified out of AOCI, pretax	\$114	\$(85
Total tax effect	(44)29
Total amounts reclassified out of AOCI, after-tax	\$70	\$(56

The pretax amount is reclassified to Realized gains (losses) on sales of investments, net and Gross impairment (1) losses on the Consolidated Statement of Income. See Note 13 to the Consolidated Financial Statements for additional details.

(2) See Note 21 to the Consolidated Financial Statements for additional details.

(3) See Note 8 to the Consolidated Financial Statements for additional details.

19. PREFERRED STOCK

The following table summarizes the Company's preferred stock outstanding:

	Issuance date	Redeemable by issuer beginning	Dividend rate	Redemption price per depositary share/preference share	Number of depositary shares	Carrying value in millions of dollars	
						March 31, 2016	December 31, 2015

Issued as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of (1) non-cumulative perpetual preferred stock. Dividends are payable quarterly on February 15, May 15, August 15 and November 15, in each case when, as and if declared by the Citi Board of Directors.

Issued as depositary shares, each representing a 1/25th interest in a share of the corresponding series of (2) non-cumulative perpetual preferred stock. Dividends are payable semi-annually on April 30 and October 30 at a fixed rate until April 30, 2018, thereafter payable quarterly on January 30, April 30, July 30 and October 30 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

Issued as depositary shares, each representing a 1/25th interest in a share of the corresponding series of (3) non-cumulative perpetual preferred stock. Dividends are payable semi-annually on January 30 and July 30 at a fixed rate until January 30, 2023, thereafter payable quarterly on January 30, April 30, July 30 and October 30 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

Issued as depositary shares, each representing a 1/25th interest in a share of the corresponding series of (4) non-cumulative perpetual preferred stock. Dividends are payable semi-annually on February 15 and August 15 at a fixed rate until February 15, 2023, thereafter payable quarterly on February 15, May 15, August 15 and November 15 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

Issued as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of (5) non-cumulative perpetual preferred stock. Dividends are payable quarterly on January 22, April 22, July 22 and October 22 when, as and if declared by the Citi Board of Directors.

(6) Issued as depositary shares, each representing a 1/25th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable semi-annually on May 15 and November 15 at a

fixed rate until May 15, 2023, thereafter payable quarterly on February 15, May 15, August 15 and November 15 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

- (7) Issued as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable quarterly on March 30, June 30, September 30 and December 30 at a fixed rate until September 30, 2023, thereafter payable quarterly on the same dates at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

- (8) Issued as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable quarterly on February 15, May 15, August 15 and November 15 at a fixed rate until November 15, 2023, thereafter payable quarterly on the same dates at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

- (9) Issued as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable quarterly on February 12, May 12, August 12 and November 12 at a fixed rate, in each case when, as and if declared by the Citi Board of Directors.

- (10) Issued as depositary shares, each representing a 1/25th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable semi-annually on May 15 and November 15 at a fixed rate until May 15, 2024, thereafter payable quarterly on February 15, May 15, August 15, and November 15 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

- (11) Issued as depositary shares, each representing a 1/25th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable semi-annually on May 15 and November 15 at a fixed rate until, but excluding, November 15, 2019, and thereafter payable quarterly on February 15, May 15, August 15 and November 15 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

- (12) Issued as depositary shares, each representing a 1/25th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable semi-annually on March 27 and September 27 at a fixed rate until, but excluding, March 27, 2020, and thereafter payable quarterly on March 27, June 27, September 27 and December 27 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

- (13) Issued as depositary shares, each representing a 1/25th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable semi-annually on May 15 and November 15 at a fixed rate until, but excluding, May 15, 2025, and thereafter payable quarterly on February 15, May 15, August 15, and November 15 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

Issued as depository shares, each representing 1/25th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable semi-annually on February 15 and August 15 at (14) a fixed rate until, but excluding, August 15, 2020, and thereafter payable quarterly on February 15, May 15, August 15, and November 15 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

Issued as depository shares, each representing 1/25th interest in a share of the corresponding series of non-cumulative perpetual preferred stock. Dividends are payable semi-annually on May 15 and November 15 at (15) a fixed rate until, but excluding, November 15, 2020, and thereafter payable quarterly on February 15, May 15, August 15 and November 15 at a floating rate, in each case when, as and if declared by the Citi Board of Directors.

Issued as depository shares, each representing 1/1,000th interest in a share of the corresponding series of (16) non-cumulative perpetual preferred stock. Dividends are payable quarterly on February 12, May 12, August 12, and November 12 at a fixed rate, in each case when, as and if declared by the Citi Board of Directors.

On April 18, 2016, Citi issued \$1.5 billion of Series T Preferred Stock as depository shares, each representing 1/25th interest in a share of corresponding series of non-cumulative perpetual preferred stock. The dividend rate is 6.25% payable semi-annually on February 15 and August 15, beginning February 15, 2017, from and including August 15, 2026, and thereafter an annual floating rate equal to three-month LIBOR plus 4.517%, payable quarterly in arrears on each February 15, May 15, August 15 and November 15, in each case when, as and if declared by the Citi Board of Directors.

During the first quarter of 2016, Citi distributed \$210 million in dividends on its outstanding preferred stock. Based on its preferred stock outstanding as of April 18, 2016 (which includes the issuance of Series T Preferred Stock), Citi estimates it will distribute preferred dividends of approximately \$868 million during the remainder of 2016, in each case assuming such dividends are declared by the Citi Board of Directors.

20. SECURITIZATIONS AND VARIABLE INTEREST ENTITIES

Uses of Special Purpose Entities

A special purpose entity (SPE) is an entity designed to fulfill a specific limited need of the company that organized it. The principal uses of SPEs by Citi are to obtain liquidity and favorable capital treatment by securitizing certain financial assets, to assist clients in securitizing their financial assets and to create investment products for clients. SPEs may be organized in various legal forms, including trusts, partnerships or corporations. In a securitization, the company transferring assets to an SPE converts all (or a portion) of those assets into cash before they would have been realized in the normal course of business through the SPE's issuance of debt and equity instruments, certificates, commercial paper or other notes of indebtedness. These issuances are recorded on the balance sheet of the SPE, which may or may not be consolidated onto the balance sheet of the company that organized the SPE.

Investors usually have recourse only to the assets in the SPE, but may also benefit from other credit enhancements, such as a collateral account, a line of credit or a liquidity facility, such as a liquidity put option or asset purchase agreement. Because of these enhancements, the SPE issuances typically obtain a more favorable credit rating than the transferor could obtain for its own debt issuances. This results in less expensive financing costs than unsecured debt. The SPE may also enter into derivative contracts in order to convert the yield or currency of the underlying assets to match the needs of the SPE investors or to limit or change the credit risk of the SPE. Citigroup may be the provider of certain credit enhancements as well as the counterparty to any related derivative contracts.

Most of Citigroup's SPEs are variable interest entities (VIEs), as described below.

Variable Interest Entities

VIEs are entities that have either a total equity investment that is insufficient to permit the entity to finance its activities without additional subordinated financial support, or whose equity investors lack the characteristics of a controlling financial interest (i.e., ability to make significant decisions through voting rights or similar rights, and a right to receive the expected residual returns of the entity or an obligation to absorb the expected losses of the entity). Investors that finance the VIE through debt or equity interests or other counterparties providing other forms of support, such as guarantees, certain fee arrangements or certain types of derivative contracts are variable interest holders in the entity.

The variable interest holder, if any, that has a controlling financial interest in a VIE is deemed to be the primary beneficiary and must consolidate the VIE. Citigroup would be deemed to have a controlling financial interest and be the primary beneficiary if it has both of the following characteristics:

power to direct the activities of the VIE that most significantly impact the entity's economic performance; and an obligation to absorb losses of the entity that could potentially be significant to the VIE, or a right to receive benefits from the entity that could potentially be significant to the VIE.

The Company must evaluate each VIE to understand the purpose and design of the entity, the role the Company had in the entity's design and its involvement in the VIE's ongoing activities. The Company then must evaluate which activities most significantly impact the economic performance of the VIE and who has the power to direct such activities.

For those VIEs where the Company determines that it has the power to direct the activities that most significantly impact the VIE's economic performance, the Company must then evaluate its economic interests, if any, and determine whether it could absorb losses or receive benefits that could potentially be significant to the VIE. When evaluating whether the Company has an obligation to absorb losses that could potentially be significant, it considers the maximum exposure to such loss without consideration of probability. Such obligations could be in various forms, including, but not limited to, debt and equity investments, guarantees, liquidity agreements and certain derivative contracts.

In various other transactions, the Company may: (i) act as a derivative counterparty (for example, interest rate swap, cross-currency swap, or purchaser of credit protection under a credit default swap or total return swap where the Company pays the total return on certain assets to the SPE); (ii) act as underwriter or placement agent; (iii) provide administrative, trustee or other services; or (iv) make a market in debt securities or other instruments issued by VIEs. The Company generally considers such involvement, by itself, not to be variable interests and thus not an indicator of power or potentially significant benefits or losses.

Citigroup's involvement with consolidated and unconsolidated VIEs with which the Company holds significant variable interests or has continuing involvement through servicing a majority of the assets in a VIE is presented below:

In millions of dollars	As of March 31, 2016			Maximum exposure to loss in significant unconsolidated VIEs ⁽¹⁾				
	Total involvement with SPE assets	Consolidated VIE / SPE assets	Significant unconsolidated VIE assets ⁽³⁾	Funded exposures ⁽²⁾		Unfunded exposures

Note: Certain adjustments have been made to the December 31, 2015 information to conform to the current period's presentation.

- (1) The definition of maximum exposure to loss is included in the text that follows this table.
- (2) Included on Citigroup's March 31, 2016 and December 31, 2015 Consolidated Balance Sheet.
- (3) A significant unconsolidated VIE is an entity where the Company has any variable interest or continuing involvement considered to be significant, regardless of the likelihood of loss.
- (4) Citigroup mortgage securitizations also include agency and non-agency (private-label) re-securitization activities. These SPEs are not consolidated. See "Re-securitizations" below for further discussion.
- (5) Citi's total involvement with Citicorp SPE assets was \$402.2 billion and \$383.2 billion as of March 31, 2016 and December 31, 2015, respectively, with the remainder related to Citi Holdings.

The previous tables do not include:

- certain venture capital investments made by some of the Company's private equity subsidiaries, as the Company accounts for these investments in accordance with the Investment Company Audit Guide (codified in ASC 946);
- certain investment funds for which the Company provides investment management services and personal estate trusts for which the Company provides administrative, trustee and/or investment management services;
- certain VIEs structured by third parties where the Company holds securities in inventory, as these investments are made on arm's-length terms;
- certain positions in mortgage-backed and asset-backed securities held by the Company, which are classified as Trading account assets or Investments, where the Company has no other involvement with the related securitization entity deemed to be significant (for more information on these positions, see Notes 12 and 13 to the Consolidated Financial Statements);
- certain representations and warranties exposures in legacy ICG-sponsored mortgage-backed and asset-backed securitizations, where the Company has no variable interest or continuing involvement as servicer. The outstanding balance of mortgage loans securitized during 2005 to 2008 where the Company has no variable interest or continuing involvement as servicer was approximately \$11 billion and \$12 billion at March 31, 2016 and December 31, 2015, respectively;
- certain representations and warranties exposures in Citigroup residential mortgage securitizations, where the original mortgage loan balances are no longer outstanding; and
- VIEs such as trust preferred securities trusts used in connection with the Company's funding activities. The Company does not have a variable interest in these trusts.

The asset balances for consolidated VIEs represent the carrying amounts of the assets consolidated by the Company. The carrying amount may represent the amortized cost or the current fair value of the assets depending on the legal form of the asset (e.g., loan or security) and the Company's standard accounting policies for the asset type and line of business.

The asset balances for unconsolidated VIEs where the Company has significant involvement represent the most current information available to the Company. In most cases, the asset balances represent an amortized cost basis without regard to impairments, unless fair value information is readily available to the Company. For VIEs that obtain asset exposures synthetically through derivative instruments, the tables generally include the full original notional amount of the derivative as an asset balance.

The maximum funded exposure represents the balance sheet carrying amount of the Company's investment in the VIE. It reflects the initial amount of cash invested in the VIE adjusted for any accrued interest and cash principal payments received. The carrying amount may also be adjusted for increases or declines in fair value or any impairment in value recognized in earnings. The maximum exposure of unfunded positions represents the remaining undrawn committed amount, including liquidity and credit facilities provided by the Company, or the notional amount of a derivative instrument considered to be a variable interest. In certain transactions, the Company has entered into derivative instruments or other arrangements that are not considered variable interests in the VIE (e.g., interest rate swaps, cross-currency swaps, or where the Company is the purchaser of credit protection under a credit default swap or total return swap where the Company pays the total return on certain assets to the SPE). Receivables under such arrangements are not included in the maximum exposure amounts.

Funding Commitments for Significant Unconsolidated VIEs—Liquidity Facilities and Loan Commitments

The following table presents the notional amount of liquidity facilities and loan commitments that are classified as funding commitments in the VIE tables above:

In millions of dollars	March 31, 2016		December 31, 2015	
	Liquidity facilities	Loan / equity commitments	Liquidity facilities	Loan / equity commitments
Asset-based financing	\$5	\$ 3,993	\$5	\$ 3,611
Municipal securities tender option bond trusts (TOBs)	2,962	—	3,100	—
Municipal investments	—	2,399	—	2,335
Investment funds	—	78	—	102
Other	—	71	—	—
Total funding commitments	\$2,967	\$ 6,541	\$3,105	\$ 6,048

Consolidated VIEs

The Company engages in on-balance sheet securitizations, which are securitizations that do not qualify for sales treatment; thus, the assets remain on the Company's Consolidated Balance Sheet, and any proceeds received are recognized as secured liabilities. The consolidated VIEs included in the tables below represent hundreds of separate entities with which the Company is involved. In general, the third-party investors in the obligations of consolidated VIEs have legal recourse only to the assets of the respective VIEs and do not have such recourse to the Company, except where the Company has provided a guarantee to the investors or is the counterparty to certain derivative transactions involving

the VIE. Thus, the Company's maximum legal exposure to loss related to consolidated VIEs is significantly less than the carrying value of the consolidated VIE assets due to outstanding third-party financing. Intercompany assets and liabilities are excluded from the table. All VIE assets are restricted from being sold or pledged as collateral. The cash flows from these assets are the only source used to pay down the associated liabilities, which are non-recourse to the Company's general assets.

The following table presents the carrying amounts and classifications of consolidated assets that are collateral for consolidated VIE obligations:

In billions of dollars	March 31, December 31,	
	2016	2015
Cash	\$ 0.2	\$ 0.2
Trading account assets	0.6	0.6
Investments	5.2	5.3
Total loans, net of allowance	74.9	78.6
Other	0.1	0.1
Total assets	\$ 81.0	\$ 84.8
Short-term borrowings	\$ 13.6	\$ 14.0
Long-term debt	29.1	31.3
Other liabilities	2.0	2.1
Total liabilities ⁽¹⁾	\$ 44.7	\$ 47.4

(1) The total liabilities of consolidated VIEs for which creditors or beneficial interest holders do not have recourse to the general credit of Citi were \$42.7 billion and \$45.3 billion as of March 31, 2016 and December 31, 2015, respectively. Liabilities of consolidated VIEs for which creditors or beneficial interest holders have recourse to the general credit of Citi comprise two items included in the above table: (i) credit enhancements provided to consolidated Citi-administered commercial paper conduits in the form of letters of credit of \$1.9 billion at March 31, 2016 and December 31, 2015; and (ii) credit guarantees provided by Citi to certain consolidated

municipal tender option bond trusts of \$82 million at March 31, 2016 and December 31, 2015.

Significant Interests in Unconsolidated VIEs—Balance Sheet Classification

The following table presents the carrying amounts and classification of significant variable interests in unconsolidated VIEs:

In billions of dollars	March 31, December 31,	
	2016	2015
Cash	\$ 0.1	\$ 0.1
Trading account assets	7.7	6.2
Investments	3.5	3.0
Total loans, net of allowance	21.7	23.6
Other	1.4	1.7
Total assets	\$ 34.4	\$ 34.6

Credit Card Securitizations

The Company securitizes credit card receivables through trusts established to purchase the receivables. Citigroup transfers receivables into the trusts on a non-recourse basis. Credit card securitizations are revolving securitizations; as customers pay their credit card balances, the cash proceeds are used to purchase new receivables and replenish the receivables in the trust.

Substantially all of the Company's credit card securitization activity is through two trusts—Citibank Credit Card Master Trust (Master Trust) and the Citibank Omni Master Trust (Omni Trust), with the substantial majority through the Master Trust. These trusts are consolidated entities because, as servicer, Citigroup has the power to direct

the activities that most significantly impact the economic performance of the trusts, Citigroup holds a seller's interest and certain securities issued by the trusts, and also provides liquidity facilities to the trusts, which could result in exposure to potentially significant losses or benefits from the trusts. Accordingly, the transferred credit card receivables remain on Citi's Consolidated Balance Sheet with no gain or loss recognized. The debt issued by the trusts to third parties is included on Citi's Consolidated Balance Sheet.

The Company utilizes securitizations as one of the sources of funding for its business in North America. The following table reflects amounts related to the Company's securitized credit card receivables:

In billions of dollars	March 31, December 31,	
	2016	2015
Ownership interests in principal amount of trust credit card receivables		
Sold to investors via trust-issued securities	\$ 27.5	\$ 29.7
Retained by Citigroup as trust-issued securities	8.1	9.4
Retained by Citigroup via non-certificated interests	16.1	16.5
Total	\$ 51.7	\$ 55.6

The following table summarizes selected cash flow information related to Citigroup's credit card securitizations:

In billions of dollars	Three months ended March 31,	
	2016	2015
Proceeds from new securitizations	\$ —	\$ —
Pay down of maturing notes	(2.2)	(2.7)

Managed Loans

After securitization of credit card receivables, the Company continues to maintain credit card customer account relationships and provides servicing for receivables transferred to the trusts. As a result, the Company considers the securitized credit card receivables to be part of the business it manages. As Citigroup consolidates the credit card trusts, all managed securitized card receivables are on-balance sheet.

Funding, Liquidity Facilities and Subordinated Interests

As noted above, Citigroup securitizes credit card receivables through two securitization trusts—Master Trust, which is part of Citicorp, and Omni Trust, substantially all of which is also part of Citicorp. The liabilities of the trusts are included in the Consolidated Balance Sheet, excluding those retained by Citigroup.

The Master Trust issues fixed- and floating-rate term notes. Some of the term notes are issued to multi-seller commercial paper conduits. The weighted average maturity of the term notes issued by the Master Trust was 2.3 years as of March 31, 2016 and 2.4 years as of December 31, 2015.

Master Trust Liabilities (at Par Value)

In billions of dollars	March 31, 2016	Dec. 31, 2015
Term notes issued to third parties	\$ 26.2	\$ 28.4
Term notes retained by Citigroup affiliates	6.3	7.5
Total Master Trust liabilities	\$ 32.5	\$ 35.9

The Omni Trust issues fixed- and floating-rate term notes, some of which are purchased by multi-seller commercial paper conduits. The weighted average maturity of the third-party term notes issued by the Omni Trust was 0.6 years as of March 31, 2016 and 0.9 years as of December 31, 2015.

Omni Trust Liabilities (at Par Value)

In billions of dollars	March 31, 2016	Dec. 31, 2015
Term notes issued to third parties	\$ 1.3	\$ 1.3
Term notes retained by Citigroup affiliates	1.9	1.9
Total Omni Trust liabilities	\$ 3.2	\$ 3.2

Mortgage Securitizations

The Company provides a wide range of mortgage loan products to a diverse customer base. Once originated, the Company often securitizes these loans through the use of VIEs. These VIEs are funded through the issuance of trust certificates backed solely by the transferred assets. These certificates have the same life as the transferred assets. In addition to providing a source of liquidity and less expensive funding, securitizing these assets also reduces the Company's credit exposure to the borrowers. These mortgage loan securitizations are primarily non-recourse, thereby effectively transferring the risk of future credit losses to the purchasers of the securities issued by the trust. However, the Company's U.S. consumer mortgage business generally retains the servicing rights and in certain instances retains investment securities, interest-only strips and residual interests in future cash flows from the trusts and also provides servicing for a limited number of ICG securitizations.

The Company securitizes mortgage loans generally through either a government-sponsored agency, such as Ginnie Mae, Fannie Mae or Freddie Mac (U.S. agency-sponsored

mortgages), or private-label (non-agency-sponsored mortgages) securitization. The Company is not the primary beneficiary of its U.S. agency-sponsored mortgage securitizations because Citigroup does not have the power to direct the activities of the VIE that most significantly impact the entity's economic performance. Therefore, Citi does not consolidate these U.S. agency-sponsored mortgage securitizations.

The Company does not consolidate certain non-agency-sponsored mortgage securitizations because Citi is either not the servicer with the power to direct the significant activities of the entity or Citi is the servicer but the servicing relationship is deemed to be a fiduciary relationship; therefore, Citi is not deemed to be the primary beneficiary of the entity.

In certain instances, the Company has (i) the power to direct the activities and (ii) the obligation to either absorb losses or the right to receive benefits that could be potentially significant to its non-agency-sponsored mortgage securitizations and, therefore, is the primary beneficiary and thus consolidates the VIE.

The following table summarizes selected cash flow information related to Citigroup mortgage securitizations:

In billions of dollars	2016		2015	
	U.S. agency-sponsored mortgages	Non-agency-sponsored mortgages	U.S. agency-sponsored mortgages	Non-agency-sponsored mortgages
Proceeds from new securitizations ⁽¹⁾	\$ 10.6	\$ 4.2	\$ 8.3	\$ 3.6
Contractual servicing fees received	0.1	—	0.1	—
Cash flows received on retained interests and other net cash flows	—	—	—	—

(1) The proceeds from new securitizations in 2016 include \$0.5 billion related to personal loan securitizations.

During the first quarter of 2016, gains recognized on the securitization of U.S. agency-sponsored mortgages and non-agency sponsored mortgages were \$25 million and \$9 million, respectively.

Agency and non-agency securitization gains for the quarter ended March 31, 2015 were \$43 million and \$16 million, respectively.

Edgar Filing: CITIGROUP INC - Form 10-Q

Key assumptions used in measuring the fair value of retained interests at the date of sale or securitization of mortgage receivables were as follows:

	March 31, 2016		
		Non-agency-sponsored mortgages ⁽¹⁾	
	U.S. agency-sponsored mortgages	Senior interests	Subordinated interests
Discount rate	2.1% to 11.5%	—	—
Weighted average discount rate	8.4	%—	—
Constant prepayment rate	9.1% to 23.3%	—	—
Weighted average constant prepayment rate	11.8	%—	—
Anticipated net credit losses ⁽²⁾	NM	—	—
Weighted average anticipated net credit losses	NM	—	—
Weighted average life	3.5 to 17.5 years	—	—

Note: Citi held no retained interests in non-agency-sponsored mortgages securitized during the first quarter of 2016.

	March 31, 2015			
	U.S. agency-sponsored mortgages	Non-agency-sponsored mortgages ⁽¹⁾		
		Senior interests	Subordinated interests	
Discount rate	0.0% to 8.0%	2.8	% 4.4	%
Weighted average discount rate	6.0	% 2.8	% 4.4	%
Constant prepayment rate	11.7% to 34.9%	0.0	% 3.3	%
Weighted average constant prepayment rate	17.6	% 0.0	% 3.3	%
Anticipated net credit losses ⁽²⁾	NM	40.0	% 55.9	%
Weighted average anticipated net credit losses	NM	40.0	% 55.9	%
Weighted average life	3.5 to 11.4 years	9.7 years	0.0 to 12.2 years	

(1) Disclosure of non-agency-sponsored mortgages as senior and subordinated interests is indicative of the interests' position in the capital structure of the securitization.

(2) Anticipated net credit losses represent estimated loss severity associated with defaulted mortgage loans underlying the mortgage securitizations disclosed above. Anticipated net credit losses, in this instance, do not represent total credit losses incurred to date, nor do they represent credit losses expected on retained interests in mortgage securitizations.

NM Anticipated net credit losses are not meaningful due to U.S. agency guarantees.

The interests retained by the Company range from highly rated and/or senior in the capital structure to unrated and/or residual interests.

The key assumptions used to value retained interests, and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions, are set forth in the tables

below. The negative effect of each change is calculated independently, holding all other assumptions constant. Because the key assumptions may not be independent, the net effect of simultaneous adverse changes in the key assumptions may be less than the sum of the individual effects shown below.

	March 31, 2016		
	U.S. agency-sponsored mortgages	Non-agency-sponsored mortgages ⁽¹⁾	
		Senior interests	Subordinated interests
Discount rate	0.3% to 25.4%	1.5% to 20.3%	2.5% to 27.1%
Weighted average discount rate	5.3	% 5.8	% 9.2
Constant prepayment rate	7.0% to 44.6%	4.6% to 100.0%	0.5% to 40.2%
Weighted average constant prepayment rate	16.3	% 15.7	% 7.5
Anticipated net credit losses ⁽²⁾	NM	0.4% to 87.4%	3.2% to 94.6%
Weighted average anticipated net credit losses	NM	50.7	% 55.5
Weighted average life	0.7 to 19.5 years	0.3 to 18.5 years	1.2 to 18.8 years

	December 31, 2015		
	U.S. agency-sponsored mortgages	Non-agency-sponsored mortgages ⁽¹⁾	
		Senior interests	Subordinated interests
Discount rate	0.0% to 27.0%	1.6% to 67.6%	2.0% to 24.9%

Edgar Filing: CITIGROUP INC - Form 10-Q

Weighted average discount rate	4.9	% 7.6	% 8.4	%
Constant prepayment rate	5.7% to 27.8%	4.2% to 100.0%	0.5% to 20.8%	
Weighted average constant prepayment rate	12.3	% 14.0	% 7.5	%
Anticipated net credit losses ⁽²⁾	NM	0.2% to 89.1%	3.8% to 92.0%	
Weighted average anticipated net credit losses	NM	48.9	% 54.4	%
Weighted average life	1.3 to 21.0 years	0.3 to 18.1 years	0.9 to 19.0 years	

(1) Disclosure of non-agency-sponsored mortgages as senior and subordinated interests is indicative of the interests' position in the capital structure of the securitization.

(2) Anticipated net credit losses represent estimated loss severity associated with defaulted mortgage loans underlying the mortgage securitizations disclosed above. Anticipated net credit losses, in this instance, do not represent total credit losses incurred to date, nor do they represent credit losses expected on retained interests in mortgage securitizations.

NM Anticipated net credit losses are not meaningful due to U.S. agency guarantees.

	March 31, 2016		
	Non-agency-sponsored mortgages ⁽¹⁾		
	U.S.		
In millions of dollars	agency-sponsored mortgages	Senior interests	Subordinated interests
Carrying value of retained interests	\$3,186	\$ 100	\$ 297
Discount rates			
Adverse change of 10%	\$(62)	\$(9)	\$(15)
Adverse change of 20%	(121)	(19)	(28)
Constant prepayment rate			
Adverse change of 10%	(113)	(1)	(6)
Adverse change of 20%	(217)	(2)	(12)

	Non-agency-sponsored mortgages ⁽¹⁾		
	U.S.		
In millions of dollars	agency-sponsored mortgages	Senior interests	Subordinated interests
Carrying value of retained interests	\$3,546	\$ 179	\$ 533
Discount rates			
Adverse change of 10%	\$(79)	\$(8)	\$(25)
Adverse change of 20%	(155)	(15)	(49)
Constant prepayment rate			
Adverse change of 10%	(111)	(3)	(9)
Adverse change of 20%	(213)	(6)	(18)
Anticipated net credit losses			
Adverse change of 10%	NM	(6)	(7)
Adverse change of 20%	NM	(11)	(14)

Note: There were no subordinated interests in mortgage securitizations in Citi Holdings as of March 31, 2016 and December 31, 2015.

(1) Disclosure of non-agency-sponsored mortgages as senior and subordinated interests is indicative of the interests' position in the capital structure of the securitization.

NM Anticipated net credit losses are not meaningful due to U.S. agency guarantees.

Mortgage Servicing Rights

In connection with the securitization of mortgage loans, the Company's U.S. consumer mortgage business generally retains the servicing rights, which entitle the Company to a future stream of cash flows based on the outstanding principal balances of the loans and the contractual servicing fee. Failure to service the loans in accordance with contractual requirements may lead to a termination of the servicing rights and the loss of future servicing fees.

These transactions create an intangible asset referred to as mortgage servicing rights (MSRs), which are recorded at fair value on Citi's Consolidated Balance Sheet. The fair value of Citi's capitalized MSRs was \$1.5 billion and \$1.7 billion at March 31, 2016 and 2015, respectively. Of these amounts, approximately \$1.5 billion and \$1.6 billion, respectively, were specific to Citicorp, with the remainder to Citi Holdings as of March 31, 2016 and 2015. The MSRs correspond to principal loan balances of \$192 billion and \$216 billion as of March 31, 2016 and 2015, respectively. The following table summarizes the changes in capitalized MSRs:

In millions of dollars	2016	2015
Balance, beginning of year	\$1,781	\$1,845
Originations	33	43
Changes in fair value of MSRs due to changes in inputs and assumptions	(225)	(71)
Other changes ⁽¹⁾	(79)	(100)
Sale of MSRs ⁽²⁾	14	(32)
Balance, as of March 31	\$1,524	\$1,685

(1) Represents changes due to customer payments and passage of time.

(2) Current period's amount is related to a sale of credit challenged MSRs for which Citi paid the new servicer.

The fair value of the MSR is primarily affected by changes in prepayments of mortgages that result from shifts in mortgage interest rates. Specifically, higher interest rates tend to lead to declining prepayments, which causes the fair value of the MSR to increase. In managing this risk, the Company economically hedges a significant portion of the value of its MSR through the use of interest rate derivative contracts, forward purchase and sale commitments of mortgage-backed securities and purchased securities all classified as Trading account assets. The Company receives fees during the course of servicing previously securitized mortgages. The amounts of these fees were as follows:

In millions of dollars	2016	2015
Servicing fees	\$ 128	\$ 140
Late fees	4	4
Ancillary fees	5	7
Total MSR fees	\$ 137	\$ 151

In the Consolidated Statement of Income these fees are primarily classified as Commissions and fees, and changes in MSR fair values are classified as Other revenue.

Re-securitizations

The Company engages in re-securitization transactions in which debt securities are transferred to a VIE in exchange for new beneficial interests. Citi did not transfer any non-agency (private-label) securities to re-securitization entities during the quarter ended March 31, 2016. During the quarter ended March 31, 2015, Citi transferred non-agency (private-label) securities with an original par value of \$454 million to re-securitization entities. These securities are backed by either residential or commercial mortgages and are often structured on behalf of clients.

As of March 31, 2016, the fair value of Citi-retained interests in private-label re-securitization transactions structured by Citi totaled approximately \$243 million (all related to re-securitization transactions executed prior to 2016), which has been recorded in Trading account assets. Of this amount, substantially all was related to subordinated beneficial interests. As of December 31, 2015, the fair value of Citi-retained interests in private-label re-securitization transactions structured by Citi totaled approximately \$428 million (including \$132 million related to re-securitization transactions executed in 2015). Of this amount, approximately \$18 million was related to senior beneficial interests, and approximately \$410 million was related to subordinated beneficial interests. The original par value of private-label re-securitization transactions in which Citi holds a retained interest as of March 31, 2016 and December 31, 2015 was approximately \$2.6 billion and \$3.7 billion, respectively.

The Company also re-securitizes U.S. government-agency guaranteed mortgage-backed (agency) securities. During the quarters ended March 31, 2016 and 2015, Citi transferred agency securities with a fair value of approximately \$7.3 billion and \$4.3 billion, respectively, to re-securitization entities.

As of March 31, 2016, the fair value of Citi-retained interests in agency re-securitization transactions structured by Citi totaled approximately \$3.0 billion (including \$651 million related to re-securitization transactions executed in 2016) compared to \$1.8 billion as of December 31, 2015 (including \$1.5 billion related to re-securitization transactions executed in 2015), which is recorded in Trading account assets. The original fair value of agency re-securitization transactions in which Citi holds a retained interest as of March 31, 2016 and December 31, 2015 was approximately \$68.2 billion and \$65.0 billion, respectively.

As of March 31, 2016 and December 31, 2015, the Company did not consolidate any private-label or agency re-securitization entities.

Citi-Administered Asset-Backed Commercial Paper Conduits

The Company is active in the asset-backed commercial paper conduit business as administrator of several multi-seller commercial paper conduits and also as a service provider to single-seller and other commercial paper conduits sponsored by third parties.

Citi's multi-seller commercial paper conduits are designed to provide the Company's clients access to low-cost funding in the commercial paper markets. The conduits purchase assets from or provide financing facilities to clients and are

funded by issuing commercial paper to third-party investors. The conduits generally do not purchase assets originated by the Company. The funding of the conduits is facilitated by the liquidity support and credit enhancements provided by the Company.

As administrator to Citi's conduits, the Company is generally responsible for selecting and structuring assets purchased or financed by the conduits, making decisions regarding the funding of the conduits, including determining the tenor and other features of the commercial paper issued, monitoring the quality and performance of the conduits' assets, and facilitating the operations and cash flows of the conduits. In return, the Company earns structuring fees from customers for individual transactions and earns an administration fee from the conduit, which is equal to the income from the client program and liquidity fees of the conduit after payment of conduit expenses. This administration fee is fairly stable, since most risks and rewards of the underlying assets are passed back to the clients. Once the asset pricing is negotiated, most ongoing income, costs and fees are relatively stable as a percentage of the conduit's size. The conduits administered by the Company do not generally invest in liquid securities that are formally rated by third parties. The assets are privately negotiated and structured transactions that are generally designed to be held by the conduit, rather than actively traded and sold. The yield earned by the conduit on each asset is generally tied to the rate on the commercial paper issued by the conduit, thus passing interest rate risk to the client. Each asset purchased by the conduit is structured with transaction-specific credit enhancement features provided by the third-party client seller, including over collateralization, cash and excess spread collateral accounts, direct recourse or third-party guarantees. These credit enhancements are sized with the objective of approximating a credit rating of A or above, based on the

Company's internal risk ratings. At March 31, 2016 and December 31, 2015, the conduits had approximately \$21.4 billion and \$21.3 billion of purchased assets outstanding, respectively, and had incremental funding commitments with clients of approximately \$13.1 billion and \$11.6 billion, respectively.

Substantially all of the funding of the conduits is in the form of short-term commercial paper. At March 31, 2016 and December 31, 2015, the weighted average remaining lives of the commercial paper issued by the conduits were approximately 65 and 56 days, respectively.

The primary credit enhancement provided to the conduit investors is in the form of transaction-specific credit enhancements described above. In addition to the transaction-specific credit enhancements, the conduits, other than the government guaranteed loan conduit, have obtained a letter of credit from the Company, which is equal to at least 8% to 10% of the conduit's assets with a minimum of \$200 million. The letters of credit provided by the Company to the conduits total approximately \$1.9 billion as of March 31, 2016 and December 31, 2015. The net result across multi-seller conduits administered by the Company, other than the government guaranteed loan conduit, is that, in the event defaulted assets exceed the transaction-specific credit enhancements described above, any losses in each conduit are allocated first to the Company and then the commercial paper investors.

The Company also provides the conduits with two forms of liquidity agreements that are used to provide funding to the conduits in the event of a market disruption, among other events. Each asset of the conduits is supported by a transaction-specific liquidity facility in the form of an asset purchase agreement (APA). Under the APA, the Company has generally agreed to purchase non-defaulted eligible receivables from the conduit at par. The APA is not designed to provide credit support to the conduit, as it generally does not permit the purchase of defaulted or impaired assets.

Any funding under the APA will likely subject the underlying conduit clients to increased interest costs. In addition, the Company provides the conduits with program-wide liquidity in the form of short-term lending commitments.

Under these commitments, the Company has agreed to lend to the conduits in the event of a short-term disruption in the commercial paper market, subject to specified conditions. The Company receives fees for providing both types of liquidity agreements and considers these fees to be on fair market terms.

Finally, the Company is one of several named dealers in the commercial paper issued by the conduits and earns a market-based fee for providing such services. Along with third-party dealers, the Company makes a market in the commercial paper and may from time to time fund commercial paper pending sale to a third party. On specific dates with less liquidity in the market, the Company may hold in inventory commercial paper issued by conduits administered by the Company, as well as conduits administered by third parties. Separately, in the normal course of business, the Company invests in commercial paper, including commercial paper issued by the Company's conduits. At March 31, 2016 and December 31, 2015, the Company owned \$11.6 billion and \$11.4 billion, respectively, of the commercial paper issued by its administered conduits. The Company's investments were

not driven by market illiquidity and the Company is not obligated under any agreement to purchase the commercial paper issued by the conduits.

The asset-backed commercial paper conduits are consolidated by the Company. The Company has determined that, through its roles as administrator and liquidity provider, it has the power to direct the activities that most significantly impact the entities' economic performance. These powers include its ability to structure and approve the assets purchased by the conduits, its ongoing surveillance and credit mitigation activities, its ability to sell or repurchase assets out of the conduits, and its liability management. In addition, as a result of all the Company's involvement described above, it was concluded that the Company has an economic interest that could potentially be significant. However, the assets and liabilities of the conduits are separate and apart from those of Citigroup. No assets of any conduit are available to satisfy the creditors of Citigroup or any of its other subsidiaries.

Collateralized Loan Obligations

A collateralized loan obligation (CLO) is a VIE that purchases a portfolio of assets consisting primarily of non-investment grade corporate loans. The CLO issues multiple tranches of debt and equity to investors to fund the asset purchases and pay upfront expenses associated with forming the CLO. A third-party asset manager is contracted by the CLO to purchase the underlying assets from the open market and monitor the credit risk associated with those

assets. Over the term of the CLO, the asset manager directs purchases and sales of assets in a manner consistent with the CLO's asset management agreement and indenture. In general, the CLO asset manager will have the power to direct the activities of the entity that most significantly impact the economic performance of the CLO. Investors in the CLO, through their ownership of debt and/or equity in the CLO, can also direct certain activities of the CLO, including removing the CLO asset manager under limited circumstances, optionally redeeming the notes, voting on amendments to the CLO's operating documents and other activities. The CLO has a finite life, typically 12 years. Citi serves as a structuring and placement agent with respect to the CLO. Typically, the debt and equity of the CLO are sold to third-party investors. On occasion, certain Citi entities may purchase some portion of the CLO's liabilities for investment purposes. In addition, Citi may purchase, typically in the secondary market, certain securities issued by the CLO to support its market making activities.

The Company does not generally have the power to direct the activities of the entity that most significantly impact the economic performance of the CLOs, as this power is generally held by a third-party asset manager of the CLO. As such, those CLOs are not consolidated.

Key Assumptions and Retained Interests

The key assumptions used to value retained interests in CLOs, and the sensitivity of the fair value to adverse changes of 10% and 20% are set forth in the tables below:

	Mar. 31, 2016	Dec. 31, 2015
Discount rate	1.1% to 41.9%	1.4% to 49.6%
	Mar.	Dec.

	2016	2015
Carrying value of retained interests	\$907	\$918
Discount rates		
Adverse change of 10%	\$(5)	\$(5)
Adverse change of 20%	(10)	(10)

Asset-Based Financing

The Company provides loans and other forms of financing to VIEs that hold assets. Those loans are subject to the same credit approvals as all other loans originated or purchased by the Company. Financings in the form of debt securities or derivatives are, in most circumstances, reported in Trading account assets and accounted for at fair value through earnings. The Company generally does not have the power to direct the activities that most significantly impact these VIEs' economic performance, thus, it does not consolidate them.

The primary types of Citigroup's asset-based financings, total assets of the unconsolidated VIEs with significant involvement, and the Company's maximum exposure to loss are shown below. For the Company to realize the maximum loss, the VIE (borrower) would have to default with no recovery from the assets held by the VIE.

	March 31, 2016	
	Total unconsolidated assets	Maximum exposure to unconsolidated VIEs

Municipal Securities Tender Option Bond (TOB) Trusts

Municipal TOB trusts may hold fixed- or floating-rate, taxable or tax-exempt securities issued by state and local governments and municipalities. TOB trusts are typically structured as single-issuer entities whose assets are purchased from either the Company or from other investors in the municipal securities market. TOB trusts finance the purchase of their municipal assets by issuing two classes of certificates: long-dated, floating rate certificates (“Floaters”) that are putable pursuant to a liquidity facility and residual interest certificates (“Residuals”). The Floaters are purchased by third-party investors, typically tax-exempt money market funds. The Residuals are purchased by the original owner of the municipal securities that are being financed.

From the Company’s perspective, there are two types of TOB trusts: customer TOB trusts and non-customer TOB trusts. Customer TOB trusts are those trusts utilized by customers of the Company to finance their municipal securities investments. The Residuals issued by these trusts are purchased by the customer being financed.

Non-customer TOB trusts are trusts that are used by the Company to finance its own municipal securities investments; the Residuals issued by non-customer TOB trusts are purchased by the Company.

With respect to both customer and non-customer TOB trusts, the Company may provide remarketing agent services. If Floaters are optionally tendered and the Company, in its role as remarketing agent, is unable to find a new investor to purchase the optionally tendered Floaters within a specified period of time, the Company may, but is not obligated to, purchase the tendered Floaters into its own inventory. The level of the Company’s inventory of such Floaters fluctuates. At March 31, 2016 and December 31, 2015, the Company held \$119 million and \$2 million, respectively, of Floaters related to customer and non-customer TOB trusts.

For certain customer TOB trusts, the Company may also serve as a voluntary advance provider. In this capacity, the Company may, but is not obligated to, make loan advances to customer TOB trusts to purchase optionally tendered Floaters that have not otherwise been successfully remarketed to new investors. Such loans are secured by pledged Floaters. As of March 31, 2016, the Company had no outstanding voluntary advances to customer TOB trusts.

For certain non-customer trusts, the Company also provides credit enhancement. At March 31, 2016 and December 31, 2015, approximately \$82 million of the municipal bonds owned by non-customer TOB trusts are subject to a credit guarantee provided by the Company.

The Company also provides liquidity services to many customer and non-customer trusts. If a trust is unwound early due to an event other than a credit event on the underlying municipal bonds, the underlying municipal bonds are sold out of the Trust and bond sale proceeds are used to redeem the outstanding Trust certificates. If this results in a shortfall between the bond sale proceeds and the redemption price of the tendered Floaters, the Company, pursuant to the liquidity agreement, would be obligated to make a payment to the trust to satisfy that shortfall. For certain customer TOB trusts the Company has also executed a reimbursement agreement with the holder of the Residual, pursuant to which the Residual holder is obligated to reimburse the Company for any payment

the Company makes under the liquidity arrangement. These reimbursement agreements may be subject to daily margining based on changes in the market value of the underlying municipal bonds. In cases where a third party provides liquidity to a non-customer TOB trust, a similar reimbursement arrangement may be executed, whereby the Company (or a consolidated subsidiary of the Company), as Residual holder, would absorb any losses incurred by the liquidity provider.

For certain other non-customer TOB trusts, the Company serves as tender option provider. The tender option provider arrangement allows Floater holders to put their interests directly to the Company at any time, subject to the requisite notice period requirements, at a price of par.

At March 31, 2016 and December 31, 2015, liquidity agreements provided with respect to customer TOB trusts totaled \$3.0 billion and \$3.1 billion, respectively, of which \$2.2 billion and \$2.2 billion, respectively, were offset by reimbursement agreements. For the remaining exposure related to TOB transactions, where the Residual owned by the customer was at least 25% of the bond value at the inception of the transaction, no reimbursement agreement was executed.

The Company considers both customer and non-customer TOB trusts to be VIEs. Customer TOB trusts are not consolidated by the Company, as the power to direct the activities that most significantly impact the trust's economic performance rests with the customer Residual holder, which may unilaterally cause the sale of the trust's bonds. Non-customer TOB trusts generally are consolidated because the Company holds the Residual interest, and thus has the unilateral power to cause the sale of the trust's bonds.

The Company also provides other liquidity agreements or letters of credit to customer-sponsored municipal investment funds, which are not variable interest entities, and municipality-related issuers that totaled \$7.6 billion and \$8.1 billion as of March 31, 2016 and December 31, 2015, respectively. These liquidity agreements and letters of credit are offset by reimbursement agreements with various term-out provisions.

Municipal Investments

Municipal investment transactions include debt and equity interests in partnerships that finance the construction and rehabilitation of low-income housing, facilitate lending in new or underserved markets, or finance the construction or operation of renewable municipal energy facilities. The Company generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits and grants earned from the investments made by the partnership. The Company may also provide construction loans or permanent loans for the development or operation of real estate properties held by partnerships. These entities are generally considered VIEs. The power to direct the activities of these entities is typically held by the general partner. Accordingly, these entities are not consolidated by the Company.

Client Intermediation

Client intermediation transactions represent a range of transactions designed to provide investors with specified returns based on the returns of an underlying security, referenced asset or index. These transactions include credit-linked notes and equity-linked notes. In these transactions, the VIE typically obtains exposure to the underlying security, referenced asset or index through a derivative instrument, such as a total-return swap or a credit-default swap. In turn the VIE issues notes to investors that pay a return based on the specified underlying security, referenced asset or index. The VIE invests the proceeds in a financial asset or a guaranteed insurance contract that serves as collateral for the derivative contract over the term of the transaction. The Company's involvement in these transactions includes being the counterparty to the VIE's derivative instruments and investing in a portion of the notes issued by the VIE. In certain transactions, the investor's maximum risk of loss is limited, and the Company absorbs risk of loss above a specified level. The Company does not have the power to direct the activities of the VIEs that most significantly impact their economic performance, and thus it does not consolidate them.

The Company's maximum risk of loss in these transactions is defined as the amount invested in notes issued by the VIE and the notional amount of any risk of loss absorbed by the Company through a separate instrument issued by the VIE. The derivative instrument held by the Company may generate a receivable from the VIE (for example, where the

Company purchases credit protection from the VIE in connection with the VIE's issuance of a credit-linked note), which is collateralized by the assets owned by the VIE. These derivative instruments are not considered variable interests, and any associated receivables are not included in the calculation of maximum exposure to the VIE.

The proceeds from new securitizations related to the Company's client intermediation transactions for the quarters ended March 31, 2016 and 2015 totaled approximately \$0.6 billion and \$0.2 billion, respectively.

Investment Funds

The Company is the investment manager for certain investment funds and retirement funds that invest in various asset classes including private equity, hedge funds, real estate, fixed income and infrastructure. The Company earns a management fee, which is a percentage of capital under management, and may earn performance fees. In addition, for some of these funds the Company has an ownership interest in the investment funds. The Company has also established a number of investment funds as opportunities for qualified employees to invest in private equity investments. The Company acts as investment manager to these funds and may provide employees with financing on both recourse and non-recourse bases for a portion of the employees' investment commitments.

Prior to January 1, 2016, the Company determined that a majority of the investment entities managed by Citigroup were provided a deferral from the requirements of ASC 810, because they met the criteria in ASU No. 2010-10, Consolidation (Topic 810): Amendments for Certain Investment Funds. As part of the amended guidance under ASU 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis, effective January 1, 2016, these entities were evaluated and the Company determined that these entities continue to meet the definition of a VIE because the limited partners in the fund do not have the ability to remove the Company as investment manager. The Company is considered the primary beneficiary and consolidates those VIE entities where it has both the power to direct the activities and a potentially significant variable interest.

21. DERIVATIVES ACTIVITIES

In the ordinary course of business, Citigroup enters into various types of derivative transactions. These derivative transactions include:

- Futures and forward contracts, which are commitments to buy or sell at a future date a financial instrument, commodity or currency at a contracted price and may be settled in cash or through delivery.

- Swap contracts, which are commitments to settle in cash at a future date or dates that may range from a few days to a number of years, based on differentials between specified indices or financial instruments, as applied to a notional principal amount.

- Option contracts, which give the purchaser, for a premium, the right, but not the obligation, to buy or sell within a specified time a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

Swaps and forwards and some option contracts are over-the-counter (OTC) derivatives that are bilaterally negotiated with counterparties and settled with those counterparties, except for swap contracts that are novated and "cleared" through central counterparties (CCPs). Futures contracts and other option contracts are standardized contracts that are traded on an exchange with a CCP as the counterparty from the inception of the transaction. Citigroup enters into these derivative contracts relating to interest rate, foreign currency, commodity and other market/credit risks for the following reasons:

Trading Purposes: Citigroup trades derivatives as an active market maker. Citigroup offers its customers derivatives in connection with their risk management actions to transfer, modify or reduce their interest rate, foreign exchange and other market/credit risks or for their own trading purposes. Citigroup also manages its derivative risk positions through offsetting trade activities, controls focused on price verification, and daily reporting of positions to senior managers.

Hedging: Citigroup uses derivatives in connection with its risk management activities to hedge certain risks or reposition the risk profile of the Company. For example, Citigroup issues fixed-rate long-term debt and then enters into a receive-fixed, pay-variable-rate interest rate swap with the same tenor and notional amount to convert the interest payments to a net variable-rate basis. This strategy is the most common form of an interest rate hedge, as it minimizes net interest cost in certain yield curve environments. Derivatives are also used to manage risks inherent in specific groups of on-balance sheet assets and liabilities, including AFS securities, commodities and borrowings, as well as other interest-sensitive assets and liabilities. In addition, foreign-exchange contracts are used to hedge non-U.S.-dollar-denominated debt, foreign-currency-denominated AFS securities and net investment exposures.

Derivatives may expose Citigroup to market, credit or liquidity risks in excess of the amounts recorded on the Consolidated Balance Sheet. Market risk on a derivative product is the exposure created by potential fluctuations in interest rates, market prices, foreign-exchange rates and other factors and is a function of the type of product, the volume of transactions, the tenor and terms of the agreement and the underlying volatility. Credit risk is the exposure to loss in the event of nonperformance by the other party to satisfy a derivative liability where the value of any collateral held by Citi is not adequate to cover such losses. The recognition in earnings of unrealized gains on these transactions is subject to management's assessment of the probability of counterparty default. Liquidity risk is the potential exposure that arises when the size of a derivative position may not be able to be monetized in a reasonable period of time and at a reasonable cost in periods of high volatility and financial stress.

Derivative transactions are customarily documented under industry standard master netting agreements that provide that, following an uncured payment default or other event of default, the non-defaulting party may promptly terminate all transactions between the parties and determine the net amount due to be paid to, or by, the defaulting party. Events of default include: (i) failure to make a payment on a derivatives transaction that remains uncured following applicable notice and grace periods, (ii) breach of agreement that remains uncured after applicable notice and grace

periods, (iii) breach of a representation, (iv) cross default, either to third-party debt or to other derivative transactions entered into between the parties, or, in some cases, their affiliates, (v) the occurrence of a merger or consolidation which results in a party's becoming a materially weaker credit, and (vi) the cessation or repudiation of any applicable guarantee or other credit support document. Obligations under master netting agreements are often secured by collateral posted under an industry standard credit support annex to the master netting agreement. An event of default may also occur under a credit support annex if a party fails to make a collateral delivery that remains uncured following applicable notice and grace periods.

The netting and collateral rights incorporated in the master netting agreements are considered to be legally enforceable if a supportive legal opinion has been obtained from counsel of recognized standing that provides the requisite level of certainty regarding enforceability and that the exercise of rights by the non-defaulting party to terminate and close-out transactions on a net basis under these agreements will not be stayed or avoided under applicable law upon an event of default including bankruptcy, insolvency or similar proceeding.

A legal opinion may not be sought for certain jurisdictions where local law is silent or unclear as to the enforceability of such rights or where adverse case law or conflicting regulation may cast doubt on the enforceability of such rights. In some jurisdictions and for some counterparty types, the insolvency law may not provide the requisite level of certainty. For example, this may be the case for certain sovereigns, municipalities, central banks and U.S. pension plans.

Exposure to credit risk on derivatives is affected by market volatility, which may impair the ability of counterparties to satisfy their obligations to the Company. Credit limits are established and closely monitored for customers engaged in derivatives transactions. Citi considers the level of legal certainty regarding enforceability of its offsetting rights under master netting agreements and credit support annexes to be an important factor in its risk management process. Specifically, Citi generally transacts much lower volumes of derivatives under master netting agreements where Citi does not have the requisite level of legal certainty regarding enforceability, because such derivatives consume greater amounts of single counterparty credit limits than those executed under enforceable master netting agreements. Cash collateral and security collateral in the form of G10 government debt securities is often posted by a party to a master netting agreement to secure the net open exposure of the other party; the receiving party is free to commingle/rehypothesize such collateral in the ordinary course of its business. Nonstandard collateral such as corporate bonds, municipal bonds, U.S. agency securities and/or MBS may also be pledged as collateral for derivative transactions. Security collateral posted to open and maintain a master netting agreement with a counterparty, in the form of cash and/or securities, may from time to time be segregated in an account at a third-party custodian pursuant to a tri-party account control agreement.

Information pertaining to Citigroup's derivative activity, based on notional amounts is presented in the table below. Derivative notional amounts are reference amounts from which contractual payments are derived and do not represent a complete and accurate measure of Citi's exposure to derivative transactions. Rather, as discussed above, Citi's derivative exposure arises primarily from market fluctuations (i.e., market risk), counterparty failure (i.e., credit risk) and/or periods of high volatility or financial stress (i.e., liquidity risk), as well as any market valuation adjustments that may be

required on the transactions. Moreover, notional amounts do not reflect the netting of offsetting trades (also as discussed above). For example, if Citi enters into an interest rate swap with \$100 million notional, and offsets this risk with an identical but opposite position with a different counterparty, \$200 million in derivative notionals is reported, although these offsetting positions may result in de minimis overall market risk. Aggregate derivative notional amounts can fluctuate from period to period in the normal course of business based on Citi's market share, levels of client activity and other factors.

The notional amounts presented in this table do not include hedge accounting relationships under ASC 815 where

(1) Citigroup is hedging the foreign currency risk of a net investment in a foreign operation by issuing a foreign-currency-denominated debt instrument. The notional amount of such debt was \$2,229 million and \$2,102 million at March 31, 2016 and December 31, 2015, respectively.

(2) Derivatives in hedge accounting relationships accounted for under ASC 815 are recorded in either Other assets/Other liabilities or Trading account assets/Trading account liabilities on the Consolidated Balance Sheet.

(3) Management hedges represent derivative instruments used to mitigate certain economic risks, but for which hedge accounting is not applied. These derivatives are recorded in either Other assets/Other liabilities or Trading account assets/Trading account liabilities on the Consolidated Balance Sheet.

Credit derivatives are arrangements designed to allow one party (protection buyer) to transfer the credit risk of a “reference asset” to another party (protection seller). These arrangements allow a protection seller to assume the (4) credit risk associated with the reference asset without directly purchasing that asset. The Company enters into credit derivative positions for purposes such as risk management, yield enhancement, reduction of credit concentrations and diversification of overall risk.

The following tables present the gross and net fair values of the Company’s derivative transactions, and the related offsetting amounts permitted under ASC 210-20-45 and ASC 815-10-45, as of March 31, 2016 and December 31, 2015. Under ASC 210-20-45, gross positive fair values are offset against gross negative fair values by counterparty pursuant to enforceable master netting agreements. Under ASC 815-10-45, payables and receivables in respect of cash collateral received from or paid to a given counterparty pursuant to a credit support annex are included in the offsetting amount if a legal opinion supporting enforceability of netting and collateral rights has been obtained. GAAP does not permit similar offsetting for security collateral. The tables also include amounts that are not permitted to be offset under ASC 210-20-45 and ASC 815-10-45, such as security collateral posted or cash collateral posted at third-party custodians, but which would be eligible for offsetting to the extent an event of default occurred and a legal opinion supporting enforceability of the netting and collateral rights has been obtained.

(1) The trading derivatives fair values are presented in Note 12 to the Consolidated Financial Statements.

(2) Derivative mark-to-market receivables/payables related to management hedges are recorded in either Other assets/Other liabilities or Trading account assets/Trading account liabilities.

(3) Over-the-counter (OTC) derivatives are derivatives executed and settled bilaterally with counterparties without the use of an organized exchange or central clearing house. Cleared derivatives include derivatives executed bilaterally with a counterparty in the OTC market but then novated to a central clearing house, whereby the central clearing

house becomes the counterparty to both of the original counterparties. Exchange traded derivatives include derivatives executed directly on an organized exchange that provides pre-trade price transparency.

The credit derivatives trading assets comprise \$16,094 million related to protection purchased and \$16,429 million (4) related to protection sold as of March 31, 2016. The credit derivatives trading liabilities comprise \$16,907 million related to protection purchased and \$15,623 million related to protection sold as of March 31, 2016.

For the trading account assets/liabilities, reflects the net amount of the \$57,418 million and \$67,703 million of (5) gross cash collateral paid and received, respectively. Of the gross cash collateral paid, \$50,994 million was used to offset trading derivative liabilities and, of the gross cash collateral received, \$53,812 million was used to offset trading derivative assets.

For cash collateral paid with respect to non-trading derivative assets, reflects the net amount of \$55 million of gross cash collateral paid, of which \$44 million is netted against non-trading derivative positions within Other (6) liabilities. For cash collateral received with respect to non-trading derivative liabilities, reflects the net amount of \$2,142 million of gross cash collateral received, of which \$2,102 million is netted against OTC non-trading derivative positions within Other assets.

Represents the netting of derivative receivable and payable balances with the same counterparty under enforceable (7) netting agreements. Approximately \$470 billion, \$185 billion and \$9 billion of the netting against trading account asset/liability balances is attributable to each of the OTC, cleared and exchange-traded derivatives, respectively.

Represents the netting of cash collateral paid and received by counterparty under enforceable credit support (8) agreements. Substantially all cash collateral received and paid is netted against OTC derivative assets and liabilities, respectively.

(9) The net receivables/payables include approximately \$9 billion of derivative asset and \$9 billion of derivative liability fair values not subject to enforceable master netting agreements, respectively.

(1) The trading derivatives fair values are presented in Note 12 to the Consolidated Financial Statements.

(2) Derivative mark-to-market receivables/payables related to management hedges are recorded in either Other assets/Other liabilities or Trading account assets/Trading account liabilities.

Over-the-counter (OTC) derivatives include derivatives executed and settled bilaterally with counterparties without the use of an organized exchange or central clearing house. Cleared derivatives include derivatives executed bilaterally with a counterparty in the OTC market but then novated to a central clearing house,

whereby the central clearing house becomes the counterparty to both of the original counterparties. Exchange traded derivatives include derivatives executed directly on an organized exchange that provides pre-trade price transparency.

The credit derivatives trading assets comprise \$17,957 million related to protection purchased and \$16,918 million (4) related to protection sold as of December 31, 2015. The credit derivatives trading liabilities comprise \$16,968 million related to protection purchased and \$17,200 million related to protection sold as of December 31, 2015.

For the trading account assets/liabilities, reflects the net amount of the \$47,520 million and \$56,855 million of (5) gross cash collateral paid and received, respectively. Of the gross cash collateral paid, \$42,609 million was used to offset derivative liabilities and, of the gross cash collateral received, \$43,227 million was used to offset derivative assets.

For cash collateral paid with respect to non-trading derivative assets, reflects the net amount of \$61 million of the gross cash collateral received, of which \$53 million is netted against non-trading derivative positions within Other (6) liabilities. For cash collateral received with respect to non-trading derivative liabilities, reflects the net amount of \$1,986 million of gross cash collateral received, of which \$1,949 million is netted against non-trading derivative positions within Other assets.

Represents the netting of derivative receivable and payable balances with the same counterparty under enforceable (7) netting agreements. Approximately \$391 billion, \$126 billion and \$7 billion of the netting against trading account asset/liability balances is attributable to each of the OTC, cleared and exchange-traded derivatives, respectively.

Represents the netting of cash collateral paid and received by counterparty under enforceable credit support (8) agreements. Substantially all cash collateral received and paid is netted against OTC derivative assets and liabilities, respectively.

(9) The net receivables/payables include approximately \$10 billion of derivative asset and \$10 billion of liability fair values not subject to enforceable master netting agreements, respectively.

For the three months ended March 31, 2016 and 2015, the amounts recognized in Principal transactions in the Consolidated Statement of Income related to derivatives not designated in a qualifying hedging relationship, as well as the underlying non-derivative instruments, are presented in Note 6 to the Consolidated Financial Statements.

Citigroup presents this disclosure by business classification, showing derivative gains and losses related to its trading activities together with gains and losses related to non-derivative instruments within the same trading portfolios, as this represents the way these portfolios are risk managed.

The amounts recognized in Other revenue in the Consolidated Statement of Income related to derivatives not designated in a qualifying hedging relationship are shown below. The table below does not include any offsetting gains/losses on the economically hedged items to the extent such amounts are also recorded in Other revenue.

Accounting for Derivative Hedging

Citigroup accounts for its hedging activities in accordance with ASC 815, Derivatives and Hedging. As a general rule, hedge accounting is permitted where the Company is exposed to a particular risk, such as interest-rate or foreign-exchange risk, that causes changes in the fair value of an asset or liability or variability in the expected future cash flows of an existing asset, liability or a forecasted transaction that may affect earnings.

Derivative contracts hedging the risks associated with changes in fair value are referred to as fair value hedges, while contracts hedging the variability of expected future cash flows are cash flow hedges. Hedges that utilize derivatives or debt instruments to manage the foreign exchange risk associated with equity investments in non-U.S.-dollar-functional-currency foreign subsidiaries (net investment in a foreign operation) are net investment hedges.

If certain hedging criteria specified in ASC 815 are met, including documentation requirements and assessing hedge effectiveness, hedge accounting may be applied. The hedge effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships. For fair value hedges, changes in the value of the hedging derivative, as well as changes in the value of the related hedged item due to the risk being hedged, are reflected in current earnings. For cash flow hedges and net investment hedges, changes in the value of the hedging derivative are reflected in Accumulated other comprehensive income (loss) in Citigroup's stockholders' equity to the extent the hedge is highly effective. Hedge ineffectiveness, in either case, is reflected in current earnings.

For asset/liability management hedging, fixed-rate long-term debt is recorded at amortized cost under GAAP. However, by designating an interest rate swap contract as a hedging instrument and electing to apply ASC 815 fair value hedge accounting, the carrying value of the debt is adjusted for changes in the benchmark interest rate, with such changes in value recorded in current earnings. The related interest-rate swap also is recorded on the balance sheet at fair value, with any changes in fair value also reflected in earnings. Thus, any ineffectiveness resulting from the hedging relationship is captured in current earnings.

Alternatively, for management hedges that do not meet the ASC 815 hedging criteria, the derivative is recorded at fair value on the balance sheet, with the associated changes in fair value recorded in earnings, while the debt continues to be carried at amortized cost. Therefore, current earnings are affected only by the interest rate shifts and other factors that cause a change in the swap's value. This type of hedge is undertaken when hedging requirements cannot be achieved or management decides not to apply ASC 815 hedge accounting.

Another alternative is to elect to account for the debt at fair value under the fair value option. Once the irrevocable election is made upon issuance of the debt, the full change in fair value of the debt is reported in earnings. The changes in fair value of the related interest rate swap are also reflected in earnings, which provides a natural offset to the debt's fair value change. To the extent the two offsets are not exactly equal because the full change in the fair value of the debt

includes risks not offset by the interest rate swap, the difference is captured in current earnings.

The key requirements to achieve ASC 815 hedge accounting are documentation of a hedging strategy and specific hedge relationships at hedge inception and substantiating hedge effectiveness on an ongoing basis. A derivative must be highly effective in accomplishing the hedge objective of offsetting either changes in the fair value or cash flows of the hedged item for the risk being hedged. Any ineffectiveness in the hedge relationship is recognized in current earnings. The assessment of effectiveness may exclude changes in the value of the hedged item that are unrelated to the risks being hedged. Similarly, the assessment of effectiveness may exclude changes in the fair value of a derivative related to time value that, if excluded, are recognized in current earnings.

Fair Value Hedges

Hedging of Benchmark Interest Rate Risk

Citigroup hedges exposure to changes in the fair value of outstanding fixed-rate issued debt. These hedges are designated as fair value hedges of the benchmark interest rate risk associated with the currency of the hedged liability.

The fixed cash flows of the hedged items are converted to benchmark variable-rate cash flows by entering into receive-fixed, pay-variable interest rate swaps. These fair value hedge relationships use either regression or dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis.

Citigroup also hedges exposure to changes in the fair value of fixed-rate assets due to changes in benchmark interest rates, including available-for-sale debt securities and loans. The hedging instruments used are receive-variable, pay-fixed interest rate swaps. These fair value hedging relationships use either regression or dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis.

Hedging of Foreign Exchange Risk

Citigroup hedges the change in fair value attributable to foreign-exchange rate movements in available-for-sale securities that are denominated in currencies other than the functional currency of the entity holding the securities, which may be within or outside the U.S. The hedging instrument employed is generally a forward foreign-exchange contract. In this hedge, the change in fair value of the hedged available-for-sale security attributable to the portion of foreign exchange risk hedged is reported in earnings, and not AOCI—which serves to offset the change in fair value of the forward contract that is also reflected in earnings. Citigroup considers the premium associated with forward contracts (i.e., the differential between spot and contractual forward rates) as the cost of hedging; this is excluded from the assessment of hedge effectiveness and reflected directly in earnings. The dollar-offset method is used to assess hedge effectiveness. Since that assessment is based on changes in fair value attributable to changes in spot rates on both the available-for-sale securities and the forward contracts for the portion of the relationship hedged, the amount of hedge ineffectiveness is not significant.

Hedging of Commodity Price Risk

Citigroup hedges the change in fair value attributable to price movements in physical commodities inventory. The hedging instrument employed is a futures contract to sell the underlying commodity. In this hedge, the change in value of the hedged inventory is reflected in earnings, which serves to offset the change in fair value of the futures contract that is also reflected in earnings. Citigroup excludes the differential between spot and the contractual forward rates under the futures contract from the assessment of hedge effectiveness. Since the assessment is based on changes in fair value attributable to change in spot prices on both the physical commodity and the futures contract, the amount of hedge ineffectiveness is not significant.

The following table summarizes the gains (losses) on the Company's fair value hedges:

In millions of dollars	Gains (losses) on fair value hedges ⁽¹⁾ Three Months Ended March 31,	
	2016	2015
Gain (loss) on the derivatives in designated and qualifying fair value hedges		
Interest rate contracts	\$2,115	\$641
Foreign exchange contracts	(1,361)	1,388
Commodity contracts	349	116
Total gain (loss) on the derivatives in designated and qualifying fair value hedges	\$1,103	\$2,145
Gain (loss) on the hedged item in designated and qualifying fair value hedges		
Interest rate hedges	\$(2,090)	\$(608)
Foreign exchange hedges	1,307	(1,421)
Commodity hedges	(344)	(104)
Total gain (loss) on the hedged item in designated and qualifying fair value hedges	\$(1,127)	\$(2,133)
Hedge ineffectiveness recognized in earnings on designated and qualifying fair value hedges		
Interest rate hedges	\$27	\$33
Foreign exchange hedges	(75)	(38)
Total hedge ineffectiveness recognized in earnings on designated and qualifying fair value hedges	\$(48)	\$(5)
Net gain (loss) excluded from assessment of the effectiveness of fair value hedges		
Interest rate contracts	\$(2)	\$—
Foreign exchange contracts ⁽²⁾	21	5
Commodity hedges ⁽²⁾	5	12
Total net gain (loss) excluded from assessment of the effectiveness of fair value hedges	\$24	\$17

(1) Amounts are included in Other revenue on the Consolidated Statement of Income. The accrued interest income on fair value hedges is recorded in Net interest revenue and is excluded from this table.

Amounts relate to the premium associated with forward contracts (differential between spot and contractual forward rates). These amounts are excluded from the assessment of hedge effectiveness and are reflected directly in earnings.

Cash Flow Hedges

Hedging of Benchmark Interest Rate Risk

Citigroup hedges variable cash flows associated with floating-rate liabilities and the rollover (re-issuance) of liabilities. Variable cash flows from those liabilities are converted to fixed-rate cash flows by entering into receive-variable, pay-fixed interest rate swaps and receive-variable, pay-fixed forward-starting interest rate swaps. Citi also hedges variable cash flows from recognized and forecasted floating-rate assets. Variable cash flows from those assets are converted to fixed-rate cash flows by entering into receive-fixed, pay-variable interest rate swaps. These cash-flow hedging relationships use either regression analysis or dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis. When certain variable interest rates, associated with hedged items, do not qualify as benchmark interest rates, Citigroup designates the risk being hedged as the risk of overall changes in the hedged cash flows. Since efforts are made to match the terms of the derivatives to those of the hedged forecasted cash flows as closely as

possible, the amount of hedge ineffectiveness is not significant.

Hedging of Foreign Exchange Risk

Citigroup locks in the functional currency equivalent cash flows of long-term debt and short-term borrowings that are denominated in currencies other than the functional currency of the issuing entity. Depending on the risk management objectives, these types of hedges are designated as either cash flow hedges of only foreign exchange risk or cash flow hedges of both foreign exchange and interest rate risk, and the hedging instruments used are foreign exchange cross-currency swaps and forward contracts. These cash flow hedge relationships use dollar-offset ratio analysis to determine whether the hedging relationships are highly effective at inception and on an ongoing basis.

The amount of hedge ineffectiveness on the cash flow hedges recognized in earnings for the three months ended March 31, 2016, and 2015 is not significant. The pretax change in AOCI from cash flow hedges is presented below:

In millions of dollars	Three Months Ended March 31,	
	2016	2015
Effective portion of cash flow hedges included in AOCI		
Interest rate contracts	\$415	\$220
Foreign exchange contracts	24	(150)
Total effective portion of cash flow hedges included in AOCI	\$439	\$70
Effective portion of cash flow hedges reclassified from AOCI to earnings		
Interest rate contracts	\$(16)	\$(46)
Foreign exchange contracts	(26)	(40)
Total effective portion of cash flow hedges reclassified from AOCI to earnings ⁽¹⁾	\$(42)	\$(86)

(1)Included primarily in Other revenue and Net interest revenue on the Consolidated Income Statement.

For cash flow hedges, the changes in the fair value of the hedging derivative remaining in AOCI on the Consolidated Balance Sheet will be included in the earnings of future periods to offset the variability of the hedged cash flows when such cash flows affect earnings. The net loss associated with cash flow hedges expected to be reclassified from AOCI within 12 months of March 31, 2016 is approximately \$0.3 billion. The maximum length of time over which forecasted cash flows are hedged is 10 years.

The after-tax impact of cash flow hedges on AOCI is shown in Note 18 to the Consolidated Financial Statements.

Net Investment Hedges

Consistent with ASC 830-20, Foreign Currency Matters—Foreign Currency Transactions, ASC 815 allows hedging of the foreign currency risk of a net investment in a foreign operation. Citigroup uses foreign currency forwards, options and foreign-currency-denominated debt instruments to manage the foreign exchange risk associated with Citigroup's equity investments in several non-U.S.-dollar-functional-currency foreign subsidiaries. Citigroup records the change in the carrying amount of these investments in the Foreign currency translation adjustment account within AOCI. Simultaneously, the effective portion of the hedge of this exposure is also recorded in the Foreign currency translation adjustment account and the ineffective portion, if any, is immediately recorded in earnings. For derivatives designated as net investment hedges, Citigroup follows the forward-rate method outlined in ASC 815-35-35-16 through 35-26. According to that method, all changes in fair value, including changes related to the forward-rate component of the foreign currency forward contracts and the time value of foreign currency options, are recorded in the Foreign currency translation adjustment account within AOCI.

For foreign-currency-denominated debt instruments that are designated as hedges of net investments, the translation gain or loss that is recorded in the Foreign currency translation adjustment account is based on the spot exchange rate between the functional currency of the respective subsidiary and the U.S. dollar, which is the functional currency of Citigroup. To the extent the notional amount of the hedging instrument exactly matches the hedged net investment and the underlying exchange rate of the derivative hedging instrument relates to the exchange rate between the functional currency of the net investment and Citigroup's functional currency (or, in the case of a non-derivative debt instrument, such instrument is denominated in the functional currency of the net investment), no ineffectiveness is recorded in earnings.

The pretax gain (loss) recorded in the Foreign currency translation adjustment account within AOCI, related to the effective portion of the net investment hedges, is \$(1,374) million and \$1,000 million for the three months ended March 31, 2016 and 2015, respectively.

Credit Derivatives

Citi is a market maker and trades a range of credit derivatives. Through these contracts, Citi either purchases or writes protection on either a single name or a portfolio of reference credits. Citi also uses credit derivatives to help mitigate credit risk in its corporate and consumer loan portfolios and other cash positions, and to facilitate client transactions. Citi monitors its counterparty credit risk in credit derivative contracts. As of March 31, 2016 and December 31, 2015, approximately 98% of the gross receivables are from counterparties with which Citi maintains collateral agreements. A majority of Citi's top 15 counterparties (by receivable balance owed to Citi) are banks, financial institutions or other dealers. Contracts with these counterparties do not include ratings-based termination events. However, counterparty ratings downgrades may have an incremental effect by lowering the threshold at which Citi may call for additional collateral.

The range of credit derivatives entered into includes credit default swaps, total return swaps, credit options and credit-linked notes.

A credit default swap is a contract in which, for a fee, a protection seller agrees to reimburse a protection buyer for any losses that occur due to a predefined credit event on a reference entity. These credit events are defined by the terms of the derivative contract and the reference credit and are generally limited to the market standard of failure to pay on indebtedness and bankruptcy of the reference credit and, in a more limited range of transactions, debt restructuring. Credit derivative transactions that reference emerging market entities will also typically include additional credit events to cover the acceleration of indebtedness and the risk of repudiation or a payment moratorium. In certain transactions, protection may be provided on a portfolio of reference entities or asset-backed securities. If there is no credit event, as defined by the specific derivative contract, then the protection seller makes no payments to the protection buyer and receives only the contractually specified fee. However, if a credit event occurs as defined in the specific derivative contract sold, the

protection seller will be required to make a payment to the protection buyer. Under certain contracts, the seller of protection may not be required to make a payment until a specified amount of losses has occurred with respect to the portfolio and/or may only be required to pay for losses up to a specified amount.

A total return swap typically transfers the total economic performance of a reference asset, which includes all associated cash flows, as well as capital appreciation or depreciation. The protection buyer receives a floating rate of interest and any depreciation on the reference asset from the protection seller and, in return, the protection seller receives the cash flows associated with the reference asset plus any appreciation. Thus, according to the total return swap agreement, the protection seller will be obligated to make a payment any time the floating interest rate payment plus any depreciation of the reference asset exceeds the cash flows associated with the underlying asset. A total return swap may terminate upon a default of the reference asset or a credit event with respect to the reference entity subject to the provisions of the related total return swap agreement between the protection seller and the protection buyer.

A credit option is a credit derivative that allows investors to trade or hedge changes in the credit quality of a reference entity. For example, in a credit spread option, the option writer assumes the obligation to purchase or sell credit protection on the reference entity at a specified "strike" spread level. The option purchaser buys the right to sell credit

default protection on the reference entity to, or purchase it from, the option writer at the strike spread level. The payments on credit spread options depend either on a particular credit spread or the price of the underlying credit-sensitive asset or other reference. The options usually terminate if a credit event occurs with respect to the underlying reference entity.

A credit-linked note is a form of credit derivative structured as a debt security with an embedded credit default swap. The purchaser of the note effectively provides credit protection to the issuer by agreeing to receive a return that could be negatively affected by credit events on the underlying reference credit. If the reference entity defaults, the note may be cash settled or physically settled by delivery of a debt security of the reference entity. Thus, the maximum amount of the note purchaser's exposure is the amount paid for the credit-linked note.

The following tables summarize the key characteristics of Citi's credit derivatives portfolio by counterparty and derivative form:

- (1) The fair value amount receivable is composed of \$18,799 million under protection purchased and \$16,918 million under protection sold.
- (2) The fair value amount payable is composed of \$17,531 million under protection purchased and \$17,200 million under protection sold.

Fair values included in the above tables are prior to application of any netting agreements and cash collateral. For notional amounts, Citi generally has a mismatch between the total notional amounts of protection purchased and sold, and it may hold the reference assets directly, rather than entering into offsetting credit derivative contracts as and when desired. The open risk exposures from credit derivative contracts are largely matched after certain cash positions in reference assets are considered and after notional amounts are adjusted, either to a duration-based equivalent basis or to reflect the level of subordination in tranching structures. The ratings of the credit derivatives portfolio presented in the tables and used to evaluate payment/performance risk are based on the assigned internal or external ratings of the referenced asset or entity. Where external ratings are used, investment-grade ratings are considered to be 'Baa/BBB' and above, while anything below is considered non-investment grade. Citi's internal ratings are in line with the related external rating system.

Citigroup evaluates the payment/performance risk of the credit derivatives for which it stands as a protection seller based on the credit rating assigned to the underlying referenced credit. Credit derivatives written on an underlying non-investment grade reference credit represent greater payment risk to the Company. The non-investment grade category in the table above also includes credit derivatives where the underlying referenced entity has been downgraded subsequent to the inception of the derivative.

The maximum potential amount of future payments under credit derivative contracts presented in the table above is based on the notional value of the derivatives. The Company believes that the notional amount for credit protection sold is not representative of the actual loss exposure based on historical experience. This amount has not been reduced by the value of the reference assets and the related cash flows. In accordance with most credit derivative contracts, should a credit event occur, the Company usually is liable for the difference between the protection sold and the value of the reference assets. Furthermore, the notional amount for credit protection sold has not been reduced for any cash collateral paid to a given counterparty, as such payments would be calculated after netting all derivative exposures, including any credit derivatives with that counterparty in accordance with a related master netting agreement. Due to such netting processes, determining the amount of collateral that corresponds to credit derivative exposures alone is not possible. The Company actively monitors open credit-risk exposures and manages this exposure by using a variety of strategies, including purchased credit derivatives, cash collateral or direct holdings of the referenced assets. This risk mitigation activity is not captured in the table above.

Credit-Risk-Related Contingent Features in Derivatives

Certain derivative instruments contain provisions that require the Company to either post additional collateral or immediately settle any outstanding liability balances upon the occurrence of a specified event related to the credit risk of the Company. These events, which are defined by the existing derivative contracts, are primarily downgrades in the credit ratings of the Company and its affiliates. The fair value (excluding CVA) of all derivative instruments with credit-risk-related contingent features that were in a net liability position at both March 31, 2016 and December 31, 2015 was \$26 billion and \$22 billion, respectively. The Company had posted \$22 billion and \$19 billion as collateral for this exposure in the normal course of business as of March 31, 2016 and December 31, 2015, respectively. A downgrade could trigger additional collateral or cash settlement requirements for the Company and certain affiliates. In the event that Citigroup and Citibank were downgraded a single notch by all three major rating agencies as of March 31, 2016, the Company could be required to post an additional \$2.0 billion as either collateral or settlement of the derivative transactions. Additionally, the Company could be required to segregate with third-party custodians collateral previously received from existing derivative counterparties in the amount of \$0.1 billion upon the single notch downgrade, resulting in aggregate cash obligations and collateral requirements of approximately \$2.1 billion.

Derivatives Accompanied by Financial Asset Transfers

The Company executes total return swaps which provide it with synthetic exposure to substantially all of the economic return of the securities or other financial assets referenced in the contract. In certain cases, the derivative transaction is accompanied by the Company's transfer of the referenced financial asset to the derivative counterparty, most typically in response to the derivative counterparty's desire to hedge, in whole or in part, its synthetic exposure under the derivative contract by holding the referenced asset in funded form. In certain jurisdictions these transactions qualify as sales, resulting in derecognition of the securities transferred (see 2015 Annual Report on Form 10-K, Note 1 to the Consolidated Financial Statements for further discussion of the related sale conditions for transfers of financial assets). For a significant portion of the transactions, the Company has also executed another total return swap where the Company passes on substantially all of the economic return of the referenced securities to a different third party seeking the exposure. In those cases, the Company is not exposed, on a net basis, to changes in the economic return of the referenced securities.

These transactions generally involve the transfer of the Company's liquid government bonds, convertible bonds, or publicly traded corporate equity securities from the trading portfolio and are executed with third-party financial institutions. The accompanying derivatives are typically total return swaps. The derivatives are cash settled and subject to ongoing margin requirements.

When the conditions for sale accounting are met, the Company reports the transfer of the referenced financial asset as a sale and separately reports the accompanying derivative

transaction. These transactions generally do not result in a gain or loss on the sale of the security, because the transferred security was held at fair value in the Company's trading portfolio. For transfers of financial assets accounted for by the Company as a sale, where the Company has retained substantially all of the economic exposure to the transferred asset through a total return swap executed in contemplation of the initial sale with the same counterparty and still outstanding as of March 31, 2016, both the asset carrying amounts derecognized and gross cash proceeds received as of the date of derecognition were \$1.1 billion. At March 31, 2016, the fair value of these previously derecognized assets was \$1.1 billion and the fair value of the total return swaps was \$29 million recorded as gross derivative assets and \$5 million recorded as gross derivative liabilities. The balances for the total return swaps are on a gross basis, before the application of counterparty and cash collateral netting, and are included primarily as equity derivatives in the tabular disclosures in this Note.

22. FAIR VALUE MEASUREMENT

ASC 820-10 Fair Value Measurement, defines fair value, establishes a consistent framework for measuring fair value and requires disclosures about fair value measurements. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Among other things, the standard requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

Under ASC 820-10, the probability of default of a counterparty is factored into the valuation of derivative and other positions as well as the impact of Citigroup's own credit risk on derivatives and other liabilities measured at fair value.

Fair Value Hierarchy

ASC 820-10 specifies a hierarchy of inputs based on whether the inputs are observable or unobservable. Observable inputs are developed using market data and reflect market participant assumptions, while unobservable inputs reflect the Company's market assumptions. These two types of inputs have created the following fair value hierarchy:

Level 1: Quoted prices for identical instruments in active markets.

Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.

Level 3: Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

As required under the fair value hierarchy, the Company considers relevant and observable market inputs in its valuations where possible. The frequency of transactions, the size of the bid-ask spread and the amount of adjustment necessary when comparing similar transactions are all factors in determining the liquidity of markets and the relevance of observed prices in those markets.

The Company's policy with respect to transfers between levels of the fair value hierarchy is to recognize transfers into and out of each level as of the end of the reporting period.

Determination of Fair Value

For assets and liabilities carried at fair value, the Company measures fair value using the procedures set out below, irrespective of whether the assets and liabilities are measured at fair value as a result of an election or whether they are required to be measured at fair value.

When available, the Company uses quoted market prices to determine fair value and classifies such items as Level 1. In some cases where a market price is available, the

Company will make use of acceptable practical expedients (such as matrix pricing) to calculate fair value, in which case the items are classified as Level 2.

The Company may also apply a price-based methodology, which utilizes, where available, quoted prices or other market information obtained from recent trading activity in positions with the same or similar characteristics to the position being valued. The market activity and the amount of the bid-ask spread are among the factors considered in determining the liquidity of markets and the observability of prices from those markets. If relevant and observable prices are available, those valuations may be classified as Level 2. When less liquidity exists for a security or loan, a quoted price is stale, a significant adjustment to the price of a similar security is necessary to reflect differences in the terms of the actual security or loan being valued, or prices from independent sources are insufficient to corroborate the valuation, the "price" inputs are considered unobservable and the fair value measurements are classified as Level 3. If quoted market prices are not available, fair value is based upon internally developed valuation techniques that use, where possible, current market-based parameters, such as interest rates, currency rates and option volatilities. Items valued using such internally generated valuation techniques are classified according to the lowest level input or value driver that is significant to the valuation. Thus, an item may be classified as Level 3 even though there may be some

significant inputs that are readily observable.

Fair value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors or brokers. Vendors' and brokers' valuations may be based on a variety of inputs ranging from observed prices to proprietary valuation models.

The following section describes the valuation methodologies used by the Company to measure various financial instruments at fair value, including an indication of the level in the fair value hierarchy in which each instrument is generally classified. Where appropriate, the description includes details of the valuation models, the key inputs to those models and any significant assumptions.

Market Valuation Adjustments

Generally, the unit of account for a financial instrument is the individual financial instrument. The Company applies market valuation adjustments that are consistent with the unit of account, which does not include adjustment due to the size of the Company's position, except as follows. ASC 820-10 permits an exception, through an accounting policy election, to measure the fair value of a portfolio of financial assets and financial liabilities on the basis of the net open risk position when certain criteria are met. Citi has elected to measure certain portfolios of financial instruments, such as derivatives, that meet those criteria on the basis of the net open risk position. The Company applies market valuation adjustments, including adjustments to account for the size of the net open risk position, consistent with market participant assumptions and in accordance with the unit of account.

Liquidity adjustments are applied to items in Level 2 or Level 3 of the fair-value hierarchy in an effort to ensure that the fair value reflects the price at which the position could be liquidated. The liquidity adjustment is based on the bid/offer spread for an instrument. When Citi has elected to measure certain portfolios of financial investments, such as derivatives, on the basis of the net open risk position, the liquidity adjustment may be adjusted to take into account the size of the position.

Credit valuation adjustments (CVA) and funding valuation adjustments (FVA), are applied to over-the-counter (OTC) derivative instruments in which the base valuation generally discounts expected cash flows using the relevant base interest rate curve for the currency of the derivative (e.g., LIBOR for uncollateralized U.S.-dollar derivatives). As not all counterparties have the same credit risk as that implied by the relevant base curve, a CVA is necessary to incorporate the market view of both counterparty credit risk and Citi's own credit risk in the valuation. FVA reflects a market funding risk premium inherent in the uncollateralized portion of derivative portfolios, and in collateralized derivatives where the terms of the agreement do not permit the reuse of the collateral received.

Citi's CVA and FVA methodology is composed of two steps.

First, the exposure profile for each counterparty is determined using the terms of all individual derivative positions and a Monte Carlo simulation or other quantitative analysis to generate a series of expected cash flows at future points in time. The calculation of this exposure profile considers the effect of credit risk mitigants and sources of funding, including pledged cash or other collateral and any legal right of offset that exists with a counterparty through arrangements such as netting agreements. Individual derivative contracts that are subject to an enforceable master netting agreement with a counterparty are aggregated as a netting set for this purpose, since it is those aggregate net cash flows that are subject to nonperformance risk. This process identifies specific, point-in-time future cash flows that are subject to nonperformance risk and unsecured funding, rather than using the current recognized net asset or liability as a basis to measure the CVA and FVA.

Second, for CVA, market-based views of default probabilities derived from observed credit spreads in the credit default swap (CDS) market are applied to the expected future cash flows determined in step one. Citi's own-credit CVA is determined using Citi-specific CDS spreads for the relevant tenor. Generally, counterparty CVA is determined using CDS spread indices for each credit rating and tenor. For certain identified netting sets where individual analysis is practicable (e.g., exposures to counterparties with liquid CDSs), counterparty-specific CDS spreads are used. For FVA, a term structure of future liquidity spreads is applied to the expected future funding requirement.

The CVA and FVA are designed to incorporate a market view of the credit and funding risk, respectively, inherent in the derivative portfolio. However, most unsecured derivative instruments are negotiated bilateral contracts and are not commonly transferred to third parties. Derivative instruments are normally settled contractually or, if terminated early, are terminated at a value negotiated bilaterally between the counterparties. Thus, the CVA and FVA may not be realized upon a settlement or termination in the normal course of business. In addition, all or a portion of these adjustments may be reversed or otherwise adjusted in future periods in the event of changes in the credit or funding risk associated with the derivative instruments.

The table below summarizes the CVA and FVA applied to the fair value of derivative instruments at March 31, 2016 and 2015:

In millions of dollars	Credit and funding valuation adjustments contra-liability (contra-asset)	
	March 31, 2016	December 31, 2015
Counterparty CVA	\$(1,889)	\$(1,470)
Asset FVA	(664)	(584)
Citigroup (own-credit) CVA	609	471

Liability FVA	135	106
Total CVA—derivative instruments	\$ (1,809)	\$ (1,477)

(1) FVA is included with CVA for presentation purposes.

The table below summarizes pretax gains (losses) related to changes in CVA on derivative instruments, net of hedges, FVA on derivatives and debt valuation adjustments (DVA) on Citi's own fair value option (FVO) liabilities for the years indicated:

In millions of dollars	Credit/funding/debt valuation adjustments gain (loss)	
	Three Months Ended March 31,	
	2016	2015
Counterparty CVA	\$ (108)	\$ (139)
Asset FVA	(80)	(42)
Own-credit CVA	135	(36)
Liability FVA	29	57
Total CVA—derivative instruments	\$ (24)	\$ (160)
DVA related to own FVO liabilities ⁽²⁾	\$ 307	\$ 87

(1) FVA is included with CVA for presentation purposes.

Effective January 1, 2016, Citigroup early adopted on a prospective basis only the provisions of ASU No. 2016-01, Financial Instruments - Overall (Subtopic 825-01): Recognition and Measurement of Financial Assets and Financial Liabilities, related to the presentation of DVA on fair value option liabilities. Accordingly, beginning in (2) the first quarter 2016, the portion of the change in fair value of these liabilities related to changes in Citigroup's own credit spreads (DVA) is reflected as a component of AOCI; previously these amounts were recognized in Citigroup's revenues and net income. DVA amounts in AOCI will be recognized in revenue and net income if realized upon the settlement of the related liability.

Valuation Process for Fair Value Measurements

Price verification procedures and related internal control procedures are governed by the Citigroup Pricing and Price Verification Policy and Standards, which is jointly owned by Finance and Risk Management.

For fair value measurements of substantially all assets and liabilities held by the Company, individual business units are responsible for valuing the trading account assets and liabilities, and Product Control within Finance performs independent price verification procedures to evaluate those fair value measurements. Product Control is independent of the individual business units and reports to the Global Head of Product Control. It has authority over the valuation of financial assets and liabilities. Fair value measurements of assets and liabilities are determined using various techniques, including, but not limited to, discounted cash flows and internal models, such as option and correlation models.

Based on the observability of inputs used, Product Control classifies the inventory as Level 1, Level 2 or Level 3 of the fair value hierarchy. When a position involves one or more significant inputs that are not directly observable, price verification procedures are performed that may include reviewing relevant historical data, analyzing profit and loss, valuing each component of a structured trade individually, and benchmarking, among others.

Reports of inventory that is classified within Level 3 of the fair value hierarchy are distributed to senior management in Finance, Risk and the business. This inventory is also discussed in Risk Committees and in monthly meetings with senior trading management. As deemed necessary, reports may go to the Audit Committee of the Board of Directors or to the full Board of Directors. Whenever an adjustment is needed to bring the price of an asset or liability to its exit price, Product Control reports it to management along with other price verification results.

In addition, the pricing models used in measuring fair value are governed by an independent control framework. Although the models are developed and tested by the individual business units, they are independently validated by the Model Validation Group within Risk Management and reviewed by Finance with respect to their impact on the price verification procedures. The purpose of this independent control framework is to assess model risk arising from models' theoretical soundness, calibration techniques where needed, and the appropriateness of the model for a specific product in a defined market. To ensure their continued applicability, models are independently reviewed annually. In addition, Risk Management approves and maintains a list of products permitted to be valued under each approved model for a given business.

Securities Purchased Under Agreements to Resell and Securities Sold Under Agreements to Repurchase

No quoted prices exist for these instruments, so fair value is determined using a discounted cash-flow technique. Cash flows are estimated based on the terms of the contract, taking into account any embedded derivative or other features. These cash flows are discounted using interest rates appropriate to the maturity of the instrument as well as the nature of the underlying collateral. Generally, when such instruments are recorded at fair value, they are classified within Level 2 of the fair value hierarchy, as the inputs used in the valuation are readily observable. However, certain long-dated positions are classified within Level 3 of the fair value hierarchy.

Trading Account Assets and Liabilities—Trading Securities and Trading Loans

When available, the Company uses quoted market prices in active markets to determine the fair value of trading securities; such items are classified as Level 1 of the fair value hierarchy. Examples include government securities and exchange-traded equity securities.

For bonds and secondary market loans traded over the counter, the Company generally determines fair value utilizing valuation techniques, including discounted cash flows, price-based and internal models, such as Black-Scholes and Monte Carlo simulation. Fair value estimates from these internal valuation techniques are verified, where possible, to prices obtained from independent sources, including third-party vendors. Vendors compile prices from various sources and may apply matrix pricing for similar bonds or loans where no price is observable. A price-based methodology utilizes, where available, quoted prices or other market information obtained from recent trading activity of assets with similar characteristics to the bond or loan being valued. The yields used in discounted cash flow models are

derived from the same price information. Trading securities and loans priced using such methods are generally classified as Level 2. However, when less liquidity exists for a security or loan, a quoted price is stale, a significant adjustment to the price of a similar security or loan is necessary to reflect differences in the terms of the actual security or loan being valued, or prices from independent sources are insufficient to corroborate valuation, a loan or security is generally classified as Level 3. The price input used in a price-based methodology may be zero for a security, such as a subprime CDO, that is not receiving any principal or interest and is currently written down to zero. When the Company's principal market for a portfolio of loans is the securitization market, the Company uses the securitization price to determine the fair value of the portfolio. The securitization price is determined from the assumed proceeds of a hypothetical securitization in the current market, adjusted for transformation costs (i.e., direct costs other than transaction costs) and securitization uncertainties such as market conditions and liquidity. As a result of the severe reduction in the level of activity in certain securitization markets since the second half of 2007, observable securitization prices for certain directly

comparable portfolios of loans have not been readily available. Therefore, such portfolios of loans are generally classified as Level 3 of the fair value hierarchy. However, for other loan securitization markets, such as commercial real estate loans, price verification of the hypothetical securitizations has been possible, since these markets have remained active. Accordingly, this loan portfolio is classified as Level 2 of the fair value hierarchy. For most of the lending and structured direct subprime exposures, fair value is determined utilizing observable transactions where available, other market data for similar assets in markets that are not active and other internal valuation techniques. The valuation of certain asset-backed security (ABS) CDO positions utilizes prices based on the underlying assets of the ABS CDO.

Trading Account Assets and Liabilities—Derivatives

Exchange-traded derivatives, measured at fair value using quoted (i.e., exchange) prices in active markets, where available, are classified as Level 1 of the fair value hierarchy.

Derivatives without a quoted price in an active market and derivatives executed over the counter are valued using internal valuation techniques. These derivative instruments are classified as either Level 2 or Level 3 depending upon the observability of the significant inputs to the model.

The valuation techniques and inputs depend on the type of derivative and the nature of the underlying instrument. The principal techniques used to value these instruments are discounted cash flows and internal models, including Black-Scholes and Monte Carlo simulation.

The key inputs depend upon the type of derivative and the nature of the underlying instrument and include interest rate yield curves, foreign-exchange rates, volatilities and correlation. The Company uses overnight indexed swap (OIS) curves as fair value measurement inputs for the valuation of certain collateralized derivatives. Citi uses the relevant benchmark curve for the currency of the derivative (e.g., the London Interbank Offered Rate for U.S. dollar derivatives) as the discount rate for uncollateralized derivatives.

Citi's FVA methodology leverages the existing CVA methodology to estimate a funding exposure profile. The calculation of this exposure profile considers collateral agreements where the terms do not permit the firm to reuse the collateral received, including where counterparties post collateral to third-party custodians.

Investments

The investments category includes available-for-sale debt and marketable equity securities whose fair values are generally determined by utilizing similar procedures described for trading securities above or, in some cases, using vendor pricing as the primary source.

Also included in investments are nonpublic investments in private equity and real estate entities. Determining the fair value of nonpublic securities involves a significant degree of management judgment, as no quoted prices exist and such securities are generally thinly traded. In addition, there may

be transfer restrictions on private equity securities. The Company's process for determining the fair value of such securities utilizes commonly accepted valuation techniques, including comparables analysis. In determining the fair value of nonpublic securities, the Company also considers events such as a proposed sale of the investee company, initial public offerings, equity issuances or other observable transactions.

Private equity securities are generally classified as Level 3 of the fair value hierarchy.

In addition, the Company holds investments in certain alternative investment funds that calculate NAV per share, including hedge funds, private equity funds and real estate funds. Investments in funds are generally classified as non-marketable equity securities carried at fair value. The fair values of these investments are estimated using the NAV per share of the Company's ownership interest in the funds where it is not probable that the investment will be realized at a price other than the NAV. Consistent with the provisions of ASU No. 2015-07 these investments have not been categorized within the fair value hierarchy and are not included in the tables below. See Note 13 to the Consolidated Financial Statements for additional information.

Short-Term Borrowings and Long-Term Debt

Where fair value accounting has been elected, the fair value of non-structured liabilities is determined by utilizing internal models using the appropriate discount rate for the applicable maturity. Such instruments are generally classified as Level 2 of the fair value hierarchy when all significant inputs are readily observable.

The Company determines the fair value of hybrid financial instruments, including structured liabilities, using the appropriate derivative valuation methodology (described above in “Trading account assets and liabilities—derivatives”) given the nature of the embedded risk profile. Such instruments are classified as Level 2 or Level 3 depending on the observability of significant inputs to the model.

Alt-A Mortgage Securities

The Company classifies its Alt-A mortgage securities as held-to-maturity, available-for-sale or trading investments. The securities classified as trading and available-for-sale are recorded at fair value with changes in fair value reported in current earnings and AOCI, respectively. For these purposes, Citi defines Alt-A mortgage securities as non-agency residential mortgage-backed securities (RMBS) where (i) the underlying collateral has weighted average FICO scores between 680 and 720 or (ii) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans.

Similar to the valuation methodologies used for other trading securities and trading loans, the Company generally determines the fair values of Alt-A mortgage securities utilizing internal valuation techniques. Fair value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors.

Consensus data providers compile prices from various sources. Where available, the Company may also make use of quoted prices for recent trading activity in securities with the same or similar characteristics to the security being valued.

The valuation techniques used for Alt-A mortgage securities, as with other mortgage exposures, are price-based and yield analysis. The primary market-derived input is yield. Cash flows are based on current collateral performance with prepayment rates and loss projections reflective of current economic conditions of housing price change, unemployment rates, interest rates, borrower attributes and other market indicators.

Alt-A mortgage securities that are valued using these methods are generally classified as Level 2. However, Alt-A mortgage securities backed by Alt-A mortgages of lower quality or subordinated tranches in the capital structure are mostly classified as Level 3 due to the reduced liquidity that exists for such positions, which reduces the reliability of prices available from independent sources.

Items Measured at Fair Value on a Recurring Basis

The following tables present for each of the fair value hierarchy levels the Company's assets and liabilities that are measured at fair value on a recurring basis at March 31, 2016 and December 31, 2015. The Company's hedging of positions that have been classified in the Level 3 category is not limited

to other financial instruments (hedging instruments) that have been classified as Level 3, but also instruments classified as Level 1 or Level 2 of the fair value hierarchy. The effects of these hedges are presented gross in the following tables:

Fair Value Levels

In millions of dollars at March 31, 2016	Level 1 ⁽¹⁾	Level 2 ⁽¹⁾	Level 3	Gross inventory	Netting ⁽²⁾	Net balance

For the three months ended March 31, 2016, the Company transferred assets of approximately \$0.2 billion from Level 1 to Level 2, respectively, primarily related to foreign government securities not traded in active markets.

(1) During the three months ended March 31, 2016, the Company transferred assets of approximately \$1.3 billion from Level 2 to Level 1, respectively, primarily related to foreign government bonds traded with sufficient frequency to constitute an active market. During the three months ended March 31, 2016, there were no material transfers of liabilities from Level 1 to Level 2 or from Level 2 to Level 1.

(2)

Represents netting of: (i) the amounts due under securities purchased under agreements to resell and the amounts owed under securities sold under agreements to repurchase; and (ii) derivative exposures covered by a qualifying master netting agreement and cash collateral offsetting.

- (3) Reflects the net amount of \$57,418 million of gross cash collateral paid, of which \$50,994 million was used to offset trading derivative liabilities.
Amounts exclude \$0.8 billion investments measured at Net Asset Value (NAV) in accordance with ASU No.
- (4) 2015-07, Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent).
- (5) There is no allowance for loan losses recorded for loans reported at fair value.
- (6) Reflects the net amount of \$55 million of gross cash collateral paid, of which \$44 million was used to offset non-trading derivative liabilities.
Because the amount of the cash collateral paid/received has not been allocated to the Level 1, 2 and 3 subtotals,
- (7) these percentages are calculated based on total assets and liabilities measured at fair value on a recurring basis, excluding the cash collateral paid/received on derivatives.
- (8) Reflects the net amount of \$67,703 million of gross cash collateral received, of which \$53,812 million was used to offset trading derivative assets.
- (9) Reflects the net amount of \$2,142 million of gross cash collateral received, of which \$2,102 million was used to offset non-trading derivative assets.

In 2015, the Company transferred assets of approximately \$3.3 billion from Level 1 to Level 2, respectively, primarily related to foreign government securities and equity securities not traded in active markets. In 2015, the Company transferred assets of approximately \$4.4 billion from Level 2 to Level 1, respectively, primarily related to foreign government bonds and equity securities traded with sufficient frequency to constitute a liquid market. In 2015, the Company transferred liabilities of approximately \$0.6 billion from Level 2 to Level 1. In 2015, the Company transferred liabilities of approximately \$0.4 billion from Level 1 to Level 2.

(1)

(2)

Represents netting of: (i) the amounts due under securities purchased under agreements to resell and the amounts owed under securities sold under agreements to repurchase; and (ii) derivative exposures covered by a qualifying master netting agreement and cash collateral offsetting.

- (3) Reflects the net amount of \$47,520 million of gross cash collateral paid, of which \$42,609 million was used to offset trading derivative liabilities.
Amounts exclude \$0.9 billion investments measured at Net Asset Value (NAV) in accordance with ASU No.
- (4) 2015-07, Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent).
- (5) There is no allowance for loan losses recorded for loans reported at fair value.
- (6) Reflects the net amount of \$61 million of gross cash collateral paid, of which \$53 million was used to offset non-trading derivative liabilities.
Because the amount of the cash collateral paid/received has not been allocated to the Level 1, 2 and 3 subtotals,
- (7) these percentages are calculated based on total assets and liabilities measured at fair value on a recurring basis, excluding the cash collateral paid/received on derivatives.
- (8) Reflects the net amount of \$56,855 million of gross cash collateral received, of which \$43,227 million was used to offset trading derivative assets.
- (9) Reflects the net amount of \$1,986 million of gross cash collateral received, of which \$1,949 million was used to offset non-trading derivative assets.

Changes in Level 3 Fair Value Category

The following tables present the changes in the Level 3 fair value category for the three months ended March 31, 2016 and 2015. As discussed above, the Company classifies financial instruments as Level 3 of the fair value hierarchy when there is reliance on at least one significant unobservable input to the valuation model. In addition to these unobservable inputs, the valuation models for Level 3 financial instruments typically also rely on a number of inputs that are readily observable either directly or indirectly. The gains and losses presented below include changes in the fair value related to both observable and unobservable inputs.

The Company often hedges positions with offsetting positions that are classified in a different level. For example, the gains and losses for assets and liabilities in the Level 3 category presented in the tables below do not reflect the effect of offsetting losses and gains on hedging instruments that have been classified by the Company in the Level 1 and Level 2 categories. In addition, the Company hedges items classified in the Level 3 category with instruments also classified in Level 3 of the fair value hierarchy. The effects of these hedges are presented gross in the following tables:

Changes in fair value for available-for-sale investments are recorded in AOCI, unless related to other-than-temporary impairment, while gains and losses from sales are recorded in Realized gains (losses) from (1) sales of investments on the Consolidated Statement of Income. Effective January 1, 2016, changes in fair value of fair value option liabilities related to changes in Citigroup's own credit spreads (DVA) are reflected as a component of Accumulated other comprehensive income (AOCI).

(2) Unrealized gains (losses) on MSRs are recorded in Other revenue on the Consolidated Statement of Income.

Represents the amount of total gains or losses for the period, included in earnings (and AOCI for changes in fair value of available-for-sale investments), attributable to the change in fair value relating to assets and liabilities classified as Level 3 that are still held at March 31, 2016.

(4) Total Level 3 derivative assets and liabilities have been netted in these tables for presentation purposes only.

Changes in fair value of available-for-sale investments are recorded in AOCI, unless related to

- (1) other-than-temporary impairment, while gains and losses from sales are recorded in Realized gains (losses) from sales of investments on the Consolidated Statement of Income.
 - (2) Unrealized gains (losses) on MSRs are recorded in Other revenue on the Consolidated Statement of Income.
- Represents the amount of total gains or losses for the period, included in earnings (and AOCI for changes in fair value of available-for-sale investments), attributable to the change in fair value relating to assets and liabilities classified as Level 3 that are still held at March 31, 2015.
- (4) Total Level 3 derivative assets and liabilities have been netted in these tables for presentation purposes only.

Level 3 Fair Value Rollforward

The following were the significant Level 3 transfers for the period December 31, 2015 to March 31, 2016:

Transfers of Long-term debt of \$0.5 billion from Level 2 to Level 3, and of \$1.1 billion from Level 3 to Level 2, mainly related to structured debt, reflecting certain unobservable inputs becoming less significant and certain underlying market inputs being more observable.

There were no significant Level 3 transfers for the period from December 31, 2014 to March 31, 2015.

Valuation Techniques and Inputs for Level 3 Fair Value Measurements

The Company's Level 3 inventory consists of both cash instruments and derivatives of varying complexity. The valuation methodologies used to measure the fair value of these positions include discounted cash flow analysis, internal models and comparative analysis. A position is classified within Level 3 of the fair value hierarchy when at least one input is unobservable and is considered significant to its valuation. The specific reason an input is deemed unobservable varies. For example, at least one significant input to the pricing model is not observable in the market, at least one significant input has been adjusted to make it more representative of the position being valued, or the price quote available does not reflect sufficient trading activities.

The following tables present the valuation techniques covering the majority of Level 3 inventory and the most significant unobservable inputs used in Level 3 fair value measurements. Differences between this table and amounts presented in the Level 3 Fair Value Rollforward table represent individually immaterial items that have been measured using a variety of valuation techniques other than those listed.

- (1) The fair value amounts presented in these tables represent the primary valuation technique or techniques for each class of assets or liabilities.
- (2) Some inputs are shown as zero due to rounding.
- (3) When the low and high inputs are the same, there is either a constant input applied to all positions, or the methodology involving the input applies to only one large position.
- (4) Weighted averages are calculated based on the fair values of the instruments.
- (5) For equity securities, the price and fund NAV inputs are expressed on an absolute basis, not as a percentage of the notional amount.
- (6) Both trading and nontrading account derivatives—assets and liabilities—are presented on a gross absolute value basis.

(7) Includes hybrid products.

Sensitivity to Unobservable Inputs and Interrelationships between Unobservable Inputs

The impact of key unobservable inputs on the Level 3 fair value measurements may not be independent of one another. In addition, the amount and direction of the impact on a fair value measurement for a given change in an unobservable input depends on the nature of the instrument as well as whether the Company holds the instrument as an asset or a liability. For certain instruments, the pricing, hedging and risk management are sensitive to the correlation between various inputs rather than on the analysis and aggregation of the individual inputs. The following section describes the sensitivities and interrelationships of the most significant unobservable inputs used by the Company in Level 3 fair value measurements.

Correlation

Correlation is a measure of the extent to which two or more variables change in relation to each other. A variety of correlation-related assumptions are required for a wide range of instruments, including equity and credit baskets, foreign-exchange options, CDOs backed by loans or bonds, mortgages, subprime mortgages and many other instruments. For almost all of these instruments, correlations are not observable in the market and must be calculated using historical information. Estimating correlation can be especially difficult where it may vary over time. Calculating correlation information from market data requires significant assumptions regarding the informational efficiency of the market (for example, swaption markets). Changes in correlation levels can have a major impact, favorable or unfavorable, on the value of an instrument, depending on its nature. A change in the default correlation of the fair value of the underlying bonds comprising a CDO structure would affect the fair value of the senior tranche. For example, an increase in the default correlation of the underlying bonds would reduce the fair value of the senior tranche, because highly correlated instruments produce larger losses in the event of default and a part of these losses would become attributable to the senior tranche. That same change in default correlation would have a different impact on junior tranches of the same structure.

Volatility

Volatility represents the speed and severity of market price changes and is a key factor in pricing options. Typically, instruments can become more expensive if volatility increases. For example, as an index becomes more volatile, the cost to Citi of maintaining a given level of exposure increases because more frequent rebalancing of the portfolio is required. Volatility generally depends on the tenor of the underlying instrument and the strike price or level defined in the contract. Volatilities for certain combinations of tenor and strike are not observable. The general relationship between changes in the value of a portfolio to changes in volatility also depends on changes in interest rates and the level of the underlying index. Generally, long option positions (assets) benefit from increases in volatility, whereas short option positions

(liabilities) will suffer losses. Some instruments are more sensitive to changes in volatility than others. For example, an at-the-money option would experience a larger percentage change in its fair value than a deep-in-the-money option. In addition, the fair value of an option with more than one underlying security (for example, an option on a basket of bonds) depends on the volatility of the individual underlying securities as well as their correlations.

Yield

In some circumstances, the yield of an instrument is not observable in the market and must be estimated from historical data or from yields of similar securities. This estimated yield may need to be adjusted to capture the characteristics of the security being valued. In other situations, the estimated yield may not represent sufficient market liquidity and must be adjusted as well. Whenever the amount of the adjustment is significant to the value of the security, the fair value measurement is classified as Level 3.

Adjusted yield is generally used to discount the projected future principal and interest cash flows on instruments, such as asset-backed securities. Adjusted yield is impacted by changes in the interest rate environment and relevant credit

spreads.

Prepayment

Voluntary unscheduled payments (prepayments) change the future cash flows for the investor and thereby change the fair value of the security. The effect of prepayments is more pronounced for residential mortgage-backed securities. An increase in prepayments—in speed or magnitude—generally creates losses for the holder of these securities. Prepayment is generally negatively correlated with delinquency and interest rate. A combination of low prepayment and high delinquencies amplify each input's negative impact on mortgage securities' valuation. As prepayment speeds change, the weighted average life of the security changes, which impacts the valuation either positively or negatively, depending upon the nature of the security and the direction of the change in the weighted average life.

Recovery

Recovery is the proportion of the total outstanding balance of a bond or loan that is expected to be collected in a liquidation scenario. For many credit securities (such as asset-backed securities), there is no directly observable market input for recovery, but indications of recovery levels are available from pricing services. The assumed recovery of a security may differ from its actual recovery that will be observable in the future. The recovery rate impacts the valuation of credit securities. Generally, an increase in the recovery rate assumption increases the fair value of the security. An increase in loss severity, the inverse of the recovery rate, reduces the amount of principal available for distribution and, as a result, decreases the fair value of the security.

Credit Spread

Credit spread is a component of the security representing its credit quality. Credit spread reflects the market perception of changes in prepayment, delinquency and recovery rates, therefore capturing the impact of other variables on the fair value. Changes in credit spread affect the fair value of securities differently depending on the characteristics and maturity profile of the security. For example, credit spread is a more significant driver of the fair value measurement of a high yield bond as compared to an investment grade bond. Generally, the credit spread for an investment grade bond is also more observable and less volatile than its high yield counterpart.

Qualitative Discussion of the Ranges of Significant Unobservable Inputs

The following section describes the ranges of the most significant unobservable inputs used by the Company in Level 3 fair value measurements. The level of aggregation and the diversity of instruments held by the Company lead to a wide range of unobservable inputs that may not be evenly distributed across the Level 3 inventory.

Correlation

There are many different types of correlation inputs, including credit correlation, cross-asset correlation (such as equity-interest rate correlation), and same-asset correlation (such as interest rate-interest rate correlation). Correlation inputs are generally used to value hybrid and exotic instruments. Generally, same-asset correlation inputs have a narrower range than cross-asset correlation inputs. However, due to the complex and unique nature of these instruments, the ranges for correlation inputs can vary widely across portfolios.

Volatility

Similar to correlation, asset-specific volatility inputs vary widely by asset type. For example, ranges for foreign exchange volatility are generally lower and narrower than equity volatility. Equity volatilities are wider due to the nature of the equities market and the terms of certain exotic instruments. For most instruments, the interest rate volatility input is on the lower end of the range; however, for certain structured or exotic instruments (such as market-linked deposits or exotic interest rate derivatives), the range is much wider.

Yield

Ranges for the yield inputs vary significantly depending upon the type of security. For example, securities that typically have lower yields, such as municipal bonds, will fall on the lower end of the range, while more illiquid securities or securities with lower credit quality, such as certain residual tranche asset-backed securities, will have much higher yield inputs.

Credit Spread

Stronger companies have tighter credit spreads, and weaker companies have wider credit spreads. Credit spread is relevant primarily for fixed income and credit instruments; however, the ranges for the credit spread input can vary across instruments. For example, certain fixed income instruments,

such as certificates of deposit, typically have lower credit spreads, whereas certain derivative instruments with high-risk counterparties are typically subject to higher credit spreads when they are uncollateralized or have a longer tenor. Other instruments, such as credit default swaps, also have credit spreads that vary with the attributes of the underlying obligor.

Price

Price is a significant unobservable input for certain fixed income instruments. For these instruments, the price input is expressed as a percentage of the notional amount, with a price of \$100 meaning that the instrument is valued at par. For most of these instruments, the price varies between zero to \$100, or slightly above \$100. Relatively illiquid assets that have experienced significant losses since issuance, such as certain asset-backed securities, are at the lower end of the range, whereas most investment grade corporate bonds will fall in the middle to the higher end of the range. For

certain structured debt instruments with embedded derivatives, the price input may be above \$100 to reflect the embedded features of the instrument (for example, a step-up coupon or a conversion option).

The price input is also a significant unobservable input for certain equity securities; however, the range of price inputs varies depending on the nature of the position, the number of shares outstanding and other factors.

Mean Reversion

A number of financial instruments require an estimate of the rate at which the interest rate reverts to its long-term average. Changes in this estimate can significantly affect the fair value of these instruments. However, sometimes there is insufficient external market data to calibrate this parameter, especially when pricing more complex instruments. The level of mean reversion affects the correlation between short- and long-term interest rates. The fair values of more complex instruments, such as Bermudan swaptions (options with multiple exercise dates) and constant maturity spread options or structured debts with these embedded features, are more sensitive to the changes in this correlation as compared to less complex instruments, such as caps and floors.

Items Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a nonrecurring basis and therefore are not included in the tables above. These include assets measured at cost that have been written down to fair value during the periods as a result of an impairment. In addition, these assets include loans held-for-sale and other real estate owned that are measured at the lower of cost or market.

The following table presents the carrying amounts of all assets that were still held for which a nonrecurring fair value measurement was recorded during the three months ended:

Loans held-for-sale	\$10,326	\$6,752	\$3,574
Other real estate owned	107	15	92
Loans ⁽¹⁾	1,173	836	337
Other Assets	—	—	—
Total assets at fair value on a nonrecurring basis	\$11,606	\$7,603	\$4,003

(1) Represents impaired loans held for investment whose carrying amount is based on the fair value of the underlying collateral, primarily real estate secured loans.

(2) Represents the carrying value of an equity investment which was impaired during the first quarter of 2016.

The fair value of loans held-for-sale is determined where possible using quoted secondary-market prices. If no such quoted price exists, the fair value of a loan is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of that loan. Fair value for the other real estate owned is based on appraisals. For loans whose carrying amount is based on the fair value of the underlying collateral, the fair values depend on the type of collateral. Fair value of the collateral is typically estimated based on quoted market prices if available, appraisals or other internal valuation techniques.

Where the fair value of the related collateral is based on an unadjusted appraised value, the loan is generally classified as Level 2. Where significant adjustments are made to the appraised value, the loan is classified as Level 3.

Additionally, for corporate loans, appraisals of the collateral are often based on sales of similar assets; however, because the prices of similar assets require significant adjustments to reflect the unique features of the underlying collateral, these fair value measurements are generally classified as Level 3.

Valuation Techniques and Inputs for Level 3 Nonrecurring Fair Value Measurements

The following tables present the valuation techniques covering the majority of Level 3 nonrecurring fair value measurements and the most significant unobservable inputs used in those measurements:

As of March 31, 2016	Fair value ⁽¹⁾ (in millions)	Methodology	Input	Low ⁽⁵⁾	High	Weighted average ⁽²⁾
Loans held-for-sale	\$ 2,735	Price-based	Price	\$—	\$100.00	\$77.32
			Credit spread	90 bps	436 bps	356 bps

Other Assets	—
Total nonrecurring fair value gains (losses)	\$ (99)

(1)

Represents loans held for investment whose carrying amount is based on the fair value of the underlying collateral, primarily real estate loans.

Estimated Fair Value of Financial Instruments Not Carried at Fair Value

The table below presents the carrying value and fair value of Citigroup's financial instruments that are not carried at fair value. The table below therefore excludes items measured at fair value on a recurring basis presented in the tables above.

The disclosure also excludes leases, affiliate investments, pension and benefit obligations and insurance policy claim reserves. In addition, contract-holder fund amounts exclude certain insurance contracts. Also, as required, the disclosure excludes the effect of taxes, any premium or discount that could result from offering for sale at one time the entire holdings of a particular instrument, excess fair value associated with deposits with no fixed maturity, and other expenses that would be incurred in a market transaction. In addition, the table excludes the values of non-financial assets and liabilities, as well as a wide range of franchise, relationship and intangible values, which are integral to a full assessment of Citigroup's financial position and the value of its net assets.

The fair value represents management's best estimates based on a range of methodologies and assumptions. The

carrying value of short-term financial instruments not accounted for at fair value, as well as receivables and payables arising in the ordinary course of business, approximates fair value because of the relatively short period of time between their origination and expected realization. Quoted market prices are used when available for investments and for liabilities, such as long-term debt not carried at fair value. For loans not accounted for at fair value, cash flows are discounted at quoted secondary market rates or estimated market rates if available. Otherwise, sales of comparable loan portfolios or current market origination rates for loans with similar terms and risk characteristics are used. Expected credit losses are either embedded in the estimated future cash flows or incorporated as an adjustment to the discount rate used. The value of collateral is also considered. For liabilities such as long-term debt not accounted for at fair value and without quoted market prices, market borrowing rates of interest are used to discount contractual cash flows.

In billions of dollars	March 31, 2016		Estimated fair value		
	Carrying value	Estimated fair value	Level 1	Level 2	Level 3

197

The carrying value of loans is net of the Allowance for loan losses of \$12.7 billion for March 31, 2016 and \$12.6 (1) billion for December 31, 2015. In addition, the carrying values exclude \$2.0 billion and \$2.4 billion of lease finance receivables at March 31, 2016 and December 31, 2015, respectively.

(2) Includes items measured at fair value on a nonrecurring basis.

Includes cash and due from banks, deposits with banks, brokerage receivables, reinsurance recoverable and other (3) financial instruments included in Other assets on the Consolidated Balance Sheet, for all of which the carrying value is a reasonable estimate of fair value.

(4) The carrying value includes long-term debt balances under qualifying fair value hedges.

Includes brokerage payables, separate and variable accounts, short-term borrowings (carried at cost) and other (5) financial instruments included in Other liabilities on the Consolidated Balance Sheet, for all of which the carrying value is a reasonable estimate of fair value.

Fair values vary from period-to-period based on changes in a wide range of factors, including interest rates, credit quality and market perceptions of value, as existing assets and liabilities run off and new transactions are executed. The estimated fair values of loans reflect changes in credit status since the loans were made, changes in interest rates in the case of fixed-rate loans, and premium values at origination of certain loans.

The estimated fair values of the Company's corporate unfunded lending commitments at March 31, 2016 and December 31, 2015 were liabilities of \$6.5 billion and \$7.0 billion, respectively, substantially all of which are classified as Level 3. The Company does not estimate the fair values of consumer unfunded lending commitments, which are generally cancellable by providing notice to the borrower.

23. FAIR VALUE ELECTIONS

The Company may elect to report most financial instruments and certain other items at fair value on an instrument-by-instrument basis with changes in fair value reported in earnings, other than DVA (see below). The election is made upon the initial recognition of an eligible financial asset, financial liability or firm commitment or when certain specified reconsideration events occur. The fair value election may not be revoked once made. The changes in fair value are recorded in current earnings, other than DVA, which from

January 1, 2016 is reported in AOCI. Additional discussion regarding the applicable areas in which fair value elections were made is presented in Note 22 to the Consolidated Financial Statements.

All servicing rights are recognized initially at fair value. The Company has elected fair value accounting for its mortgage servicing rights. See Note 20 to the Consolidated Financial Statements for further discussions regarding the accounting and reporting of MSRs.

The following table presents the changes in fair value of those items for which the fair value option has been elected:

In millions of dollars	Changes in fair value gains (losses) for the Three Months Ended March 31, 2016 2015	
Assets		
Federal funds sold and securities borrowed or purchased under agreements to resell selected portfolios of securities purchased under agreements to resell and securities borrowed	\$28	\$2
Trading account assets	258	91
Investments	1	45
Loans		
Certain corporate loans ⁽¹⁾	24	(49)
Certain consumer loans ⁽¹⁾	(1)2
Total loans	\$23	\$(47)
Other assets		
MSRs	(225)	(71)
Certain mortgage loans held for sale ⁽²⁾	80	102
Other assets	370	—
Total other assets	\$225	\$31
Total assets	\$535	\$122
Liabilities		
Interest-bearing deposits	\$(50)	\$10
Federal funds purchased and securities loaned or sold under agreements to repurchase selected portfolios of securities sold under agreements to repurchase and securities loaned	(6)2
Trading account liabilities	94	29
Short-term borrowings	80	(1)
Long-term debt	(423)	189
Total liabilities	\$(305)	\$229

⁽¹⁾ Includes mortgage loans held by mortgage loan securitization VIEs consolidated upon the adoption of ASC 810, Consolidation (SFAS 167), on January 1, 2010.

(2) Includes gains (losses) associated with interest rate lock-commitments for those loans that have been originated and elected under the fair value option.

199

Own Debt Valuation Adjustments (DVA)

Own debt valuation adjustments are recognized on Citi's liabilities for which the fair value option has been elected by reference to Citi's credit spreads observed in the bond market. Among other variables, the fair value of liabilities for which the fair value option has been elected (other than non-recourse and similar liabilities) is impacted by the narrowing or widening of the Company's credit spreads.

The estimated change in the fair value of these liabilities due to such changes in the Company's own credit spread (or instrument-specific credit risk) were gains of \$307 million and \$87 million for the three months ended March 31, 2016 and 2015, respectively. Changes in fair value resulting from changes in instrument-specific credit risk were estimated by incorporating the Company's current credit spreads observable in the bond market into the relevant valuation technique used to value each liability as described above. Effective January 1, 2016, changes in fair value of fair value option liabilities related to changes in Citigroup's own credit spreads (DVA) are reflected as a component of AOCI; previously these amounts were recognized in Citigroup's Revenues and Net income along with all other changes in fair value. See Note 1 to the Consolidated Financial Statements for additional information.

The Fair Value Option for Financial Assets and Financial Liabilities

Selected Portfolios of Securities Purchased Under Agreements to Resell, Securities Borrowed, Securities Sold Under Agreements to Repurchase, Securities Loaned and Certain Non-Collateralized Short-Term Borrowings

The Company elected the fair value option for certain portfolios of fixed-income securities purchased under agreements to resell and fixed-income securities sold under agreements to repurchase, securities borrowed, securities loaned, and certain non-collateralized short-term borrowings held primarily by broker-dealer entities in the United States, United Kingdom and Japan. In each case, the election was made because the related interest-rate risk is managed on a portfolio basis, primarily with offsetting derivative instruments that are accounted for at fair value through

earnings.

Changes in fair value for transactions in these portfolios are recorded in Principal transactions. The related interest revenue and interest expense are measured based on the contractual rates specified in the transactions and are reported as interest revenue and expense in the Consolidated Statement of Income.

Certain Loans and Other Credit Products

Citigroup has also elected the fair value option for certain other originated and purchased loans, including certain unfunded loan products, such as guarantees and letters of credit, executed by Citigroup's lending and trading businesses. None of these credit products are highly leveraged financing commitments. Significant groups of transactions include loans and unfunded loan products that are expected to be either sold or securitized in the near term, or transactions where the economic risks are hedged with derivative instruments, such as purchased credit default swaps or total return swaps where the Company pays the total return on the underlying loans to a third party. Citigroup has elected the fair value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplifications. Fair value was not elected for most lending transactions across the Company.

The following table provides information about certain credit products carried at fair value:

In millions of dollars	March 31, 2016		December 31, 2015	
	Trading assets	Loans	Trading assets	Loans
Carrying amount reported on the Consolidated Balance Sheet	\$9,712	\$4,793	\$9,314	\$5,005
Aggregate unpaid principal balance in excess of fair value	851	169	980	280
Balance of non-accrual loans or loans more than 90 days past due	3	2	5	2
	10	1	13	1

Aggregate unpaid principal balance in excess of fair value for non-accrual loans or loans more than 90 days past due

In addition to the amounts reported above, \$1,930 million and \$2,113 million of unfunded commitments related to certain credit products selected for fair value accounting were outstanding as of March 31, 2016 and December 31, 2015,

respectively.

Changes in the fair value of funded and unfunded credit products are classified in Principal transactions in the Company's Consolidated Statement of Income. Related interest revenue is measured based on the contractual interest rates and reported as Interest revenue on Trading account

200

assets or loan interest depending on the balance sheet classifications of the credit products. The changes in fair value for the three months ended March 31, 2016 and 2015 due to instrument-specific credit risk totaled to a gain of \$13 million and loss of \$1 million, respectively.

Certain Investments in Unallocated Precious Metals

Citigroup invests in unallocated precious metals accounts (gold, silver, platinum and palladium) as part of its commodity and foreign currency trading activities or to economically hedge certain exposures from issuing structured liabilities. Under ASC 815, the investment is bifurcated into a debt host contract and a commodity forward derivative instrument. Citigroup elects the fair value option for the debt host contract, and reports the debt host contract within Trading account assets on the Company's Consolidated Balance Sheet. The total carrying amount of debt host contracts across unallocated precious metals accounts was approximately \$0.6 billion and \$0.6 billion at March 31, 2016 and December 31, 2015, respectively. The amounts are expected to fluctuate based on trading activity in future periods.

As part of its commodity and foreign currency trading activities, Citi trades unallocated precious metals investments and executes forward purchase and forward sale derivative contracts with trading counterparties. When Citi sells an unallocated precious metals investment, Citi's receivable from its depository bank is repaid and Citi derecognizes its investment in the unallocated precious metal. The forward purchase or sale contract with the trading counterparty indexed to unallocated precious metals is accounted for as a derivative, at fair value through earnings. As of March 31, 2016, there were approximately \$10.2 billion and \$9.0 billion notional amounts of such forward purchase and forward sale derivative contracts outstanding, respectively.

Certain Investments in Private Equity and Real Estate Ventures and Certain Equity Method and Other Investments

Citigroup invests in private equity and real estate ventures for the purpose of earning investment returns and for capital appreciation. The Company has elected the fair value option for certain of these ventures, because such investments are considered similar to many private equity or hedge fund activities in Citi's investment companies, which are reported at fair value. The fair value option brings consistency in the accounting and evaluation of these investments. All investments (debt and equity) in such private equity and real estate entities are accounted for at fair value. These investments are classified as Investments on Citigroup's Consolidated Balance Sheet.

Changes in the fair values of these investments are classified in Other revenue in the Company's Consolidated Statement of Income.

Citigroup also elects the fair value option for certain non-marketable equity securities whose risk is managed with derivative instruments that are accounted for at fair value through earnings. These securities are classified as Trading account assets on Citigroup's Consolidated Balance Sheet. Changes in the fair value of these securities and the related derivative instruments are recorded in Principal transactions.

Certain Mortgage Loans Held for Sale (HFS)

Citigroup has elected the fair value option for certain purchased and originated prime fixed-rate and conforming adjustable-rate first mortgage loans HFS. These loans are intended for sale or securitization and are hedged with derivative instruments. The Company has elected the fair value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplifications.

The following table provides information about certain mortgage loans HFS carried at fair value:

In millions of dollars	March 31, 2016	December 31, 2015
Carrying amount reported on the Consolidated Balance Sheet	\$ 889	\$ 745
Aggregate fair value in excess of unpaid principal balance	36	20

Edgar Filing: CITIGROUP INC - Form 10-Q

Balance of non-accrual loans or loans more than 90 days past due	—	—
Aggregate unpaid principal balance in excess of fair value for non-accrual loans or loans more than 90 days past due	—	—

The changes in the fair values of these mortgage loans are reported in Other revenue in the Company's Consolidated Statement of Income. There was no net change in fair value during the three months ended March 31, 2016 and 2015 due to instrument-specific credit risk. Related interest income continues to be measured based on the contractual interest rates and reported as Interest revenue in the Consolidated Statement of Income.

201

Certain Structured Liabilities

The Company has elected the fair value option for certain structured liabilities whose performance is linked to structured interest rates, inflation, currency, equity, referenced credit or commodity risks. The Company elected the fair value option, because these exposures are considered to be trading-related positions and, therefore, are managed on a fair value basis. These positions will continue to be classified as debt, deposits or derivatives (Trading account liabilities) on the Company's

Consolidated Balance Sheet according to their legal form.

The following table provides information about the carrying value of structured notes, disaggregated by type of embedded derivative instrument:

In billions of dollars	March 31, December 31,	
	2016	2015
Interest rate linked	\$ 10.3	\$ 9.6
Foreign exchange linked	0.3	0.3
Equity linked	11.4	9.9
Commodity linked	1.3	1.4
Credit linked	1.6	1.6
Total	\$ 24.9	\$ 22.8

Prior to 2016, the total change in the fair value of these structured liabilities was reported in Principal transactions in the Company's Consolidated Statement of Income. Beginning in the first quarter of 2016, the portion of the changes in fair value attributable to changes in Citigroup's own credit spreads (DVA) are reflected as a component of AOCI while all other changes in fair value will continue to be reported in Principal transactions. Changes in the fair value of these structured liabilities include accrued interest, which is also included in the change in fair value reported in Principal transactions.

Certain Non-Structured Liabilities

The Company has elected the fair value option for certain non-structured liabilities with fixed and floating interest rates. The Company has elected the fair value option where the interest-rate risk of such liabilities may be economically hedged with derivative contracts or the proceeds are used to purchase financial assets that will also be accounted for at fair value through earnings. The elections have been made to mitigate accounting mismatches and to achieve operational simplifications. These positions are reported in Short-term borrowings and Long-term debt on the Company's Consolidated Balance Sheet. Prior to 2016, the total change in the fair value of these non-structured liabilities was reported in Principal transactions in the Company's Consolidated Statement of Income. Beginning in the first quarter of 2016, the portion of the changes in fair value attributable to changes in Citigroup's own credit spreads (DVA) are reflected as a component of AOCI while all other changes in fair value will continue to be reported in Principal transactions.

Interest expense on non-structured liabilities is measured based on the contractual interest rates and reported as Interest expense in the Consolidated Statement of Income.

The following table provides information about long-term debt carried at fair value:

In millions of dollars	March 31, December 31,	
	2016	2015
Carrying amount reported on the Consolidated Balance Sheet	\$ 27,103	\$ 25,293
Aggregate unpaid principal balance in excess of fair value	556	1,569

The following table provides information about short-term borrowings carried at fair value:

In millions of dollars	March 31, December 31,	
	2016	2015
Carrying amount reported on the Consolidated Balance Sheet	\$ 1,375	\$ 1,207

Aggregate unpaid principal balance in excess of fair value	199	130
--	-----	-----

202

24. GUARANTEES AND COMMITMENTS

Citi provides a variety of guarantees and indemnifications to its customers to enhance their credit standing and enable them to complete a wide variety of business transactions. For

certain contracts meeting the definition of a guarantee, the guarantor must recognize, at inception, a liability for the fair value of the obligation undertaken in issuing the guarantee.

In addition, the guarantor must disclose the maximum potential amount of future payments that the guarantor could be required to make under the guarantee, if there were a total

default by the guaranteed parties. The determination of the maximum potential future payments is based on the notional amount of the guarantees without consideration of possible recoveries under recourse provisions or from collateral held or pledged. As such, Citi believes such amounts bear no relationship to the anticipated losses, if any, on these guarantees.

The following tables present information about Citi's guarantees at March 31, 2016 and December 31, 2015:

In billions of dollars at March 31, 2016 except carrying value in millions	Maximum potential amount of future payments			Carrying value (in millions of dollars)
	Expire within 1 year	Expire after 1 year	Total amount outstanding	
Financial standby letters of credit	\$27.6	\$66.3	\$ 93.9	\$ 167
Performance guarantees	7.7	3.9	11.6	23
Derivative instruments considered to be guarantees	3.9	74.8	78.7	1,594
Loans sold with recourse	—	0.2	0.2	15
Securities lending indemnifications ⁽¹⁾	88.0	—	88.0	—
Credit card merchant processing ⁽¹⁾	76.7	—	76.7	—
Custody indemnifications and other	—	48.2	48.2	56
Total	\$203.9	\$193.4	\$ 397.3	\$ 1,855

In billions of dollars at December 31, 2015 except carrying value in millions	Maximum potential amount of future payments			Carrying value (in millions of dollars)
	Expire within 1 year	Expire after 1 year	Total amount outstanding	
Financial standby letters of credit	\$ 23.8	\$ 73.0	\$ 96.8	\$ 153
Performance guarantees	7.4	4.1	11.5	24
Derivative instruments considered to be guarantees	3.6	74.9	78.5	1,779
Loans sold with recourse	—	0.2	0.2	17
Securities lending indemnifications ⁽¹⁾	79.0	—	79.0	—
Credit card merchant processing ⁽¹⁾	84.2	—	84.2	—

Custody indemnifications and other	—	51.7	51.7	56
Total	\$ 198.0	\$ 203.9	\$ 401.9	\$ 2,029

(1) The carrying values of securities lending indemnifications and credit card merchant processing were not material for either period presented, as the probability of potential liabilities arising from these guarantees is minimal.

Financial standby letters of credit

Citi issues standby letters of credit, which substitute its own credit for that of the borrower. If a letter of credit is drawn down, the borrower is obligated to repay Citi. Standby letters of credit protect a third party from defaults on contractual obligations. Financial standby letters of credit include: (i) guarantees of payment of insurance premiums and reinsurance risks that support industrial revenue bond underwriting; (ii) settlement of payment obligations to clearing houses, including futures and over-the-counter derivatives clearing (see further discussion below); (iii) support options and purchases of securities in lieu of escrow deposit accounts; and (iv) letters of credit that backstop loans, credit facilities, promissory notes and trade acceptances.

Performance guarantees

Performance guarantees and letters of credit are issued to guarantee a customer's tender bid on a construction or systems-installation project or to guarantee completion of such projects in accordance with contract terms. They are also issued to support a customer's obligation to supply specified products, commodities, or maintenance or warranty services to a third party.

Derivative instruments considered to be guarantees

Derivatives are financial instruments whose cash flows are based on a notional amount and an underlying instrument, reference credit or index, where there is little or no initial investment, and whose terms require or permit net settlement. For a discussion of Citi's derivatives activities, see Note 21 to the Consolidated Financial Statements.

Derivative instruments considered to be guarantees include only those instruments that require Citi to make payments to the counterparty based on changes in an underlying instrument that is related to an asset, a liability or an equity security held by the guaranteed party. More specifically, derivative instruments considered to be guarantees include certain over-the-counter written put options where the counterparty is not a bank, hedge fund or broker-dealer (such counterparties are considered to be dealers in these markets and may, therefore, not hold the underlying instruments). Credit derivatives sold by Citi are excluded from the tables above, as they are disclosed separately in Note 21 to the Consolidated Financial Statements. In instances where Citi's maximum potential future payment is unlimited, the notional amount of the contract is disclosed.

Loans sold with recourse

Loans sold with recourse represent Citi's obligations to reimburse the buyers for loan losses under certain circumstances. Recourse refers to the clause in a sales agreement under which a seller/lender will fully reimburse the buyer/investor for any losses resulting from the purchased loans. This may be accomplished by the seller taking back any loans that become delinquent.

In addition to the amounts shown in the tables above, Citi has recorded a repurchase reserve for its potential repurchases or make-whole liability regarding residential mortgage representation and warranty claims related to its whole loan sales to the U.S. government-sponsored enterprises (GSEs) and, to a lesser extent, private investors. The repurchase reserve was approximately \$148 million and \$152 million at March 31, 2016 and December 31, 2015, respectively, and these amounts are included in Other liabilities on the Consolidated Balance Sheet.

Securities lending indemnifications

Owners of securities frequently lend those securities for a fee to other parties who may sell them short or deliver them to another party to satisfy some other obligation. Banks may administer such securities lending programs for their clients. Securities lending indemnifications are issued by the bank to guarantee that a securities lending customer will be made whole in the event that the security borrower does not return the security subject to the lending agreement and collateral held is insufficient to cover the market value of the security.

Credit card merchant processing

Credit card merchant processing guarantees represent the Company's indirect obligations in connection with:

- (i) providing transaction processing services to various merchants with respect to its private-label cards; and
- (ii) potential liability for bank card transaction processing services. The nature of the liability in either case arises as a result of a billing dispute between a merchant and a cardholder that is ultimately resolved in the cardholder's favor. The merchant is liable to refund the amount to the cardholder. In general, if the credit card processing company

is unable to collect this amount from the merchant, the credit card processing company bears the loss for the amount of the credit or refund paid to the cardholder.

With regard to (i) above, Citi has the primary contingent liability with respect to its portfolio of private-label merchants. The risk of loss is mitigated as the cash flows between Citi and the merchant are settled on a net basis and Citi has the right to offset any payments with cash flows otherwise due to the merchant. To further mitigate this risk, Citi may delay settlement, require a merchant to make an escrow deposit, include event triggers to provide Citi with more financial and operational control in the event of the financial deterioration of the merchant or require various credit enhancements (including letters of credit and bank guarantees). In the unlikely event that a private-label merchant is unable to deliver products, services or a refund to its private-label cardholders, Citi is contingently liable to credit or refund cardholders.

With regard to (ii) above, Citi has a potential liability for bank card transactions where Citi provides the transaction processing services as well as those where a third party provides the services and Citi acts as a secondary guarantor, should that processor fail to perform.

Citi's maximum potential contingent liability related to both bank card and private-label merchant processing services is estimated to be the total volume of credit card transactions that meet the requirements to be valid charge-back

transactions at any given time. At March 31, 2016 and December 31, 2015, this maximum potential exposure was estimated to be \$77 billion and \$84 billion, respectively.

However, Citi believes that the maximum exposure is not representative of the actual potential loss exposure based on its historical experience. This contingent liability is unlikely to arise, as most products and services are delivered when purchased and amounts are refunded when items are returned to merchants. Citi assesses the probability and amount of its contingent liability related to merchant processing based on the financial strength of the primary guarantor, the extent and nature of unresolved charge-backs and its historical loss experience. At March 31, 2016 and December 31, 2015, the losses incurred and the carrying amounts of Citi's contingent obligations related to merchant processing activities were immaterial.

Custody indemnifications

Custody indemnifications are issued to guarantee that custody clients will be made whole in the event that a third-party subcustodian or depository institution fails to safeguard clients' assets.

Other guarantees and indemnifications

Credit Card Protection Programs

Citi, through its credit card businesses, provides various cardholder protection programs on several of its card products, including programs that provide insurance coverage for rental cars, coverage for certain losses associated with purchased products, price protection for certain purchases and protection for lost luggage. These guarantees are not included in the table, since the total outstanding amount of the guarantees and Citi's maximum exposure to loss cannot be quantified. The protection is limited to certain types of purchases and losses, and it is not possible to quantify the purchases that would qualify for these benefits at any given time. Citi assesses the probability and amount of its potential liability related to these programs based on the extent and nature of its historical loss experience. At March 31, 2016 and December 31, 2015, the actual and estimated losses incurred and the carrying value of Citi's obligations related to these programs were immaterial.

Other Representation and Warranty Indemnifications

In the normal course of business, Citi provides standard representations and warranties to counterparties in contracts in connection with numerous transactions and also provides indemnifications, including indemnifications that protect the counterparties to the contracts in the event that additional taxes are owed due either to a change in the tax law or an adverse interpretation of the tax law. Counterparties to these transactions provide Citi with comparable indemnifications. While such representations, warranties and indemnifications are essential components of many contractual relationships, they do not represent the underlying business purpose for the transactions. The indemnification clauses are often standard contractual terms related to Citi's own performance under the terms of a contract and are entered into in the normal course of business based on an assessment that the risk of loss is remote. Often these clauses are intended to ensure that terms of a contract are met at inception. No compensation is received for these standard representations and warranties, and it is not possible to determine their fair value because they rarely, if ever, result in a payment. In many cases, there are no stated or notional amounts included in the indemnification clauses, and the contingencies potentially triggering the obligation to indemnify have not occurred and are not expected to occur. As a result, these indemnifications are not included in the tables above.

Value-Transfer Networks

Citi is a member of, or shareholder in, hundreds of value-transfer networks (VTNs) (payment, clearing and settlement systems as well as exchanges) around the world. As a condition of membership, many of these VTNs require that members stand ready to pay a pro rata share of the losses incurred by the organization due to another member's default on its obligations. Citi's potential obligations may be limited to its membership interests in the VTNs, contributions to the VTN's funds, or, in limited cases, the obligation may be

unlimited. The maximum exposure cannot be estimated as this would require an assessment of future claims that have not yet occurred. Citi believes the risk of loss is remote given historical experience with the VTNs. Accordingly, Citi's participation in VTNs is not reported in the guarantees tables above, and there are no amounts reflected on the Consolidated Balance Sheet as of March 31, 2016 or December 31, 2015 for potential obligations that could arise from Citi's involvement with VTN associations.

Long-Term Care Insurance Indemnification

In the sale of an insurance subsidiary, the Company provided an indemnification to an insurance company for policyholder claims and other liabilities relating to a book of long-term care (LTC) business (for the entire term of the LTC policies) that is fully reinsured by another insurance company. The reinsurer has funded two trusts with securities whose fair value (approximately \$7.0 billion at March 31, 2016, compared to \$6.3 billion at December 31, 2015) is designed to cover the insurance company's statutory liabilities for the LTC policies. The assets in these trusts are evaluated and adjusted periodically to ensure that the fair value of the assets continues to cover the estimated statutory liabilities related to the LTC policies, as those statutory liabilities change over time.

If the reinsurer fails to perform under the reinsurance agreement for any reason, including insolvency, and the assets in the two trusts are insufficient or unavailable to the ceding insurance company, then Citi must indemnify the ceding insurance company for any losses actually incurred in connection with the LTC policies. Since both events would have to occur before Citi would become responsible for any payment to the ceding insurance company pursuant to its indemnification obligation, and the likelihood of such events occurring is currently not probable, there is no liability reflected in the Consolidated Balance Sheet as of March 31, 2016 and December 31, 2015 related to this indemnification. Citi continues to closely monitor its potential exposure under this indemnification obligation.

Futures and over-the-counter derivatives clearing

Citi provides clearing services for clients executing exchange-traded futures and over-the-counter (OTC) derivatives contracts with central counterparties (CCPs). Based on all relevant facts and circumstances, Citi has concluded that it acts as an agent for accounting purposes in its role as clearing member for these client transactions. As such, Citi does not reflect the underlying exchange-traded futures or OTC derivatives contracts in its Consolidated Financial Statements. See Note 21 for a discussion of Citi's derivatives activities that are reflected in its Consolidated Financial Statements.

As a clearing member, Citi collects and remits cash and securities collateral (margin) between its clients and the respective CCP. There are two types of margin: initial margin and variation margin. Where Citi obtains benefits from or controls cash initial margin (e.g., retains an interest spread), cash initial margin collected from clients and remitted to the CCP is reflected within Brokerage Payables

(payables to customers) and Brokerage Receivables (receivables from brokers, dealers and clearing organizations), respectively. However, for OTC derivatives contracts where Citi has contractually agreed with the client that (a) Citi will pass through to the client all interest paid by the CCP on cash initial margin; (b) Citi will not utilize its right as a clearing member to transform cash margin into other assets; and (c) Citi does not guarantee and is not liable to the client for the performance of the CCP, cash initial margin collected from clients and remitted to the CCP is not reflected on Citi's Consolidated Balance Sheet. The total amount of cash initial margin collected and remitted in this manner was approximately \$4.9 billion and \$4.3 billion as of March 31, 2016 and December 31, 2015, respectively. Variation margin due from clients to the respective CCP, or from the CCP to clients, reflects changes in the value of the client's derivative contracts for each trading day. As a clearing member, Citi is exposed to the risk of non-performance by clients (e.g., failure of a client to post variation margin to the CCP for negative changes in the value of the client's derivative contracts). In the event of non-performance by a client, Citi would move to close out the client's positions. The CCP would typically utilize initial margin posted by the client and held by the CCP, with any remaining shortfalls required to be paid by Citi as clearing member. Citi generally holds incremental cash or securities margin posted by the client, which would typically be expected to be sufficient to mitigate Citi's credit risk in the event the client fails to perform.

As required by ASC 860-30-25-5, securities collateral posted by clients is not recognized on Citi's Consolidated Balance Sheet.

Carrying Value—Guarantees and Indemnifications

At March 31, 2016 and December 31, 2015, the total carrying amounts of the liabilities related to the guarantees and indemnifications included in the tables above amounted to approximately \$1.9 billion and \$2.0 billion, respectively.

The carrying value of financial and performance guarantees is included in Other liabilities. For loans sold with recourse, the carrying value of the liability is included in Other liabilities.

Collateral

Cash collateral available to Citi to reimburse losses realized under these guarantees and indemnifications amounted to \$55 billion and \$52 billion at March 31, 2016 and December 31, 2015, respectively. Securities and other marketable assets held as collateral amounted to \$39 billion and \$33 billion at March 31, 2016 and December 31, 2015, respectively. The majority of collateral is held to reimburse losses realized under securities lending indemnifications. Additionally, letters of credit in favor of Citi held as collateral amounted to \$4.0 billion and \$4.2 billion at March 31, 2016 and December 31, 2015, respectively. Other property may also be available to Citi to cover losses under certain guarantees and indemnifications; however, the value of such property has not been determined.

Performance risk

Citi evaluates the performance risk of its guarantees based on the assigned referenced counterparty internal or external ratings. Where external ratings are used, investment-grade ratings are considered to be Baa/BBB and above, while anything below is considered non-investment grade. Citi's internal ratings are in line with the related external rating system. On certain underlying referenced assets or entities, ratings are not available. Such referenced assets are included in the "not rated" category. The maximum potential amount of the future payments related to the outstanding guarantees is determined to be the notional amount of these contracts, which is the par amount of the assets guaranteed.

Presented in the tables below are the maximum potential amounts of future payments that are classified based upon internal and external credit ratings as of March 31, 2016 and December 31, 2015. As previously mentioned, the determination of the maximum potential future payments is based on the notional amount of the guarantees without consideration of possible recoveries under recourse provisions or from collateral held or pledged. As such, Citi believes such amounts bear no relationship to the anticipated losses, if any, on these guarantees.

Maximum potential amount of future
payments

Edgar Filing: CITIGROUP INC - Form 10-Q

Credit Commitments and Lines of Credit

The table below summarizes Citigroup's credit commitments as of March 31, 2016 and December 31, 2015:

In millions of dollars	U.S.	Outside of U.S.	March 31, 2016	December 31, 2015
Commercial and similar letters of credit	\$1,114	\$3,833	\$4,947	\$6,102
One- to four-family residential mortgages	1,790	1,842	3,632	3,196
Revolving open-end loans secured by one- to four-family residential properties	12,600	2,152	14,752	14,726
Commercial real estate, construction and land development	7,813	1,253	9,066	10,522
Credit card lines	482,008	93,413	575,421	573,057
Commercial and other consumer loan commitments	178,710	89,547	268,257	271,076
Other commitments and contingencies	4,901	4,358	9,259	9,982
Total	\$688,936	\$196,398	\$885,334	\$888,661

The majority of unused commitments are contingent upon customers' maintaining specific credit standards.

Commercial commitments generally have floating interest rates and fixed expiration dates and may require payment of fees. Such fees (net of certain direct costs) are deferred and, upon exercise of the commitment, amortized over the life of the loan or, if exercise is deemed remote, amortized over the commitment period.

Commercial and similar letters of credit

A commercial letter of credit is an instrument by which Citigroup substitutes its credit for that of a customer to enable the customer to finance the purchase of goods or to incur other commitments. Citigroup issues a letter on behalf of its client to a supplier and agrees to pay the supplier upon presentation of documentary evidence that the supplier has performed in accordance with the terms of the letter of credit. When a letter of credit is drawn, the customer is then required to reimburse Citigroup.

One- to four-family residential mortgages

A one- to four-family residential mortgage commitment is a written confirmation from Citigroup to a seller of a property that the bank will advance the specified sums enabling the buyer to complete the purchase.

Revolving open-end loans secured by one- to four-family residential properties

Revolving open-end loans secured by one- to four-family residential properties are essentially home equity lines of credit. A home equity line of credit is a loan secured by a primary residence or second home to the extent of the excess of fair market value over the debt outstanding for the first mortgage.

Commercial real estate, construction and land development

Commercial real estate, construction and land development include unused portions of commitments to extend credit for the purpose of financing commercial and multifamily residential properties as well as land development projects. Both secured-by-real-estate and unsecured commitments are included in this line, as well as

undistributed loan proceeds, where there is an obligation to advance for construction progress payments. However, this line only includes those extensions of credit that, once funded, will be classified as Total loans, net on the Consolidated Balance Sheet.

Credit card lines

Citigroup provides credit to customers by issuing credit cards. The credit card lines are cancellable by providing notice to the cardholder or without such notice as permitted by local law.

Commercial and other consumer loan commitments

Commercial and other consumer loan commitments include overdraft and liquidity facilities, as well as commercial commitments to make or purchase loans, to purchase third-party receivables, to provide note issuance or revolving underwriting facilities and to invest in the form of equity.

In addition, included in this line item are highly leveraged financing commitments, which are agreements that provide funding to a borrower with higher levels of debt (measured by the ratio of debt capital to equity capital of the borrower) than is generally considered normal for other companies. This type of financing is commonly employed in corporate acquisitions, management buy-outs and similar transactions.

Other commitments and contingencies

Other commitments and contingencies include committed or unsettled regular-way reverse repurchase agreements and all other transactions related to commitments and contingencies not reported on the lines above.

25. CONTINGENCIES

The following information supplements and amends, as applicable, the disclosures in Note 28 to the Consolidated Financial Statements of Citigroup's 2015 Annual Report on Form 10-K. For purposes of this Note, Citigroup, its affiliates and subsidiaries, and current and former officers, directors and employees, are sometimes collectively referred to as Citigroup and Related Parties.

In accordance with ASC 450, Citigroup establishes accruals for contingencies, including the litigation and regulatory matters disclosed herein, when Citigroup believes it is probable that a loss has been incurred and the amount of the loss can be reasonably estimated. Once established, accruals are adjusted from time to time, as appropriate, in light of additional information. The amount of loss ultimately incurred in relation to those matters may be substantially higher or lower than the amounts accrued for those matters.

If Citigroup has not accrued for a matter because the matter does not meet the criteria for accrual (as set forth above), or Citigroup believes an exposure to loss exists in excess of the amount accrued for a particular matter, in each case assuming a material loss is reasonably possible, Citigroup discloses the matter. In addition, for such matters, Citigroup discloses an estimate of the aggregate reasonably possible loss or range of loss in excess of the amounts accrued for those matters as to which an estimate can be made. As of March 31, 2016, Citigroup estimates that the reasonably possible unaccrued loss for these matters ranges up to approximately \$3.0 billion in the aggregate.

As available information changes, the matters for which Citigroup is able to estimate will change, and the estimates themselves will change. In addition, while many estimates presented in financial statements and other financial disclosure involve significant judgment and may be subject to significant uncertainty, estimates of the range of reasonably possible loss arising from litigation and regulatory proceedings are subject to particular uncertainties. For example, at the time of making an estimate, Citigroup may have only preliminary, incomplete or inaccurate information about the facts underlying the claim; its assumptions about the future rulings of the court or other tribunal on significant issues, or the behavior and incentives of adverse parties or regulators, may prove to be wrong; and the outcomes it is attempting to predict are often not amenable to the use of statistical or other quantitative analytical tools. In addition, from time to time an outcome may occur that Citigroup had not accounted for in its estimates because it had deemed such an outcome to be remote. For all these reasons, the amount of loss in excess of accruals ultimately incurred for the matters as to which an estimate has been made could be substantially higher or lower than the range of loss included in the estimate.

Subject to the foregoing, it is the opinion of Citigroup's management, based on current knowledge and after taking into account its current legal accruals, that the eventual outcome of all matters described in this Note would not be likely to have a material adverse effect on the consolidated financial condition of Citigroup. Nonetheless, given the substantial or indeterminate amounts sought in certain of these matters, and

the inherent unpredictability of such matters, an adverse outcome in certain of these matters could, from time to time, have a material adverse effect on Citigroup's consolidated results of operations or cash flows in particular quarterly or annual periods.

For further information on ASC 450 and Citigroup's accounting and disclosure framework for contingencies, including for litigation and regulatory matters disclosed herein, see Note 28 to the Consolidated Financial Statements of Citigroup's 2015 Annual Report on Form 10-K.

Credit Crisis-Related Litigation and Other Matters

Mortgage-Related Litigation and Other Matters

Mortgage-Backed Securities and CDO Investor Actions: On April 6, 2016, the court in *TENNESSEE CONSOLIDATED RETIREMENT SYSTEM v. J.P. MORGAN SECURITIES LLC, ET AL.* denied defendants' motion to dismiss plaintiff's amended complaint. Additional information concerning this action is publicly available in court filings under the docket number 13-1729-II (Tenn. Ch. Ct.) (McCoy, Ch.).

Derivative Actions and Related Proceedings: On April 18, 2016, a derivative action captioned *IRA FOR THE BENEFIT OF VICTORIA SHAEV v. CORBAT, ET AL.* was filed in New York state court on behalf of Citigroup (as

nominal defendant) against certain of Citigroup's present and former directors and officers, seeking damages arising out of defendants' alleged mismanagement with respect to residential MBS. Additional information concerning this action is publicly available in court filings under the docket number 652066/2016 (N.Y. Sup. Ct.).

Tribune Company Bankruptcy

On March 29, 2016, the United States Court of Appeals for the Second Circuit affirmed the dismissal of state-law constructive fraudulent conveyance claims asserted by Tribune noteholders against various defendants, including certain Citigroup affiliates. Additional information concerning these actions is publicly available in court filings under the docket numbers 13-3992, 13-3875, 13-4178, and 13-4196 (2d Cir.).

Foreign Exchange Matters

Antitrust and Other Litigation: On January 22, 2016, plaintiffs in NYPL v. JPMORGAN CHASE & CO., ET AL. filed a second amended class action complaint naming Citibank and Citicorp as defendants, in addition to Citigroup and numerous other foreign exchange dealers. The defendants moved to stay or consolidate the case with the consolidated proceeding captioned IN RE FOREIGN EXCHANGE BENCHMARK RATES ANTITRUST LITIGATION. Additional information concerning this action is publicly available in court filings under the docket numbers 13 Civ. 7789 (S.D.N.Y.) (Schofield, J.) and 15 Civ. 9300 (S.D.N.Y.) (Schofield, J.).

On April 6, 2016, the plaintiff in ALLEN v. BANK OF AMERICA CORPORATION, ET AL. filed a second amended class action complaint against numerous foreign exchange dealers, including Citigroup and Citibank. Additional

information concerning this action is publicly available in court filings under the docket number 15 Civ. 4285 (S.D.N.Y.) (Schofield, J.).

On December 22, 2015, plaintiffs in *NEGRETE v. CITIBANK, N.A.* opposed Citibank's motion to dismiss and filed a cross-motion for partial summary judgment on one of their breach of contract claims. Additional information concerning this action is publicly available in court filings under the docket number 15 Civ. 7250 (S.D.N.Y.) (Sweet, J.).

Derivative Actions and Related Proceedings: On March 30, 2016, a derivative action captioned *OKLAHOMA FIREFIGHTERS PENSION & RETIREMENT SYSTEM, ET AL. v. CORBAT, ET AL.* was filed in the Delaware Chancery Court on behalf of Citigroup (as nominal defendant) against certain of Citigroup's present and former directors and officers. Plaintiffs assert claims for breach of fiduciary duty and waste of corporate assets in connection with defendants' alleged failure to exercise appropriate oversight and management of Bank Secrecy Act and anti-money laundering laws and regulations and related consent decrees concerning Citigroup subsidiaries, Banco Nacional de Mexico, or Banamex, and Banamex USA (BUSA), as well as defendants' alleged failures to implement adequate internal controls and exercise adequate oversight with respect to Citigroup subsidiaries' participation in foreign exchange markets and credit card practices. Additional information concerning this action is publicly available in court filings under the docket number C.A. No. 12151-VCG (Del. Ch.) (Glasscock, Ch.).

ISDAFIX-Related Litigation and Other Matters

Antitrust and Other Litigations: On March 28, 2016, the court denied defendants' motion to dismiss the antitrust, breach of contract and unjust enrichment claims in plaintiffs' amended consolidated complaint, while granting the motion as to plaintiffs' claims of breach of the implied covenant of good faith and fair dealing and tortious interference with contract. Additional information concerning this action is publicly available in court filings under the consolidated lead docket number 14 Civ. 7126 (S.D.N.Y.) (Furman, J.).

Money Laundering Inquiries

Derivative Actions and Related Proceedings: As described above in Foreign Exchange Matters, on March 30, 2016, a derivative action captioned *OKLAHOMA FIREFIGHTERS PENSION & RETIREMENT SYSTEM, ET AL. v. CORBAT, ET AL.* was filed in the Delaware Chancery Court (the Delaware Action). Due to the similarity of issues, plaintiffs in a separate derivative action captioned *FIREMAN'S RETIREMENT SYSTEM OF ST. LOUIS, ET AL. v. CORBAT, ET AL.* voluntarily dismissed the action in favor of proceeding together with plaintiffs in the Delaware Action. Plaintiffs' derivative claims were dismissed without prejudice, except their claim for violation of Section 14(a) of the Securities Exchange Act of 1934, which was dismissed with prejudice. Additional information concerning these actions is publicly available in court filings under the docket numbers C.A. No. 12151-VCG (Del. Ch.) (Glasscock, Ch.) and 15 Civ. 7501 (S.D.N.Y.) (Furman, J.).

Oceanografía Fraud and Related Matters

Other Litigation: On February 26, 2016, a complaint was filed against Citigroup in the United States District Court for the Southern District of Florida alleging that it conspired with Oceanografía, S.A. de C.V. (OSA) and others with respect to receivable financings and other financing arrangements related to OSA in a manner that injured bondholders and other creditors of OSA. The complaint asserts claims on behalf of 39 plaintiffs that are characterized in the complaint variously as trade creditors of, investors in, or lenders to OSA. Plaintiffs collectively claim to have lost \$1.1 billion as a result of OSA's bankruptcy. The complaint asserts claims under the federal civil Racketeer Influenced and Corrupt Organizations Act and seeks treble damages and other relief pursuant to that statute. The complaint also asserts claims for fraud and breach of fiduciary duty. Additional information concerning this action is publicly available in court filings under the docket number 16-20725 (S.D. Fla.) (Gayles, J.).

Settlement Payments

Payments required in settlement agreements described above have been made or are covered by existing litigation accruals.

26. CONDENSED CONSOLIDATING FINANCIAL STATEMENTS

Citigroup amended its Registration Statement on Form S-3 on file with the SEC (File No. 33-192302) to add its wholly owned subsidiary, Citigroup Global Markets Holdings Inc. (CGMHI), as a co-registrant. Any securities issued by CGMHI under the Form S-3 will be fully and unconditionally guaranteed by Citigroup.

The following are the Condensed Consolidating Statements of Income and Comprehensive Income for the three months ended March 31, 2016 and 2015, Condensed Consolidating Balance Sheet as of March 31, 2016 and December 31, 2015 and Condensed Consolidating Statement of Cash Flows for the three months ended March 31, 2016 and 2015 for Citigroup Inc., the parent holding company (Citigroup parent company), CGMHI, other Citigroup subsidiaries and eliminations and total consolidating adjustments. "Other Citigroup subsidiaries and eliminations" includes all other subsidiaries of Citigroup, intercompany eliminations and income (loss) from discontinued operations. "Consolidating adjustments" includes Citigroup parent company elimination of distributed and undistributed income of subsidiaries and investment in subsidiaries.

These Condensed Consolidating Financial Statements have been prepared and presented in accordance with SEC Regulation S-X Rule 3-10, "Financial Statements of Guarantors and Issuers of Guaranteed Securities Registered or Being Registered."

These Condensed Consolidating Financial Statements schedules are presented for purposes of additional analysis, but should be considered in relation to the Consolidated Financial Statements of Citigroup taken as a whole.

Condensed Consolidating Statements of Income and Comprehensive Income

Equity Security Repurchases

The following table summarizes Citi's equity security repurchases, which consisted entirely of common stock repurchases:

In millions, except per share amounts	Total shares purchased	Approximate dollar	
		Average value of price paid per share	shares that may yet be purchased under the plan or programs
January 2016			
Open market repurchases ⁽¹⁾	15.7	\$ 44.18	\$ 1,939
Employee transactions ⁽²⁾	—	—	N/A
February 2016			
Open market repurchases ⁽¹⁾	9.8	38.69	1,558
Employee transactions ⁽²⁾	0.8	37.56	N/A
March 2016			
Open market repurchases ⁽¹⁾	5.6	42.11	1,322
Employee transactions ⁽²⁾	—	—	N/A
Amounts as of March 31, 2016	31.9	\$ 41.97	\$ 1,322

Represents repurchases under the \$7.8 billion 2015 common stock repurchase program (2015 Repurchase Program) that was approved by Citigroup's Board of Directors and announced on March 11, 2015, which was part (1) of the planned capital actions included by Citi in its 2015 Comprehensive Capital Analysis and Review (CCAR).

The 2015 Repurchase Program extends through the second quarter of 2016. Shares repurchased under the 2015 Repurchase Program are added to treasury stock.

Consisted of shares added to treasury stock related to (i) certain activity on employee stock option program (2) exercises where the employee delivers existing shares to cover the option exercise, or (ii) under Citi's employee restricted stock programs where shares are withheld to satisfy tax requirements.

N/A Not applicable

Dividends

In addition to Board of Directors' approval, Citi's ability to pay common stock dividends substantially depends on regulatory approval, including an annual regulatory review of the results of the CCAR process required by the Federal Reserve Board and the supervisory stress tests required under the Dodd-Frank Act. See "Risk Factors—Regulatory Risks" in Citi's 2015 Annual Report on Form 10-K. For information on the ability of Citigroup's subsidiary depository institutions and non-bank subsidiaries to pay dividends, see Note 19 to the Consolidated Financial Statements in Citi's 2015 Annual Report on Form 10-K. Any dividend on Citi's outstanding common stock would also need to be made in compliance with Citi's obligations to its outstanding preferred stock.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized, on the 2nd day of May, 2016.
